American Railroad Journal.

Saturday, February 13, 1869.

Stock Exchange and Money Market.

The Money Market has been fairly active throughout the week. The speculative demand has been quite up to a full average. The mercantile inquiry has likewise been good. The outflow of currency to the South and Southwest has been liberal, and has not been compensated for by the influx from other sections. The city banks, during the week, lost $1,323,436 of legal tender notes, and $383,563 of deposits, while they added $1,370,623 to their loan and discount averages. The U. S. Sub-Treasury added over two millions to its cash balances, within the week. Yet to the street houses, in both Government and stock lines, accommodation has been given freely by lenders at from 5@7 per cent. on call; and to leading mercantile borrowers, aid has been readily extended at from 7@9 per cent. per annum. According to the monthly exhibit of the Public Debt, for Feb. 1, it appears that the aggregate cash balances of the Treasury Department were diminished $5,642,412 during the past month. On the 1st of January the coin reserve was $98,763,369, of which $71,727,349 belonged to the Government; now the reserve is $88,782,716, of which $56,073,196 are in the ownership of the Treasury. The currency reserve is up to $17,441,382, as against $13,063,092 at the beginning of the year. Of the 98¾ millions of coin and currency under the control of the department, at the close of January, nearly 83¾ millions were in the Sub-Treasury at this port.

The specie reserve of the city banks is now $27,939,404, against $23,823,372 same time last year. The city bank deposits are now $196,602,899, against $217,844,548 week ending Feb. 8, 1868. The legal tender reserve amounts to $53,424,133, against $65,847,259 same time last year. The circulation now stands at $34,246,436, against $34,096,834 same time last year. The loans are now $266,541,732, against $270,555,536 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $111,721,580 a day, against a daily average of $103,226,716 the preceding week, and $111,872,424 the week ending with Jan. 20, 1869. The current week's exchanges average about $128,241,919 a day. The city banks, last week, gained $154,481 of specie, while they lost $383,563 of deposits, and $1,323,436 of legal tender notes. They increased their loans, $1,370,623; and their circulation, $15,280.

National Bank notes to the amount of $205,460 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $312,333,486, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $12,544,139, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,789,347. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,555,900; and for the public deposits, $34,492 350—making a total of $377,048,250. The Treasury Department last week redeemed and destroyed $638,618 of worn and mutilated fractional currency, and issued $604,231 of new. The outstanding amount of fractional currency on the 1st of February, 1869, was $35,511,127, against $34,215,716 on the 1st of January, 1869, and $33,875,268 on the 1st of December, 1868.

The average amounts of the Gold Exchange Bank loans and discounts last week was $1,379,771, average amount of specie $1,146,296, average amount of deposits $1,807,552.

The U. S. Sub-Treasury receipts, week ending with Feb. 6, were $7,863,358, including $2,169,645 from customs duties; payments, $5,657,096, including $1,005,569 of coin interest; balance at the close of the week, $85,879,989, against $83,673,727, at the close of the preceding week, showing an increase of $2,206,262. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $801,908 including $400,000 from customs; and payments, $1,029,372 including $119,770 of coin interest; on Tuesday, receipts, $1,369,464 including $717,000 from customs, and payments, $786,844, including $89,000 of coin interest. The balance at the close of business on Tuesday stood at $86,235,144, against $84,015,873 a week previous; and $86,977,180, on Jan. 20, 1869. The aggregate receipts of the office in January were $60,627,079, including $9,702,416 from customs,

aggregate payments, $64,854,493, including $18,543,453 of coin interest.

The outstanding amount of coin certificates on the 1st of Feb., 1869, was $32,659,520, against 27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $385,000, and retired $2,093,645 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during January, reached $10,964,000.

The Government income from both customs and excises has been fair, since our last. The excises, last week, yielded about four millions; customs at the port of New York, $2,169,645, and at the outports about $750,000 (in coin) more, making the grand total income for the week equal to about $7,941,540 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 88⅛ millions, according to the latest Washington advices.

The Treasury Department, last month, disbursed nearly 74 millions, on the following accounts: Civil, miscellaneous and foreign intercourse, $44,499,000; interest on public debt, $30,704,000; war department, $6,254,000; navy department, $1,359,000; interior, pensions and Indians, $832,000. The warrants issued for the redemption of the public debt are not included in the above.

The Gold speculation has been quite spirited, since our last, and while operators for a fall have been selling with a little reserve, purchasers for a rise have been buying with confidence. The transactions of the past few days have been on an extensive scale. The market is believed to be largely oversold, and an advance in the price is quite generally looked for, when the *short* sellers shall have concluded to cover and protect their outstanding contracts. The customs and export inquiry has been moderate, since our last. The shipments to Europe last week were under a million, against over 1⅝ millions same week last year. The exports thus far in the current week embraced $703,000 on Tuesday. The range of the price through the week was from 134¾@135¾, and the closing figures on Wednesday were 135@135⅛.

The customs demand for Gold last week, averaged $361,607 a day; thus far, this week, it has been equal to $558,500 a day, or equal to a weekly aggregate of $3,351,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $459,062, and since Jan. 1, $600,794 against $132,616 same time in 1868. The receipts from California, last week, were $737,506. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $71,650,340, against $66,379,723 same time in the preceding fiscal year. At the port of San Francisco in 1868, $8,382,329, against $7,622,827 in 1867.

The total receipts of California gold at this port, since July 1, 1868, have been $14,760,788, against $18,712,441 same time in fiscal year 1867–'68, showing a decrease in the current fiscal year, of $3,951,653. The exports of specie, from this port, last week, were $996,953, against $1,644,057 same week last year; total, since July 1, 1868, $26,020,331, against $36,180,674 in 1867–'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,005,569; since July 1, 1868, $62,240,371, against $50,433,520 same time in 1867–'68. The specie exports from San Francisco, from Jan. 1, to Jan. 22, 1869, were $2,305,610, against $2,707,801 same time in 1868.

Foreign exchange has been more abundant and in less request at easier rates, closing heavily. Bankers' prime sixty day bills on London closed on Wednesday at 109⅛@109½, and on Paris to 5.18¾@5.15; sight bills on London to 109¾@110⅛, and on Paris to 5.13¼c.@5.12. The offering of produce bills has been on a restricted scale this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,660,313, against $2,678,180 same week last year; total, since July 1, 1868, $97,064,510, against $110,409,269 same time in preceding fiscal year of 1867–'68.

Government securities have been in lively demand, particularly toward the close, and on a very moderate offering of all issues, prices have advanced considerably, closing quite strong and buoyant. According to the debt exhibit of Feb. 1, the net aggregate obligations of the Government at the close of January, were $2,556,205,658, as against $2,540,707,201 a month previous, showing an increase, during January, of $15,498,457, chiefly the result of the extraordinarily heavy disbursements of the month, on the interest account. The coin bearing portion of the debt shows no material variation, being now $2,107,850,050, against $2,107,835,350 on Jan. 1, an increase of only $14,700, and wholly in the Five-twenty form. To the three per cent. currency certificates, an addition of $1,545,000 was made during the month; to the coin certificates, of $5,623,500; and to the United States currency six per cent. bonds, issued in aid of the Pacific Railroad enterprises, of $1,920,000. The matured obligations, not presented for payment, show a reduction of $552,567. The outstanding amount of fractional currency was enlarged $1,295,412.

U. S. sixes of 1881 closed here on Wednesday at 113¼@113½; U. S. Five-twenties of 1862, 113⅞@114; U. S. Five twenties of 1864 at 110¾@110⅞; U. S. Five-twenties of 1865 at 112@112⅛; U. S. Five-twenties of 1865, consolidated, 109⅝@109¾; U. S. Five-twenties of 1867, 109⅞@110; U. S. Five-twenties of 1868, 110@110⅛; U. S. Ten-forties at 109@109⅛; U. S. Six per cent. currency bonds, 101⅝@101¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 27.	Feb. 3.	Feb. 10.
Consols	93¼	93¼	93⅛
U. S. 5-20's of 1862	75⅝	76¼	77
Erie	26½	25½	24¾
Ill. Central	92¾	93½	94

There has been more activity in the railway and miscellaneous stock market, and much under fluctuations have been noted in prices, particularly of Pacific Mail, and Ohio and Mississippi certificates. The general market closed with increasing firmness and buoyancy.

Railway bonds and mortgages have been in more demand and stronger in price, including the Union Pacific R. R. Co.'s First Mortgage Bonds at par and accrued interest. The first mortgage bonds of the Central Pacific R. R. Co. have been all very successfully marketed by the banking agents of the company, Messrs. Fisk & Hatch, and the loan is no longer available to subscribers, through the company's agents at the fixed price of 103 per cent. The bonds will henceforward be dealt in, like other funded obligations, at prices varying with the fluctuations of the general market; but most probably will regularly command a handsome premium on first cost to investors.

An effort is being made in the interest of the stocks excluded from the call at the Stock Boards, to organize an independent board.

General business shows a fair degree of animation at, however, irregular prices for domestic produce. Breadstuffs closed in favor of sellers, as a rule. Provisions, less buoyantly. Middling upland cotton closed buoyantly on Wednesday at 30¼cts per lb. The stock of cotton now here is estimated at about 52,500 bales. The receipts at the port this week, have averaged about 3,250 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 1,423,000 bales, against 1,307,000 bales same time in 1867–'8; exports, same time 713,000 bales, against 765,000 bales same time in 1867–'8; stock on hand at latest dates, 360,000 bales, against 358,000 bales same date 1868. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 840 pkgs., against 570 pkgs., same time last year. From Boston, 826 pkgs., against 1,944 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been in moderate demand, closing heavily at 10@17c. per lb.; week's receipts, 5,508. Milch cows firm and in light supply at $40@110; receipts, 43. Veal calves in request at 9@13½c. per lb.; receipts, 547. Sheep and lambs in fair demand, but plenty and weak in price at 5¾@9c., as extremes, per lb.; receipts, 31,485. Swine lightly dealt in at from 12¼@13c. per lb., live weight; receipts, 11,525. In foreign merchandise, there has been more doing, and prices have shown more firmness. The total imports of foreign dry goods, last week, were $1,887,580, and the total amount marketed $2,012,731. The value of foreign merchandise imported last week, was $2,738,248—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,625,828, against $5,047,004 same week last year; total since July 1, 1868, $145,616,226, against $135,968,978 in 1867–'8. Freights have been quiet and unsettled. For Liverpool we quote flour at 2s. 3d. @2s. 6d. by sail, and 2s. 9d.@3s. by steamer, per bbl.; grain at 6d.@6½d. by sail, and 6¾d.@7d. by steamer, per bushel; cotton at ¼d.@$\frac{5}{16}$d. by sail, and ⅜d.@½d. by steamer, per lb.; and heavy goods 17s. 6d.@27s. 6d. by sail, and 25s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 411.

The New York exports, exclusive of specie, for the week ending Feb. 9, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$2,678,180	$2,660,313
Prev. reported	16,578,713	14,777,193
Since January 1	$19,256,893	$17,437,506

The imports for the week ending February 6,

and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$2,598,298	$1,887,580
Gen. merchandise.....	2,448,706	2,738,248
Total for the week.....	$5,047,004	$4,625,828
Previously reported....	13,505,613	20,586,534
Since January 1.....	$18,552,617	$25,212,362

The balance in the Sub-Treasury on Wednesday was $86,799,173.

United States Supreme Court.

STATE TAXES—THEY MAY BE EXACTED IN COIN OR KIND AS THE STATE SHALL REQUIRE, BY LAW—THE LEGAL TENDER ACT DOES NOT APPLY TO THE COLLECTION OF SUCH TAXES—A TAX IS NOT A DEBT.

The County of Lane *vs.* The State of Oregon.—The State of Oregon claims judgment against the County of Lane for something over $5,000 in gold and silver coin, the amount of revenue due the State from that County for the year 1863. The County admits the amount claimed to be due, but pleads a tender of payment in legal tender notes of the United States. The Supreme Court of the State affirmed a judgment of the Circuit Court in favor of the State for the sum nam d in gold and silver coin. A writ of error was taken from that affirmance to this Court, and the cause was argued at the last term, and held under advisement until now. Mr. Chief Justice Chase now read the opinion of the Court, holding that the legal tender act does not apply to the present case, because a tax is not a debt, but an obligation on the part of a citizen, which the State is entitled and authorized to accept in such kind as it shall elect. A State may collect her taxes in any specific articles, and such tax is not a debt within the meaniug of the act. It was not the intention of Congress to make legal tenders receivable for any tax except such as are enumerated in the act, and therefore no question as to the constitutionality of that act arises in the case. The State and National Governments are independent of each other in respect to taxes, each being at liberty to levy and collect them in such manner and kind as provided by law. The law of Oregon, therefore, which requires the taxes of that State to be paid in coin, are constitutional and valid, and the judgment of the State Court so holding is affirmed. The Court discussed the question of what constituted a debt at some length, and defined the meaning of the word to be an obligation arising in contract. A tax is quite different, its obligation arising without any engagement on the part of the party taxed, but created wholly by a law made by the sovereign. The transfer of personal property, the law of domicil, inter State faith and credit of judgment records.

Journal of Railroad Law.

LIABILITY FOR INJURY TO RAILROAD CARS BY CATTLE.

An important question, often touched upon, but seldom presented in such form as to enable the Courts to decide it, was lately determined in Indiana, upon an appeal to the Supreme Court in the case of Sinram *vs.* The Pittsburg, Fort Wayne and Chicago R. R. Co.

The Court there held that if the owner of cattle knowingly permits them to wander at large in the vicinity of a railway crossing of a public highway, the road being properly fenced, and they wander upon the track and are run over by a train of cars, without any fault on the part of the servants of the company and the train is damaged thereby, the owner of the cattle is liable to the company for the injury done.

That the Board of County Commissioners, have under the statute, passed an order allowing cattle to run at large in the county, does not affect the rights of the parties. The facts in the case are clearly and fully stated in the following opinion of the Court by

Gregory, J.—The railway company sued Sinram in the Court below for an injury occasioned to a train of cars by a collision with two cows, the property of the defendant, at the crossing of a public highway. The *gravamen* of the action is, that the defendant carelessly and negligently suffered and permitted his cattle to run at large in the immediate neighborhood of and upon the crossing, knowing the danger to the company of damage thereby. The case was tried upon this agreed statement of facts.

"On the 15th of August, 1866, at a crossing of the Paulding state road, a public highway, over the railway of the plaintiff, about five miles east of Fort Wayne, in Adams township, Allen County, Indiana, the plaintiff was running a gravel train, in daily use at that point, along her railroad, and when running the train at proper speed, and without any negligence on her part, and when the train had approached the highway within one hundred feet, two cows belonging to the defendant suddenly ran upon the track of the railroad, at and upon the crossing of the highway, and collided with and were run over and killed by the train, which could not be prevented by the servants of the company running the train, thereby throwing the train from the track, and injuring and damaging the same to the amount of five thousand dollars, and without the plaintiffs fault or neglect. The road was properly fenced and proper cattle guards placed by the company on each side of the crossing for several miles each way. The defendant was not present, and had no actual knowledge of the fact that the cattle were on the crossing at the time of the collision, but had before that time for one year, resided within one-fourth of a mile of the crossing, and knowing that the plaintiff was running the gravel train several times, at least thrice a day each way, over the road and the crossing of the public highway, and that the plaintiff was running at least ten passenger and freight trains over the road and the crossing, each way, every day for the period of one year before and at the time of the collision, had knowingly suffered and permitted the cattle to run at large, pasturing upon common and uninclosed lands on both sides of the road adjoining the railway and near to the crossing and in immediate proximity thereto, during said period, daily using the same, unattended at their will. The board of commissioners of the County of Allen had on the — day of June, 1855, made an order 'that all cattle, sheep and swine, except bulls, rams and boars, may be allowed to pasture or run at large upon the uninclosed lands or public commons within the bounds of any township in said county of Allen.' The cattle were never attended by any one, but wandered at will in pursuit of pasture over said crossing at all times of day and night, and whilst they were so wandering, with the knowledge of the defendant, as aforesaid, over the crossing, the collision in question occurred. The plaintiff had the right of way, and was engaged in the lawful operation of her railroad over and across the said highway at the time."

The complaint is not that the appellant unlawfully suffered his cattle to run at large, and therefore the statute, and the order of the board of commissioners made thereunder, allowing cattle to run at large on uninclosed lands and public commons, can have no influence in the determination of this case. The question is: Did the defendant so carelessly and negligently use his own property, to the injury of the plaintiff, as to entitle the latter to recover therefor?

Kerwhaker *vs.* The Cleveland, Columbus and Cincinnati Railroad Company, 3 Ohio St., 172, relied on by the appellant's counsel, was an action of trespass on the case, for the alleged negligence and misconduct of the defendant's agents in conducting and running a locomotive and cars on the defendant's railway track, whereby six hogs, the property of the plaintiff, were killed. It was held, in that case, that the act of the plaintiff in allowing his hogs to be at large in the neighborhood of the railroad, where they were exposed to the danger of getting upon the railway track and being injured, was only a remote cause of the injury, and in the voluntary exposure of his property to danger, in the exercise of his lawful rights, he took upon himself the risk of injury to his property by mere accident, but no risk of injury by the defendant's negligence.

But the facts of the case bear no analogy to this. Here, the defendant lived in the immediate vicinity of a dangerous road crossing, he knew that his cattle were in the habit of roaming at large across the railway track at this point, at all hours in the day and night in search of pasture, he was aware of the danger to trains from this cause, he knew that some thirteen trains were passing each way every day. Notwithstanding this knowledge, he permitted his cattle to go at large unattended. It is admitted that the railway company was without fault.

In Knight, Adm'r, &c., *vs.* The Toledo and Wabash Railway Co., 24 Ind., 402, this Court held that it was gross negligence for the owner of a blind horse to turn him out upon the common of a town through which a railroad ran, where he was killed by a passing train.

In Barnes *vs.* Chapin, 4 Allen, 444, it was held that if a sucking colt while following its dam, which is being led by her owner in a highway, is kicked and killed by a horse which has been turned loose in the highway without a keeper, the owner of the colt, if found by the jury to have been in the exercise of reasonable care, may recover damages of the owner of the horse, although the horse was not vicious. The right of the defendant to permit his cattle to pasture on uninclosed lands and public commons conferred no right on him to permit them, unattended, to wander on a dangerous crossing of a railway track, thereby endangering the lives of passengers, and the property of the railroad company. Such an act ought to be a misdemeanor. It certainly is an act of wicked carelessness. It is a maxim of the law that a man is bound to use his own property in such way as not to injure that of his neighbor.

We think that the action of the Court below was clearly right.

The judgment is affirmed with costs.

New York Central Railroad.

AUTHORITY TO ISSUE BONDS CONVERTIBLE INTO STOCK. THE CERTIFICATES ISSUED DECLARED VALUELESS. THE COMPANY RESTRAINED FROM PAYING DIVIDENDS ON SUCH CERTIFICATES.

Isaac N. Jenks *vs.* The New York Central Railroad Company. On the 4th of December, 1868, the plaintiff obtained an injunction restraining the defendants from issuing any certificates of stock upon the surrender of any convertible bonds; also from transferring upon its books any shares of stock originally issued in exchange for such bonds; also from paying any dividends upon any stock so issued in excess of the original capital, or from permitting any votes upon such stock. On the 21st of December following, the defendants were enjoined from issuing any certificates or other evidence of indebtedness, or making any dividend of stock issued in excess of the original capital. Afterwards, on the 2d of January, another order was made restraining the defendants from issuing any interest certificates, or other evidence of debts, among the stockholders, from permitting the transfer of such certificates upon the books of the company, and from paying any interest or dividends upon such certificates. This last order was made upon a supplemental complaint, which set out the resolutions adopted by the defendants on the 19th of December, 1868, which, after reciting that the company had expended in the construction and equipment of the road an amount equal to eighty per cent. on the capital stock, and that the stockholders were entitled to evidence of such expenditure and to reimbursements, "Resolved, That a certificate signed by the President and Treasurer of the company be issued to the stockholders, declaring that such stockholder is entitled to eighty per cent. of the amount of the capital stock held by him, payable ratably with the other certificates issued under this resolution, at the option of the company, out of its future earnings, with dividends thereon at the same rates and times as dividends shall be paid on the shares of the capital stock of the company; and that such certificates may be, at the option of the company, convertible into stock of the company whenever the company shall be authorized to increase its capital stock to an amount sufficient for such conversion." There was passed at the same time a resolution declaring a dividend of four per cent., payable on the stock of the company and upon the certificates then authorized to be issued. Under these resolutions the certificates were issued on the day of

the passage of the resolutions. The certificate stated that the holder was entitled to ——— dollars, payable ratable with the other certificates issued under said resolution, at the pleasure of the company, out of its future earnings, with dividends thereon at the same rates and times as dividends shall be paid upon the shares of the capital stock of said company. Three questions were presented for discussion on this motion, namely: First, whether the defendants had authority to issue bonds convertible into stock at the pleasure of the holders. Second, whether they had any power to issue the certificates above referred to as a dividend to the stockholders. Third, whether the company can declare a dividend on such certificates. The decision of the Supreme Court is briefly that the injunction in the first and second orders shall be vacated and dissolved. The injunction in the third order, restraining the payment of dividends on the interest certificates, is continued and such payment forbidden until the further order of the Court.

The effect of this decision is to make the certificates a mere declaration on the part of the directors of the value of the road and equipment in excess of the nominal value of the stock. The certificates give no claim to their holders against the road, and there is no power, except such as may be given by the legislature, to declare dividends upon them or treat them in any respect as stock. Judge Ingraham, in deciding the question whether the defendants had authority to issue bonds convertible into stock at the pleasure of the holders, said:

The power to issue convertible bonds depends upon the construction to be given to the act authorizing the formation of railroad corporations, passed April 2, 1850. That act requires that in forming the corporation articles of association should be signed, which, among other provisions, should state the number of shares of which said capital stock should consist. This was to be done previous to the formation of the corporation. After the corporation was so formed it was then vested with the powers incident to corporations and various others specially named in the twenty eighth section of that act. In the tenth subdivision of the section authority is given "from time to time to borrow such sums of money as may be necessary for completing and finishing or operating their railread, and to issue and dispose of their bonds for any amount so borrowed, and to mortgage their corporate property and franchises, &c., and the directors may confer on any holder of any bond issued for money borrowed as aforesaid the right to convert the principle due or owing thereon into stock of said company at any time not exceeding ten years from the date of the bond." The authority to issue these bonds is absolute for the purposes stated, and the right to convert into stock is authorized to be given in the bond without regard to any action of the board for increasing the capital stock. The act provides for subscribing for the whole capital stock, and it allows that capital to be increased by the stockholders for certain purposes—viz., for constructing and operating the road—but not for paying debts previously contracted. It may well be doubted whether the corporation could increase the capital stock for the purpose of paying off its debts, certainly it could not for the purpose of making a dividend. The authority to issue bonds is given for the purpose of borrowing such money as would be necessary for completing, finishing or operating the railroad, and when issued for that purpose the bonds may be converted into stock. There is no limitation on the conversion of these bonds into stock to be authorized by the stockholders. The time in which it may be done is ten years from the date, and the true construction of this sentence is to vest in the holder of the bond the right at his pleasure to convert into stock of the company, whether the original capital is full or not and without any further increase by the stockholders for that purpose. The right of conversion is given to add value to the bonds and to make them more easy of negotiation. Such, however, would not be the effect if the exercise of this right was made dependent upon the pleasure of the stockholders, either to increase the stock or to refuse such increase. I think there can be no doubt as to the power of the board of directors to issue bonds for the purposes stated, and to give the right to convert the same into stock, without any action of the stockholders on the subject. Such issue of bonds, however, should only be made for the borrowing of money for completing, finishing or operating the road, and if resorted to for the purpose of increasing the capital stock, or any other purpose not contemplated by this section, the same would be illegal and void. It appears from the complaint and answer that the amount of convertible bonds issued by the company was $2,537,000; that such bonds were issued for borrowed money, which was necessary for completing and finishing or operating the road; that most of such bonds were converted before the present board of directors were elected; that when such bonds were issued they were sold at a premium of $90,000 above par, and the whole amount received was expended for the benefit of the company. The remaining item of stock issued was $914,400, which by the answer appears to have been issued on account of railroads held under lease in exchange for stock of such roads. This is authorized by the acts of 1855 and 1867. These acts fully authorized such issue of stock without any action of the stockholders. The same appears to have been done in conformity with the provisions of the statutes before referred to, and for both classes of stock so issued the company have received full and adequate compensation. There is, therefore, no ground upon which the issue of any of this stock can be contested, and the injunction on this account cannot be continued.

Law Relating to Railroad Accidents in Pennsylvania.

Under the act of March 23d, 1865, passed by the Legislature of Pennsylvania, to promote the safety of travelers on railroads and to punish negligent and careless employees, a brakesman has been convicted in Luzerne county of criminal negligence, and sentenced to imprisonment in the State Penitentary for thirteen months. The circumstances which gave rise to the trial are as follows: On November 3d, 1868, a train of empty coal cars was ascending a grade of forty-five feet to the mile, on the Lehigh and Susquehanna Railroad out of the Lehigh Valley. A freight train was following on the same track, about five miles behind. The coal train stopped on the track to raise more steam, and the brakesman on the rear car jumped off and started for the engine to warm himself, instead of remaining at his post, as it was his duty to do. Sixteen of the rear cars broke loose from the train, and, no one applying any brakes, they ran down the mountain into the approaching train, and killed three men. The law reads substantially as follows:

"If any person or persons in the service or employ of a railroad or other transportation company doing business in Pennsylvania shall refuse or neglect to obey any rule or regulation of such company, or by reason of negligence or willful misconduct shall fail to observe any precaution or rule which it was his duty to obey and observe, and injury or death to any person or persons shall thereby result, such person or persons so offending shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be sentenced to pay a fine not exceeding $5,000, and to undergo an imprisonment in the county jail or in the State penitentary not exceeding five years. It is made the duty of the county district attorneys to prosecute offenders against this law."

The Public Debt.

The following is a comparative statement of the Public Debt of the United States January 1, and February 1, 1869:

	Jan. 1, 1869	Feb. 1, 1869.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$221,588,300.00	$221,589,300 00
Six per cent. bonds of 1881	283,677,400.00	283,677,400.00
Six per cent. Five-twenty bonds	1,602,568,650.00	1,602,583,350.00
Total	$2,107,835,350.00	$2,107,850,050.00
DEBT BEARING CURRENCY INTEREST.		
Six per cent. Pacific R. R. bonds	$50,097,000.00	$52,017,000.00
Three per cent. certificates	55,865,000.00	57,410,000.00
Navy pension 3 p. ct.	14,000,000.00	14,000,000.00
Total	$119,962,000.00	$123,427,000.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 1, 1867, June and July 15, 1868	$2,174,900.00	$1,977,160.00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867, and May 15, Aug. 1, Sept. 1 and 15, and Oct. 1 and 15, 1868	3,978,290.00	3,599,170 00
Bonds (Texas indemnity)	256,000.00	256,000.00
Treasury notes, (acts July 17, 1861, and prior thereto)	148,561 64	148,411.64
Bonds April 15, 1842, Jan. 28, 1847, and March 31, 1848	349,950.00	278,400 00
Treasury notes, March 3, 1863	445,492.00	445,492.00
Temporary loan	197,310.00	193,313.00
Certificates of indebtedness	13,000.00	13,000.00
Total	$7,463,503.64	$6,910,936.64
DEBT BEARING NO INTEREST.		
United States notes	$356,021,073.00	$356,021,073.00
Fractional currency	34,215,715.64	35,511,127.54
Gold certificates of deposit	27,036,020.00	32,659,520.00
Total	$417,272,808.64	$424,191,720.54
Total debt	$2,652,533,662.28	$2 662,379,707.18
AMOUNT IN THE TREASURY.		
Coin	$98,763,368.91	$88,732,716.44
Currency	13,063,092.12	17,441,332.66
Total	$111,826,461.03	$106,174,049.10
Debt less cash in the Treasury	$2,540,707,201.25	$2,556,205,658.08

By comparing this with the statement of January 1, it is shown that the debt bearing coin interest has increased $14,700; the debt bearing currency interest has increased $3,465,000; the matured debt not presented for payment has decreased $552,567; and the debt bearing no interest has increased $6,918,911 90—making the increase in the total debt since January 1, 1869, $9,846,044 90. The amount of coin in the Treasury during the same period has decreased $10,030,652 47, and the amount of currency has increased $4,378,240 54—leaving the amount of debt less cash in the Treasury February 1, $15,498,456 83 more than on January 1.

☞ Surveys are in progress for a route for a railroad between Stockbridge and West Stockbridge, four and a half miles.

London Coal Statistics.

It appears from the table of statistics published by Mr. J. R. Scott, the Registrar of the London Coal Market, that the imports of coal into the port and district of London by sea, railway, and canal during the year 1868, have been:

IMPORTS.

By Sea:	Ships.	Tons.
Newcastle	2,927	1,471,369
Seaham	540	142,454
Sunderland	1,621	789,087
Middlesborough	160	61,963
Hartlepool	1,844	400,845
Blyth	12	7,529
Scotch	92	25,724
Welsh	123	37,044
Yorkshire	198	24,193
Liverpool	1	139
Foreign Coal—Westphalia	1	165
Duff	1	270
Small coal	22	12,533
Cinders	65	7,878
Culm	3	707
Total	7,110	2,981,230
Imports during year 1867	6,977	3,016,416

By Railway and Canal:	Tons.	Cwt.
London and North Western	1,059,177	13
Great Northern	938,405	0
Great Western	442,450	0
Midland	183,701	9
Great Eastern	316,408	19
South Western	22,731	10
London, Chatham and Dover	4,646	13
London, Tilbury and Southend	589	0
South Eastern	11,323	3
Grand Junction Canal	8,903	5
River Lea	613	5
River Thames, *via* Weybridge	11	0
Total	2,988,860	17
Imports during the year 1867	3,305,617	18

COMPARATIVE STATEMENT, 1867 AND 1868.

By Sea:	Ships.	Tons.
Jan. 1 to Dec. 31, 1867	6,977	3,016,416
Jan. 1 to Dec. 31, 1868	7,110	2,988,230
Decrease in 1868		35,186
Increase ditto	133	

By Railway and Canal:	Tons.	Cwt.
Jan. 1 to Dec. 31, 1867	3,305,617	18
Jan. 1 to Dec. 31, 1868	2,988,860	17
Decrease in 1868	316,757	1

The falling off by railway is accounted for partly by the fact of a glut of coal forced on the London market during the latter portion of 1867, in consequence of the stagnation in the iron trades (now happily showing signs of revival,) whereby a large stock was on hand at the commencement of this year, and partly to the exceptionally warm weather experienced throughout to its close, and to the continued depression in the large manufacturing trades, especially in the east of London. This decrease in imports is, however, mostly apparent in the surplus by railway (exceeding 300,000 tons in the year,) notwithstanding the additional means of supply furnished during the year by the direct transmission of coal over their own line by the Midland Railway Company to London.

Atlantic and Gt. Western Railway.

The following gentlemen have been elected directors of this company for the ensuing year: Henry G. Stebbins, Edwards Pierrepont, Andrew H. Green, E. Weston, T. W. Kennard, R. L. Cutting, Sr., John D. Prince, E. McDermott, Mortimer L. Mackenzie, J. P. Fennes, John Gardner, Wentworth Huysche, General Rush C. Hawkins and W. Archdall O'Doherty, of New York; Tatlow Jackson, of Philadelphia; Sir William Russell, Bart., M. P.; John Fildes, M. P.; E. L. S. Ridsdale, J. Chaytor and Paul Margetson, of London, England, and F. W. Oewel, of Amsterdam, Holland. After organizing, the new board unanimously elected Henry G. Stebbins, President, and W. Archdall O'Doherty, Vice President.

Movements of Produce.

Receipts of certain articles of domestic produce at the port of New York for the month of January:

	1868.	1869.
Ashes, bbls.	216	880
Breadstuffs—

☞ At the recent annual meeting of the Providence and Worcester Railroad, the old board of directors was elected, with Earl P. Mason, Esq., as President. The act of the legislature of Massachusetts authorizing an increase of capital stock was accepted, and the lease of the Milford and Woonsocket Railroad was approved.

☞ Gangs of hands being employed in the construction of the Point of Rocks Railway for a considerable distance north of the District line. More laborers are in requisition.

☞ The passenger receipts of the Ohio and Mississippi Railroad for the year 1868, as returned to the Assessor of the Second district of Ohio, were $1,296,336.

Mount Washington Glass Works.

MANUFACTURER OF GLASS IN ALL ITS FORMS and varieties. The attention of Railroad Men is called particularly to the *Lantern Globes and Chimnies* produced, which for general good qualities are unexcelled. Railroad Companies, Purchasing Agents, and those interested, would do well to look at sample of these Goods, which will be sent on application. Orders solicited, and all such executed promptly and satisfactorily.

Address,

W. L. LIBBEY,

61 Milk-St., Boston, Mass.

Notice to Bridge Builders.

DEPARTMENT OF SURVEYS,

JANUARY 11, 1869.

In conformity with an ordinance of the Select and Common Councils of the City of Philadelphia—

I hereby invite the presentation of Plans and Estimates for an Iron Truss Bridge suitable to be erected over the River Schuylkill, on the site of the present Suspension Bridge at Fairmount, in said city. The abutments are now erected with a clear span of three hundred and forty (340) feet. The width of Bridge from out to out of footways to be fifty (50) feet, which footways will be not less than eight feet in the clear.

It must be provided with an upper and lower carriage way, the upper to be not more than 35 feet above the bottom of lower chord, or less than 28 feet above the lower roadway—the lower roadway to be not more than seven feet above the bottom of lower chord or it may rest upon the lower chords.

The entire structure to be of iron, excepting the flooring of the road and footways; to be proportioned for a weight of seventy-five pounds per square foot upon each roadway, including the footways. All wrought iron to be proportioned to resist a tension of 60,000 pounds, with a factor of five for security in large bars, and six for the small bars or rods.

A full and detailed estimate of quantities and cost will be required to accompany each plan.

The conditions of the Ordinance are, that the plans herein called for shall be submitted to a Commission of three Civil Engineers, in conjunction with the Chief Engineer and Surveyor of the city of Philadelphia—the best three of the plans to be retained by and become the property of the city of Philadelphia, for which they will be paid in order of merit, as may be determined by the Commission —800, 500, 300 dollars respectively. No design for a Portal will be required.

All plans must be deposited with the subscriber on or before the 1st day of April, 1869, at the Department of Surveys, 224 SOUTH FIFTH STREET, Philadelphia, with letter, giving the address of the Designer. Map and Profile of location may be seen at the Department of Surveys.

STRICKLAND KNEASS,

3t4 Chief Engineer and Surveyor.

☞ Two routes for the proposed Massachusetts Central Railroad are now being surveyed, one running from Bolton, *via* North Lancaster, Leominster and Westminster, striking the Vermont and Massachusetts road at some point near Gardner, the other to run on the same line to Bolton, thence through South Lancaster and Sterling, till it intersects the line already surveyed *via* Hudson, both parties being confident that they can show the best route to the tunnel.

☞ A movement is on foot to build a branch railroad from Athol, Mass., *via* North Dana and Enfield, to the Western Railroad at Palmer.

RAILROAD TIES.

1,000 EASTERN SPRUCE AND HEMLOCK Ties, 8, 9 and 10 feet long, 6+6 inch face. For delivery from April to September next, as required. Also, Oak, Chestnut, Pine, Cedar, and Cypress Ties, and R. R. Timber. Apply to

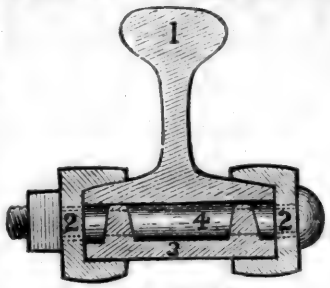
TESTIMONIAL.

Baltimore, Md., April 16, 1868.

We have used, on the Baltimore and Ohio Railroad, during the past year, about 13,000 lbs. of India Rubber Car Springs, manufactured by the Hamilton Square Rubber Works, Trenton, N. J., (C. V. Mead & Co.,) and have found them equal to, if not superior to any we have used in past time, and on much more reasonable terms.



JOHN OLIVER,
Purchasing Agent Baltimore and Ohio Railroad.

THE PHŒNIX IRON COMPANY'S
NEW SUSPENSION RAIL JOINT.

Cross Section of Rail Joint.

Side Clamps 14 in. long, showing Rail Stop.

Bottom Ribbed Plate, 14 in. in length.

The above diagrams show the general design of this new ***Suspension Rail Joint,*** which, after long and successful trial on the Philadelphia, Wilmington and Baltimore, and other Railways, is now offered to Railway Companies. The cut on the left gives a cross section of the finished joint, showing the rail (*1*) resting upon the ribs of the bottom plate (*3,*) with the flanges of the rail and the bottom plate embraced by the side clamps (*2,*) and held firmly in place by bolts (*4*) In screwing up these bolts, the bite or grip between the bevel on the side clamps corresponding with the bevel on the flanges of the rail, insures great vertical and lateral rigidity to the joint.

Several careful tests have proved that the deflection of two pieces of rail thus fastened at the joints and subjected to a transverse strain between supports five feet two inches apart, was but a trifle more than that of the same rail uncut, tested in the same way. The value of the joint in this respect was 85 per cent. of that of the solid rail, while the best fish joints, similarly tried, gave less than 50 per cent.

No holes are required to be punched through the neck of the rail, nor slots in the flanges, only a quarter circle notch of about half an inch radius is necessary to be cut out of the corner of one of the flanges of the rail to fit the "stop" shown in the upper right hand cut. This is a very important consideration, as holes punched or drilled in the neck are apt to split the rail longitudinally, and in *Steel Rails particularly,* is the principal cause of breakage.

All that portion of the joint, shown in the cut of cross section, below the bottom of the rail, bears endwise against the cross-ties, and prevents any creeping of the track. It makes a very firm joint, does not get out of order, and can be fitted to any size of rail. When ordering, send a sample piece of rail two feet long. Address,

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our

LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

S. W. HOPKINS & CO.,

American Railroad Journal.

New York Saturday, February 20, 1869.

Oil Creek and Allegheny River Railroad.

At the annual meeting of the stockholders of this company at Corry, Pa., on the 10th inst., the following gentlemen were elected directors for the ensuing year: Edward F. Gay, Wm. G. Fargo, Charles H. Lee, Wm. G. Moorhead, A. S. Diven, Charles B. Wright, and Thomas A. Scott. President, Edward F. Gay; Vice President and General Superintendent, H. F. Sweetzer; Secretary and Treasurer, F. A. Phillips. The Report of the President, which was read at the meeting, is as follows:

To the Stockholders of the Oil Creek and Allegheny River Railway Company:

As your road is the result of a consolidation of three roads, constructed by separate companies, into one, in presenting this our first report, your Board deem it appropriate to refer briefly to the history of these several roads.

NUCLEUS OF THE ROAD.

The Oil Creek Railroad was chartered in 1861 with authority "to build and construct a railroad from some point on the Philadelphia and Erie Railroad to Titusville, thence along Oil Creek to Oil City, and extend the same to Franklin." This road was commenced and completed early in 1862 from Corry to Titusville; in 1863 it was extended to "Shaffer Farm," and subsequently to "Boyd Farm," its terminus at the date of our consolidation, its length being 38 miles.

WARREN AND FRANKLIN AND FARMERS' RAILWAY.

The Warren and Franklin Railway was chartered in 1861, was commenced in December, 1865, and completed to Oil City (50 miles) in July, 1866.

The Farmers' Railroad from Oil City to Petroleum Centre, was chartered in 1862. Its length is 8 miles, with a branch up Cherry Run of about 4 miles; it was commenced early in 1866, and completed about the first of November, same year.

In August, 1867, the Warren and Franklin Railway Company purchased a majority of the stock of the Farmers' Railroad, and in November of the same year that road was merged into and consolidated with the Warren and Franklin Railway, thus making one road from Irvineton to Petroleum Centre, leaving an interval of about one-half mile between it and the Oil Creek Railroad at Boyd Farm.

CONSOLIDATION.

In the winter of 1868, negotiations were commenced and concluded for the consolidation of the Oil Creek Railroad into the Warren and Franklin Railway under the name of the "Oil Creek and Allegheny River Railway," forming a continuous road through the Oil Regions from Irvineton to Corry—100 *miles in length, including branch.* The Act of Consolidation went into effect on the first day of March, 1868, and whatever doubt may have existed heretofore with regard to the propriety of that measure, the experience of the last ten months must convince the most skeptical of its wisdom; indeed your Board feel much gratification in being able to assure you of its entire success, for had the consolidation of these roads failed, the result could only have been a violent contest between the two companies for business and a failure of dividends to their respective stockholders. As the matter now stands, all rivalry is at an end. The rate of charges from Oil City (the central point) to the respective termini (Corry and Irvineton) are the same, and from intermediate points on the line to Oil City, as nearly so as practicable.

OIL BUSINESS.

As your company furnishes no cars to transport freight off its own road, equal facilities are now afforded to all parties coming from other roads for *oil*—the staple product of the country through which our road passes; merchandize or other freight, especially local, is generally carried on the road in the cars of this company, but other parties may run their own cars over it with such freight, but without allowance for car service.

The articles of consolidation stipulate that no preference shall be given in the movement or in the loading or unloading of the cars and property, or discrimination of any kind whatever to any party doing business on the line of the consolidated road, with the exception of the Atlantic and Great Western Railway or its successors in the event of their declining to allow a third rail between Oil City and Franklin.

It has been the earnest desire of your Board that this regulation should be strictly enforced, and we have no reason to doubt that it will be, as by it we preserve our friendly relations with other roads and secure permanent success in the management of our own.

RENO AND PITHOLE RAILROAD.

In the act of consolidation it was provided that this company should purchase and pay for the Reno and Pithole Railroad the sum of two hundred thousand dollars "in the bonds of the said consolidated corporation, or in its capital stock at par, as it may elect.' After due consideration, your Board decided to pay in stock, and for this purpose 4,000 shares of stock ($200,000) were purchased, with the product of one hundred and ninety bonds of the company, or $190.000, and paid over to the Trustees of that road on the delivery of a deed conveying all the rights, privileges, materials and franchises of that company to yours, thus saving ten bonds, or $10,000, which are still in the hands of our Treasurer and can be applied to the improvement of the road—to the purchase of equipment, or cancelled, as may be considered most desirable. The track of the Reno and Pithole Railroad south of Rouseville and north of Plumer (about 12 miles) has been taken up and used chiefly in laying a third rail along the track and sidings between Boyd Farm and Oil City, and in renewing the third rail previously laid between Boyd Farm and Corry. The balance of the iron being light has been exchanged for new and heavier rails, to be used in general re-

pairs. In laying the third rail between Boyd Farm and Oil City, that portion of your road between Corry and the latter place is adapted to the use of either broad or narrow gauge cars running on connecting roads, thus enabling us to accommodate the trade of all parties using the road.

IMPROVEMENTS.

An examination of the entire line immediately after consolidation showed that a large amount of work must be done to place it in good working condition. First of all the connection of the two roads at Petroleum Centre and Boyd Farm was considered indispensable. This was immediately commenced, and, including a new bridge over Oil Creek, was finished and opened for through business early in July last.

The principal improvements made during the past season may be enumerated as follows:

A new and permanent brick engine house at Corry; straightening the road at Tryonville.

A freight house at Titusville; a new and substantial bridge over Oil Creek at the latter place; the connection of the two roads (already mentioned;) extension of the new engine house at Oil City; new weight scales at the same place; new water station houses at Tionesta and Tideout; engine house and turn table at the latter place; also, a large amount of sloping to remove hill slides and prevent the same—all of which should be properly charged to construction, but have been paid for out of the current receipts of the road.

In the repair department, a large amount of ballasting and ditching has been done, embankment substituted for trestling, new cross ties and rails laid, and the track generally adjusted, so that the entire road is now in better condition for general use than it ever was before. The expenses both of construction and repair have been large, but experience teaches us that all requisite facilities should be furnished and the road kept in the best possible condition to accommodate the extraordinary demand of the business incident to our road. It is not anticipated, however, that the construction account will be nearly so large the ensuing year as during the past—perhaps $100,000 less will meet all needful demands in this department.

EQUIPMENT.

The equipment account for the past ten months represents the purchase of forty-three freight cars, two passenger cars, and two locomotive engines. At the present time the equipment of the road is in good condition but worked to its greatest capacity, and it will be the duty of your board promptly to increase it if required to meet new developments or demands in the increasing *local* business of the road.

ADVANTAGEOUS CONTRACT.

In October last a contract was concluded with the Allegheny Pipe and Transportation Company for ten years, by which the most if not all the oil passing through their pipes is secured to your road, and no pipes are to be permitted to be laid parallel to it for or during the term of said contract, thus placing at rest, competition from that source.

OIL PRODUCTION.

During the past year, the production of oil has exceeded any previous one and whatever doubts may have existed in regard to the failure of that valuable product, the new developments constantly being made on the large extent of *oil producing territory* comprised within the circuit of your road, afford ample evidence that it will continue for many years to come.

BUSINESS REPORT.

The business of the road during the past ten months (March 1st, to December 31st,) has equaled, and in fact, exceeded our most sanguine expectations. Tabular statements representing the character of the business in detail, receipts, expenditures, &c., will accompany the report of your Treasurer—from which it will be seen that the amount of capital stock issued is limited to 85,189 shares—equal to $4,259,450; and of bonds, (including $10,000 in Treasury,) $3,180,000, making a total of stock and bonds of $7,439,450.

From March 1st, to December 31st, inclusive, there has been carried over or upon the road, 312,349 passengers, 2,507,434 barrels of oil; and of merchandize, coal, lumber and other freight, 111,069 tons.

The earnings of the road during that period of 10 months have been $1,507,468 17, being an average of over $150,000 per month, and the disbursements, including interest on bonded debt, three quarterly dividends to stockholders, $136,096 10, for construction and equipment, $1,846,422 06, leaving balance in Treasury on the 1st of January, 1869, of $161,046 11, sufficient to meet all accruing interest on bonds at maturity and the ensuing April dividends of two and a half per cent. to the stockholders, with no floating debt whatever upon the road.

FAVORABLE DEDUCTIONS.

From the above statement of facts it is evident to your Board that the road, on its present business alone, will be abundantly able to pay all its interest and ten per cent. dividends on the stock clear of all taxes, besides appropriating probably $200,000 per annum to purchasing its own securities. The Board hope to secure a connection with the Allegheny Valley Railroad by it bridging the river at Oil City, which will add a valuable and entirely new source of traffic between the cities of Pittsburgh and Buffalo and intermediate points, and also enable us to transport large quantities of lumber from the line of the Philadelphia and Erie Railroad over our river division of fifty miles on its way to Pittsburgh and other points, the return cars bringing back to the oil regions and Buffalo all classes of traffic, including the fine gas coal of the Pittsburgh region.

PROPOSED ALLIANCE.

The Board also hope that a connection between our road and the Jamestown Branch of the Erie and Pittsburgh Railroad will be perfected during the coming year, which will also prove a valuable ally and feeder to our lines.

With these new source of revenue there is no reason why your property shall not be made most useful to the public and profitable to its shareholders.

By order of the Board of Directors,

EDWARD F. GAY, President.

☞ Between 400 and 500 workmen are now employed on the Massawippi (Vt.) Railroad, which is to extend from the Passumpsic Railroad to the Grand Trunk, and the cars will be running through to Quebec by the 1st of July.

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of this road for the years ending October 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$1,503,297 62	$1,437,459 95

Balance to credit of revenue, October 31, 1868		$1,101,105 15

The passenger receipts were smaller by more than four per cent., than those of last year; while the receipts from freight and express, were slightly larger than those from same sources in 1867. The gross earnings from all sources were less than those of 1867 by more than two per cent. The operating expenses as compared with those of the preceding year were less by a little over four per cent. The report says:

The policy of a liberal expenditure for the purpose of keeping your property fully up to its value at the beginning of the year, has been adhered to; and we believe that the road, rolling stock, and other property are in excellent condition.

The Susquehanna Bridge each succeeding year justifies more fully the action of the company in erecting it; notwithstanding the large outlay required for the purpose.

In consequence of the entire failure of the peach crop, and the partial failure of the grain crop in Delaware, and on the Eastern shore of Maryland; the net receipts from operating the Delaware Railroad were again insufficient to pay the rent thereof, and the deficiency is temporarily borne by this company.

Our lease of the Delaware Railroad provides, that in addition to a rent of 6 per cent. upon the capital stock, we are to pay to that company one-half of any surplus which we may earn after paying the rent and working expenses of that road. The question arose as to the meaning of this provision. The Delaware Railroad Company claiming that there is a divisible surplus whenever the business of any one year shows a surplus. This company claiming that there can be no divisible surplus until they have been reimbursed for all the loss hitherto sustained in operating the Delaware Railroad.

This company's views were sustained by referees, and as the business of the Delaware Railroad is increasing, we have ever reason to suppose that ere long, we shall receive net earnings from operating it, not only sufficient to pay its rent, but also to gradually reimburse to us the past losses amounting in the aggregate to over $200,000.

In 1864, the Legislature of Delaware provided by statute, that this company should pay to that State a tax of ten cents per passenger, upon each passenger transported through, upon, over, or across any portion of that State. This company has paid about $360,000, in compliance with this statute. The United States Supreme Court has recently decided that a tax levied by a State upon passengers transported by a common carrier across the boundary line of that State, is unconstitutional. Learning this decision, this company has declined to collect and pay over this tax, after Nov. 1, 1868, excepting that portion of it which is payable by those passengers in Delaware, who are not transported across the State Line.

The Wicomico and Pocomoke Railroad connecting Berlin with Salisbury has been completed during the past year. The Dorchester and Delaware Railroad is ready for operation, for twelve miles of its Eastern portion. The last rail has been laid upon the Chester Creek Railroad. The work of construction is rapidly advancing upon the Wilmington and Reading—upon the Maryland and Delaware, upon the Queen Anne's and Kent County, and upon the Townsend Branch. All of these roads will bring traffic to our roads, and so soon as the business of the country revives, we confidently expect a considerable addition to the receipts of the past two years.

The company have 57 locomotives, of which 13 are in use on the New Castle and Wilmington, New Castle and Frenchtown, Delaware and Eastern Shore Railroads. The number of miles run by locomotives, including service on the New Castle and Wilmington Branch, was 897,220.

The number of local passengers carried over the Philadelphia, Wilmington and Baltimore and Port Deposit Branch Railroads during the year was 781,806.

The number of local passengers carried over the Philadelphia, Wilmington and Baltimore, New Castle and Wilmington, New Castle and Frenchtown, Delaware, Smyrna Station and Smyrna, and Eastern Shore Railroads during the year was 199,627.

The number of tons of local freight carried over the Philadelphia, Wilmington and Baltimore Railroad during the year was 270,516; do., through freight, 10,902—total, 281,418.

The total number of tons of freight carried over the New Castle and Wilmington, New Castle and Frenchtown, Delaware, Eastern Shore, Junction and Breakwater, Smyrna and Smyrna Station, and Wicomico and Pocomoke Railroads, in connection with the Philadelphia, Wilmington and Baltimore Railroad during the year was 123,661.

President.—ISAAC HINCKLEY.

Vice President.—ENOCH PRATT.

Directors.—Samuel M. Felton, William Sellers, Samuel Welsh, Samuel Harlan, Jr., Jesse Lane, Joseph Bringhurst, Frederick A. Curtis, J. I. Cohen, Jr., Thomas Kelso, Columbus O'Donnell, Thomas Donaldson, Jacob Tome, Nathaniel Thayer.

Secretary and Treasurer.—ALFRED HORNER.

Superintendent.—H. F. KENNEY.

Norwich and Worcester Railroad.

A meeting of the stockholders in this corporation was held in Norwich, Ct., on the 9th inst., for the purpose of ratifying the agreement previously entered into by directors, for the lease of their road for a term of 99 years to the Boston, Hartford and Erie Railroad Company. By the terms of the proposed lease, all the railroad and steamboat property of the company is to pass to the control of the Boston, Hartford and Erie Railroad Company, under certain restrictions. The road, which extends from Worcester to Allyn's Point, with all its rights and appurtenances, lands and buildings, is included. For this they guarantee to the stockholders of the Norwich and Worcester Railroad Company, a yearly dividend of ten per cent., free of all tax or burden of any kind. Everything is to be kept in as good repair as at present, the repair shop at Norwich is to be retained there, trains are to be run giving equal or greater accommodations to Norwich and Worcester and way stations as at present. Messrs. Andrews and Parker are named as a commission to determine from time to time the true inventory of the stock of the road. The managing agent of the road is to be chosen by a concurring vote of the boards of directors of both roads. All indebtedness of all kinds is to be paid by the Boston, Hartford and Erie Company, and all existing contracts assumed by them. Probable changes in the location of the stations at Worcester or elsewhere are provided for, and in case a new road is built or other improvements are made calling for an increase of stock, on such increase the same dividend of ten per cent. is to be paid annually. All moneys are to be received and paid in to the Treasurer of the Norwich and Worcester Railroad as at present, and monthly accounts carefully rendered. The lease to be rescinded on the neglect to fulfill any of its provisions. The agreement was confirmed by the stockholders by a vote of 14,320 to 138. The directors were authorized to arrange temporarily with the Boston, Hartford and Erie Railroad Company, in accordance with the provisions of the lease, until the necessary consent of the legislatures of Massachusetts and Connecticut be obtained to legally transfer the lease.

☞ The stockholders of the Boston, Hartford and Erie Railroad Company, at a meeting held in Boston on the 10th inst., confirmed the action of the directors in taking a lease of the Norwich and Worcester Railroad. They also approved of the running arrangements made with that company, and will at once take possession of the road, and run it until such time as the said lease shall have been ratified by the Legislatures. It is understood that the company will at once put on a new train to connect with the cars at Norwich.

☞ The New Orleans and Ohio Railroad, extending from Paducah to the Tennessee line, a distance of fifty miles, with its property, stock and fixtures has been sold under a judgment recovered by the United States, to Mr. E. Norton, of Norton Slaughter, & Co., of New York, for $300,000.

☞ The McMinnville Tennessee, New Era says the work on the Southwestern Railroad is progressing finely, and is heading straight for the Kentucky line. There are now some three hundred hands at work on its construction.

Commerce of New York.

The foreign imports at New York for the month of January, are officially stated as follows:

	1868.	1869.
Entered for consumpt'n.	$7,855,830	$11,698,755
Do. for warehousing....	6,647,871	9,878,719
Free goods.....	778,296	1,243,777
Specie and bullion.....	136,574	221,278
Total entered at port...	$15,418 571	$22,542,529
Withdrawn fr. wareh'use	6,731,624	8,506,630

The foreign imports at New York for the seven months ending January 31, were:

	1868.	1869.
Entered for consumpt'n.	$70,424,231	$80,510,927
Do. for warehousing...	53,333,519	54,263,051
Free goods.....	5,846,786	8,053,755
Specie and bullion.....	1,886,217	3,267,767
Total entered at port..	$131,490,753	$146,095,500
Withdrawn fr. wareh'se	54,019,789	56,621,378

The revenue from customs at New York, were:

Six mos. ending	1868.	1869.
Jan. 1.....	$54,731,301 44	$57.845,963 97
In Jan.....	7,133,428 42	9,615,894 48
Total 7 months..	$61,864,729 86	$67,461,858 40

The exports from New York to foreign ports in the month of January, were:

	1868.	1869.
Domestic produce.....	$13,766,496	$12,672,824
Foreign free goods.....	12,680	7,965
Do. dutiable.....	669,151	472,228
Specie and bullion.....	7,349,825	3,214,380
Total exports	$21,798.152	$16,367,397
Do. exclusive of specie.	14,448,327	13,153,017

The exports from New York to foreign ports for seven months ending January 31, were:

	1868.	1869.
Domestic produce.....	$100,829,047	$89,647,090
Foreign free goods....	162,097	204,640
Do. dutiable	4,600,568	3,952,355
Specie and bullion.....	34,556,111	24,952,379
Total exports	$140,147,823	$118,756,464
Do. exclusive of specie	105,591,172	93,804,085

The foreign imports at New York in January for ten years have been as follows:

	Imports of Specie.	Total Imports.
1860	$228,050	$21,756,273
1861	7,262,229	26,827,411
1862	163,658	12,620,829
1863	101,906	15,739,576
1864	141,790	18,977,394
1865	52,268	10,620,117
1866	72,771	30,109,830
1867	126,719	29,979,087
1868	136,574	15,418,571
1869	221,278	22,542,529

New York and Oswego Midland Railroad.

The Port Jervis *Union* of Februray 5th says ground was broken at Phillipsport Monday last, on the Ellenville branch of the Midland and a large force of men set to work.

A new route is being surveyed *via* Warwick to intersect the Greenwood Lake route at Pompton. The route from Middletown to Warwick is said to be feasible and easy of construction.

It is believed that trains will be run on the Midland Railroad between Middletown and Hoboken in eighteen months from this time.

☞ The time in which certain towns in the counties of Ulster, Delaware, Greene and Schoharie may issue bonds and take stock in the Rondout and Oswego Railroad, and in which consent for that purpose may be obtained, has been extended by act of the Legislature to January 1, 1871.

Railroads of Massachusetts.

A tabular Statement of the Railroads of the State, their Capital and Cost, Earnings and Expenses, Dividends, &c., for the year ending November 30, 1868.

Prepared from the Annual Report of the Secretary of the Commonwealth.

Railway from Annapolis to Yarmouth.

It is proposed to extend the railway now in course of construction between Windsor and Annapolis to Yarmouth, in the western part of the province. Windsor is already connected with Halifax by rail, and the line from Windsor to Annapolis is well advanced and will doubtless be completed next summer. The distance from Halifax to Annapolis by this route is 130 miles and it is computed that about 70 miles of rail will connect Annapolis and Yarmouth, making the whole distance from the latter place to Halifax about 200 miles. It is claimed for this route that, besides giving western Nova Scotia railway connection with Halifax, it will afford a direct route for through travel to the west. The distance from Halifax to Yarmouth could be made by train in ten hours, and it is asserted that steamers could make the trip from Yarmouth to Portland in twelve hours, the distance being but 170 miles. This would enable the people of Halifax to reach the eastern terminus of the Grand Trunk within 24 hours—saving at least twelve hours, as compared with either of the existing routes. The Government of Nova Scotia has appropriated $2,000 towards the survey, which is now being prosecuted with the approval of the Dominion government, by Mr. Sanford Fleming. It is expected that the survey will be completed in March next. The proposed line will start from Annapolis—the terminus of the Windsor and Annapolis line—and proceed up the valley of Allan's River; across the upper waters of Bear River and Moose River; thence to the head waters of Tusket River, on to Kempt ville; and thence through a fine agricultural district to Yarmouth harbor.

On the line between Annapolis and Bear River there is a bed of iron ore 6 feet in thickness, yielding 56 per cent. of iron, and of great extent and value. Between Bear River and Yarmouth the Government have 50,000 acres of land (with a fine growth of spruce, pine, and hardwood) which they can if they choose set apart to aid the construction of the railway.

Short branches may be built to connect with Digby and Weymouth. Mr. Scribner, C. E., has already traversed the proposed route and reports very favorably on the practicability and cost of the road.

☞ The St. John *News* says that the construction of the Western Extension Railway is progressing rapidly, and it will soon be completed. The per centage of finished work is about 90 per cent. of grading; 75 per cent. of masonry; 50 per cent. of rails delivered on the line; 80 per cent. of sleepers; 20 per cent. of tracklaying, and 6 per cent. of ballasting.

☞ The County Commissioners of Allegany Co., Md., have appropriated $3,000 to be used in the construction of a bridge over the North Branch of the Potomac, between Westernport and Piedmont, and the board of supervisors of Mineral county have appropriated a like sum, to be used in co-operation with the appropriation made by the former county for the erection of the bridge.

☞ The contract for building the Mansfield and Framingham Railroad has been given to Messrs. Phelps & Co., of Springfield, Mass. The road is to be finished in one year from the first of June next.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, February 20, 1869.

Stock Exchange and Money Market.

Money was in full supply up to Monday and quite easy in price at the rates quoted in our last, namely 5@7 per cent. on call, and 7@9 per cent. per annum in the discount form, though the city banks made a rather less favorable exhibit, in their last weekly returns, and an enlarged outflow of currency to the South and South-West was reported. The demand for aid was not urgent from any source, and lenders, finding no other employment readily available for the idle means, were making free purchases of the public funds. On Tuesday, however, all this was changed; and Money was made artificially close and dear very suddenly, mainly in the interest of the *bear* operators in the public funds, and in substantial stock values, with a view to the depression of prices, which, under somewhat vigorous hammering yielded sharply in the railway and miscellaneous share line, and about ⅛@¾ per cent. from the closing figures of Monday in the instance of the national securities. The absence of the day's foreign telegrams, until a late hour, led to some hesitancy in the dealings in coin-bearing bonds, which circumstance was taken advantage of, to make further *short* sales. Buyers, however, appeared promptly for all the current offerings at the going rates. None of the large street holders seemed disposed to sell, as they looked confidently for higher figures than even those made during the activity and excitement of Monday. Toward the close of business hours on Wednesday, there were symptoms apparent of a relaxation in the market, and less pressure for accommodation was noted than had been experienced on Tuesday, though the extreme rates of that day were maintained, the range having been from 7 per cent. in currency to the same figure in gold, on call. Discounts were quoted at from 7⅛@10 per cent. per annum, with little movement in progress. The city banks, last week, lost $3,625,000 of deposits, $2,085,000 of specie, and $1,089,000 of legal tender notes. They reduced their loans $2,161,000; and added $17,045 to their circulation. Washington advices report the cash balances of the Treasury Department as being now up to 95½ millions coin, and 16 millions currency, or equal to 111½ millions, all told, of which the Sub-Treasury in this city holds about 88¼ millions. Of the coin reserve, 33 millions represent outstanding coin certificates.

The specie reserve of the city banks is now $25,854,531, against $24,192,954 same time last year. The city bank deposits are now $193,977,960, against $216,759,898 week ending Feb. 15, 1868. The legal tender reserve amounts to $52,334,962, against $63,471,762 same time last year. The circulation now stands at $34,163,451, against $24,043,296 same time last year. The loans are now $264,380,407, against $271,015,970 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $115,126,000 a day, against a daily average of $111,721,580 the preceding week, and $103,226,716 the week ending with Jan. 27, 1869. The current week's exchanges average about $111,500,000 a day. The city banks, last week, lost $2,085,073 of specie, $3,625,039 of deposits, and $1,089,181 of legal tender notes. They reduced their loans, $2,161,325; and increased their circulation, $17,035.

The average amounts of the Gold Exchange Bank loans and discounts last week was $1,365,110, average amount of specie $1,194,091, average amount of deposits $1,906,815.

National Bank notes to the amount of $197,240 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $312,530,726, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $12,787,949, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,742,777. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,555,900; and for the public deposits, $34,391,350—making a total of $376,947,250. The Treasury Department last week redeemed and destroyed $412,600 of worn and mutilated fractional currency, and issued $166,650 of new. The outstanding amount of fractional currency on the 1st of February, 1869, was $35,511,127, against $34,215,716 on the 1st of January, 1869, and $33,875,268 on the 1st of December, 1868.

The U. S. Sub-Treasury receipts, week ending with Feb. 13, were $10,157,005, including $3,339,143 from customs duties; payments, $7,996,110, including $502,760 of coin interest; balance at the close of the week, $88,040,934, against $85,879,989, at the close of the preceding week, showing an increase of $2,160,945. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $963,991 including $406,891 from customs; and payments, $1,186,697 including $43,732 of coin interest; on Tuesday, receipts, $1,059,625 including $553,121 from customs, and payments, $674,272, including $40,593 of coin interest. The balance at the close of business on Tuesday stood at $88,203,580, against $86,235,144 a week previous; and $84,015,873, on Jan. 27, 1869. The aggregate receipts of the office in January were $60,627,079, including $9,702,416 from customs, aggregate payments, $64,854,493, including $18,543,453 of coin interest.

The outstanding amount of coin certificates on the 1st of Feb., 1869, was $32,659,520, against 27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $401,000, and retired $3,245,142 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during January, reached $10,964,000.

Government revenues show a fair average yield. The excises, last week, yielded about four millions; customs at the port of New York, $3,339,143, and at the outports about $1,050,000 (in coin) more, making the grand total income for the week equal to about $8,925,593 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 91 millions, according to the latest Washington advices.

There has been more activity in the Gold Market, without any very notable fluctuations in the premium. The offerings have been liberal, chiefly on speculative account, but have been readily absorbed, mainly by the *bull* interest in the room. The extreme figures of the week have been 134¾ @135½, and the closing quotations on Wednesday 135@135⅛. The advanced prices of Government securities in the home and foreign market, and the abundance and depressed condition of foreign exchange operated against the speculators for a rise. The customs demand keeps up to about about half a million a day. The export inquiry has already ceased, for the present. The exports, last week, from this port were under a million of dollars.

The customs demand for Gold last week, averaged $556,523 a day; thus far, this week, it has been equal to $480,000 a day, or equal to a weekly aggregate of $2,880,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $1,029,568, and since Jan. $1,630,362 against $261,330 same time in 1868. The receipts from California, last week, were $247,356. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $75,050,739, against $68,703,123 same time in the preceding fiscal year. At the port of San Francisco in 1868, $8,382,829, against $7,622,827 in 1867.

The total receipts of California gold at this port, since July 1, 1868, have been $15,008,144, against $19,967,774 same time in fiscal year 1867–'68, showing a decrease in the current fiscal year, of $4,959,639. The exports of specie, from this port, last week, were $929,839, against $708,394 same week last year; total, since July 1, 1868, $26,877,171, against $36,968,565 in 1867–'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $502,760; since July 1, 1868, $62,743,131, against $50,871,520 same time in 1867–'68. The specie exports from San Francisco, from Jan. 1, to Jan. 22, 1869, were $3,161,497, against $2,732,801 same time in 1868.

Foreign Exchange has been quite freely offered at much lower prices, yet has been in very moderate request. The bond and produce export purchases have added largely to the floating supply of bills, and the depression of the general market. Bankers' prime sixty day bills on London closed on Wednesday at 108½@108⅞, and on Paris to 5.20@5.17½; sight bills on London to 109⅛@109½, and on Paris to 5.16¼c.@5.15. The offering of produce bills has been on a more liberal scale this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,228,065, against $3,686,417 same week last year; total, since July 1, 1868, $100,292,575, against $114,095,686 same time in preceding fiscal year of 1867–'68.

There has been an unusually active call for all the coin-bearing bonds of the Government, since our last, at advanced though somewhat variable prices. Monday's dealings were particularly extensive. The exportable bonds were eagerly sought after by the foreign houses, and showed a sharp advance in prices—full 1½ per cent. in the instance of 1862 Five-Twenties—on very meagre offerings, in the face of the reported activity and buoyancy in the London and Frankfort markets, where our funded obligations are daily gaining in public favor, as thoroughly reliable, as well as extraordinarily lucrative forms of investment. The home demand grows almost as rapidly as the foreign inquiry, both absorbing the floating supply of bonds at an unusually extensive rate, and giving to holders who are disposed to realize, every advantage as to price, the tendency of values in all instances being to much higher figures. The recent address of the President elect, indicating his determination to administer the Government on an economical basis and to uphold the public credit, had the effect of dissipating all distrust in the financial policy of the incoming administration, and in the solvency and uprightness of the national government. The severe pressure brought about on Tuesday in the Money line temporarily injured the fund values, by inducing realizations, partly on speculative account; but late on Wednesday, there, was a fresh rally in prices of ½ per cent. from the lowest quotations of the day, on an improved demand, market closing strong and buoyant.

U. S. sixes of 1881 closed here on Wednesday at 114@114¼; U. S. Five-twenties of 1862, 114¾@115; U. S. Five twenties of 1864 at 111⅛@111¼; U. S. Five-twenties of 1865 at 112¾@113; U. S. Five-twenties of 1865, consolidated, 110¼@110⅜; U. S. Five-twenties of 1867, 110⅞@111; U. S. Five-twenties of 1868, 110¾@110½; U. S. Ten-forties at 109¼@109½; U. S. Six per cent. currency bonds, 101⅝@101¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 3.	Feb. 10.	Feb. 17.
Consols	93¼	93⅛	93
U. S. 5-20's of 1862	76¼	77	78¼
Erie	25½	24¾	24
Ill. Central	93½	94	96½

Railway and miscellaneous stocks have been more freely offered and have been depressed in price, on a less confident speculative demand, though closing rather more steadily on Wednesday, under the partial easing up in Money.

The Delaware, Lackawanna and Western Railroad Company have made an important reduction in their retail prices of Scranton Coal, and are now offering Stove, Grate and Egg at $6 50, and Chestnut at $6, per ton, of 2,000 lbs., delivered from their several yards in New York, Brooklyn and Jersey City.

General business has shown less activity and less firmness in the domestic produce line, especially in Cotton and Breadstuffs. Middling upland cotton closed dull and heavy on Wednesday at 29@29¼ cts per lb. The stock of cotton now here is estimated at about 67,000 bales. The receipts at the port this week, have averaged about 4,500 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 1,489,000 bales, against 1,427,000 bales same time in 1867–'8; exports, same time 737,000 bales, against 862,500 bales same time in 1867–'8; stock on hand at latest dates, 392,500 bales, against 387,000 bales same date 1868. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 997 pkgs., against 955 pkgs., same time last year. From Boston, 832 pkgs., against 2,045 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been very slow of sale at from 10@17c. per lb.; week's receipts, 5,383. Milch cows quiet, but quoted firm for good stock, the whole range being from $40@$125 each; receipts, 77. Veal calves scarce and in demand, at from 9@13½c. for inferior to extra per lb.; receipts, 600. Sheep and lambs have been moderately dealt in at from 5@8¾c., per lb.; receipts, 25,880. Swine have been in less demand at from 11@11¾c. per lb., live weight; receipts, 14,508. In foreign merchandise, there has been more movement particularly in Groceries, which have been quoted much firmer. The total imports of foreign dry goods, last week, were $2,057,682, and the total amount marketed $2,390,418. The value of foreign merchandise imported last week, was $1,887,065—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $3,941,747, against $4,037,820 same week last year; total since July 1, 1868, $151,398,208, against $138,688,570 in 1867–'8. The freight market has been dull and heavy. For Liverpool we quote flour at 1s. 6d.@1s. 7½d. by sail, and 1s. 9d.@1s. 10½d. by steamer, per bbl.; grain at 4½d.@5d. by sail, and 5d.@5½d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and ¼d. by steamer, per lb.; and heavy goods 17s. 6d.@25s. by sail, and 25s.@50s.

by steamer, per ton. Total number of vessels in port on Wednesday, 380.

The New York exports, exclusive of specie, for the week ending Feb. 16, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,686,417	$3,228,065
Prev. reported	19,256,893	17,437,506
Since January 1	$22,943,310	$20,665,571

The imports for the week ending February 13, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,278,902	$2 057,682
Gen. merchandise	2,758,918	1,887,065
Total for the week	$4,037,820	$3,944,747
Previously reported	18,552,617	25,212,362
Since January 1	$22,590,437	$29,157,109

The balance in the Sub-Treasury on Wednesday was $89,138,127 67.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New Haven and Derby Railroad.

For several weeks past the work of constructing this road has been suspended, owing to the company being unable to raise the necessary funds to complete the work. The city of New Haven having voted to guarantee the bonds of the railroad to the amount of $225,000, work has been resumed, and the road will be rapidly pushed to completion. If no further delays occur it will probably be in running order the latter part of the summer. The company have just advertised for proposals to build the road from the present terminus at Derby through the village of Birmingham to the village of Ansonia, a distance of one and a half miles, making the entire road thirteen miles long. It is expected that this portion will soon be under contract and be completed as soon as the main part. The entire road will cost about $1,000,000.

☞ At a meeting of the directors of the Cincinnati and Baltimore railroad company in Cincinnati on the 5th inst. Mr. John King Jr., of Baltimore' resigned the Presidency of the road, and Mr. W. T. McClintock, of Chillicothe, Ohio, was chosen his successor. Mr. William H. Kimbert, of Chillicothe, Ohio, resigned the position of Secretary, and Mr. John O'Donnell Smith, of Cincinnati, was elected in his stead.

☞ The Peterboro' and Lakefield Extension of the Peterboro' and Port Hope Railway has been completed and opened for traffic. It is nine miles in length; making the total distance from Port Hope to Lakefield about 39 miles. It is proposed to extend the road a further distance of about five miles either to Chomung Lake or to Buckhorn.

☞ A railroad has been projected to run from South Royalston, on the Vermont and Massachusetts Railroad, to Winchenden, on the Cheshire Railroad.

☞ The Wicomico and Pocomoke Railroad has realized on an average about $1,000 per month, over expenses, during the first six months of its existence.

Erie Railway.

SUPREME COURT, SPECIAL TERM—DECISION OF JUDGE CARDOZO—THE RECEIVERSHIP ORDER VACATED—THE DIRECTORS HAVE POWER TO ISSUE CONVERTIBLE BONDS, AND TO CONVERT THEM INTO STOCK.

August Belmont *vs.* the Erie Railway Company. —The decision in this case was made public on the 10th inst. This matter comes before the court upon an application to open an order made at Special Term, to allow the defendants to introduce proofs, which they could not produce when the motion, which resulted in that order, was heard, and thereupon to hear the motion anew; and, if found to be required by law and justice, to vacate the order previously entered, and declaring that the plaintiffs are not entitled to the relief they obtained, to deny their motion for that relief. This is a very ordinary proceeding, constantly occurring, the Judge says, but as the question was raised and elaborately argued, he reviews at length the authorities, premising by saying that the twenty-third rule of the court has nothing to do with the matter. Indeed it is manifest, and so it has been always understood, that that rule relates exclusively to ex parte applications made out of court to a "judge or justice" upon affidavits; and so the rule provides that upon making to a judge or justice an application for an order, in the affidavit upon which the order is asked the party shall state whether any previous application for such order has been made to any other judge or justice. But a motion upon notice to open an order is not addressed or presented to the Judge. It is an application to the court. Judge Cardozo concludes as a result of his review of the discussions, that if it be possible that anything should be deemed to be settled by authority, the proposition that a motion may upon application to the court be opened and heard anew, if the court in its discretion thinks sufficient reason exists for doing so, must be considered as conclusively established. To sum it all up briefly, it is well settled that whatever can be done upon motion to the court may by the court, upon further motion, be altered, modified or wholly undone. The second subject, do the defendants present such a case as justifies the granting of the preliminary motion to open the rule taken against them? is next considered, and Judge Cardozo takes this as the test of whether the motion to open should be granted. Have the defendants shown any material facts which were not presented to the court upon the previous motion, and if they have, were they, so far as such matters then existed, prevented from bringing them to the notice of the judge, by mistake, inadvertence, surprise, or excusable neglect?" The case, as insisted upon by each side, as argued by counsel and already published, is stated, and the points made by defendants that they were taken by surprise, because the case was taken from its regular place on the calendar, and that they had not sufficient time to prepare the necessary papers, are held to be well taken, and even those points are unnecessary, because the one conceded fact that this case is prosecuted at the risk and expense of persons other than the nominal plaintiffs, introduces a new feature, not developed before Mr. Justice Sutherland, which, upon authority, is decisive of the motion. This fact requires that any relief, especially upon an interlocutory motion must be refused. The other admitting Theresa Robinson as a party plaintiff, made by Judge Sutherland on the 19th of November, 1868, does not affect the matter. When a suit is brought by one on his own behalf and all others similarly situated who see fit to come in and avail themselves of its benefits, such others have no control of the litigation and are not authorized to interfere until a decree has been made in the cause (Innes *vs.* Lansing, 7 Paige R., p: 585.) It results from these views that the court has the power to open the order made at special term; that this is a proper case to exercise that discretion, and that upon the matter as now presented the order which was then made should be vacated, and the motion for a receiver denied and the preliminary injunction discharged. An order to that effect will accordingly be entered.

The Judge then proceeds to show why he thinks the order of Judge Sutherland so plainly erroneous in law as to justify a motion being entertained on that ground alone to vacate it as being the result of an obvious mistake:

It is not doubted that a stockholder of an incorporated company may have an injunction to restrain illegal acts of the directors, and in certain cases may have a receiver appointed of a particular fund, the proceeds of an unlawful act, Such was the case of Fisk, &c., *vs.* The Chicago and Rock Island Railroad Company, (36 How., P. R., p. 20.) But the bill in this action, while neither charging insolvency nor asking to dissolve and wind up the company, prays that "a receiver may be appointed of all and singular the funds and books and papers and rights of action of such company." It makes no case for any partial receivership. In fact, unless the general receivership prayed for and granted could be allowed, the extent of the plaintiffs' case in any aspect, would be for an injunction. That any particular fund, the result of any supposed illegal act, was sought to be reached, is quite out of the question; and, indeed that no such idea was either in the mind of the counsel for the plaintiffs or of the court, is settled decisively by the fact that, after the order for a most sweeping and general receivership was granted, the court in staying, to some extent, proceedings under it, expressly provided, "but this stay shall not prevent said receivers from calling upon the directors and officers of said company by legal proceedings or otherwise"—not for the proceeds of some excess of power, but "for accounts of the earnings and receipts of said company, and for payments of all surplus of said earnings over and above the amounts thereof necessary to pay the legitimate expenses of running said railroad and operating said ferries!" It would be quite pertinent and proper to cite against removing all the directors (which such a receivership in affect does) upon charges of misconduct against a few, the remarks of the court in Waterbury *vs.* Merchants' Union Express Company, (*ubi supra*:) "The infidelity or misconduct of some, or even of all the trustees or managers of such an association, affords no ground for taking away the rights of the shareholders who constitute the company either by dissolving it, or taking away its management and placing it in the hands of an officer of the court. In such a case, the principals of remedial or preventative justice go no further than to enjoin or forbid the misconduct or remove the unfaithful officer. I am not aware of any authority for dissolving a corporation or an unincorporated stock association, or for taking its management from its proprietors, or shareholders on the mere ground that one, or even all, of its trustees are unfaithful. The court may enjoin the trustee, or suspend, or remove him, and if necessary, may order a new election, but cannot substitute its own officer." * * * * Passing then from cases not presenting precisely the question which arises here, I refer to a General Term decision made by Judges Sutherland, Ingraham and Clerke in 1855, (Howe *vs.* Denel, 43 Barb. S. C. R., p. 505,) which is directly and fatally in point. The opinion was delivered by Judge Ingraham, both of his associates concurring; and as the syllabus of the reporter is a terse and truthful statement of the points presented and decided, I need only quote his language; "The visitorial powers conferred upon the Court of Chancery by the article of the Revised Statutes relative to proceeding against corporations in equity, can only be exercised by the Supreme Court, on an application made at the instance of the Attorney-General, or a creditor of the corporation, or a director, trustee or other officer having a general superintendence of its concerns. An action cannot be brought under the statute, by a stockholder against the corporation and its trustees to have the corporation dissolved and restrained from the exercise of corporate powers, to restrain the trustees from exercising anypowers as trustees, and for appointment of a receiver and the sale of the property of the corporation. Nor can the court entertain such an action, or grant the relief asked for, under its general powers as a Court of Equity. In no case, except in respect to moneyed corporations, or insolvent corporations, can a stockholder have a receiver appointed, on a preliminary injunction, with authority to take entire possession of the corporation, and thereby work its dissolution." To the same effect is the General Term, decision in Latimer *vs.* Eddy, (46 Barb., S. C. R., p. 61,) the opinion being delivered by Judge Sutherland, who among other things, says: "A Court of Equity has no visitorial power over corporations, except such as may be express'y conferred on it by statute." Here, then, this matter must end; for let it be remembered that the plaintiffs bring this action as stockholders, and that, as such, they have according to those cases, no standing in court to obtain the relief they seek; and those decisions, whether right or wrong—though I do not mean to intimate, for I have no doubt of their correctness—are of binding and controlling authority upon every Judge of the Court when sitting at Special Term.

Judge Cardozo then proceeds to give his views upon the question whether the directors have the power to issue bonds for the amounts they may borrow to complete and finish or to operate the road and convert them into stock:

The power is claimed to exist by force of the tenth sub division of the twenty-eighth section of the "Act to authorize the formation of railroad corporations, and to regulate the same," passed April 2, 1850. (Sess. L., 1850, chap. 140.) Against a construction of the statute which asserts the existence of the power to issue these, briefly termed, "convertible bonds," the plaintiffs cite the ninth section, and they claim that the stock can only be increased in accordance with its provisions, and they suppose that this construction was given to the statute by Judge Sutherland, last spring, in the case of The People *vs.* Erie Railway Company, and Schell and Bloodgood *vs.* the same. I think it cannot be said that the statute received any construction in these cases. Nothing can be said to have been decided by them except, which was proper enough upon the facts stated in the complaint, that the plaintiffs, under the circumstances therein disclosed, were entitled to the injunction they prayed. The bills in those suits charged that the issue of the stock, which was the subject of complaint there, was not made in good faith as a conversion of bonds lawfully issued for money borrowed; and that the bonds themselves were not given for money actually borrowed, but were issued to Drew as a part of a fraudulent scheme or contrivance by which he, for his personal benefit, while a director of the company and standing in a position of trust toward it, should be enabled to create additional shares of the stock of the corporation. Now, if the Judge, upon all the papers before him, thought that charge sustained, then it was not necessary, in order to continue the injunction, that he should consider the question

of power to issue convertible bonds at all, which undoubtedly the complainants did also raise. As the Judge did not accompany his decisions with any statement of the facts which he found, or the reasons upon which he based his conclusion, I cannot say that he examined or passed upon the question now presented. He did not enlighten us by any opinion as to what he deemed the true construction of the statute, and we must therefore inquire into it for ourselves, without the assistance which we should otherwise have derived from his labors. When a case is decided, without any opinion being given, and there can, by any reasonable view of it, be more than one point upon which it could have been disposed of, it cannot be regarded as an authority on any question, because it is impossible to say which point the Judge examined and decided. So, also, no principle can be deemed to have been settled, by the General Term having affirmed those cases, because the affirmance was by default. Nothing was argued —nothing considered, and, of course, nothing decided. I do not doubt that if the court were satisfied that bonds were about to be issued by the directors of a corporation, not for the payment of money actually borrowed for the purposes authorized by the statute, but as a part of a fraudulent device to increase the stock, the issuing of them might be restrained by injunction; nor that while the bonds remained in the hands of any persons affected with notice, that they did not represent a *bona fide* indebtedness, but were issued with such fraudulent design, the issuing of stock in conversion of them might also be enjoined. But, as the papers present the facts, that does not touch the question here. The point here involves just this proposition: Have the directors power, in a proper case, to issue convertible bonds, if the capital stock of the corporation be full, and the stockholders do not authorize any increase of it, pursuant to section 9? Neither of the learned council cited any case, except those from which I have already shown we can derive no light, and I know of none myself purporting to construe the statute on this subject. To my mind, however, the question is neither doubtful nor difficult. Section 9 and subdivision 10 of section 20 are entirely distinct, and contemplate and provide for entirely different purposes. It seems to me the Legislature had two cases in contemplation. One was the mere increase of capital stock; that was to be the act of the stockholders. The other was the borrowing of money for certain purposes. Power to do that, with such incidents as should make it effectual, and afford the best facilities to execute it in the most advantageous methods for the interests of the company, was conferred upon the directors. By section 9, the case of mere increase of capital stock was regulated. Such increase might be desirable, yet perhaps there might be no pressing haste about it; and in such cases compliance with the detail required by section 9, which would consume considerable time, might be well enough. But another contingency might happen, for which the slow process of that section might be totally inadequate. It might be that the sale of stock, if any remained unissued, would not be rapid enough for the need of the corporation; or perhaps, when all the stock had been taken, its necessities might, temporarily, be so urgent that they would not bear the delay of proceedings to increase the stock under section 9, and that the life of the company depended upon prompt action. Besides, it is by no means clear that an increase by the act of the stockholders is authorized to relieve the company from that through which it might be placed in the greatest strait, viz., a previously incurred debt. Such cases would be covered, and such calamities averted, by the tenth subdivision of section 28, which authorizes the borrowing of money for certain purposes, and the issuing of bonds, and the mortgaging of the corporate property and franchises. It is plain that the two sections are wholly independent of each other, and that one refers, as I have said, to mere increase of stock, and the other to the borrowing of money, and securing its payment. Now, that the power to borrow money, issue bonds, and mortgage the corporate property and franchises is conferred on the directors, is not denied; and the statute gives it plainly, but not more so than it adds that the "Directors may confer on any holder of such bonds the right to convert the principal due or owing thereon into stock, under such regulations as the directors may see fit to adopt." It is argued that this right can only be conferred when there is stock remaining unissued. The answer is, the statute has not said so. Nor has it said that the power, which is expressly granted to the "directors"—not to the stockholders—shall be in anywise restricted or controlled by section 9, and it was very easy to have expressed it, if such had been the design, and I must assume that it would have been done if such had been the intention, because there is nothing inconsistent in providing that the stockholders may increase the stock in a certain way, and that by the action of the directors an increase of stock may be worked in another way. The power to give the privilege of converting the bonds into stock is conferred in terms upon the directors, and no condition is imposed upon the right to give such option except that the bonds shall have been issued for the purposes above mentioned. The power, therefore, to issue the bonds, in a proper case, with the right to authorize their conversion into stock, is beyond doubt. And that being so, the right of the directors to issue stock in conversion of those bonds, is clear, not only upon a fair and reasonable reading of the section, but upon the rule that when a power is granted everything which is necessary to fully effectuate it and the acts it authorizes, is implied if not expressed; and also because it is but doing voluntarily what by a suit the company might be compelled to do. The holders of such bonds would be entitled either to have the contract to convert them into stock specifically performed or else to receive compensation in damages, and whether the one or the other, the pecuniary effect on the company would be the same. Nor do I think that it is at all surprising that the power should have been conferred on the directors. The Legislature had seen fit, and necessarily to the due administration of the affairs of corporations, to authorize the borrowing of money for certain purposes, and the issuing of bonds and the mortgaging of the corporate property and franchises. Through that power, if it stopped there, by mortgaging the "corporate property and franchises," the directors could strip the stockholders of their property. After having thus evinced the intention to repose confidence in those in whom the stockholders, by electing them to office, declared they trusted, it does not strike me as regular that the Legislature should have authorized the directors to issue stock for such bonds, and thereby convert creditors who may have had a lien by mortgage upon all the "corporate property and franchises" of the company into mere ordinary stockholders. Such a power was greatly for the benefit of the company and its stockholders, and is insignificant in trust when compared with the capacity to ruin the corporation which the right to mortgage conferred. If I had doubt on this subject, in the absence of any adjudication, the practice of directors of this and other companies, brought by annual reports to the notice of the State Engineer, the Legislature, the Attorney-General, and stockholders, and tacitly acquiesced in, until quite recently, would certainly merit attention. The practice of this and of kindred companies, the New York Central, the Hudson River, &c., seems to have been uniform in favor of the power. This practical exposition of the statute, in the absence of judicial decision, is entitled to great weight and, in a doubtful case, should determine the construction which the law should receive. Mr. Sedwick says (Sed. on Stat. and Con. Law, p. 255) that usage, custom, or practice is of similar value to judicial decisions in the construction of statutes, and he cites the maxim, "*optimus legum interpres consuetudo;*" also Lord Corke's remarks, that "it is the common opinion, and *communis opinio* is of good *authoritie* in law." (See also Broom's Legal Maxims, p. 421.) But, as I have already observed, I have no doubt that the statute is susceptible of but one construction, and that sustains the right of the directors acting in good faith and for the purposes mentioned in the statute, to issue "convertible bonds" and to convert them into stock, within the period allowed by law, and "under such regulations as they may see fit to adopt." Finally, I have only to add that I declare the conclusions which I have reached, without hesitancy, not only from my conviction of their accuracy, but because of the action of the State through its Attorney-General, which I incline to think would alone introduce such a new element into this case, as, if there were no other ground, to demand the vacating of the previous order. That but the act of the sovereign power of the State overreaches and overrides this private litigation. In that action all the facts can be properly investigated and ascertained, the rights of everybody amply protected, and justice regularly and according to the statute done alike to the State and all others interested; and therefore, even if it were different before, this suit for any legitimate purpose has become wholly unnecessary. Since the foregoing opinion was prepared, the case of Jenks *vs.* The Central Railroad Company has been published, in which Judge Ingraham considers the question of the power of the directors to issue bonds and convert them into stock without the action of the stockholders, and although the capital stock be full, and he construes the statute of 1850, in that respect, in the same way that I have done. The question was necessarily presented and distinctly met and decided, and that case is therefore an authority directly in point, sustaining the views I have expressed.

Oil Creek and Allegheny River Railroad.

We give elsewhere the Report of the President of this company entire, togther with the names of the officers and directors for the current year. It is said that by this combination entire harmony is preserved between the trunk lines, the New York Central route being represented by Charles H. Lee, Vice President of the Buffalo and Erie road; the Erie Railway Company by its Vice President, A. S. Diven; the Pennsylvania Company by its Vice President, Thomas A. Scott; the private stockholders having as their representatives Messrs. Fargo, Wright, Moorhead and Gay. The re-election of Mr. Sweetzer to the position of General Superintendent caused general satisfaction. Mr. Phillips, the Secretary and Treasurer, is equally and deservedly popular.

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of January, as compared with the same period of the year 1868:

	1869.	1868.
From freight.....	$444,012 41	$321,700 72
" passengers.....	155,543 75	157,586 62
" express matter...	10,257 00	8,626 50
" mail	7,825 00	7,825 00
" rent of railway...	7,083 33	7,083 33
" miscellaneous....	1,000 00	2,682 99
Total.....	$625,721 49	$505,505 16
Expenses	483,816 13	398,916 27
Net earnings.....	$141,905 36	$106,588 89

This shows a increase in earnings of $120,216,-33; with a increase in expenses of $84,899 86—making the increase in net earnings, $35,316 47.

☞ The cities of Biddeford and Saco, Me., are agitating the subject of building a railroad up the valley of the Saco river, tapping the Portland and Rochester and the Portland and Ogdensburg roads.

Peat Fuel.

The consideration of peat as a fuel has been lately presented to the public by J. B. Hyde, in a letter published in the *N. Y. Sun*, of which we furnish a copy, believing it to contain valuable facts and suggestions upon the subject. Few persons are aware of the numerous peat beds scattered throughout our country, or of the superior qualities it possesses for fuel. It has been proved by experiment that it fully equals in heat giving properties double its weight in wood, and that for generating steam and smelting ores there is nothing equal to it. The great difficulty in the way of introducing peat into use has always been the expense of preparing it as a merchantable article. Though numerous patents have been obtained for grinding and manipulating peat, yet in every instance we believe it has been found that whatever theories the inventors may have propounded the practical operation of their machinery from day to day in turning out prepared or manufactured peat has been, owing to the high price of labor in this country, attended with an expense fatal to their success. We ought to except from these remarks the Canada process by which the Grand Trunk Railway there is supplied; but this process is adapted to peat beds of large dimensions rather than to those of ordinary size. If the machine referred to by the "*Sun's* Correspondent," will produce good commercial peat at a cost of less than $1.50 per ton, we have no hesitation in saying that it will add hundreds of millions to the wealth of the country, and that our peat beds will become little inferior in value to the coal fields of our country:

Sir: I beg to take exception to a paragraph in the *Sun* of the 10th inst., adverse to the utilization of peat, and respectfully ask your permission to allow me to reply.

Trees, shrubs, grasses, and mosses all produce peat. Pine, cedar, juniper, and cypress yield peat of a more inflammable nature than less resinous plants. Its property for combustion therefore, and also for heating, varies according to the nature of the original vegetable. Peat, therefore, being composed from the solid or fibrous parts of vegetable matters, the carbon from which has been concentrated by chemical disintegration, without the loss of one atom of its original calorific power, it follows that in its condensed condition it must possess great heating properties.

If a bed of peat be skirted in whole or in part by hilly or higher ground, the water shed will carry down upon it earthy matter, and if the bed be adjacent to an overflowing water course, a like effect may ensue, particularly in time of "freshets." Such adulterations may permeate these accumulations of ages from first to last, and consequently impoverish the value of the peat throughout. This earthy matter is the chief cause of difference in the heating values of peat, and it will always be found admixed with the ashes, causing this residue to vary from three to fifty per cent. of the weight, beyond which the material is difficult of combustion. Of course, the less ash the better peat, and the test is within the control of any one who can make a fire with the material. The proportion of peat beds thus impoverished is, however, small.

Peat *in situ* is always spongy. If raised to the surface and dried, this porosity will not be disturbed. In that condition peat is generally unfit for commercial use; yet there are exceptions. But if the moist peat be manipulated, the cellular structure will be broken up, and the mass reduced to a smooth, paste-like consistency, which will dry compact and solid, and be in the best condition for use as a fuel. To do this satisfactorily and at proper cost, and also to dry it economically, have furnished the chief problems, a solving of which has caused much loss and disappointment. All attempts to mold peat by pressure, or to dry it artificially, have and always must economically fail; and to accomplish one or both these results has been the chief cause of all the disastrous expenditures in peat utilization.

Peat exists throughout the Middle and Northern and Western States of our country in incredible quantity, and is generally found favorable for working in localities remote from convenient coal transportation, and where wood is scarce or dear. You will admit the great importance of its being produced at such cost as will justify its sale at a price proportionate with other fuel.

I know of an unfinished peat pressing machine which has already cost over fifty thousand dollars, and which I had the presumption to say at its commencement would be sold for iron after its first trial. I know a peat enthusiast who paid $1000 an acre for a choice peat bed, when he should not have paid one quarter that money. I know of several instances where thousands of dollars have been expended in working out impracticable theories for treating peat, but where the projectors were without any previous practical knowledge of that material, yet where an experienced person would have predicted failure as inevitable. The promoters in all these cases will doubtless give you the hand of grasping concurrence upon your article of the 10th, and wish they had never heard of peat.

On the other hand, the Grand Trunk Railway in Canada, which traverses immense districts of its own timber lands, which for fuel costs the expense of cutting only, and where labor is less than half what it costs with us, has nevertheless been using peat exclusively for fuel during the past year, and their saving has been over £10,000 from so doing. A gentleman in Dutchess County during the past summer has harvested peat at a cost of about $2 50 a ton, and has sold several thousand tons of it to the Dutchess County Railroad at $5, delivered at the bed, and it is giving full satisfaction.

I can furnish you with many cases of its employment in this country and Europe with entire success as a cheap and efficient fuel in the trades and arts, and know of a thoroughly practical, substantial, and durable machine which will produce the best quality of commercial peat at a cost of less than $1 50 a ton, guaranteed by responsible parties. With great respect, your obedient servant.

J. B. Hyde.

Boston and Albany Railroad.

The annual meeting of the stockholders of this corporation was held in Boston on the 10th inst. C. W. Chapin, Esq., President, in the chair. The annual report of the directors was presented and adopted.

The President, in reply to certain inquiries by Mr. S. Bemis, of Watertown, said that the carrying out the preliminary work of consolidation had occasioned a necessary increase of expense. The receipts had been reduced by $300,090, owing to the reduction of the rate of freight by one-quarter of a cent. per ton, and the public had been benefitted to that amount.

He did not think that the expenses could be reduced the coming year. The rolling stock had been largely increased by the addition of new cars and locomotives. It was also stated that the directors had control of the Grand Junction road, but difficulties had arisen in regard to a clear and undisputed title to the property owing to the interposition of third parties, who claimed certain rights in the property which, it was alleged, might be jeopardized by a transfer of the legal title to this corporation.

Mr. S. Bemis made a motion to the effect that the directors be authorized to issue further new stock and to pay the sterling bond loan of $2,051,520 when, in their judgment, it was for the best interest of the corporation to do so. The motion was adopted.

The committee appointed to sort and count the votes for the election of Directors for the ensuing year, reported that the whole number of votes was 11,280; necessary to a choice 5641. All the votes given were for the following gentlemen, who were accordingly declared re elected: Chester W. Chapin of Springfield, Daniel Denny of Boston, Ignatius Sargent of Brookline, Josiah Stickney of Watertown, Ginery Twitchell of Brookline, D. Waldo Lincoln of Worcester, William Claflin of Newton, James D. Colt of Pittsfield.

Illinois Central Railroad.

The statement of this Company for the month ending January 31, 1869, is as follows:

LAND DEPARTMENT.

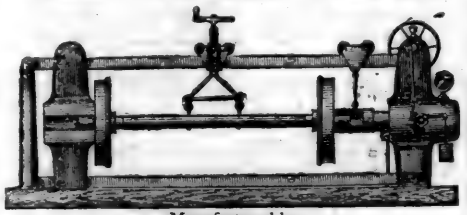
Acres Construction Lands Sold	8,232.48 for	$81,049 34
Acres Int. Fund Lands sold	280.00 for	4,807 00
Acres Free Lands sold	1,560.00 for	22,631 60
Total sales during month of January, 1869	10,072.48 for	$108,487.04
To which add Town Lot Sales		345 00
Total of all	10,072.48 for	$108,832 94
Cash collected in January		$253,821 61

TRAFFIC DEPARTMENT.

Receipts from Freight		$373,577 00
do. Passengers		120,487 55
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		90,000 00
Total Receipts in January, 1869		$594,422 88
Total Receipts in January, 1868		$519,497 04
Estimated earnings in the month of January, on the D. & S. C. R. R., not included above		$87,233 02
Corresponding month of 1868		$52,509 01

Gold Contracts.

In the United Supreme Court, on the 15th inst., in the case of Frederick Bronson, executor, etc., plaintiff in error, *vs.* Peter Rodes, Chief Justice Chase delivered the opinion of the court, to the effect that contracts for the payment of coin should be enforced by the court, according to the intent of the parties. In this case a mortgage was made in the State of New York in 1851 to secure payments of $1,500, and it was provided that the money should be paid in coin, the legal money of the United States. In January, 1865, tender was made in Treasury notes, which was refused. The New York Court of Appeals held that the tender was a discharge of the mortgage, and directed it to be cancelled. The Supreme Court how hold that there are two descriptions of lawful money, both sanctioned by law, and both a legal tender; that in view of this fact, where coin is provided to be paid, judgment should be for such description of money; but where no description is named judgment should be entered generally without specification. The judgment of the New York Court of Appeals is reversed with costs, and the cause remanded for further proceedings in conformity to this decision.



☞ The survey of the Ascutney Railroad, from Gasset's station, Vt., through Springfield to Claremont has been begun.

☞ The contract for the construction of the first division of the Georgia Air-line Railroad extending from Atlanta to Charlotte N. C., has been awarded to Messrs. Scott, Bondurant & Adams, of Lynchburg, Va. The extent of the contract given them is twenty miles, being that portion of the road immediately east of Atlanta, which is all that has as yet been let. They will commence operations at once.

☞ A party of gentlemen from the south portion of Middlesex County, Mass., have commenced the examination of a proposed railroad route from Framingham to Lowell. The plan is to follow the Sudbury river, through Wayland to Concord, and thence the Concord river *via* Billerica to Lowell. They report the route as far as perambulated to be surprisingly favorable to grades and curves.

☞ Engineers are now engaged in surveying the route for a railroad from Freeport to Bulter, Penn.

CAR WHEEL PRESS.

Manufactured by

D. P. DAVIS,
Mechanical Engineer,
26½ BROADWAY, N. Y.
AGENT FOR
T. S. DAVIS' PATENT BALANCE PISTON VALVES, & STATIONARY ENGINES, Cut Off Operated by the Governor.

Over 14,000 horse power of Engines with this Valve are now in use, combining the greatest economy in fuel, simplicity and durability of parts, with low cost, they being cheaper than any other first-class Engine built.

Engineers desiring to adopt these improvements, either for new work or to improve the old style of Engines, will be furnished with drawings, and all information necessary to apply them in the best and cheapest manner. Circulars sent upon application therefor.

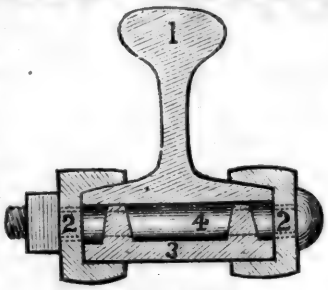
HAMILTON SQUARE
RUBBER WORKS.

C. V. MEAD & Co.,
Manufacturers of Superior Quality
OF
INDIA RUBBER
CAR SPRINGS,
BRAKE TUBING, ETC.
P. O. Address Box 588, TRENTON, N. J.

TESTIMONIAL.

Baltimore, Md., April 16, 1868.

We have used, on the Baltimore and Ohio Railroad, during the past year, about 13,000 lbs. of India Rubber Car Springs, manufactured by the Hamilton Square Rubber Works, Trenton, N. J., (C. V. Mead & Co.,) and have found them equal to, if not superior to any we have used in past time, and on much more reasonable terms.



JOHN OLIVER,
Purchasing Agent Baltimore and Ohio Railroad.

CAUTION.—The above firm are not connected with any other Manufacturers using the name of Mr. Mead.

THE PHŒNIX IRON COMPANY'S
NEW SUSPENSION RAIL JOINT.

Cross Section of Rail Joint.

Side Clamps 14 in. long, showing Rail Stop.

Bottom Ribbed Plate, 14 in. in length.

The above diagrams show the general design of this new ***Suspension Rail Joint,*** which, after long and successful trial on the Philadelphia, Wilmington and Baltimore, and other Railways, is now offered to Railway Companies. The cut on the left gives a cross section of the finished joint, showing the rail (*1*) resting upon the ribs of the bottom plate (*3,*) with the flanges of the rail and the bottom plate embraced by the side clamps (*2,*) and held firmly in place by bolts (*4*) In screwing up these bolts, the bite or grip between the bevel on the side clamps corresponding with the bevel on the flanges of the rail, insures great vertical and lateral rigidity to the joint.

Several careful tests have proved that the deflection of two pieces of rail thus fastened at the joints and subjected to a transverse strain between supports five feet two inches apart, was but a trifle more than that of the same rail uncut, tested in the same way. The value of the joint in this respect was 85 per cent. of that of the solid rail, while the best fish joints, similarly tried, gave less than 50 per cent.

No holes are required to be punched through the neck of the rail, nor slots in the flanges, only a quarter circle notch of about half an inch radius is necessary to be cut out of the corner of one of the flanges of the rail to fit the "stop" shown in the upper right hand cut. This is a very important consideration, as holes punched or drilled in the neck are apt to split the rail longitudinally, and in *Steel Rails particularly,* is the principal cause of breakage.

All that portion of the joint, shown in the cut of cross section, below the bottom of the rail, bears endwise against the cross-ties, and prevents any creeping of the track. It makes a very firm joint, does not get out of order, and can be fitted to any size of rail. When ordering, send a sample piece of rail two feet long. Address,

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our

LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

The Hebbard Car Spring.

The problem of supporting cars, and consequently of transporting freight and passengers with the least concussion and in the best possible manner over the necessary irregularities of a track, is one still far from solution. But we have made, and are still making immense progress.

Car springs, originally heavy, extended, and liable to frequent failure, have become compacted and practically reliable. Among the newest and most rapidly progressing in public favor, is that patented by Albert Hebbard, of Buffalo, and John P. Onderdonk, of Philadelphia, March 13, 1866, and although so recently invented it is already extensively introduced, and is now manufactured upon a large scale by The Hebbard Car Spring Co. The peculiarity of the construction is very clearly shown in the accompanying figures.

The novelty lies in arranging a series of spiral springs, having their spirals coiled in opposite directions, one within the other. Four is the favorite number for these spirals, but a greater or less number of springs may be thus arranged in each set or compound spiral if desired. Each is made of the best steel, with the best temper.

The inner coils being necessarily shorter are made slenderer so as to bear their proportion of the load and afford the proper elasticity. It will be seen that the resilient power of every particle of the steel is made available to the fullest extent without straining. The coils when overloaded rest upon each other without risking the abrasion or the destruction of any part.

The passenger and baggage springs, are, as constructed by the hands of most skilful workmen, about 6½ inches in diameter, and from 6½ to 10 inches long. They exhaust at between 5 and 6 tons. The freight or buffer springs are 5½ inches in diameter, and vary in length according to the requirement ranging from 4 to 9 inches. They exhaust at between 4 and 5 tons, an increased length giving of course greater range of compression when used for buffers, but not materially affecting the maximum force which they can resist before becoming fully compressed.

The construction is very simple, and appears, so far, eminently free from objection. These springs have been severely worked on cars for upwards of two years; and they are now in use in considerable quantities, and are being ordered for several of the most prominent railroads. Among those on which these springs have been or some time in successful use, are the New York Central, the Chicago, Burlington and Quincy, the Central Pacific, the Boston and Albany, the Boston and Lowell and the Lehigh Valley.

The company are represented by Mr. M. B. WASHBURN, General Agent, at 137-141 Elm street, N. Y., to whom all communications can be addressed.

Peninsular Railway.

The annual meeting of the stockholders of this company was held at Battle Creek, Mich, on the 20th of January. L. D. Dibble, Esq., President, in the chair. On motion it was

Resolved, By the stockholders of the Peninsular Railway Company, that an agreement bearing date the 31st day of December, 1868, made by and between the Port Huron and Lake Michigan Railroad Company, by William L. Bancroft, their Secretary and Treasurer; the Peninsular Railway Company, by Leonidas D. Dibble their President. and the Peninsular Railroad Company, by Thomas S. Stanfield their Pres dent, and approved and adopted by the Board of Directors of the Peninsular Railway Company, be, and the same is hereby approved and adopted.

The stockholders then proceeded to the election by ballot of nine directors, which resulted in the choice of the following gentlemen: Martin S. Brackett, William Wallace, Frederick Dale, Stephen Eldred, Leonidas D. Dibble, Alonzo Noble, Sylvador T. Read, Levi Aldrich, and Cyrus Cummings.

The annual report of the President, which was presented and accepted, is as follows:

To the Stockholders of the Peninsular Railway Company:

In obedience to the by-laws, I proceed to report "the condition and affairs of the company, for the year ending on and with the 31st day of December," 1868.

On the 13th day of February last, the said "The Peninsular Railway Company" was consolidated with the "Peninsular Railway Extension Company," under and by the corporate name of "The Peninsular Railway Company," the total length of the line of which is one hundred and eight miles. That part of the line formerly belonging to the first named company, is, for business purposes, denominated, "East Division," and that, of the last named company, "West Division." Accounts are kept with the "East Division," "West Division," and the "General Fund."

On the same day, the Board of Directors, by resolution, authorized me to borrow money, and to make bonds to an amount not exceeding $1,800,000, and to secure the payment of the same by mortgage on the property of the company, for the purpose of providing iron and rolling stock for your road. On the 23d day of November, last, the Board appointed me the Fiscal Agent of the company, and authorized me to negotiate for iron and equipment of the road, and, also to use the bonds and a portion of stock of the company for that purpose. In accordance with such authority, I commenced such negotiations, and found that an increase of the capital stock, and the issue of preferred stock, would be necessary in the making of the contract, and a meeting of the Directors was accordingly held on the first day of December, who, at that meeting, called a meeting of the stockholders to be held on the 31st day of December, 1868, at which meeting, the stockholders, by a large majority and a unanimous vote, authorized an increase of capital stock and the issue of preferred stock. The capital stock of the company is now $1,500,000. Negotiations for the sale of the entire amount of bonds, and for the purchase of iron and rolling stock for the entire line, of a most favorable character, are nearly completed, and the contracts will be signed and exchanged, within a very few days. By the terms of the contract, the iron will be furnished in June, from Battle Creek to Charlotte; in July, from Charlotte to Lansing, and from Cassopolis to the Indiana State Line; in August, from Cassopolis to Schoolcraft; in September, from Battle Creek to Climax, and, in October, from Climax to Schoolcraft, and for each or any of the consecutive divisions, before those dates, in case they are in readiness to receive the superstructure.

A contract was made and entered into on the 31st day of December, 1868, by the Hon. William L. Bancroft, Secretary and Treasurer of the Port Huron and Lake Michigan Railroad Company, on the part of said company, Hon. Thomas S. Stanfield, President of the Peninsular Railroad Company, of Indiana, on the part of said company, and by me, on the part of this company, for the purpose of providing for the doing of a "through business" between Port Huron and Chicago, and intermediate points, which has been approved by your Board of Directors, and which will be submitted to you, at this meeting, for your approval, and which I recommend be done. It will give to our line the same strength, almost, as a consolidation into one corporation, and still saving to ourselves, our own local management. Arrangements for a first class line through Illinois and into Chicago, as a continuation of our line, are already agreed upon, and it is expected that that part of the line will be completed and put in operation during this year. The Port Huron and Lake Michigan Railroad Company have closed a contract for the negotiation of their first mortgage bonds, and for the purchase of iron and equipment for their entire line, from Port Huron to Lansing, at which place they connect with our road, on such terms, that their road will be completed during this year. The Peninsular Railroad Company, of Indiana, can close a contract on like terms with ours, for the line through Indiana, at any time.

Since the consolidation of our two companies into one, the Board of Directors have let a contract for chopping, clearing, grubbing, grading, bridging, culverts, cattle guards, farm and road crossings of that part of your road between Battle Creek and the Indiana State Line, known as the "West Division," to Messrs. Britton & Russell, upon which the work has been progressing during the year.

But very little has been accomplished during the last year in obtaining subscriptions to stock, to complete the road bed, and to tie the same. From the best *data* I can obtain, it is estimated that we still need at least $150,000, for that purpose. The near approach of the time for laying iron will necessitate also the raising of at least $50,000, in addition to the above amount for fencing and station building. It is estimated that not to exceed $50,000, of the total amount can yet be obtained by subscriptions along that part of the line which has subscribed the least, and that the balance can be obtained by a Municipal Enabling Act, which will probably be passed at the present session of the Legislature.

It is now but about two years since our work commenced. In that time, we have completed 50.82 miles of road bed, including bridges, culverts, cattle guards, farm and road crossings, and delivered along the line, 64,507 ties. We have never been obliged to stop our work from the time we commenced, which few roads can boast. The Flint and Pere Marquette Company obtained its land grant in 1857, began work in 1858, opened its road to Flint, 33 miles, in 1863, and to Midland, 59½ miles, in 1867. The Flint and Holly road was begun early in 1862, and finished 17 miles, late in the Fall of 1864. The Grand Rapids and Indiana road was surveyed in 1855, obtained a land grant of nearly 1,000,000 acres in 1857, and only opened 20 miles of its road on the 23d day of December, 1867. The road from Lansing to Owosso, 29 miles in length, and having a large and valuable land grant, was begun in 1858, and opened in 1862. The Grand River Valley road was commenced in 1863, and has, at this time, iron on only 40 miles. Even the Michigan Central was six years in extending its road from Marshall to Chicago, a distance of 177 miles. From the foregoing, it will be seen that we have extended our line much more rapidly, under all our difficulties, than any of those roads.

The commercial world look upon this as a grand enterprise, and as an important line, not inferior to any of the Trunk lines of the country, connecting as it does, by a line shorter than any existing line, the wealth of the New England and Middle States, their manufactures and commerce, with the great and rapidly growing West, China, and the fabulous wealth of the Indias.

The Annual Report of the Treasurer shows that there has been paid in to him as follows, viz:

By late Treasurer	$17 80
East Division Collectors	31,323 72
West Division Collectors	52,443 34
Total	$83,784 86

That he has paid out during the year the following sums, viz:

From East Div. funds, on East Division order		$28,497 71
On General Fund orders		2,731 91
		$31,229 62
From West Div. funds, on West Division orders	$45,541 99	
On General Fund orders	3,459 19	
		49,001 18
		$80,230 80
Cash on hand on East Div.	$111 90	
" " West "	3,442 16	
		3,554 06
Total, as above		$83,784 86

There have been sold by me since my last Annual Report 272 municipal bonds up to and including the 31st day of December, 1868, for the sum of $27,804 24.

Of which amount there has been applied to East Division purposes	$25,050 73
To General Fund purposes	2,753 51
Total	$27,804 24

The total amount paid into the company for the year ending Dec. 31st, 1868, is $111,589 10. Of that amount there has been paid out as follows:

By Treasurer: E. DIV.	W. DIV.	GEN. FUND.
$28,497 71	$49,541 99	$6,191 10
By President:		
$25,050 73	.....	$2,753 51
$53,548 44	$45,541 99	$8,944 61

East Division	$53,548 44
West Division	45,541 99
General Fund	8,944 61
Cash on hand	3,554 06
Total	$111,589 10

By referring to the report of the Secretary, it will be seen that the total amount of all orders drawn against all funds from the 11th day of January, 1868, to and inclusive of the 31st day of December, 1868, is $113,393 96

Orders drawn previous to Jan. 11, '68.	107,393 67
Total orders drawn to Dec. 31, 1868	$220,787 63
Amount paid Treas. in '68.	$83,784 86
" previous "	61,816 17
Rec'd on sale of bonds "	27,804 24
" " " 1867	32,633 78
	206,039 05
	$14,748 58
Add to above amount bank note	2,200 00
Total indebtedness Dec. 31, 1868.	$16,948 58

The total amount of subscriptions to the capital stock of the company, as far as can be ascertained from the Treasurer's books, and accepted by the company, and the amounts paid thereon, and the amount still unpaid will appear from the following statement. Books in the Secretary's office might, perhaps, show a larger amount of subscriptions, but they are not accessible, for the

purpose of making this report, they being in Cassopolis.

Subscription on East Division		$126,475 00
" West "		154,500 00
Total		$280,975 00
Paid on East Division	$97,664 84	
" West Division	52,443 34	
		150,108 18
Still unpaid on both divisions		$130,866 82
The total amount of municipal bonds that have been delivered to the company up to and including the 31st day of Dec., 1868, is 762		$76,200 00
Of which were sold at that date 613.		61,300 00
On hand Dec. 31, 1868, 149		$14,900 00
There are still to be delivered to the company bonds as follows, viz:		
By the City of Lansing, 222		$22,200 00
" Town of Benton, 78		7,800 00
" " Penfield, 107		10,700 00
" " Battle Creek, 146		14,600 00
Totals 553		$55,300 00

GENERAL SUMMARY.

Subscriptions unpaid	$130,866 82
Bonds not sold	14,900 00
Bonds to be delivered	55,300 00
Total	$201,066 82

The total amount of assets to carry on the work after paying the above amount of indebtedness is $184,118 24.

The bonds of the city of Lansing were dated and delivered on the 1st day of January, 1869.

At least three-fourths of the right of way for the entire line has been obtained by donation and purchase, but the amount paid therefor cannot be readily ascertained from inability to obtain convenient access to our records.

The Chief Engineer's Report is quite full and shows that a large amount of work has been done, and material furnished since the commencement of our work.

Upon the Eastern Division the value of the work done and material furnished is	$135,771 64
Upon the Western Division	50,382 80
Total	$186,154 44

Upon the East Division, 35.19 miles of road bed are completed, 266,640 cubic yards of earth have been moved, 23,263 cubic yards of hard pan, 566 cubic yards of excavation below water, 9,309 perch of rock moved, 197.96 acres chopped and cleared, 18.52 acres grubbed, $3,398 06 paid for extra haul, $331 47 for extra work, 5,375 cubic feet of timber, not in structures, and 36,452 cubic feet of timber, in structures, have been delivered, 29 bridges have been completed, of the total length of 2,243 feet, 33 culverts are completed, 3,680 lineal feet of piles have been driven, 24,068 feet, board measure, of plank have been put into cattle guards, foundations, and other work, one Howe Truss Bridge across Grand River, at Lansing, one hundred and eighty-feet in length, and 58,272 ties have been delivered.

Upon the West Division 15.63 miles of road bed are completed, 175,522 cubic yards of earth have been moved, 47.46 acres have been chopped and cleared, 5.76 acres grubbed, 1,616 cubic feet of timber, not in structures, and 2,586 cubic feet in structures, have been delivered, 5 culverts completed, 1,263 lineal feet of piles driven, 7,463 feet of plank, board measure, placed in cattle guards, foundations, and other work, and 6,235 ties have been delivered.

I cannot close this report without acknowledging the invaluable services rendered by your able Treasurer, Clement Wakelee, Esq., in the financial management of the affairs of the company; of Martin S. Brackett, Esq., our Attorney and right of way Agent; Clement F. Miller, Esq., Chief Engineer, and of the Directors, and other officers of the company.

The work done by your contractors, Messrs. Britton & Russell, is well done.

All of which is respectfully submitted.

L. D. DIBBLE, *President.*

BATTLE CREEK, MICH., Jan. 20, 1869.

Pennsylvania Railroad.

OFFICE PENNSYLVANIA RAILROAD COMPANY, PHILADELPHIA, Feb. 10, 1869.

To the Shareholders of the Pennsylvania Railroad Company:

The Directors have the gratification to report to you the results of another year of prosperous business upon your railway, the details of which are shown in the following statements:

Earnings:		
From passengers		$8,581,903 94
" emigrant passengers		78,244 29
" mails		99,981 25
" express matters		291,881 21
" general freights		12,882,165 30
" miscellaneous sources		349,321 32
		$17,233,497 31
Expenses:		
For conducting transportation	$3,609,233 18	
For motive power	3,361,694 42	
For maintenance of cars	1,442,735 90	
For maintenance of road	3,268,896 46	
For general expenses	178,423 92	
		11,860,983 88
Leaving net earnings for the year 1868		$5,372,513 43

The total amount of revenues compared with last year is:

1868	$17,233,497 31
1867	16,340,156 36
Increase	$893,340 95

The changes in the sources of the revenue are shown below:

Decrease in emigrant passengers	$43,408 97
Decrease in express matter	38,613 39
Decrease in miscellaneous	124,707 22
	$206,729 58
Increase in regular freights	$1,049,865 63
Increase in first class passengers	35,155 33
Increase in U. S. mails	15,049 57
	1,100,070 53
Increase, as before stated	$893,340 95

The gross revenues for 1868 are equal to $48,138 26 per mile of the main line of the railroad.

The whole number of passengers carried in 1867, was 3,347,466, and in 1868, 3,747,178, an increase of the number carried of 399,712. The average distance traveled by each passenger, was 35.54 miles, being 2.27 miles less than in 1867, showing this increase to be upon the local traffic of the line.

The number of tons of freight moved (including 294,131 tons of fuel and other materials transported for the company,) was 4,722,015, embracing 2,065,049 tons of coal. The whole tonnage of your railway exceeds that of last year 721,477 tons, of which increase 384,326 tons was bituminous coal.

The average charge upon freights during the year was 1.906 cents per net ton per mile, and per passenger 2.71 cents. The cost of transportation was 68.8 per cent. of the receipts.

The earnings of the Philadelphia and Erie Railroad in 1868, were:

From passengers		$631,437 59
From freight		2,101,613 98
From express matter		30,954 33
From mails		21,518 04
From miscellaneous sources		18,726 42
Total (nearly equal to $10,000 per mile of road)		$2,804,250 36
The operating expenses during the same period were:		
For conducting transp.	$610,774 32	
Maintenance of way	600,284 40	
Motive power	677,028 49	
Maintenance of cars	178,913 85	
	$2,067,001 06	
To which add 30 per cent. of earnings, payable to the Philadelphia & Erie R.R. Co.	820,423 95	
		2,887,425 01
Showing a loss to the company, in operating the line under the lease, of		$83,174 65

Or $271,177 78 less than in 1867.

To the loss above stated there should be added—to give a fair exhibit of the workings of the lease of this line—the interest upon the capital required to operate the railway, the cost of the rolling stock and shop machinery, all of which is furnished by this company, amounting, at six per cent., to $210,000 per annum.

The increase in the business of the line is almost wholly from the development of the freight traffic of the company.

The decrease in the relative expenses arises mainly from the diminished outlays on account of the original incomplete and defective construction of the road.

The revenues of the lines operated by this company, and the amounts paid for their working expenses, interests and dividends, are as follows:

From the Pennsylvania Railroad and Branches	$17,233,497 31
From the Philadelphia & Erie R.R.	2,804,250 36
Amount	$20,037,747 67

And the expenses of operating these lines were:

Pennsylvania R. R.	$11,860,983 88	
Philadelphia & Erie Railroad	2,067,001 06	
Thirty per cent. reserved to pay interest on debts of the Philadelphia and Erie R.R. Co.	820,423 95	
		14,748,408 89
Leaving the net profits from both railways for 1868		$5,289,338 78
From which deduct dividends declared in May and November, in all thirteen per cent., with the taxes thereon	$3,242,281 99	
Balance to debit of interest account	701,610 84	
Due on the lease of the Harrisburg and Lancaster Railroad	135,274 18	
Annual payment to the State of Pennsylvania on account of interest and principal due upon the purchase of her works between Pittsburg & Philadelphia	460,000 00	
		4,539,167 01
Leaving balance		$750,171 77

The average dividends of the company since 1860 have been fully equal to that paid in 1868.

All of the branch and leased lines operated by this company, except the Philadelphia and Erie, and the East Brandywine and Waynesburg Railways, (where the aggregated loss was $88,105 84,) have shown balances in their favor over operating expenses, equal in the aggregate to the interest upon the amounts standing upon the books against them.

The earnings of the railways in which the Pennsylvania Railroad Company is the holder of a majority of their shares, but operated under their own Boards of Directors, were for the past year as stated below:

Cumberland Valley Railroad.... ..	$577,064 72
Northern Central Railroad and its leased lines	4,151,351 91
Pittsburg, Cincinnati and St. Louis Railway.....	2,327,455 43
	$7,055,872 06

The Cumberland Valley Railroad extends from Harrisburg to Hagerstown, Maryland, a distance of seventy-four miles. It is a very important feeder to your main line, and traverses throughout its length a wide and densely populated valley, rich in agricultural resources, and bounded on either side by mountain ranges containing some of the most valuable mines of iron ore in the State, of inexhaustible extent. These mines are now being developed, and when reached by the branch railroad in course of construction the transportation of these ores will add largely to the revenues of that company.

The interest of your company in this railway is held by its sinking fund, and consists of 9,418 shares of the common, and 2,864 shares of the preferred stock, upon both of which, amounting at par to $614,100, it pays regular dividends of eight per cent. per annum, leaving a surplus which is being appropriated in aid of the construction of the branch line mentioned to the largest of these iron ore deposits, and toward the extension of its own line to the Potomac, at or near Williamsport, Maryland. The Northern Central Railroad extends from Baltimore to Sunbury, Pennsylvania, a distance of 138 miles, and through leases of and contracts with other railway companies it is practically extended to Buffalo, New York. Its control by this company was the result of an unsuccessful effort upon the part of the Baltimore and Ohio Railroad Company to shut up this avenue as a competitor with its own railway for transportation between Baltimore and the West.

Instead of a burden to the Pennsylvania Railroad Company, as apprehended at the time a purchase of a majority of its shares was made by the sinking fund, it has proved a very profitable investment. After placing this work in good condition, and increasing its equipment, it has been able to pay regular quarterly dividends to its shareholders at the rate of eight per cent. per annum after leaving a reasonable surplus of net profits. The number of shares of this company held by the sinking fund is 43,614, equal at their par value to $2,180,700.

The ordinary traffic of this line has increased with the population of the wealthy and enterprising section of country it accommodates, while its coal transportation, which is still in its infancy, has become a very important source of revenue. It has connections through a lease of the Shamokin Valley and Pottsville Railway, the control of the Lykens Valley Railway, and a connection with the Philadelphia and Erie, Lackawanna and Bloomsburg, and other railways, with all of the coal fields of Pennsylvania, which will continue to give it a constantly increasing tonnage. The Pittsburg, Cincinnati and St. Louis Railway has been described in previous reports. It extends from South Pittsburg to Columbus, Ohio, a distance of 193 miles. The interest held by this company in their stocks and bonds stands upon its books at $5,663,450 09. It is an indispensable connection for the Pennsylvania Railway with the West and Southwest, and must eventually pay reasonable dividends to its shareholders.

Its traffic for the second year of its use as a continuous railway between its termini is equal to $12,000 per mile of road.

In the Connecting Railway, which extends from West Philadelphia to Frankford—a distance of seven miles—and operated under a lease by the Philadelphia and Trenton and Camden and Amboy Railroad Companies, at an annual rental equal to six per cent., clear of all taxes, upon its whole cost, the Pennsylvania Railroad Company holds 25,547 shares of the capital stock, amounting to $1,277,350.

This road was constructed with means furnished by your company for the purpose of decreasing the heavy cost of passing its New York and eastern trade through this city, and in the expectation of returning to the Philadelphia Division of its road much of the trade and travel which the delays and obstructions referred to had driven to other channels. The result, as shown in the eighteen months since the road was opened for traffic, has been such as we anticipated, while, in addition thereto, we will receive during the term of the lease legal interest upon the expenditure incurred.

The canals east of the Allegheny Mountains, purchased by this company of the State of Pennsylvania, 173 miles in length, have, as stated in our last Annual Report, been sold to the Pennsylvania Canal Company, of which General Isaac J. Wistar is President. That company has since purchased with its first mortgage bonds a majority of the shares of the West Branch Canal Company, extending from the Juniata River up the Susquehanna and its West Branch to Farrandsville, above Lock Haven—123 miles—and has consolidated its shares with those of the Wyoming Valley Canal Company, which occupies the North Branch of the Susquehanna, from Northumberland to Wilkesbarre, a distance of 64 miles, making in all 360 miles of canal. This arrangement brings the Susquehanna system of State Canals, below the coal measures—dismembered by their sale to three companies—under one control, without which they could not successfully compete with the railways traversing the valleys of the same water courses. The whole of the revenues of these canals must for a few years be appropriated to their improvement and protection from freshets, that have heretofore periodically destroyed their usefulness for months at a time, to the great injury of their revenues and the business of those who use them for the transportation of the products of the country to market. When these objects are secured, the investment of this company in the Pennsylvania Canal Company will doubtless become profitable, and highly advantageous to the community for whose accommodation they were originally built by the commonwealth.

The assets of this company—exclusive of its own roads—invested for the protection and enlargement of its traffic are now, at a reasonable valuation, more than sufficient to meet the whole indebtedness of the company, except the five per cent. bonds held by the State of Pennsylvania, which are being paid by a contribution from the net revenue of the company in semi-annual payments of $230,000 each. During the past year these contributions, after the payment of interest, left $142,978 50 to be appropriated to the reduction of the principal, which amount will annually increase as the debt upon which interest is payable is reduced.

In the month of October last an attempt was made by the Erie and New York Central Railroad Companies to break up the through traffic arrangements of this company by making large reductions upon their freight charges. This movement was promptly met by the Pennsylvania Railroad Company with still greater reductions from time to time, which resulted in a large increase in its tonnage. These low charges were continued until a restoration of former rates was desired by those companies, after incurring a heavy loss in their revenues, while the effort increased the prestige of this company by bringing its shorter lines and better facilities more prominently into public notice. After the failure of this attempt the managers of the Erie Company, by means of large sums of money, suddenly realized from a confiding public, in a manner, at least, unworthy of imitation—disregarding the comity which should exist in the relations between individuals or officers of corporations, and in disregard of popular sentiment and public rights—endeavored to arrest a healthy competition for the traffic between the East and West through the control of our connecting lines; and by this means divert business from its natural channels to *their* circuitous route to the seaboard.

The policy of your Board has heretofore been to limit its investments outside of Pennsylvania to those companies that they originally deemed it proper to assist, for the purpose of securing connections with the then existing lines, whose interests harmonized with its own. The restless spirit of our rivals in the East and West has, however, rendered it necessary to make our connections with the chief trade centres of the West more perfect and less liable in the future to molestation and interruption. This has been done to a great extent through a recent lease to the Pittsburg, Cincinnati and St. Louis Railway Company (known as the Pan Handle route,) guaranteed by this company, of the lines of the Columbus, Chicago and Indiana Central Railway Company, which has direct connections with Indianapolis, St. Louis, Louisville and Chicago.

These arrangements will require a considerable amount of money, to be applied especially to the increase of rolling stock, to render them productive. This it is proposed to raise by giving to the stockholders of the Pennsylvania Railroad Company, registered upon the books of the company on the thirtieth day of April next, the privilege of subscribing to twenty-five per cent. of their holdings at that time, in new shares at par.

With the proposed increase of capital the board entertain no difficulty in continuing dividends of ten per cent. per annum, even if these arrangements should not, as anticipated, increase our net profits to a greater extent than the interest upon the outlays to be incurred.

It will appear, from an examination of the statements already given, that the business of the past year would have justified dividends of five per cent. semi-annually upon our whole authorized capital of $35,000,000, and still leave a surplus of a half of a million of dollars. The proposed increase will make the capital stock about $33,500,000.

The rapid progress made by the Union and Central Pacific Railroads indicates the completion of a railway line across the continent during the ensuing summer. When it shall have been opened throughout, your own road, and its immediate western connections, will present the shortest line to and from the Atlantic seaboard, either by way of Chicago, St. Louis, or by an intermediate route in progress from Warsaw westward, connecting with the Union Pacific road near Fort Kearney. This advantage will secure to us at least a fair and reasonable share of the large traffic that will be carried between the Atlantic and Pacific States. By some oversight, local considerations, or a limited conception of the important part that railways were to play in the movement of the internal commerce of the country, Pennsylvania and Ohio have each been placed between two different railway gauges, which for a long time forced transhipments of freights. The Pennsylvania Railroad Company has both on its eastern and western connections a gauge of four feet ten inches, and Ohio on each side of her a gauge of four feet eight and a half inches—the latter being the prevailing gauge north of the Ohio and James Rivers, while south of these the gauge of five feet prevails, which should have been adopted originally as the uniform gauge of the United States.

To obviate the inconvenience, the increased cost and the additional capital required to move traffic, in consequence of these frequent transhipments, from a difference of gauge of only one and

a half inches, broad tread wheels were introduced for through traffic, which has to a large extent overcome these evils. Owing, however, to the great oscillation of the cars on the wider gauge, the Ohio lines insisted upon a play upon the narrow gauge that added materially to the cost of hauling upon the four feet eight and a half inches gauge, to remedy which the gauge of your road has been changed to four feet nine inches, and the Ohio roads have been, or are being, changed to four feet nine and a half inches, leaving but a difference of half of an inch, which, it is presumed, time will reduce to the uniform gauge of four feet nine inches.

Your Directors, in their last annual report, alluded to a very important movement contemplated by the Philadelphia and Erie Railroad Company, by which it was proposed to build a railroad leaving that line at the mouth of Bennett's Branch of the Susquehanna, thence up that stream to the summit, and down the waters of the Allegheny to that river at the confluence of the Mahoning, and thence to Pittsburg. This line is designed chiefly for the transportation of freights at a slow speed, with a view to so cheapen its cost as to compete with the water lines leading to New York. Upon no portion of this route is there a gradient against the heavy traffic to the East exceeding 10 feet per mile, or 16 feet against the westward bound trade, except for about four miles at the summit, where a gradient of 48 feet in favor of the heavy transportation is used, and for about four miles near the mouth of the Mahoning, where 55 feet per mile may be adopted. Until the traffic justifies the application of assistant power at these points, the full loads upon the 16 feet gradient will be passed over them by a division of the train. The exceptional gradient of 55 feet per mile, near the mouth of the Mahoning, may be avoided by continuing upon the side hill after striking this creek, and intersecting the Allegheny Valley Railroad lower down, but the work will be expensive, and may be left to a period when the traffic will justify the outlay.

It is not proposed to extend the Philadelphia and Erie line beyond Brookville in this direction, as it will be there met by the Western Pennsylvania or Allegheny Valley Railroads, the charters of both of which companies cover the ground. From Brookville the Philadelphia and Erie will eventually be carried westwardly, south of the lakes, connecting therewith by branch roads. The grading of this railway for about 20 miles is now under contract, and all of its expensive sections will be let as soon as the line is carefully located.

Respectfully submitted,
By order of the Board,
J. Edgar Thomson, *President.*

General Account.

Thomas T. Firth, *Treasurer.*

Philadelphia, Dec. 31st, 1868.

☞ The Frederick and Pennsylvania Line Railroad has been located as far as Princeville, Carroll Co., Md., and will shortly be put under contract. This road commences at Frederick and extends to Littlestown, Pa., a distance of about thirty miles.

☞ The earnings of the Philadelphia and Erie Railroad for January, 1869, were $210,059 71, against $173,503 69 in January, 1868—an increase of $36,556 02.

Delaware, Lackawanna and Western R.R.

This company have purchased the Morris and Essex and Syracuse and Binghamton Railroads, and have negotiated a perpetual lease of the Oswego and Syracuse Railroad, with stock and fixtures—the contract to go into effect March 1, 1869. The new line formed under this arrangement gives a broad gauge route from Oswego to Scranton, and thence to the junction of the Delaware, Lackawanna and Western Railroad with the Morris and Essex line, which is a narrow gauge, but which it is the intention of the company to convert into a broad gauge route at an early day, when passenger trains will be run direct from Oswego to New York. Between Binghamton and Great Bend, fourteen miles, the track of the Erie is now used by the Delaware, Lackawanna and Western Railroad Company, but they will now build an independent and connecting line between those points, thus forming an independent through line from New York to Oswego.

Kent County Railroad.

The Chestertown, Kent Co., Md., *News* says that the directors of this company have appointed a committee, consisting of Messrs. Abel J. Rees, Wm. Stevens and Wm. T. Spry, to make a contract for building the road Massey's to Kennedyville by the first of July next, to Belair by the first of September, to Deep Landing by the first of January, and the Branch to Chestertown by the first of July, 1870. This resolution differs from that adopted some weeks ago in that it does not provide for a contract with any particular parties, but leaves the committee free to negotiate with whomsoever the best terms can be effected.

The contractors are now laying the rails on the road from Townsend to Massey's Cross roads, and expect to complete the job in the course of a few weeks. This part of the road is being built by the Delaware Railroad Company.

Blue Ridge Railroad.

The Andersonville *Intelligencer* says that the reconnoissance of the line of this road recently made by Col. James P. Low and Maj. Thomas B. Lee, was entirely satisfactory. The reconnoissance was confined to that part between Walhalla and the North Carolina line, where the work had been partially done. The report is, that the Stump House Tunnel is more advanced than heretofore stated, there being but 1,500 feet of heading to drive, with six working faces; that it can be driven through in ten months; that the road can be completed to the North Carolina line in twenty months, and that the whole road to Knoxville can be finished in same time, if funds are provided. A working party of engineers will soon be put in the field, and estimates furnished for contracts in a very short time.

Portland and Kennebec Railroad.

The report of this company for the year 1868 shows that the total receipts were $599,821 35, against $576,469 16 in 1867, and the expenses $427,328 59 against $446,782 22 in 1867. The net earnings of 1868 were $172,492 76, against $129,686 94 in 1867. The condition of the road and its capacity for business have been improved during the year. The prospect of a large increase of traffic is very encouraging, and stockholders have reason to be gratified with the recent substantial improvement in the value of their property.

American Railroad Journal.

Saturday, February 27, 1869.

Stock Exchange and Money Market.

The tendency to relaxation in the Money line, referred to in our last, was more fully developed during the week, under increasing offerings of capital, chiefly on private account, and a less urgent inquiry for aid from all the borrowing interests. The market closed quite easily on the basis of 5@7 per cent. on call, and 7@9 per cent. per annum in the discount form, at which figures, the available supply of money exceeded the demand for accommodation, whether from speculative, or from mercantile sources. The outflow of currency to the South and Southwest early in the week told against the city bank reserve of legal tender notes, which, on the last return to the Clearing House, showed a falling off of $1,337,755. There was a further reduction of two and a half millions in the specie line, chiefly the result of the active demand for coin to pay duties on foreign goods imported direct or withdrawn from warehouse within the week, which led to an addition of importance to the cash balances in the U. S. Sub-Treasury. The aggregate deposits were cut down $5,365,314, and the loans were diminished nearly a million dollars. There was also a slight contraction in the item of circulation. The banks have lost about 9½ millions of deposits within five weeks, nearly six millions of specie, since Jan. 16th, and nearly four millions of legal tender notes, since the close of January. They held a week ago nearly 21½ millions more of gold and lawful money than the 25 per cent. of obligations required by the banking act, or $78,193,283 of coin and legal tender notes, as against $227,261,311 of deposits and circulation. The excess on the latest return was $18,878,610, as against $22,583,438 same date last year. The U. S. Sub-Treasury added over two millions and a half to its coin and currency balances, within the week, which it closed with $90,889,560 in reserve, against $88,203,580 the preceding week, and $84,015,878 held on January 27, four weeks since, indicating an average weekly gain of $1,718,424, during the past month.

The specie reserve of the city banks is now $23,351,391, against $22,513,981 same time last year. The city bank deposits are now $187,612,546, against $209,095,351 week ending Feb. 22, 1868. The legal tender reserve amounts to $50,997,197, against $60,868,930 same time last year. The circulation now stands at $34,247,321, against $34,100,023 same time last year. The loans are now $263,428,068, against $267,766,643 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $117,998,508 a day, against a daily average of $115,126,000 the preceding week, and $111,721,580 the week ending with Feb. 3, 1869. The current week's exchanges average about $112,393,071 a day. The city banks, last week, reported a further loss of $2,502,940 of specie, $5,365,314 of deposits, and $1,337,755 of legal tender notes. They reduced their loans, $952,339; and their circulation, $16,130.

The average amounts of the Gold Exchange Bank loans and discounts last week was $1,284,365, average amount of specie $545,234, average amount of deposits $1,258,126.

National Bank notes to the amount of $202,600 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $312,733,326, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $12,918,249, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,815,077. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,567,900; and for the public deposits, $34,217,350—making a total of $376,785,250. The Treasury Department last week redeemed and destroyed $637,700 of worn and mutilated fractional currency, and issued $891,000 of new. The outstanding amount of fractional currency on the 1st of February, 1869, was $35,511,127, against $34,215,716 on the 1st of January, 1869, and $33,875,268 on the 1st of December, 1868.

The U. S. Sub-Treasury receipts, week ending with Feb. 20, were $7,089,420, including $2,899,816 from customs duties; payments, $4,674,472, including $268,732 of coin interest; balance at the close of the week, $90,455,882, against $88,040,934, at the close of the preceding week, showing an increase of $2,414,948. The business

of the Office during the first business day of the current week, was as follows: On Tuesday, receipts, $1,229,179 including $646,000 from customs and payments, $795,501 including $25,401 of coin interest. The balance at the close of business on Tuesday stood at $90,289,560, against $88,203,580 a week previous; and $86,235,144, on Feb. 3, 1869. The aggregate receipts of the office in January were $60,627,079, including $9,702,416 from customs, aggregate payments, $64,854,493, including $18,543,453 of coin interest.

Monday was observed as a close holiday in business circles, and no business of moment was transacted at the Custom House, or Sub-Treasury.

The outstanding amount of coin certificates on the 1st of Feb., 1869, was $32,659,520, against 27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $481,000, and retired $2,813,817 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during January, reached $10,964,000.

Government revenues yielded moderately, through the week. The excises, last week, yielded about three millions; customs at the port of New York, $2,899,816, and at the outports about $950,000 (in coin) more, making the grand total income for the week equal to about $8,207.250 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 94 millions, according to the latest Washington advices.

The Gold Exchange Bank clearances on Wednesday, were $98,464,000, and the resulting balances $3,052,884 in coin, and $4,438,446 in currency.

Gold has been much less confidently dealt in since our last, and has declined materially in price, under the increased offerings, largely on speculative account. The range of the week was from 132⅛@135⅜, and the closing quotation on Wednesday 132¼@132⅜. The speculative inquiry has fallen off materially, and the drift of operations has been generally in the direction of lower figures. The customs drain has been up to nearly half a million a day. The specie exports, however, have been insignificant, having been confined to $213,323 last week, $85,000 on Tuesday, and only $15,000 on Wednesday. The foreign specie imports, during the week, were $100,078. The *Arizona* delivered here $270,364 of California treasure, on Tuesday.

The customs demand for Gold last week, averaged $483,303 a day; thus far, this week, it has been equal to $646,000 a day, or equal to a weekly aggregate of $3,876,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $100,078, and since Jan. $1,730,440 against $280,987 same time in 1868. The receipts from California, last week, were $270,364. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $77,979,711, against $71,285,123 same time in the preceding fiscal year. At the port of San Francisco in 1868, $8,382,329, against $7,622,827 in 1867.

The total receipts of California gold at this port, since July 1, 1868, have been $15,278,508, against $21,545,593 same time in fiscal year 1867–'68, showing a decrease in the current fiscal year, of $6,267,085. The exports of specie, from this port, last week, were $213,323, against $934,204 same week last year; total, since July 1, 1868, $27,090,494, against $37,902,829 in 1867–'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $268,732; since July 1, 1868, $63,011,863, against $51,037,520 same time in 1867–'68. The specie exports from San Francisco, from Jan. 1, to Jan. 22, 1869, were $3,161,497, against $2,732 801 same time in 1868.

The foreign exchange market has been less liberally supplied with prime bills, and has been quoted firmer with an improved inquiry for sterling drafts. There has been a notable falling off in the offerings of bills drawn against export purchases of American securities, which latter have been on a less extensive scale. The offerings of produce bills have been fair in amount, but have not included the usual proportion of drafts against cotton shipments. Bankers' prime sixty day bills on London closed on Wednesday at 108⅞@109¼, and on Paris to 5.18¾@5.16¼; sight bills on London to 109⅜@109¾, and on Paris to 5.15c.@5.13¾. The offering of produce bills has been on a more liberal scale this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,261,173, against $2,968,819 same week last year; total, since July 1, 1868, $106,658,910, against $118,243,837 same time in preceding fiscal year of 1867–'68.

There has been less animation in the market for Government securities, and the operators for a decline in prices have taken advantage of this circumstance to "hammer" values, which pastime they have rather more confidently indulged, though not with encouraging success thus far. The offerings of the coin bearing bonds of all issues have been quite moderate, mainly on speculative account, and with a view to the creation of an additional *short* interest, in hopes of a further yielding in prices, which would enable the *short* sellers to cover their outstanding contracts at rates which would pay a handsome profit, on the *bear* dealings. The investment demand, though not remarkably brisk, has been fair throughout the week, at the ruling values. The favorite issues with buyers have been the 1862 and 1867 Five-twenties. On Wednesday, the market closed quite buoyantly, on an active call for the gold bearing obligations, at our quotations influenced by the dispatches from Washington, reporting the passage in the House of Representatives, by a large majority, of Mr. Schenck's bill, explicitly providing for the payment of the funded debt in coin, and for the legalization of all contracts made payable in coin.

U. S. sixes of 1881 closed here on Wednesday at 113⅞@114; U. S. Five-twenties of 1862, 114⅝@114¾; U. S. Five-twenties of 1864 at 111⅝@111¾; U. S. Five-twenties of 1865 at 112⅝@112¾; U. S. Five-twenties of 1865, consolidated, 110½@110⅝; U. S. Five-twenties of 1867, 111@111¼; U. S. Five-twenties of 1868, 111@111¼; U. S. Ten-forties at 109½@109⅝; U. S. Six per cent. currency bonds, 101⅜@101½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 10.	Feb. 17.	Feb. 24.
Consols	93⅛	93	93
U. S. 5-20's of 1862	77	78¼	79¼
Erie	24¾	24	24¼
Ill. Central	94	96⅛	97¼

Railway and miscellaneous share dealings have been on a restricted scale, and the course of prices has been less satisfactory to operators for a rise, most values having been depressed considerably. Pacific Mail fell off full 18 per cent., or from 110⅜@97⅛. It closed on Wednesday at 97⅜. Fort Wayne shares were higher, as were also Hudson River and the St. Paul stocks. Express property was generally much lower and quite panicky on Wednesday, under extensive forced sales.

General business has been moderately active for the season, in the line of domestic produce, generally at lower prices though cotton and provisions closed with reviving firmness, on an enlarged demand, mainly speculative. Middling upland cotton closed steadily on Wednesday at 29½@29¾ cts. per lb. The stock of cotton now here is estimated at about 81,000 bales. The receipts at the port this week, have averaged about 2,800 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 1,558,000 bales, against 1,529,000 bales same time in 1867–'8; exports, same time 779,500 bales, against 899,000 bales same time in 1867–'8; stock on hand at latest dates, 410,000 bales, against 362,000 bales same date 1868. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 2,117 pkgs., against 2,137 pkgs., same time last year. From Boston, 843 pkgs., against 2,122 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been rather slow of sale at from 10@17c., as extremes, per lb.; week's receipts, 5,415. Milch cows dull at $40@$110 each; receipts, 124. Veal calves in moderate request at 9½@13½c. per lb.; receipts, 503. Sheep and lambs at 5⅜@8¾c., per lb.; receipts, 20,230. Swine quiet and heavy at 10½@11¼c. per lb., liveweight; receipts, 11,808. The inquiry for foreign merchandise has been fair, and groceries have shown a further improvement, under free purchases, largely on speculative account. The total imports of foreign dry goods, last week, were $3,395,505, and the total amount marketed $3,129,946. The value of foreign merchandise imported last week, was $4,043,748—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $7,439,253, against $5,735,486 same week last year; total since July 1, 1868, $158,838,461, against $141,424,056 in 1867–'8. There has been a moderate business reported in the ocean freight line, but at easier rates. For Liverpool we quote flour at 1s. 4½d.@1s. 6d. by sail, and 1s. 6d.@1s. 9d. by steamer, per bbl.; grain at 3½d.@4d. by sail, and 4d.@4½d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and ¼d. by steamer, per lb.; and heavy goods 12s. 6d.@25s. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 410.

Prices at the auction sale of Scranton Coal on Wednesday were much lower, 80,000 tons having been disposed of at 4.50@4.80 for stove; 4.32½@4.45 for grate; 4.20@4.30 for egg; 4.35@4.40 for

lump; 4.30@4.37½ for steamboat; and 3.72½@3.85 for chestnut, per ton of 2,240 lbs., deliverable at Elizabethport, N. J.

The imports for the week ending February 20, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$2,660,243	$3,395,505
Gen. merchandise	3,075,243	4,043,748
Total for the week	$5,735,486	$7,439,253
Previously reported	22,590,437	29,157,109
Since January 1	$28,325,923	$36,596,362

The New York exports, exclusive of specie, for the week ending Feb. 23, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$2,968,819	$3,261,173
Prev. reported	22,943,310	20,665,571
Since January 1	$25,912,129	$23,926,744

The balance in the Sub-Treasury on Wednesday was $91,880,804 94.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—St. Louis, Jacksonville and Chicago 1st mort., 97; Toledo, Peoria and Warsaw 1st mort., W. D., 84½; do., E. D., 86; New York and New Haven 6s, 97; Hannibal and St. Joseph R. R., 120; do., pref., 115½; do., Land Grant bonds, 107¾; do., conv. bonds, 122; New Jersey Central 1st mort., 99; Toledo and Wabash consol. bonds, 81; Long Dock bonds, 92½; Galena and Chicago 1st mort., 97½; Great Western 10s, 1868, 104; Chicago and Milwaukee 1st mort., 89½; Alabama 5s, 65¾; do., 8s, 94¼; New York State 7s, Bounty Loan, reg., 109; do., coupon, 109; Rhode Island 6s, 100¾; Georgia 7s, 93; Louisiana 6s, 72; do., 6s, Levee bonds, 68¾; do., 8s, Levee bonds, 85; Brooklyn 6s, W. L., 95½; Adams' Exp. Co., 60; American Mer. Union Exp., 40; Merchants Union Exp., 17; Wells-Fargo Exp., 30½; Mariposa pref., 30½; do., Tr. 10s, ctfs., 66; Central Coal, 65; Western Union Telegraph, 87⅜; Boston Water Power Co., 15¾; Black Hawk gold, 1.00; Buchanan Farm oil, 0.65; Brevoort oil, 1.00; Consolidated Gregory Gold, 2.55; Central Petroleum, 0.90; Grass Valley, 0.44; National oil, 3.50; Pit Hole Creek petroleum, 1.20; Quartz Hill Gold, 0.80; Smith and Parmalee Gold, 1.65; United States petroleum, 1.50; Wallkill Lead, 0.26.

Philadelphia.—Oil Creek and Allegheny River R. R., 38; Phila. and Trenton R. R., 124; West Phila. R. R., 64; West Jersey R. R. 6s, 90; Sunbury and Erie 7s, 99⅛; Phila. and Sunbury 7s, 90⅛; Delaware Division Canal, 48¼; Morris Canal scrip, 64½; Pennsylvania State coupon 5s, 92½; do., 5s, 1870, 100; New Jersey 6s, free, 102½; St. Louis W. L., 103; St. Nicholas Coal, 1; N. Y. and Middle Coal Fields, 4¼; Niagara oil, 1⅛; Corn Planter, ½. The latest quotations are: City 6s, 97⅛@97¾; do., free of tax, 100⅞@101; State 5s, reg., 99@100; do., coupon, 92¼@98; do., 6s, W. L., 101@101; do., 1st series, 104@104½; do., 2d series, 105@105¾; do., 3d series, 107¾@108; Reading, 46@46¼; do., 7s, 1893, 104½@105¾; do., 6s, 1880, 88@90; Camden and Amboy, 123¾@124; do., mort. 6s, 1889, 93@94; do., 1888, 85⅛@85⅞; Penn. W. Va. 1st mort., 92@93; do., 2d mort., 90@92; do., 3d mort., 1873, 88@89½; do., unguaranteed, 20@—; Marietta and Cincinnati 7s, 1892, 88@90; do., 2d mort., 70½@71¼; Central Ohio, 30@31⅜; do., 1st mort., 85½@86¼; Western Md. 6s, 1890, 60@75; do., guar., 89@90; do., 2d mort., guar., 85@87; Richmond and Danville bonds, 72¼@72½; Baltimore 6s, 1875, 95@95⅛; do., 1886, 94@95; do., 1890, 94¼@94¾; do., 1893, 97@—; do., 5s, 1838–'70, 75@75; City Passenger R.R., 17¾@18; George's Creek Coal, 65@67¼; Santa Clara, 1.50@3.00; Atlantic Coal, 3.00@3.30.

Union Pacific Railroad Bonds.

The late decision of the United States Supreme Court that both coin and currency are a legal tender, and that all contracts for the payment of coin are valid and may be enforced by law, places the *legal liability* of the Union Pacific Railroad Company to pay the interest and principal of its first mortgage bonds beyond question. What some of the courts have heretofore held was a matter of honor has now become an obligation, and must enhance the market value of their securities.

These bonds are a first mortgage upon one of the longest lines of railroad in the world. The amount will be less than $27,000 per mile. The earnings from local business over a portion of the road last year were over five million dollars, and after its completion early this season the immense through traffic of the Pacific States will increase this sum to fifteen or twenty millions. The payment of both interest and principal of the bonds in gold is, therefore, perfectly sure.

The present high price of governments offers a favorable opportunity to sell and to reinvest in a bond equally safe and more valuable on account of the longer period before its maturity. *The exchange will now pay a profit of from ten to fourteen per cent.*

As the issue of these bonds will soon cease, parties who desire to invest are invited to make their subscriptions at once. They will be received at the Company's office, No. 20 Nassau street, and by John J. Cisco & Son, No. 59 Wall street, and by banks and bankers generally. A pamphlet, with full particulars, sent free on application.

Finances of Baltimore.

The annual report of the Baltimore City Register recently presented to the Councils of that city, gives the following statement of its financial condition: Funded debt, $22,069,225; endorsements for various railroads, $1,948,500; miscellaneous debts, $930,261; making a total of $24,947,986. The assets of the corporation, including shares and mortgages on various railroads, real estate, taxes in arrears, &c., amount to $22,017,260. The stocks, however, taken at their market value, it is asserted, would add $305,000 to the amount of assets beyond what they are credited in the account. The estimate of expenditures for 1869 amounts to $4,883,883, and the receipts other than from taxes at $1,710,200.

☞ The receipts of the New Bedford and Taunton Branch Railroad during the past year were $227,615 80, and the expenditures $187,225 02, leaving a profit of $40,390 78. The number of passengers carried during the year was 248,221. Two hundred and eighty tons new iron were laid during the year. The dividends paid amounted to 8 per cent.

☞ The earnings of the New London Northern Railroad during the past year were $404,846 69, and the expenses $340,698 89, making the net earnings $64,147 80. Two dividends of 4 per cent. each have been paid during the year, amounting to $64,000.

From Herapath's Railway Journal.

Railway Economy.—Permanent Way.

In our last article we traced the development of the permanent way up to the period of the introduction of the fish-joint. Its success on the then Eastern Counties Railway soon attracted attention, and it began to be gradually introduced on other lines about the years 1849–50, notwithstanding that existing circumstances rendered its application at that time anything but a perfect mechanical appliance, owing to the form of the channels in the rails, then in use, not being such as to provide for the proper fitting of the fishing-plates when by abrasion their surfaces and that of the rails against which they rested had become worn, as also to the difficulty of procuring screw bolts in large quantity, of the requisite quality, at the moderate price the case demanded. So great was this difficulty at the early date named, that it threatened seriously to interfere with the general adoption of the fish joint, and at one of the discussions at the Institution of Civil Engineers it was stated that in one hundred and twenty five pairs of joints, containing 1,000 bolts and nuts, that had been examined on the Great Northern Railway two days after the nuts had been tightened up, no less than 261 nuts were found loose, and six of the bolts were out altogether. These, however, were practical difficulties, and, as a rule in a country like this, such difficulties soon vanish, and so by degrees these drawbacks to the introduction of the invention when discovered were gradually remedied. Thus a superior description of bolts made by machinery were after a time brought into the market, which while meeting the requirements as far as practicable, were at the same time supplied at a reduced price, and in all new rails that were laid down the section was so modified as to render it suitable for the application of fishing plates. This modification principally consisted in making the sides of the channels flat surfaces where the fishing plates abutted against them instead of the usual double curved form before in vogue, the angle of these surfaces being so adjusted as to admit of the application of the fishing plates in the most effectual manner, so that when worn and tightened up the fit was not impaired nor was too great a strain thrown on the bolts, and this at the same time provided against any slight variations in the width of the fishing plates or the channels of the rails consequent on the wear of the rolls, or inaccuracies in the original dimensions, so that by degrees practice coming to the aid of an invention theoretically sound, the fish-joint became an "established institution," and is now almost universal whatever the double headed rail and the Vignoles or foot rail is employed.

The success attending the introduction of the fish-joint attracted the attention of engineers and others to the subject of the joints generally, and a host of schemes made their appearance shortly after it; some simply proposed improving the form of the fishing plates, others aimed at effecting the object in a similar manner differently applied, while the object of a third-class was to make as good a joint without the use of bolts which, as before stated, at that time were a source of much trouble.

The improvements in the fishing plates themselves related principally to rolling them with grooves, to take the heads of the bolts, introduced by the late Mr. C. H. Wild, and other similar modifications, tapping the holes and screwing the bolts into one of the plates, proposed by Mr. Parsons and Mr. Pole, using screws having right and left-handed threads screwed into both plates, invented by Messrs. Richardson and Bidulph, and generally in the method of manufacture of the plates and forming the bolt holes in them; when these were drilled no difficulty was experienced, but the process was costly; moreover some engineers wanted square or other shaped hole in one of the plates, to prevent the bolt from turning while the nut was being screwed up; eventually, therefore, on this account as well as on the score of economy, punching the holes came into use, but this punching it was found bulged the plates opposite the holes, and by distorting their form, spoilt the fit against the rails; it also dished the surface around the holes upon which the nut or bolt-heads fitted. All these, however, were defects of practical detail which by degrees were discovered and ultimately remedied by various ingenious devices.

Of the plans which sought to effect the same object by a different application of the same mechanical appliances, we may mention Mr. Samuel's fish-chair, Mr. Adam's fish bracket, Mr. P. W. Barlow's chair in two halves, and various similar schemes of minor importance. In all these the parts were held together by bolts and nuts either passing through or under the rails, and were made to fit into the channels of the rails and bear against the inner portions of the rail heads like fishing-plates, except in the two-halved chair of Mr. Barlow, which clasped the lower table of the rails alone, the main difference between this class of fastening and the fish-joint being, that in them as in the old joint chair the sleeper was placed directly under the joint, it being anticipated that the power with which the ends of the rails were gripped by the cheeks of the chairs or brackets fitting the channels of the rails across the joint, and forced against them by the screw bolts, would be sufficient to hold the rails tight and make a sound joint; such, however, was not the case, for in this class of fastenings a double duty was imposed on the bolts, they had not only to hold the ends of the rails together but they had to resist the tendency to the rocking or tipping of the joint sleeper which tendency was obviated in the fish-joint by placing them on each side of, instead of under it, so that although for a short time after these plans were first laid down they appeared to make a good joint, continued heavy traffic soon told upon them and rendered them loose. When once this loosening of the parts set in they could never be kept in good order, and before long they were consequently abandoned.

Of the class of improved joint fastenings without bolts only two appear to have come into use. The first of these was Mr. Fowler's or Mr. Torkington's long-joint chair. We do not know to which of the two it really belongs. It has always been called Mr. Fowler's, but the patent for it was taken in Mr. Torkington's name. It consisted of a long trough or girder with three pairs of jaws cast on it, similar to those of ordinary chairs, the middle one being wider than those at the ends, this was supported by two sleepers on each side of the joint like the fish-joint, and the rails were secured in it by wooden keys. It was in use on the Manchester, Sheffield, and Lincolnshire Railway, where, we believe, for a time it answered well. It was also laid down on the Mid Kent line. It was a decided improvement on the ordinary joint-chair, but to make it perfect it wanted the metal fish in the rail channels crossing the joint. The other plan was a joint chair of considerable size and weight introduced by Mr. Parsons, the jaw on one side formed a fish, and on the other a strong iron key, fitting the channels of the rails, forming another fish, was driven in between the rails and cushions of wood placed in pockets in the chair with the grain of the wood endways against the key. This plan was tried successfully on the Great Northern Railway and was adopted on the then East Kent Railway, now part of the London, Chatham, and Dover; the same kind of fastening was also applied to the intermediate chairs. Both these plans have, however, succumbed to the fish-joint, though it is probable had they been combined they might from the one supplying the defects of the other have become a formidable rival to it.

It will thus be seen that the question of securing the joints of the double-headed rail has occupied the attention of a great many thinking men, most of them being practical engineers; and notwithstanding this strong competition the fish joint which was the first innovation on the old joint chair has successfully maintained its ground. Nevertheless, even now it cannot be considered absolutely perfect, it is still liable to get out of order if not carefully watched and the bolts constantly tightened up, in fact the joint is not yet as strong as the intermediate portions of the rail, and until this is actually the case, every effort should be put forth to make it so, and if a cheap method of scarfing the ends of the rails could be discovered so as to make a scarf instead of a butt joint, it would also be an improvement, for as it is necessary to have a slight space between the ends of the rails to allow for expansion, at high speeds even this small opening causes a blow which can be distinctly felt. We should like to see the joint made so strong that it would bear a test as a beam as great as the rail itself, and so even and smooth that no difference could be distinguished between passing over it and the other parts of the line. When these two objects are accomplished, and the loosening of the bolts is completely remedied, and not till then, shall we be satisfied that nothing further remains to be done in perfecting the joint of the double-headed rail.

With respect to the joints of the bridge and other rails used with longitudinal sleepers less difficulty has been experienced in keeping them in order, for the rail having a direct support under its entire length no tipping of the sleeper at the joint could take place, and therefore the only thing requisite was to keep the ends of the rails together. This was effected by a joint plate placed under the joint rolled with a rib on it to fit the trough of the rail, and secured to the rails by screws or bolts, and this at the same time extended the bearing surface of each rail beyond its end and prevented it cutting into the sleeper. There was little, therefore, to be done in improving the joints of the broad gauge or longitudinal sleeper system after it left the hands of Brunel, except perhaps in matters of detail relating to the fastenings and general strength and form of the parts, and for which practice has proved a sufficient guide.

Journal of Railroad Law:

In the case of The Lafayette and Indianapolis Railroad Company *vs.* Huffman, decided in the Supreme Court of Indiana in November, 1867, it was held that if a child, under the age of five years, while playing upon the track of a railroad company, at a point near the home of such child, receives injuries from a passing locomotive, the fact that such a child is thus upon the track, unexplained, is an act of negligence on the part of those having him in custody, and damages for injuries thus received cannot be recovered, unless defendant's conduct was so negligent as to amount to a willingness to inflict the injury.

When the question is one of simple negligence, there is no distinction between the case of a child unnecessarily exposed and that of a grown person, but where the question is one of gross neglect or willful misconduct, the rules applicable to the two cases are different.

The facts in the case are clearly and fully stated in the following opinion of the court by

RAY, J.—Huffman filed his complaint alleging "that the railroad company, defendant, on the—day of April, 1865, was running her locomotive, and tender on the Union track in Indianapolis, through thickly populated parts of said city, where persons and children of tender age were frequently passing and repassing across and upon said track, of right, and where children of tender years were frequently known by the employees of said company to be found, requiring the utmost care on the part of those running and managing such locomotive to avoid injury to such persons and children.

"That plaintiff is a child of tender years, being under the age of five years, and had not prudence and foresight to avoid or apprehend the danger

from the movement of such objects, nor to be on the lookout for them. That said plaintiff was, on the day aforesaid, by accident, with other children, playing near and on said track at a point near his home, and said defendant then and there, in a careless and wanton manner, ran said locomotive and tender upon plaintiff and over his legs, crushing the same so that amputation became and was necessary, and his said crushed limb was amputated, whereby he became and is maimed and a cripple for life, said plaintiff not being old enough to exercise prudence or foresight or forethought, or to apprehend danger. Said plaintiff has also suffered great pain, all to the damage of plaintiff," &c.

Valentine Huffman, father, consents to appear next friend of plaintiff.

A demurrer to this complaint was overruled. It was held, in the case of The Pittsburg, Ft. Wayne and Chicago Railway Co., *vs.* Vining's Adm'r, 27 Ind. 513, that "the unnecessary exposure to known danger of a child incapable of exercising the care and judgment of mature years, is in itself an act of negligence on the part of the parent sufficient to defeat recovery, unless the injury be willful." The counsel for the appelee in this case insist that, although the question as to the sufficiency of the averment in the complaint that the injury was caused to the child without fault of the parent was presented by demurrer, and considered in the case cited, yet, as the ruling of the court below on that point was approved, we are not to regard our decision as authority. We do not see any force in the suggestion.

But whether authority or not, we are clear that the law was correctly stated, and its application to this case cannot be questioned, even upon the theory advanced.

That the plaintiff, a child under the age of five years, was, by accident "playing near and on said track, at a point near his home," is, unexplained, an admission of negligence on the part of those having the custody of his person; and, to render the defendant liable, its conduct must have been so negligent as to amount to a willingness to inflict the injury. Is this charged in the complaint? It is averred that the defendant, "in a careless and wanton manner ran said locomotive" &c., "said plaintiff not being old enough to exercise prudence or foresight or forethought, or to apprehend danger." It appears by the form of this allegation that the negligence charged against the railroad company was such, because the plaintiff was not old enough to exercise prudence.

Where the question is one of simple negligence there is no distinction between the case of a child unnecessarily exposed and that of a person of mature years. Where the question becomes one of gross neglect or willful misconduct on the part of the defendant, the rule cannot be the same. Thus, if an engineer of a locomotive discovered a young child on the railroad track, he would be required to use greater effort to stop the train than could have been expected from him if he had discover a grown person in the same situation. In the latter case, he could reasonably depend more upon the judgment and presence of mind of the person on the track to save himself from danger than in the former case. But children of tender years have no right to play about and upon railroad crossings, and engineers are not required to run their trains expecting to find them so engaged. To render the defendant liable in this case, therefore, the complaint must either charge knowledge of the fact that the child was so engaged, or such neglect in keeping a lookout as would have charged the company with negligence if a person of mature judgment had been upon the track. The complaint is fatally defective. After admitting facts which show negligence of the plaintiff contributing to the injury, it charges that the defendant, in a wanton and careless manner ran said locomotive, &c. The word "wanton" does not mean willful. It is defined by Webster as follows: "Wandering or roving in gayety or sport;" "licentious" "lewd" "extravagant," &c. The word adds no force to the charge that the act was done in a careless manner. The demurrer should have been sustained to the complaint. On the trial, the following instructions were given over the exception of the defendant:

"It was the duty of defendants, and they were bound, in the management of the engine and tender, to use such diligence and care as prudent and discreet persons should use and exercise on such occasions, having due regard to the safety of persons; and if, owing to to the absence of such diligence and care, the plaintiff was injured, he is entitled to recover, unless from his own negligence or want of reasonable care be brought the injury upon himself."

It is not necessary that the negligence of the plaintiff should have "brought the injury upon himself;" if it directly contributed to that result, it would have defeated the action, where the defendant was only chargeable with want of ordinary prudence.

The fifth instruction was liable to the same objection.

The jury were told that "in determining the question of care and diligence, they should look to all the circumstances attending the transaction, the place where the train was running, the speed with which it was run, as well as the conduct of the plaintiff. Was he negligently and carelessly upon the track, and if so, was the injury the immediate result of such negligence on the part of the plaintiff?

The court misdirected the jury as to the degree of diligence required of the defendant, in the following instruction. "Although the plaintiff may have been in fault, if the employees of the defendant with reasonable diligence might have avoided the injury, it was their duty to have done so; and their failure to use such diligence would render the defendant liable."

Where the plaintiff is in fault, a want of reasonable diligence will not render the defendant liable.

The judgment is reversed, with costs, and the cause remanded for a new trial.

☞ A canal is proposed from some point on the Tennessee river in Alabama, thence by the most practicable route to the banks of the Coosa in Georgia, thence to the Chattahoochee, thence to the Ocmulgee, whence tide water is to be reached at Brunswick or Savannah. The distance is only 200 miles.

☞ The earnings of the European and North American Railway in January, 1869, were $12,008 47; in January, 1868, $11,435 91—an increase of $572 56.

Intercolonial Railway.

The Commissioners for the construction of the Intercolonial Railway have made their report to the Governor General in Council in regard to the tenders received by them for the four sections of the road advertised for letting. The whole number of tenders received was 248—of which 72 were upon the first section, 71 upon the second, 50 upon the third, and 55 upon the fourth. Tenders were received up to 4 p. m. on the 8th of February. Seven tenders were rejected as being informal, and one tender was withdrawn. Six were received on the morning of the 9th, but being behind time, were not opened or considered. The commissioners, after discussing the merits of the different tenders for each section, determined to recommend the acceptance of such as were the lowest in each case, provided they were satisfied, as required by clause 16 of the Intercolonial Railway Act, 31 Vic., chap. 13, that the parties were "possessed of sufficient skill, experience, and resources to carry on the work." Section No. 1 is 20 miles in length; No. 2, 20 miles; No. 3, 24 miles; and No. 4, 27 miles. The result of the letting is given in the annexed report of a committee of the Privy Council, approved by the Governor General, on the 12th inst.:

On the recommendation of the Honorable the Acting Minister of Public Works, and for the reasons given in the report of the Intercolonial Railway Commissioners, the committee advise that the following tenders for the construction of sections of that railway Nos. 1, 2, 3, and 4 respectively be accepted, and that contracts in conformity therewith be given accordingly, that is to say:

SEC. No. 1 to Messrs. H. H. Horsey & Co., of Ottawa, for the sum of 175,000 dollars, being at the rate of 8,750 dollars per mile.

SEC. No. 2 to Messrs. George & James Worthington of South Quebec, for the sum of 299,000 dollars, being at the rate of 14,950 dollars per mile.

SEC. No. 3 to Messrs. John Elliott, Robt. Grant and Chas. Whitehead, of Brantford, for the sum of 288,000 dollars, being at the rate of 12,000 dollars per mile.

SEC. No. 4 to Messrs. George & James Worthington, of South Quebec, for the sum of 297,000 dollars, being at the rate of 11,000 per mile.

The tender withdrawn was that of Mr. George Neilson, of Bellville, for section No. 2, being for $255,600, or at the rate of $12,780 per mile. The commissioners had decided to recommend this bid for acceptance, it being the lowest.

☞ The Frederick (Md.) *Union* says that there is every prospect of the early commencement of the Emmittsburg Branch road from Emmittsburg to intersect the Western Maryland Railroad, and that the work on it will be pushed forward with the utmost vigor until it is completed.

☞ The stockholders of the Cincinnati, Hamilton and Dayton Railroad have, by a vote of five to one, ratified its lease to the Atlantic and Great Western Railroad Co. This lease conveys all the roads controlled by the Cincinnati, Hamilton and Dayton Railroad Co.

☞ Mr. J. N. Du Barry has been promoted to the Vice Presidency of the Northern Central Railroad Company, and is succeeded by Mr. A. R. Fiske, of the Shamokin Valley Railroad, as General Superintendent.

☞ The work on the railroad between Nashville and Lebanon, known as the Tennessee and Pacific Railroad has been commenced.

From the Louisville Courier-Journal.

Luxuries of Modern Travel.

PULLMAN'S PALACE CAR, AND SOMETHING ABOUT THE JEFFERSONVILLE CAR WORKS.

A brief announcement was made a day or two since of the arrival in our city from Chicago of a party of gentlemen representing the Pullman Palace Car Company, of Chicago. The object of their visit was to exhibit one of their magnificent passenger coaches, and to make arrangements to have a number of them built at the car works at Jeffersonville.

On Saturday Messrs. Jas. S. Lithgow, Jacob Kellar, S. A. Hartwell, I. L. Hyatt, Morris Belknap, George W. Morris, J. L. Smyser, S. M. Lemont, and S. B. Thomas, President of the Elizabethtown and Paducah Railroad, accepted the invitation of A. B. Pullman, Esq., superintendent of the Pullman Palace Car Company, to visit Jeffersonville and inspect the "North Star," an elegant coach, manufactured at Chicago by the above company.

Upon arriving at Jeffersonville, the Louisville, delegation were met by Messrs. J. W. Sprague, President, and Wm. Crichton, Secretary of the Ohio Falls Car Company, and conducted through their immense establishment. But few of our citizens are aware of the magnitude of the works of this company. Although located in Jeffersonville, it is essentially a Louisville enterprise, as it was originated in this city, and the greater portion of the stock is owned here. The company was organized during the war with a capital of $400,000, and have every facility for turning out first-class work. The works are situated in the suburbs of Jeffersonville, and cover twenty acres of ground, all of which is owned by the company. Everything from a car wheel to a finely-finished passenger coach is manufactured by the company from the raw material. The shops were built especially for this class of work, and are admirably adapted for the purpose. An idea of the extent of the operations of the company can be formed from the fact that the average number of hands employed is 400.

After having made the tour of the car shops, the Louisville delegation, Messrs. Jno. C. Hilton, S. M. Richards, and A. B. Pullman, of Chicago, and a number of gentlemen and ladies of Jeffersonville, got on board of the "North Star" Pullman Palace car and made an excursion into the interior of Hoosierdom on the "Jeff." railroad.

The North Star is an elegantly finished and furnished coach combining the advantages of a day car and sleeping coach, fitted up with wash rooms, smoking saloons, &c. It is entirely different from any car now in use on the Southern roads, and is far superior to any that we have seen. It is so arranged that during the day the berths are entirely out of sight. So ingeniously are they concealed from view that a person on entering the car for the first time is at a loss to know where the berths are, yet in a few moments, by touching secrets springs, what appears to be only an elegant day car is converted into a sleeping coach, with every berth separate and distinct from the other. The berths are not simply shelves where persons are crowded into to pass sleepless nights, but elegant staterooms, luxuriously furnished with soft hair mattresses, and amply large enough for two persons in each, and with windows, mirror, and lamp in each apartment. The car is richly and tastefully ornamented, the inside work being oiled black walnut inlaid with ebony, with gilt mouldings. The metal work is heavy silver plate. The glass in the windows and doors is the best French plate. The apparatus for heating and ventilating the car is perfect. Every berth is furnished with a register, so that the occupant can regulates the temperature at will. On the outside the coach presents a very handsome appearance. The color is what is known as Munich lake, with gilt stripes. The cost of the car is $18,500. This style of coach is in very general use on the railroads of the Northwest, and has received the highest commendations from all sources. It is the intention of the Ohio Falls Company to enter at once upon their manufacture.

Reaching Henryville, the car containing the excursionists was attached to the down train and returned to Jeffersonville. During the trip an elegant collation was served up in a style that could not be surpassed by the best hotel in the country.

The excursionists were highly delighted with their trip, and, upon their arrival at Jeffersonville, resolutions thanking Mr. Pullman for the pleasant ride, and the Jeffersonville railroad for courtesies, were adopted.

The following resolutions, tendering thanks to the ladies of Jeffersonville who contributed so much to the enjoyment of all present, we give entire:

Resolved, That the thanks of the Ohio Falls Car Company be and are hereby most heartily tendered to the ladies of Jeffersonville who have so ably aided us by their happy smiles and great social excellence in our feeble efforts to entertain our guests, Mr. Pullman and his associates of the Pullman Sleeping Car Company.

Resolved further, That a vote of assurance of a most grateful remembrance for their kindness be and is hereby given, with a standing and irrevocable invitation to be with us on any and all subsequent like occasions.

Altogether the excursion was one of the pleasantest affairs of the kind ever witnessed, and one that will be long remembered by all who participated.

Detroit, Hillsdale and Indiana Railroad.

The Detriot Board of Trade, at a meeting held on the 23d ult., pledged $100,000 on the part of the citizens of that city in aid of the proposed Detroit, Hillsdale and Indiana Road. The town of Adams, Hillsdale county, pledged $35,000, and Addison and Lewance counties $85,000. Two routes are proposed—one through Hillsdale and one through Adrian. The new line through the latter place, it is said, will be 238 miles from Indianapolis to Detroit—the present distance via Toledo is 290 miles; the distance from Indianapolis to New York via Detroit will be 915 miles, whereas the present distance from Indianapolis to New York via Toledo and Buffalo is 962 miles.

☞ A board of directors, with Hon. N. G. Hickborn, of Stockton, Me., has been chosen by the Penobscot Bay and River Railroad Company, whose line extends along the shore 60 miles from Bangor to Rockland, where it connects with the Knox and Lincoln Railroad. Immediate measures for building the road are to be taken.

☞ The New York and Harlem Railroad Co. are about to construct a branch from Philmont, Columbia County, to the city of Hudson.

Locomotives for Mines.

The locomotive constructed for the use of the Lehigh Coal and Navigation Co. by Messrs. GRICE & LONG, of Philadelphia, has proved quite a success. It weighs 11,000 lbs. with water and fuel, is 12 feet in length, 4 feet 4 inches wide and 6 feet in height from rail to top of stack or roof, and cost $3,000 delivered at the mines. It is used in a gangway of the length of 7,500 feet. The gauge of the track is 3 feet 6 inches, and the rails used weigh 40 lbs. to the yard. Mr. R. P. Rothermel, a competent mining engineer, gives the difference in expense over the use of horse cars, as follows:

LOCOMOTIVES PER DAY.

1 engineer	$3 50
1 boy	1 25
Pepairs, oil, fuel, &c.	1 55
Total	$6 30

MULES PER DAY.

21 mules at $1 per day	$21 00
3 drivers	6 30
Extra cost of keeping road in repair	2 00
Total	$29 30

He also gives the first cost of the moters referred to:

Locomotive	$3,000
50 mine wagons	6,250
1 siding	1,000
Total	$10,250
21 mules at $200	$4,200
100 mine cars at $125 each	12,500
3 sidings for passing trains	3,000
Total	$19,700

This shows a very heavy saving both in first outlay and the daily expense at collieries, where the locomotive can be introduced. In anthracite mines there is but little danger of communicating fire in the gangways. The only siding required is at the end of the road, and is arranged with an air shaft to carry off the steam and gases from the combustion of the coal.

Messrs. Grice & Long will construct their locomotives of different sizes to suit gangways of different collieries. So satisfied are the Lehigh Coal and Navigation Co. with the one in use, that they are procuring two additional ones. Messrs. Grice & Long also adopt the engines for use at furnaces, rolling mills, &c.

☞ The Denton (Md.,) *Union* says the laying of the rails on the Dorchester and Delaware railroad has been resumed. Iron sufficient to lay about three miles of track had arrived, and workmen were busily engaged about 11 miles from Cambridge. Work is also progressing on the unfinished portion of the road between Hillsboro' and Easton.

☞ The Somerset *Democrat* states, on what it pronounces unquestionable authority, that the remaining sections on the line of the Pittsburg and Connellsville Railroad will be advertised to let some time during the month of March ensuing.

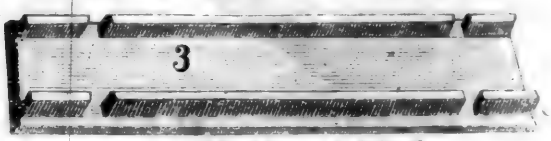
Over 14,000 horse power of Engines with this Valve are now in use, combining the greatest economy in fuel, simplicity and durability of parts, with low cost, they being cheaper than any other first-class Engine built.

Engineers desiring to adopt these improvements, either for new work or to improve the old style of Engines, will be furnished with drawings, and all information necessary to apply them in the best and cheapest manner. Circulars sent upon application therefor.



THE PHŒNIX IRON COMPANY'S
NEW SUSPENSION RAIL JOINT.

Cross Section of Rail Joint.

Side Clamps 14 in. long, showing Rail Stop.

Bottom Ribbed Plate, 14 in. in length.

The above diagrams show the general design of this new ***Suspension Rail Joint,*** which, after long and successful trial on the Philadelphia, Wilmington and Baltimore, and other Railways, is now offered to Railway Companies. The cut on the left gives a cross section of the finished joint, showing the rail (*1*) resting upon the ribs of the bottom plate (*3,*) with the flanges of the rail and the bottom plate embraced by the side clamps (*2,*) and held firmly in place by bolts (*4*). In screwing up these bolts, the bite or grip between the bevel on the side clamps corresponding with the bevel on the flanges of the rail, insures great vertical and lateral rigidity to the joint.

Several careful tests have proved that the deflection of two pieces of rail thus fastened at the joints and subjected to a transverse strain between supports five feet two inches apart, was but a trifle more than that of the same rail uncut, tested in the same way. The value of the joint in this respect was 85 per cent. of that of the solid rail, while the best fish joints, similarly tried, gave less than 50 per cent.

No holes are required to be punched through the neck of the rail, nor slots in the flanges, only a quarter circle notch of about half an inch radius is necessary to be cut out of the corner of one of the flanges of the rail to fit the "stop" shown in the upper right hand cut. This is a very important consideration, as holes punched or drilled in the neck are apt to split the rail longitudinally, and in *Steel Rails particularly,* is the principal cause of breakage.

All that portion of the joint, shown in the cut of cross section, below the bottom of the rail, bears endwise against the cross-ties, and prevents any creeping of the track. It makes a very firm joint, does not get out of order, and can be fitted to any size of rail. When ordering, send a sample piece of rail two feet long. Address,

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our

Columbus, Chicago and Indiana Central Railway Lease.

LEASE OF THE COLUMBUS, CHICAGO AND INDIANA CENTRAL RAILWAY, TO THE PITTSBURG, CINCINNATI AND ST. LOUIS, AND PENNSYLVANIA RAILROAD COMPANIES.

We publish this lease in full in our present issue. Its provisions are in substance as follows: The lessees are to maintain the road perpetually in first class condition, and furnish all the equipment necessary to do all the business which can be reasonably done thereon, without charge to the C., C. & I. C. Co., and to operate the road at their own expense.

Through passenger trains are to be run from Chicago *via* Columbus, Pittsburg and the Pennsylvania Railroad to the Eastern cities, and all facilities are to be provided for this line for both passenger and freight traffic, which are ever conceded to any other connection *via* Pittsburg. The earnings from through business of all classes between New York, Philadelphia and Baltimore, and all western terminal points which are reached *via* the C., C. & I. C. road are to be pro-rated between the three companies.

After payment of the taxes, the gross earnings from the business on the C., C. & I. C. road are to be divided, seventy (70) per cent. to the lessees, and thirty (30) per cent., to the C., C. & I. C. Co. *The lessees guarantee that the thirty* (30) *per cent., each and every year, shall amount to the full sum required to pay the interest on all the Bonds of the C., C. & I. C. Co., and in case there should be a deficit in any one or more years, the lessees are to make up and pay the deficiency without charge to the C., C. & I. C. Co.*

After the payment of the interest on the Bonds, the balance of the thirty per cent., is to be applied to dividends on the stock of the C., C. & I. C. Co.

The lessees also agree to provide from their own separate funds and without regard to the traffic of the road, the annual Sinking Funds as required by the mortgages of the C., C. & I. C. Co., *for the redemption and payment of the principal of all the mortgage bonds of the company.*

The lease is for 99 years, and renewable for like periods forever.

The officers of the company make the following estimate of the business of the road under the lease for a series of years:

Yrs.	Gross Earnings.			Profits.	Equal to Div'ds.
1st.	$5,000,000	30 per ct. is	$1,500,000	.....	.....
		Interest on $22,800,000 Bonds.	$1,540,000	.....	.....
2d.	$6,000,000	30 per ct.	$1,800,000		
		Interest	1,640,000		
				$200,000	2
3d.	$7,000,000	30 per ct.	$2,100,000		
		Interest	1,540,000		
				$560,000	4.308
4th.	$8,000,000	30 per ct.	$2,400,000		
		Interest	1,540,000		
				$860,000	6.616
5th.	$9,000,000	30 per ct.	$2,700,000		
		Interest	1,540,000		
				$1,160,000	8.924
6th.	$10,000,000	30 per ct.	$3,000,000		
		Interest	1,540,000		
				$1,460,000	11.232

This estimate for the sixth year is at a less rate per mile than the Pittsburg, Fort Wayne and Chicago road has earned in each of the last two years.

INDENTURE made and entered into this twenty-second day of January, Anno Domini one thousand eight hundred and sixty-nine (1869,) by and between *The Columbus, Chicago and Indiana Central Railway Company* party of the first part, and *The Pittsburg, Cincinnati and St. Louis Railway Company* party of the second part, and *The Pennsylvania Railroad Company* party of the third part, *witnesseth:*

ARTICLE I. That the party of the first part, in consideration of the covenants and agreements of the parties of the second and third parts hereinafter contained, doth hereby let, lease and demise to said party of the second part, its successors and assigns, the entire railroad of the party of the first part, lying, being and extending from its terminus in the City of Chicago, in the State of Illinois, through the County of Cook in said State, southward, to the State of Indiana, and through the Counties of Lake, Porter, La Porte, Stark, Pulaski, Cass, Howard, Tipton, Madison, Henry and Wayne, in Indiana, to the City of Richmond, and thence eastward to the State Ohio and through the Counties of Preble, Darke, Miami, Champaign, Union, Madison and Franklin, to the City of Columbus, Ohio; and also extending from the City of Richmond, aforesaid, westward through the counties of Wayne, Henry, Hancock and Marion, to the City of Indianapolis, in Indiana; and also extending from the main line aforesaid, at a point in Miami County, Ohio, westward through the County of Darke, in Ohio, to the Indiana State Line at Union City, and thence westward through the Counties of Randolph, Jay, Blackford, Grant, Miami, Cass, White, Jasper and Newton, in Indiana, to the line of the State of Illinois in the direction towards Peoria; altogether being in length of railways about five hundred and eighty-six and one half (586½) miles—about four hundred and twenty-four and one-half (424½) miles thereof being in the State of Indiana, about one hundred and thirty-four and one-half (134½) miles thereof being in the State of Ohio, and about twenty-seven and one-half miles (27½) thereof being in the State of Illinois—with all its franchises, equipments, property, tolls; and all its lands, tenements, buildings, fixtures, machinery connected with or used in the using or operating of said railway or appurtenant thereto; and all its rails, ties, fuel, fencing and erections; and all its rights of way and easements; and all cars, engines and tools owned by said party of the first part on the taking effect of this lease, and all rents accruing to it thereafter, together with all the rights, privileges and appurtenances thereunto belonging, with the right to use the franchises and privileges of every character, either on the line of the road or elsewhere; also the interest of the party of the first part in the line of road extending from Cambridge to Rushville, as well in the road as in bonds to be issued to said party of the first part for advances made in the construction of said road: *it being understood* that the entire revenues from said road, to which said party of the first part would be entitled had this lease not been made, shall enter into and become a part of the gross earnings of the railroad of the party of the first party hereby demised. In case said bonds shall be paid, then the money so paid shall be used in construction purposes on the line of the railroad of the party of the first part, for the mutual benefit of the parties hereto, and without charge to said party of the first part, *together* with

the use of all its rights, property and interest in any other railroad, wherever situated; *provided*, however, that this conveyance aforesaid shall not include nor operate to transfer any lands, property or other matters which said company now owns or may hereafter acquire, that need not be used for any purposes incident to the management or operation of said railroad, or the repair thereof, or in the business of said railway Company; nor shall these presents in any way prohibit the party of the first part from selling and conveying or otherwise disposing of the same, and of all the proceeds thereof, nor from using for its own purposes, as its own property, all moneys, bonds and other securities, all credits, all dues, whether in notes, accounts or otherwise, held, or to which it is entitled, on the taking effect of this lease or thereafter; *provided*, that the foregoing named assets shall be applied to the payment of the floating debt of the company of the party of the first part, so far as the same shall be required therefor.

To have and to hold, to the said party of the second part, its successors and assigns, the above leased and demised premises, for the full end and term of *ninety-nine* (99) *years* from and after the first day of February, Anno Domini one thousand eight hundred and sixty-nine, and renewable from time to time, at the election of said party of the second part, for like periods, forever, on the same terms, stipulations and conditions, but subject, however, to the earlier determination of this lease, as hereinafter provided for.

ARTICLE II. The said party of the second part, in consideration of the covenants and agreements of said party of the first part herein contained, doth hereby covenant and agree with the said party of the first part, to take under this lease the above demised premises for the said term of ninety (99) years from and after the first day of February, Anno Domini one thousand eight hundred and sixty-nine, with option of renewal as hereinbefore provided, and further covenants and agrees with said party of the first part, its successors and assigns, as follows, to wit:

ARTICLE III. That it will at its own cost risk and expense during all the said term, keep, preserve and maintain the said railroad in good working condition and repair as a first class railroad, so as to be suitable for the transaction of all business which can be reasonably done thereon, and will in like manner maintain and preserve all the side tracks and station houses, and will in like manner maintain in good repair and condition all the fixtures, appurtenances, tools and machinery pertaining to said railroad, and all the property essential to and connected therewith hereby leased; and will in like manner at all times during the continuing of this lease, maintain and preserve all the rolling stock, and equipments hereby leased in as good repair and condition as the same now are; and that it will in like manner at all times furnish and keep, for the use of the said railroad, engines, cars, equipment and rolling stock reasonably sufficient for the business thereof as the same may increase; and will in like manner at all times during the continuance of this lease, run and operate the said railroad so as to do and perform in a proper manner all the business which can reasonably be secured for and done on the same, and will fully perform towards the public all the obligations due to it from the said party of the first part, and will at its own cost and expense maintain and run and operate the said railroad, to the end that as large an amount of earnings and profits may be made and realized therefrom as can lawfully and reasonably be made and realized under the terms of this lease.

ARTICLE IV. That it will at all times place the said railroad to and from all common and competing points accessible by it, and connecting lines, on as favorable a basis, as to the trade and traffic thereon, as may at any time be granted to the road or roads of any other company, and will keep and maintain an efficient organization for the procurement of traffic and business on and over said railroad and between the seaboard cities and the West.

ARTICLE V. That it shall at all times during the hereby demised term or terms have the exclusive right to manage and control said demised railroad and premises, and to regulate and determine the rates of tolls, freights and charges for all the transportation over the whole or any part of said demised railroad and premises, rents or other revenues connected therewith; and it shall have full free and exclusive right to charge and collect all of said rents, tolls and charges, and to appropriate the same in the way and manner hereinafter mentioned, and shall have, use, exercise and enjoy all the rights, powers and authority aforesaid, and all other corporate powers and privileges, which can or may be lawfully exercised and enjoyed on and about said demised railroad and premises, as fully, amply and entirely as the same might or could have been used, exercised and enjoyed by the party of the first part had this lease not been made, and as exclusively, fully, amply and entirely as the party of the first part have or shall acquire authority by law to grant the same; it being understood and agreed that all revenues derived from the traffic carried jointly over the roads or parts thereof of the parties of the first and second parts hereto shall be divided pro rata, as to the distance moved thereon; except that local rates shall be preserved, as far as practicable, to both said parties.

ARTICLE VI. That in consideration of the premises, the said party of the second part shall at all times during the hereby demised term, pay out of the annual gross earnings all taxes and assessments of every kind, that may be imposed on, or be assessed against said party of the first part, on the property hereby leased, including the business done upon said line, in the same manner and to the same extent that said party of the first part would have to pay if operating its own line; and out of the surplus of said annual gross earnings the said party of the second part shall be entitled to receive *seventy per centum* (70 per cent.) for their own sole and exclusive use.

ARTICLE VII. It is mutually covenanted and agreed that the whole of the balance of said gross annual earnings and revenues, after deducting the taxes and assessments as aforesaid being thirty per cent. (30 per cent.) thereof, shall be and the same are hereby appropriated and shall be applied to the purposes and paid by the party of the second part in the way and manner following.

First. To the payment of the interest that may accrue after February first, eighteen hundred and sixty-nine, being at the rate of seven per cent. (7 per cent.) on all the mortgage bonds of the party of the first part, to the extent of twenty millions of dollars, ($20,000,000) in accordance with their respective equities and priorities, and—

Second. To the payment of the interest upon the income bonds of the party of the first part which may hereafter be issued to the party of the second part for the purposes of construction, as hereinafter mentioned, said interest to be deposited in ample time to meet the accruing coupons, at some bank, trust company, or agency, in the City of New York, as may be agreed upon from time to time by the parties of the first and second parts; Provided, nevertheless, that if the said thirty per per cent. (30 per cent.) should not in any one year be equal to the sum required for the payment of the interest as aforesaid, then and in that event the party of the second part shall and will at their own cost and expense, and without charge to the party of the first part pay to said agency or agencies the amount required to pay said interest, as the same shall become due and payable.

Third. To the payment of whatever surplus may remain in any one year of the said balance of thirty (30 per cent.) per cent. to the Treasurer of the party of the first part, annually, on the first day of March; or if, in the opinion of the said party of the second part, the probable annual surplus shall justify the same, then semi-annually on the first days of September and March in each year, for dividends upon the stock and for such other purposes as the party of the first part may determine.

ARTICLE VIII. In order to provide for the payment or redemption of the said twenty millions ($20,000,000) of seven (7 per cent.) per cent. bonds of the party of the first part, secured by mortgages, the party of the second part covenant and agree, that they will provide an annual Sinking Fund as required of the said party of the first part by the terms and conditions of the said mortgages therefor, and upon the redemption and cancellation of the said bonds, the party of the first part covenant and agree that they will in consideration thereof, pay or issue to the party of the second part, at the option of the party of the second part, bonds at par, bearing seven (7 per cent.) per cent. interest for an equal amount, to be secured by a mortgage having a first lien, unless otherwise agreed upon, or issue to the party of the second part shares of the capital stock, of party of the first part, at par.

ARTICLE IX. The party of the first part hereby assigns and transfers to the party of the second part all its right and interest in its contract of the eleventh of March, A. D., eighteen hundred and sixty-eight with the Terre Haute and Indianapolis Railroad Company et al., and its contracts with the Little Miami and Columbus and Xenia Railroad Company, the Indianapolis, Cincinnati, and Lafayette Railroad Company, the Indianapolis and Vincennes Railroad Company, stock yard contract at Chicago, and all other of its contracts relating to other roads for transportation, copies of which are hereto annexed; and the said party of the second part assumes and agrees, at its own risk and expense, to carry out each and all said contracts according to their respective tenors and legal liabilities, receiving and enjoying all benefits to be derived therefrom; and also to indemnify and save harmless, the said party of the first part, on account of its endorsements on the bonds of the St. Louis, Vandalia and Terre Haute Railway Company, and the Indianapolis and Vincennes Railroad Company.

ARTICLE X. The party of the second part shall provide the means for and acquire any needful right of way and real estate, erect such necessary depot buildings, shops, engine houses, side tracks, and appurtenances, and for other permanent construction as may be reasonably required to accommodate the traffic of the railroad hereby leased, and shall be entitled to receive for the actual advance so made, income bonds at par bearing seven (7 per cent.) per cent. interest, payable at such time as may be agreed upon, and such bonds, or any part of them, to be convertible into stock at the option of the holder at any time. The aggregate of such facilities required, and the amount to be expended, shall not exceed the sum of two millions ($2,000,000) of dollars for the next three (3) years. All expenditures of like character thereafter, and the means required therefor, shall be matters of mutual agreement from time to time.

ARTICLE XI. No issue of bonds beyond the fifteen millions ($15,000,000) of First Mortgage Consolidated Bonds and the five millions ($5,000,000) of Second Mortgage Consolidated Bonds, and the two millions ($2,000,000) of Income Bonds hereinbefore provided for, shall be issued by the party of the first part without the consent of the Board of Directors of the respective parties to this lease; the one half part of the said five millions of second mortgage bonds, to be used in taking up certain income and other bonds now outstanding, not included in the fifteen millions ($15,000,000) dollar loan aforesaid, on the different lines composing the railroad of the party of the first part; and the other half part thereof to be used in paying off the debts due and to become due, of all kinds, of the said party of the first part, except the said bonded debt of twenty-two millions ($22,000,000) dollars.

And it is further agreed that no further issue of bonds shall be made except as heretofore provided, or stock issued beyond the sum of thirteen millions ($13,000,000) of dollars, except as the

same may be increased by the conversion of bonds into capital stock of the company; in which case the bonds so converted shall be cancelled, making, in the aggregate of bonds and stock, thirty-five millions ($35,000,000) of dollars.

ARTICLE XII. The said party of the second part shall pay for all supplies and equipments delivered on prior contracts, after the railway passes into the possession of the party of the second part; and the party of the first part shall pay for all supplies and equipments delivered before the party of the second part shall take possession, including all pay-rolls and other floating indebtedness, so that the railroad and other property shall be made free of all debt, except of First Mortgage Bonds, to the amount of fifteen millions of dollars; Second Mortgage Bonds, to the amount of five millions of dollars; and of two millions of dollars of Income Bonds, to be issued as herein provided, for construction purposes.

ARTICLE XIII. Passenger trains shall be so run between Chicago and the east via Pittsburgh as to make direct connections, the speed of which shall be prorated upon the roads of all the parties hereto; and the party of the third part shall not run trains at higher rates of speed for any other connecting line, nor grant facilities of any kind that shall not be equalled by those given to the parties of the first and second parts; and in case the organization of the party of the second part for the procurement of either passengers or freight in the eastern cities or in the west, shall not be satisfactory to the party of the first part, then the said party of the first part may use its own organization, at its own expense for the procurement of the above traffic, in the east or west, being governed in the securing of such traffic by the rates fixed or agreed to by the party of the second part, and no consolidation of earnings or running arrangements shall be made by the party of the second part with any other company for competing business or traffic without the consent of the party of the first part.

ARTICLE XIV. In case of default in payment of interest on the bonds or sinking fund as before provided, for sixty (60) days after the same shall become due and payable; or in carrying out any of the provisions of this lease; or of default by the said second or third parties to do and perform any and all of the agreements to be done or performed by them, respectively, as aforesaid, for the space of four months, then the said party of the first part shall have the right to enter upon and take possession of all the property hereby leased, and all depots, shops, buildings and other permanent property added thereto; and the said second and third parties, each for itself, agrees with said party of the first part not to hinder or prevent its entering upon and taking such possession and using all said property for its own benefit and use by any suit or proceeding in law or in equity or otherwise, and without prejudice as to any rights of damages which said party of the first part may have for such default, it being understood that this lease shall terminate on the party of the first part taking possession of the demised premises as herein provided for.

XV. The said party of the first part shall have the right to appoint a disinterested person as engineer, having no interest, directly or indirectly, in the property, bonds or shares of the party of the first part, who shall examine, during the month of December, in each year, the said railroad and other property, equipment, &c., belonging to said party of the first part and in the possession of the said party of the second part, and who shall report to the parties hereto as to the condition of the same, in order that said parties of the second and third parts may comply with the conditions herein contained in that behalf.

ARTICLE XVI. And the party of the third part for and in consideration of the sum of one dollar to it in hand paid by the parties of the first and second parts, the receipt whereof is hereby acknowledged and of the benefits and advantages accruing and to accrue to it by reason of the covenants and agreements hereinbefore recited, by the said parties of the first and second parts, to be done and performed in the forming, maintaining and operating of a continuous line of railway in connection with the road or roads of the party of the third part, does hereby guarantee to the party of the first part, that the party of the second part will in good faith do, keep and perform all and singular the matters and things which the said party of the second part have hereinbefore covenanted and agreed to do; and upon any failure or default of the said party of the second part to keep and perform any and all of its said covenants and agreements, that then the said party of the third part, will, upon notice to them in writing, of the kind and nature of such failure or default do keep and perform the same for and on behalf of the said party of the second part. In which event the parties of the first and second parts agree that the party of the third part shall, at its option be entitled to all the profits and advantages which might or could arise or accrue therefrom to the party of the second part. And the said party of the third part further agrees that the said lines of railway so formed, maintained and operated shall at all times be placed upon a perfect equality with any other line or lines of railway that may connect at Pittsburg as to the rate and facilities for joint transportation for all classes of traffic to and from all points west and east. It being distinctly understood and agreed that the proceeds of all joint traffic on or over the lines of railway of all the parties hereto shall be divided among them pro rata, on the basis of the shortest all rail connections with the road of the party of the third part, to and from any competing points in the west, the object and intention being to place the joint line formed by the roads of the parties of the first and second parts in respect to the road of the party of the third part and its Eastern connections upon terms equally favorable to those granted to any other line, from time to time as to facilities and to give to the line of the road of the parties of the first and second parts as its share of earnings on joint traffic moved over it, all that can accrue to any other line of road west of Pittsburg for transportation of like joint traffic to and from any competing point on the pro rata per mile basis of division by shortest all rail lines forming the route of the party of the third part to and from Baltimore and Philadelphia and *via* Philadelphia to New York and other points East.

And the party of the third part will at all times so conduct its organization for securing traffic over its own and connecting roads as to place the line of the parties of the first and second parts on a perfect equality in all respects with any and all other lines.

ARTICLE XVII. It is further stipulated and agreed that the party of the first part shall and will, from time to time hereafter, during the continuance of this Lease, make, execute and deliver unto said party of the second part, their successors or assigns, all and every such further and other leases, deeds, transfers and assurances as by said party of the second part, their successors or assigns, shall be reasonably desired or required for fully effectuating the objects, intents and purposes of this Lease and of the premises, and for fully confirming, leasing and demising, as herein provided, the Railroad and premises hereinbefore mentioned, and leased, or intended so to be, and for more fully confirming and securing unto the said party of the second part all the rights and privileges hereinbefore mentioned and granted and secured, or intended so to be: It being understood, however, that no assignment of this Lease, nor of any rights under it, by the party of the second part, shall be made without the consent of the party of the first part.

ARTICLE XVIII. That the party of the second part shall keep an accurate account of all the business, receipts and revenues arising from the demised property, and its books relating thereto shall be subject to the examination of the President of the Company of the party of the first part, or of any other person duly authorized by them to examine the same; and the party of the second part shall furnish to the party of the first part monthly accounts of all the gross receipts, and an annual account of all the said gross receipts and revennes.

ARTICLE XIX. That if any difference shall arise in relation to this Lease between the parties of the first and second parts, each shall select a referee of experience and skill in Railway management, and the said referees shall select another of like skill and experience, and the three so chosen shall hear and decide such differences, and their decision, or that of a majority of them, shall be final and conclusive upon the said parties. And in case either of the parties fail to appoint a referee, as aforesaid, for the space of thirty (30) days after written notice to make such appointment, then and in that event the referee appointed, by the party not in default, shall appoint a referee for the defaulting party, and the said two referees shall then select a third referee as aforesaid.

In witness whereof, The Columbus, Chicago and Indiana Central Railway Company, The Pittsburg, Cincinnati and St. Louis Railway Company, and The Pennsylvania Railroad Company, the said parties to these presents, have caused their respective corporate seals to be hereunto set and affixed, attested by the signatures of their respective President and Secretary, the day and year first above written.

Michigan Northern Railroad.

This is the title of a new company just formed under the General Railroad law of the State to construct a road 294 miles in length, extending from a point on the State line, in the township of Sturgis, St. Joseph County, northwards passing through the city of Grand Rapids to Traverse Bay, and thence to the Straits of Mackinaw, the railroad being located in the Counties of St. Joseph, Kalamazoo, Allegan, Kent, Montcalm, Newaygo, Mecosta, Lake, Osceola, Wexford, Grand Traverse, Kalkaska, Antium, Emmet and Sheboygan, and to be built with a "T" or continuous rail. The capital stock is fixed at $2,500,000, divided into 25,000 shares. Eleven directors are named: R. Gardner, T. P. Sheldon, H. G. Wells, Geo. Goss, Kalamazoo; E. B. Dyckman, Schoolcraft; J. B. Millard, Three Rivers; Samuel Medbury, Detroit; L. H. Randall, Chester Warner, D. G. Clay, Grand Rapids; F. B. Gardner, Chicago. T. P. Sheldon has been made President of the company.

☞ The following gentlemen have been elected directors of the Cooperstown and Susquehanna Valley Railroad Company: John F. Scott, George W. Ernst, J. P. Sill, William Brooks, Ellery Cory, A. A. Jarvis, George Hinds, Charles Childs, James L Hendryx, A. H. Watkins, Charles W. Smith, G. Pomeroy Keese, Robert Quaif. At a subsequent meeting of the directors, John F. Scott was elected President; George W. Ernst, Vice President; F. A. Goffe, Secretary and Treasurer.

☞ The New Albany, Mount Carmel and St. Louis Air Railroad Company has been fully organized at New Albany, Ind., by the election of Augustus Bradley, President; Dr. E. Newland, Vice President, and George Lyman, Secretary. Fifty thousand dollars were subscribed on the spot. The route will be surveyed immediately.

Allegheny Valley Railroad.

At the annual meeting of the stockholders of this company, held in Pittsburg on the 22d ult., the following gentlemen were elected directors for the ensuing year: William Phillips, William M. Lyon, W. K. Nimick, James Park, Jr., B. F. Jones, J. Patton Lyon, and F. R. Brunot. The report of the President and Directors, which was read, is as follows:

In accordance with the requirements of the charter, the President and Managers present the sixteenth annual report to the stockholders of the Allegheny Valley Railroad Company, together with the reports from the Superintendent, Chief Engineer, Treasurer and Auditor, showing in detail the operations of their respective departments.

A condensed statement of the receipts and expenditures for the year is as follows:

Earnings:

From freights	$668,662 75
" passengers	263,057 10
" express	7,550 00
" mail	6,585 09
" miscellaneous	550 40
Total	$946,405 34

Expenses:

Conducting transportat'n	$133,015 47	
Motive power	147,710 00	
Maintenance of cars	87,016 61	
Maintenance of way	163,655 39	
General expenses	18,100 85	
		499,498 32
Net earnings		$446,907 02

During the year 1867 the gross receipts of the road amounted to $487,240 28, but owing to the varying circumstances of the road, as regards length, no useful comparison can be made with these figures the present year. In view of the fact that your road was only opened for through traffic in time to begin the fiscal year just closed and that its business for many months was subject to the many inconveniences and drawbacks incident to a new road, we have reason to congratulate the stockholders upon the result. The receipts for the first six months of the year averaged $67,674 per month. Receipts for the second half of the year averaged $90,059 per month. The expenses for the first six months averaged $38,569, and for the second six months, $44,680. Increase of gross receipts, 33 per cent.; increase of expenses, 15.8 per cent.; per centage of earnings in first six months, 57 per cent., for last six months, 49.6 per cent.

The year's business proves conclusively that your road can never fail to produce ample net revenue to meet the interest upon its bonded debt, and have a handsome surplus for the interest on the liquidation of the floating debt, the improvement of the road, and eventually for dividends.

The cost of managing and operating the road was fifty two per cent. of the gross receipts. The earnings per mile of the road were $7,224 47; expenses per mile, $3,812 96; net earnings per mile, $3,411 51. The number of barrels of crude petroleum carried, was 564,667; of refined, 595,577; number of tons of coal carried south, 208,992; northward, 20,387 tons. Further interesting details in regard to the operations and traffic of the road, are given in the accompanying reports.

The road bed and track are in excellent order, nearly all of the old iron having been replaced by new of the best make. The track is fully ballasted and surfaced up to the grade, and the engineer pronounces your road to be equal to the best roads in the country, "both for smoothness and solidity; also, for general safety." The rolling stock is in good condition, and generally sufficient for the present business of the company. The rapid increase of coal, lumber, stone and iron traffic, will require a considerable addition to the number of gondola cars.

The cost of the road is represented by

Capital stock	$2,241,250
Bonded debt	4,000,000
Floating debt, not provided for	1,801,543
Total	$8,042,793

For which you have 131 miles of first class single track railway, with the necessary side tracks, etc., and equipments for a business of $1,500,000 per annum. This is equal to a cost of $61,000 per mile, and in view of the fact that the forty-four miles of road between Pittsburg and Kittanning have been entirely relaid with new iron and ties, and have been ballasted and otherwise improved, making the road almost equivalent to rebuilding, this cost will be found to compare not unfavorably with that of similar enterprises which have been prosecuted during the same period of high prices and inflated currency.

Your Board of Managers estimate the gross receipts of the road for the coming year at $1,500,000. The expenses of the past year go to show that the expenses will not be over fifty per cent. of the gross receipts, which will leave us, over and above expenses, $750,000. Deducting from this sum the interest on $4,000,000 of bonded debt, $292,000, we will have the sum of $458,000, for the interest and reduction of the floating debt.

At the last annual meeting the stockholders directed the early prosecution of the work of extending the line of the road from the Allegheny River at the mouth of the Mahoning to the Susquehanna. The surveys had already far progressed, and as soon as possible a location was made, and the work begun at several important points, to prepare the road bed. Nothwithstanding the prior right of this company to the location, both by the charter and the surveys of its engineers, the contractor found his ground disputed by working parties claiming to act under the direction of the Philadelphia and Erie Railroad Company. Other points on the line were also claimed by the Winslow Colliery Company. It is not believed that either of the interfering roads will effect any purpose seriously detrimental to the interest of your company. Nevertheless, the paramount importance of vigorously pushing forward the work of your eastern extension is manifest. The company has expended already, in surveys and grading at different points, about $80,000, and it would be very desirable to put a large force at work on the tunnel at the summit, and other points where the work is heavy, as early as possible in the spring.

In order to supply the funds for the prosecution of this work, and to fund the present floating debt of the company, your board recommend the issue of the bonds authorized by the act of Assembly of April 11, 1867. To enable the company to issue the proposed bonds, and so apply them, a slight modification became necessary in the present laws of the company. The President has already taken preliminary measures to secure the necessary supplementary legislation, and the stockholders are asked to approve his action. The bonds, when issued, it is believed, will command ready sale at a satisfactory price, owing to the fact that the company is already in receipt of the necessary funds, in ample amounts, for the liquidation of the coupons as they mature.

A railroad bridge at Venango City or Franklin, or at each of these points, would be of great value to your company, but of equal or greater importance to the companies with which we desire to connect. In addition to the facilities it would afford in the transmission of oil, coal and lumber between the several roads, a considerable through business of traffic and trade between the head of the Ohio and the lakes would spring up. Especially would the picturesque beauty of the Allegheny River and the strange sights of the oil regions make the route a favorite one for tourists to and from the Falls of Niagara.

The bridge across the Allegheny at Brady's Bend has been completed, and greatly facilitates the shipment of railroad iron from the extensive works of the Brady's Bend Iron Company.

In surrendering, at the close of the year, the trust committed to them, the Managers take pleasure in bearing testimony to the diligence, faithfulness and ability uniformly evinced by the officers of the company in conducting the important and difficult duties of their respective positions.

The report of J. J. Lawrence, General Superintendent, was next read. The report gave a detailed statement of the business of the road during the year. From it we learn that 362,803 passengers were carried during the year, 97.1 per cent. of whom were local, and 2.9 through. The average number of miles traveled was 21.2; and the amount received per mile 3.4 cents. Total passenger mileage, 7,602,143. During the same period 570,186 tons of freight were moved, 89 per cent. of which was local, and 11 per cent. through freight. The amount of revenue per ton per mile 3.2 cents, and the cost of transportation 1.7 cents. The report states that no serious accident to passenger or freight trains has occurred, except one caused by the breaking of an axle near Scrubgrass, resulting in the serious injury of one passenger, and the slight injury of four others.

The reports of F. W. Martin, Chief Engineer of Construction, and H. Blackstone, Chief Engineer, were also read, upon the conclusion of which a resolution was offered and adopted, accepting the reports as read.

Peach Bottom and Oxford Railroad.

The York (Penn.) *Gazette* says that the report of the late survey of the Muddy Creek route for the railway from York to Peach Bottom, recently submitted by John A. Sheaff, Esq., of Lancaster, to the Superintending Committee, shows that a first-class road of not over thirty-three miles in length will connect the Susquehanna with the Northern Central, at an aggregate cost of not over $800,000, or $24,000 per mile, with grades on the creeks not exceeding sixteen feet per mile, and at the summit of only from fifty to sixty feet per mile. To accommodate the trade of Dunker Valley, with its stores of iron ore and limestone, a branch of one and a half miles may be built, and a branch of two and a quarter miles up to Delta

would be sufficiently near the large slate quarries in that vicinity to secure the entire business of Slate Ridge.

Boston and Albany Railroad.

The receipts of this road for the year ending November 30, 1868, were as follows:

From passengers		$2,290,568 41
" freight		3,410,892 76
" mails and other sources		373,143 85
		$6,074,605 02
Expenses, viz:		
Repairs of roadway	$653,812 76	
" engines	350,856 75	
" cars	542,961 46	
" buildings, Ferry, etc.	224,533 50	
Transportation exp.	2,328,006 15	
General expenses	56,002 19	
		4,156,172 81
Net balance of income		$1,918,432 21
From this deduct—		
Interest on state loans and exchanges	$314,397 64	
One per cent. to sinking fund	40,000 00	
Ten per ct. dividends, including Government tax	1,507,942 08	
		1,862,339 72
Leaving		$56,092 49
Appropriated for insurance		30,000 00
Surplus not divided		$26,092 49
Surplus last year of West'n & Boston and Worcester R.Rs.	$2,307,662 15	
Reduced by settlement of sundry accounts	$116,698 43	
Payme't of $10 per share to B. & W. RR. st'k-holders.	500,000 00	
	616,698 43	
		1,690,968 72
Total surplus of contingent fund, November 30, 1868		$1,717,056 21

SINKING FUNDS.

Value of Massachusetts sink'g fund November 30, 1867		$2,956,074 02
Contribution in 1868	$40,000 00	
Extra "	67,188 90	
Earnings "	308,217 57	
	$415,356 47	
Less premium on gold	$378,053 07	
		37,303 40
		$2,998,377 42
Less paid for £222,500		1,068,000 00
Amount of fund Nov. 30, 1868		$1,925,377 42
Value of Albany sinking fund, Nov. 30, 1867	$655,090 90	
Earnings in 1868	34,266 25	
	$689,357 15	
Interest paid in 1868	38,250 00	
	$651,107 15	
Bonds paid in 1868	48,000 00	
Value of fund Nov. 30, 1868		$603,107 15
Value of both funds Nov. 30, 1868		$2,528,484 57

The receipts of the Pittsfield and North Adams were $108,597 44; and the expenses, $78,824 44—leaving net earnings, $30,273. Two dividends, of $3 each, have been paid, amounting to $27,000—leaving a surplus of $3,273.

The gross receipts of the Boston and Albany Railroad for the year, as compared with the receipts of the Western and Boston and Worcester Railroads in 1867, stand thus:

	1867.	1868.
From passengers	$2,307,715 47	$2,290,568 41
" freight	3,261,310 37	3,410,892 76
" mails, etc	460,183 38	373,143 85
	$6,029,209 22	$6,074,605 02

This shows an increase in freight of $149,582 39, with a decrease in passengers of $17,147 06, and in other sources of $87,039 53—making the total increase, $45,395 80. The expenses of 1868 are $157,680 greater than for 1867. The report says:

The sterling bonds, due on the first of April and October last, amounting to £472,500, have all been paid in gold, £222,500 by the commissioners of the sinking fund, and £250,000 by the corporation, from the proceeds of a temporary loan from Messrs. Baring, Bros. & Co., of London. This loan was in gold, at five per cent. per annum without commissions, is secured by a pledge of Massachusetts sterling bonds as collateral, and can be recalled or repaid at any time on six months' notice by either party. The whole amount falling due during the year might have been paid from the sinking fund, but it was deemed advisable to effect a temporary loan, in the hope that the future course of the gold market would afford an opportunity for meeting our foreign obligations on more favorable terms than could then be effected. This hope has been already in part realized, as we could to-day remit against the foreign debt at about ten per cent. less than at the time of the maturity of the bonds.

In view of these facts, it may be worth the attention of the company to determine whether a portion of this temporary loan should not soon be paid from the proceeds of new stock to be issued to the stockholders.

The Albany city bonds have been reduced by the payment from the Albany Sinking Fund of $48,000, and there remained in the two funds with the accrued interest to Nov. 30, $2,528,484 75.

The second track has been completed, so that we now have a double track road the entire distance from Boston to East Albany, except over the Connecticut River bridge at Springfield. A little more than seven thousand tons of new rails and a corresponding number of new sleepers have been used in repairs during the year; the rolling stock has been largely increased and improved, and the whole is now in excellent condition.

The company have 144 locomotives, 108 passenger, 34 baggage and postal, 2,334 merchandise, 137 gravel, and 100 hand cars. Also, 98-234ths of 34 passenger, 13 express, 2 post office, and 8 baggage cars of the New York and Boston Express Line and 2-5ths of 6 passenger and baggage cars on steamboat train.

The number of miles run by locomotives with passenger trains was 945,933; with freight trains, 1,639,618; with gravel trains, etc., 142,007—total, 2,727,558.

The number of through passengers carried was 53,842; way passengers, 3,568,272—total, 3,622,114.

The total number of tons moved was 1,319,059, of which 568,303 tons went west, and 750.756 tons east. The through tonnage westward amounted 75,688; do., eastward, 177,343. All other tonnage westward, 492,615; do., eastward, 573,413. Equivalent number of tons carried one mile, 121,848,891, equal to 606,744 tons carried over the whole road.

An aggregate of 205,848,323 passengers or tons of freight carried one mile in 1868; against 193,664,499 passengers or tons of freight carried one mile in 1867.

The cost of transportation for each passenger and each ton of freight one mile in 1868 has been 2.024 cents, against 2.064 cents in 1867.

The cost of the Boston and Albany, Albany and West Stockbridge, and Hudson and Boston Railroads to November 30, 1868, has been as follows:

Boston and Albany Railroad	$13,526,709 33
Equipment	2,224,200 49
Albany and West Stockbridge R.R.	2,411,055 75
Hudson and Boston Railroad	208,036 01
West Stockbridge Railroad stock	12,000 00
	$18,378,001 58

Ass't Supt.—J. B. CHAPIN, Albany.

Treasurer.—C. E. STEVENS, Boston.

Lykens Valley Railroad.

This road, leased by the Summit Branch Coal Company about three years since, has passed into the control of the Pennsylvania and Northern Central Railroad Companies, together with the Summit Branch Coal operations at Williamstown, the eastern terminus of the road. The new officers of the company are as follows:

President.—H. J. Lombaert, 2d Vice President of the Pennsylvania Railroad.

Directors.—J. D. Cameron, President of the Northern Central; J. Edgar Thomson, President of Pennsylvania; J. N. DuBarry, Vice President of Northern Central; G. P. Sanger, President, and W. B. Fowle, Treasurer of the Summit Branch Company.

☞ The grading of the Bangor and Piscataquis Railroad between Dover and East Dover is finished and the rails will be laid as soon as the ground opens.

American Railroad Journal.

Saturday, March 6, 1869.

Stock Exchange and Money Market.

Notwithstanding the further general falling off in the city bank averages during the week, including a decrease of 2½ millions of specie, 2⅜ millions of deposits, and $162,143 of legal tender notes, with a contraction of two millions in the loan and discount item, money was in full supply and easy in price at 5@7 per cent. on call, and 7 @9 per cent. per annum in the discount form, until late in the afternoon of Monday, when there was a sudden increase of demand, almost wholly from speculative sources and largely the result of manipulation, leading to notable activity in the market, which was maintained up to the close of the week under review, and which gave lenders the advantage as to the price of accommodation, enabling them to mark up even the best call loans to the full legal figure of 7 per cent. as the minimum rate, and to obtain mercantile paper at a somewhat heavier shave than had been exacted earlier in the week. Part of the increased activity was due to the growing wants of the mercantile interest, in anticipation of a vigorous and successful spring trade. But most of it resulted from speculative influences brought to bear on the market in the interest of the Gold, Government and Stock Exchange operators for lower values. The city banks were less liberal lenders, outside the line of their regular customers. Private parties, controlling large balances, were naturally taking advantage of the temporary animation and stringency, to make the most out of the "situation." The U. S. Sub Treasury at this port cut down its cash balances about three millions, during the week, out of its February gains of nearly five millions. Washington dispatches reported the aggregate coin reserve of the Treasury Department last Saturday at 98 millions, and the currency balance at about 13½ millions. At the close of January the coin reserve was 88¾ millions, and the currency balance 17½ millions. The coin and currency balances of the United States Sub-Treasury on Saturday were $88,540,000, against $83,670,000 at the end of January. During the current week the City Banks will probably receive nearly as much Gold from the Treasury for the 10-40 Gold Interest due March 1, as will be drawn from them for customs. The Sub Treasury paid out 1¾ millions of coin interest on the Ten Forty Loan, during the first two days of the week and month.

The specie reserve of the city banks is now $20,832,603, against $22,091,642 same time last year. The city bank deposits are now $185,216,175, against $208,651,578 week ending Feb. 29, 1868. The legal tender reserve amounts to $50,835,054, against $58,553,607 same time last year. The circulation now stands at $34,247,981, against $34,086,223 same time last year. The loans are now $261,371,897, against $267,240,678 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $105,563,264 a day, against a daily average of $117,998,508 the preceding week, and $115,126,000 the week ending with Feb. 10, 1869. The current week's exchanges average about $126,305,134 a day. The city banks, last week, reported a further loss of $2,518,788 of specie, $2,396,371 of deposits, and $162,143 of legal tender notes. They reduced their loans, $2,056,171; and added to their circulation, $660.

The average amounts of the Gold Exchange Bank loans and discounts last week was $1,228,924, average amount of specie $633,389, average amount of deposits $1,362,581.

National Bank notes to the amount of $192,840 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $312,926,166, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $13,011,149, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,915,017. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,613,900; and for the public deposits, $33,851,350—making a total of $376,465,250. The Treasury Department last week redeemed and destroyed $448,800 of worn and mutilated fractional currency, and issued $239,800 of new. The outstanding amount of fractional currency on the 1st of February, 1869, was $35,511,127, against $34,215,716 on the 1st of January, 1869, and $33,875,268 on the 1st of December, 1868.

The U. S. Sub-Treasury receipts, week ending with Feb. 27, were $6,547,652, including $3,588,089 from customs duties; payments, $8,461,940, including $146,483 of coin interest; balance at the close of the week, $88,541,593, against $90,455,882, at the close of the preceding week, showing a decrease of $1,914,289. The business of the Office during the first two business days of the current week, was as follows: On Monday, receipts, $1,536,023, including $587,000 from customs; payments, $938,425 including $190,000 of coin interest, On Tuesday, receipts, $1,220,078 including $523,000 from customs and, payments $2,429,124 including $1,509,691 of coin interest. The balance at the close of business on Tuesday stood at $87,930,325, against $90,889,560 a week previous; and $88,203,580, on Feb. 10, 1869. The aggregate receipts of the office in February were $31,657,457, including $12,179,726 from customs, aggregate payments, $26,789,619, including $1,923,545 of coin interest.

The outstanding amount of coin certificates on the 1st of Feb., 1869, was $32,659,520, against 27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $365,000, and retired $3,493,089 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during February, reached $1,634,240.

Government derived a liberal income from customs, during the week, though the excises yielded only moderately. The customs revenue at this port during the last week reached nearly three-fourths of a million a day; and for all February showed an increase of nearly two and a half millions, as compared with February of last year. The excises, last week, yielded about three millions; customs at the port of New York, $3,588,089, and at the outports about $1,196,000 (in coin) more, making the grand total income for the week equal to about $9,356,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 96½ millions, according to the latest Washington advices. The increase of gold customs, thus far in the fiscal year—eight months—at all the collection ports of the United States, is now about ten and a half millions. For the whole fiscal year, 1868, they were $164,492,000; so that without further increase from the present date to June 30, the fiscal year, 1869, will yield about $175,000,000. But as the prospects of our foreign trade now look, we believe the amount will exceed one hundred and eighty millions, while the interest upon the gold-bearing debt for the year is only $124,255,092—leaving as applicable to sinking the principal of this debt, about $56,000,000 exclusive of the surplus gold from previous years, not otherwise sold or disposed of.

The Gold Exchange Bank clearances on Wednesday, were $100,032,000, and the resulting balances $2,567,099 in coin, and $3,954,646 in currency.

Gold has been more active and excited, but lower and irregular, since our last. It has been sold as low as 130¾, but it subsequently rallied to 132⅛, and closed on Wednesday at 131⅞@132. The earlier dealings were all in favor of a much reduced premium, influenced by very free offerings, in view of extraordinary activity and high prices made, in the market for the Public Funds, which up to noon on Saturday were steadily on the rise in both the home and foreign markets, but which reacted during the closing days, under bear sales, in anticipation of the failure of the Schenck public credit bill to become a law at the final session of the 40th Congress. But the more reliable private advices on Tuesday and Wednesday from Washington were against this assumption, and the prospect was that those who had been free sellers on Monday and Tuesday would be even more eager buyers presently. It is confidently believed, that, "law or no law," General Grant will give emphatic utterance to his opinions as to the binding force of the claims of the national creditors, in their most equitable construction, as to spirit as well as letter; and that the coming Congress will give prompt effect to his deliberately formed views on the subject of the validity of the debt. The Gold speculation closed feverishly on the basis of the figures already quoted. There was rather more of an export movement last week; but there has been very little of an outflow thus far this week. The customs inquiry was quite brisk, last week, and is also active this week, averaging thus far over half a million a day.

The customs demand for Gold last week, averaged $717,618 a day; thus far, this week, it has averaged $555,000 a day, or equal to a weekly aggregate of $3,330,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $291,200, and since Jan. $2,021,640 against $542,587 same time in 1868. The receipts from California, last week, were $104,000. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $80,725,677, against $73,631,248 same time in the preceding fiscal year.

The total receipts of California gold at this port, since July 1, 1868, have been $15,382,602, against $21,545,593 same time in fiscal year 1867–'68, showing a decrease in the current fiscal year, of $6,163,085. The exports of specie, from this port, last week, were $1,093,967, against $659,901 same week last year; total, since July 1, 1868, $28,184,461, against $38,562,730 in 1867–'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $146,483; since July 1, 1868, $63,158,346, against $51,166,606 same time in 1867–'68. The specie exports from San Francisco, from Jan. 1, to Jan. 22, 1869, were $3,161,497, against $2,732,801 same time in 1868.

Foreign Exchange closed up much more firmly, on a reduced supply and a moderately active demand. Both bankers and commercial bills have been less freely offered at the going rates. Bankers' prime sixty day bills on London closed on Wednesday at 108¾@109¼, and on Paris to 5.21¼@5.16¾; sight bills on London to 109¼@109¾, and on Paris to 5.16¾c.@5.13¾. The offering of produce bills has been on a moderate scale this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,108,676, against $3,930,200 same week last year; total, since July 1, 1868, $108,767,586, against $122,174,037 same time in preceding fiscal year of 1867–'68.

Government securities have been very heavily dealt in through the week in both the home and foreign markets, and on Saturday the highest figures yet realized for the war loans were made, U. S. Five-Twenties of 1862 have been sold here as high as 118¾@118⅞, and in London at 83. The subsequently dealings were on a less confident basis as to price, though quite extensive in amount. Values were sensitive to the variable London quotations, the successive rumors from Washington, and the Money pinch which led to rather free sales by some speculative holders. But the offerings of bonds found a ready market at the ruling figures. The home inquiry was on an enlarged scale, and there was no indication of an immediate, material falling off in the foreign call for our funded obligations. One phase of the foreign demand for United States bonds is the increasing partiality of thrifty people in England for five-twenties, which pay six dollars a year, in coin, on each 82 or 83 dollars invested in them. It is not probable that, with the assurance which is now afforded of the ultimate honorable liquidation of the public indebtedness, the mass of even English investors will long hesitate to buy United States six per cent. coin bonds, at any figure under the prevailing market price for British three per cents. which stand, in London at 93.

U. S. sixes of 1881 closed here on Wednesday at 115¼@115⅜; U. S. Five-twenties of 1862, 117¼@117⅜; U. S. Five twenties of 1864 at 113⅝@113⅞; U. S. Five-twenties of 1865 at 114¾@114; U. S. Five-twenties of 1865, consolidated, 112⅜@112½; U. S. Five-twenties of 1867, 112⅜@112⅝; U. S. Five-twenties of 1868, 112¼@112½; U. S. Ten-forties at 105⅝@105⅞; U. S. Six per cent. currency bonds, 101⅞@102.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 17.	Feb. 24.	Mar. 3.
Consols	93'	93	93
U. S. 5-20's of 1862	78¼	79¼	81½
Erie	24	24¼	24¾
Ill. Central	96½	97¼	97

The extraordinary activity in the Public Funds overshadowed the dealings in Railway and Miscellaneous share property most of the week, and prices were quite variable, weakening off notably on Tuesday, influenced by the Money pressure, which forced many speculative holdings on the market. The dealings late on Wednesday showed more firmness.

There has been a lighter and less confident movement in domestic produce, which has been easier and irregular in price, particularly Breadstuffs, Provisions, Cotton, and Petroleum, though toward the close, some articles in the flour and grain line, as also hog products and Petroleum seemed inclined to rally. Middling upland cotton closed steadily on Wednesday at 29¼ cts. per lb. The stock of cotton now here is estimated at about 102,000 bales. The receipts at the port this week, have averaged about 3,500 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 1,691,000 bales, against 1,632,000 bales same time in 1867–'8; exports, same time 843,000 bales, against 997,000 bales same time in 1867–'8; stock on hand at latest dates, 394,000 bales, against 361,000 bales same date 1868. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports

of domestic cotton goods from this port, since Jan. 1, have been 2,286 pkgs., against 2,140 pkgs., same time last year. From Boston, 2,979 pkgs., against 2,237 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been moderately inquired for at from 10@17½c., per lb.; week's receipts, 4,928. Milch cows at from $40@$125, each, receipts, 77. Veal calves at from 9½@13½c. per lb.; receipts, 399. Sheep and lambs at from 5¾@9¾c., per lb.; receipts, 25,-311. Swine in limited request at from 10@10⅝c. per lb., all live weight; receipts, 11,960. Foreign merchandise has been in fair, though not urgent request, at generally steady rates though Sugars and Molasses closed in favor of buyers. The total imports of foreign dry goods, last week, were $1,-860,426, and the total amount marketed $2,021,-083. The value of foreign merchandise imported last week, was $2,902,075—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,762,501, against $5,111,098 same week last year; total since July 1, 1868, $163,600,962, against $150,-135,154 in 1867–'8. The ocean freight market has been without special activity, though rates have been without improvement. For Liverpool we quote flour at 1s. 4½d.@1s. 6d. by sail, and 1s. 6d.@1s. 7½d. by steamer, per bbl.; grain at 3½d.@4d. by sail, and 4d.@4¼d. by steamer, per bushel; cotton at ⅛d. by sail, and 3/16@¼d. by steamer, per lb.; and heavy goods 12s. 6d.@20s. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 354.

The New York exports, exclusive of specie, for the week ending Mar. 2, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,980,200	$2,108,676
Prev. reported	25,912,129	23,926,744
Since January 1	$29,892,329	$26,035,420

The imports for the week ending February 28, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$2,037,327	$1,860,426
Gen. merchandise	3,073,771	2,902,075
Total for the week	$5,111,098	$4,762,501
Previously reported	28,325,923	36,596,362
Since January 1	$33,437,021	$41,358,863

The balance in the Sub-Treasury on Wednesday was $87,701,242 97.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ THE FIRST MORTGAGE, FIFTY-YEAR CONVERTIBLE BONDS of the ROCKFORD, ROCK ISLAND and ST. LOUIS RAILROAD COMPANY pay the PRINCIPAL AND SEVEN PER CENT. INTEREST—1st FEBRUARY and 1st AUGUST—IN GOLD COIN, *Free of Government Tax.*

The bonds are offered at 97½ and accrued interest in currency.

Pamphlets, with maps, giving full information, sent on application.

All Bonds subscribed for sent by Express free of charge.

The Bonds may be had of H. H. BOODY, Treasurer, No. 12 Wall st., or of HENRY CLEWS & CO., Bankers, No. 32 Wall st., New York.

☞ From the Dallas *Herald* we learn that the Kansas City and Mexican Gulf Railroad is going on steadily, and is expected to be completed to Fort Scott the present year, and in another year to Red River.

☞ The January product of the Franklin Copper Mine was 83 tons, 500 lbs.; of the Quincy, 80 tons; of the Ogima, 2 tons, 1,643 lbs.; of the Schoolcraft, 10 tons, 1,130 lbs.; of the National, 4 tons.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States February 1, and March 1, 1869:

	Feb. 1, 1869.	March 1, 1869.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$221,589,300.00	$221,589,300.00
Six per cent. bonds of 1881	283,677,400.00	283,677,400.00
Six per cent. Five-twenty bonds	1,602,583,350.00	1,602,587,350.00
Total	$2,107,850,050.00	$2,107,854,050.00
DEBT BEARING CURRENCY INTEREST.		
Six per cent. Pacific R. R. bonds	$52,017,000.00	$53,937,000.00
Three per cent. certificates	57,410,000.00	57,140,000.00
Navy pension 3 p. ct.	14,000,000 00	14,000,000.00
Total	$123,427,000.00	$125,077,000.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 1, 1867, June and July 15, 1868	$1,977,150.00	$1,816,350.00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867, and May 15, Aug. 1, Sept. 1 and 15, and Oct. 1 and 15, 1868	3,599,170 00	3,422,460.00
Bonds (Texas indemnity)	256,000.00	256,000.00
Treasury notes, (acts July 17, 1861, and prior thereto)	148,411.64	148,411.64
Bonds April 15, 1842, Jan. 28, 1847, and March 31, 1848	278,400.00	262,800.00
Treasury notes, March 3, 1863	445,492.00	375,432.00
Temporary loan	193,313.00	189,010.00
Certificates of indebtedness	13,000.00	12,000.00
Total	$6,910,936.64	$6,422,463.64
DEBT BEARING NO INTEREST.		
United States notes	$356,021,073.00	$356,021,073.00
Fractional currency	35,511,127.54	36,781,547.50
Gold certificates of deposit	32,659,520.00	28,775,560.00
Total	$424,191,720.54	$421,578,180.50
Total debt	$2,662,379,707.18	$2,660,931,694.14
AMOUNT IN THE TREASURY.		
Coin	$88,732,716.44	$98,741,260.72
Currency	17,441,332.66	16,853,529.04
Total	$106,174,049.10	$115,594,789.76
Debt less cash in the Treasury	$2,556,205,658.08	$2,544,336,904.38

By comparing this with the statement of February 1, it is shown that the debt bearing coin interest has increased $4,000; the debt bearing currency interest has increased $1,650,000; the matured debt not presented for payment has decreased $488,473; and the debt bearing no interest has decreased $2,613,540 04—making the decrease in the total debt since February 1, 1869, $1,448,013 04. The amount of coin in the Treasury during the same period has increased $10,008,544 28, and the amount of currency has decreased $587,803 62—leaving the amount of debt less cash in the Treasury March 1, $11,868,753 70 less than on February 1.

☞ The Portland Company's works at Portland, Me., are building two locomotives and twenty-four iron cars for the Panama Railroad; one locomotive for the Grand Trunk Railroad, and six passenger cars; completing a contract for 105 cars for the European and North American Railroad, and building one locomotive for that road.

Journal of Railroad Law.

RAILROADS—INJURY TO SERVANT EMPLOYED AS BRAKEMAN BY TRAIN RUNNING OFF TRACK—RULE OF DAMAGES—ORDINARY HAZARDS OF EMPLOYMENT.

The facts of the late case of the Ohio and Miss. R. R. Co. *vs.* Hammersley (28 Ind., 371,) are fully set forth in the following able opinion of

RAY, J.—This was an action by the appellee to recover for the death of his son, a minor, caused by the negligence of the appellant.

Among other defenses, the appellant answered that the deceased was in the employ of the railroad company, and that his duties were to furnish water to the other servants employed on a construction train, and that in violation of the known rule of said appellant, he took a position upon the engine drawing said train, and that by reason of the position so occupied the injury resulted, and without the fault of the appellant.

On the trial, the appellant offered a witness to prove that the deceased, on the day following the injury, stated that he knew he was acting in violation of orders, in riding on the engine at the time he was injured, and that if he had not been thus acting contrary to appellant's regulations he would not have been hurt. It was sought to introduce this as an admission by the boy. The Court excluded the evidence. This, it seems to us, was correct. The suit was brought by the father for loss of service and for expense incurred by reason of the injury. This cause of action the boy could not admit away, nor could he, without regard to the question of minority, have released the company from any liability incurred by it to the father. Had he lived, he would have been a competent witness to prove the facts, but his previous admissions could only have been given in evidence to impeach his testimony.

Had the action been prosecuted by the son, the statement would have been properly introduced as an admission against himself.

Under the most favorable view of the evidence given on the trial, the following facts were established: The deceased was employed to go upon a construction train, or train for the repair of the track, and furnish the hands employed on the train with water, at the points where the train was stopped, and the hands disembarked for labor. The boy had also been employed, with the knowledge of his father, who was engaged on the construction train, and without his objection, as the father states "frequently as fireman, sometimes as brakeman, and sometimes he helped to water the engine." The accident was caused by the engine and a number of the cars running off the track at a point where the rails were being elevated at a curve on the line of the road, and this resulted from the negligence of the person in charge of the section hands, in not sending out a signal flag. There was a finding of the appellee, and over a motion for a new trial. Judgment was rendered upon the verdict.

We know of no rule of law by which this recovery can be sustained. The rule *respondeat superior* can only be applied in an action sounding in tort, and not where the liability arises out of contract. Where a servant, engaged in his proper employment, and acting within the scope of his authority, *injures a stranger*, the master is responsible for the act, being done by his agent, is held to be his act. But this liability does not grow out of contract. The form of the action at common law is trespass on the case. But when the relation of master and servants exists, the duties and liabilities resulting are to be determined from the contract of employment. Thus, it must be implied that one in accepting a situation surrounded by known dangers, exacts compensation for the hazard he incurs, and he cannot, unless by express contract, hold his employer as an insurer against dangers known alike to both servant and master, and against which the employed can perhaps more fully protect himself than he could be protected by the master. When, therefore, one accepts a situation in which he must of necessity be exposed to injury by any want of care on the part of a fellow servant, he must be held to have made his contract in view of such hazard, and unless he by express stipulation, makes the master the insurer against such injury, he cannot recover by virtue of his contract, and we know of no well considered case which sustains a recovery in an action sounding in tort. The servant, indeed, has the right to expect that the master will select prudent and careful fellow workmen, and any failure to do this may render the master liable for injuries resulting from such failure; for such neglect would be a breach of the implied terms of the employment, and a fraud upon the servant, for it would increase the ordinary dangers of the situation, against which alone he is supposed to have compensated himself by his contract. As to all injuries, therefore, resulting to the servant from the ordinary hazards incident to his employment, the master is not liable. As to injuries resulting from any other cause, the servant stands towards the master as toward a stranger.

The entire current of authority, and indeed all the cases, if we except the single one of Chamberlain *vs.* The Milwaukee and Mississippi Railroad Co., have established the doctrine that, as a general rule, a master is not liable to his servant for an injury sustained by the negligence of a fellow servant. The only conflict among the authorities has arisen upon the application of this general rule to special cases. The exception, as it has been sometimes called, as now stated by the authorities, is that the master will be liable, unless the servant receiving the injury, and the one by whose negligence it was caused, are both engaged under the same master in promoting one common object. The authority for this distinction is admitted in the Wisconsin case, but that it rests upon any sound principle is denied. If all the servants of one master were his slaves, or in other words, his servants for any and all purposes, we do not see on what principle the distinction could be sustained. But in all the cases which are to be treated as authority, either by the evident consideration given to them by the Court in which they were rendered, or by the respect in which they are held from the reputation of the Court pronouncing the opinion, the servant has been such only as to his employment for a special object, and where another servant has been employed for a purpose entirely other and different, it may be well said that they are not fellow servants of one master. Each is but a servant for the purpose for which he is employed, and as to any other duties or dangers, not resulting from such employment, he is not a servant, and, there-

fore, for injuries sustained may hold the master responsible, upon the same ground that he would any stranger. Under the authorities, it is very clear that in the case under consideration the appellant is not liable.

In a very recent case in the Exchequer Chamber, in which the facts upon which the question of law arose are sufficiently stated in the opinion, Erle, C. J., says:

"The plaintiff was employed by the railway company to do carpenter work, and he was so employed on the line of railway, and the wrongdoers were the porters, also in the employment of the company, who, in shifting a steam engine on a turn table, close to the shed on which the plaintiff was working, managed the business so negligently that the engine struck against the ladder which partly supported the plaintiffs scaffolding, and threw the plaintiff violently to the ground. The plaintiff and the porters were engaged in one common employment, and were doing work for the common object of their masters, viz., fitting the line for traffic. On a suggestion put by my brother Pigott, Mr. Macnamara was driven to an answer, which (if it did not admit that it was the same thing,) showed that he had difficulty in establishing any distinction whether the plaintiff was working close by, or whether he was employed on the turn table. I think it can make no difference, and the rule which exempts the master from liability to a servant for injury caused by the negligence of a fellow servant applies. The principle on which this rule was established, as applicable to the present case, is very clearly put by Blackburn, J., in the judgment, to which Mellor, J., agreed, in the Court below. 'There are many cases where the immediate object on which the one servant is employed is very dissimilar from that on which the other is employed, and yet the risk of injury from the negligence of the one is so much a natural and necessary consequence of the employment which the other accepts, that it must be included in the risks which are to be considered in his wages. I think that whenever the employment is such as necessarily to bring the person accepting it into contract with the traffic of a line of a railway, risk of injury from the carelessness of those managing that traffic is one of the risks necessarily and naturally incident to such an employment, and within the rule. The cases on this subject are extremely numerous, and have been closely examined, both here and in the Court below, and I could not make the matter clearer by going through them. It is sufficient to say that I entirely agree with the judgment of the Court below, that the facts of the case bring it within the rule exempting the master from liability.'" Morgan *vs.* the Vale of Neath Railway Co., Law Rep., 12 B., 149.

So in a still later case in England, where the plaintiff was employed by a railway company as a laborer, to assist in loading what is called a "pick-up train" with materials left by platelayers and others upon the line. One of the terms of his engagement was, that he should be carried by the train from Birmingham, where he resided, and whence the train started, to the spot at which his work for the day was done, and be brought back to Birmingham at the end of each day. As he was returning to Birmingham, after his day's work was done, the train in which the plaintiff was, through the negligence of the guard who had charge of it, came into collision with another train, and the plaintiff was injured. Held, that inasmuch as the plaintiff was being carried, not as a passenger, but in the course of his contract of service, there was nothing to take the case out of the ordinary rule which exempts a master from responsibility for an injury to a servant through the negligence of a fellow servant, when both are acting in pursuance of a common employment.

The judgment is reversed, with costs, and the cause remanded for a new trial.

From the St. Louis Republican, Feb. 10.

Iron Mountain Railroad.

It is remarked that this road brings into this city more car loads of freight than any road terminating here on either side of the river. It is, however, of a low price class of freight, mostly, and the cars built for the transportation of ore are sent back empty. The exports of merchandise from the city over the road are gradually increasing.

The President has been trying the experiment of a reduction in passenger fares. The reduction was over twenty per cent., but so far the result has been a falling off in the aggregate receipts from passengers. The fare between Carondelet and St. Louis was reduced January 1, to ten cents, or about one cent and three quarters per mile. This is very low. The number of passengers increased in January about 8,000, but the aggregate receipts of the passenger traffic between the two places are but slightly affected. Considering the extra accommodations, the frequent trains and high speed that passengers require, this branch of business, in itself, except as a necessary incident to freight, is regarded as unprofitable.

No express companies or fast freight lines are permitted on this road. The President thinks the railroad company can do all this business itself, without the intervention of outsiders; and if there is any profit in special freights, or in sleeping cars or anything else connected with its legitimate business of transportation, the owners of the road intend to have it, and not give it to people who have no interest in the road.

The Southern division of this road has been opened to business and the trains are running about forty miles. Corn is the principal freight yet offered, of which there are some ten car loads per day taken down to the company's landing at Lucas Bend.

Merchandise is beginning to find its way over this line into the interior. It reaches the wharfboat at the company's landing by steamers. The cars running on this division of the road were built at Jeffersonville, Indiana, and are said to be of the best quality.

The new iron used upon this road, amounting to 11,500 tons, is of the T pattern, with fish-joints, and weighs fifty-six pounds to the yard. About half of it was made at Johnstown, Pennsylvania, and the other half in England. The American iron is all delivered. Four thousand tons of English rails are now arriving. This latter was made at the Dowlas Works, by Guest & Co., according to specifications sent out, and under constant inspection and test there. It has been subjected to a test of a ton's weight falling ten feet upon each bar lying on bearings four feet apart, and is considered the best iron rail that can be made in England. The price paid for it on board ship was six pounds ten shillings. A considerable number of rails failed to stand this test, and were rejected and rerolled. These rails are brought in English steam propellers, from England to New Orleans for a freight charge of eighteen shillings per ton. It is a little singular that the Captain of one of the vessels was fined five hundred dollars by the United States authorities for coming into port without a manifest of his cargo.

The number of locomotives now on this road is thirty-two, and the number of cars 480. The new locomotives were built by the Grant Works, Patterson, New Jersey, and the freight cars by the Ohio Falls Car Company, by the Union Car Works of this city, and by the company. Many more locomotives are ordered and to be ordered, and the company's shops at Carondelet are busy remodelling old cars and building more new ones. This company, for some months past, have been expending about three hundred thousand dollars per month, in its various departments, and now it is so near the end that, probably the amount of one such sum or less will complete the graduation and masonry of the entire line. The new work so far has cost over three millions.

It is said by a gentleman, who has made geology his study for years, that this road penetrates the richest mineral region in America. The company expect that their rolling stock will be taxed to the utmost in bringing out the ores of iron, of lead, of zinc, of nickel, the barytes, porphyry and building stone; the pig lead and pig iron and pig zinc; the timber and lumber and stock and other produce with which this interesting region abounds. The most approved method of unloading these ores rapidly and cheaply has been introduced.

Several new towns are springing up along the line of the road, and new buildings and mills are rising. Among the most prominent of the towns, so far, are Morley, in Scott county, and De Loosus in St. Francois county.

The semi-annual interest on the company's first mortgage bonds was paid at their agency in New York on the 1st instant. The price of the bonds is 86. The interest 7 per cent. Over three millions of them have been sold. The total issue is not to exceed four millions, or less than $18,000 per mile. The earnings of the road, on local traffic, on the first ninety miles of the road are over $7,000 per mile. Transportation expenses, supplies, contractors' work, rails and rolling stock have been promptly paid for monthly, so that there is no floating debt. It is expected that the road will be opened through in June next, and that its earnings will be rapidly and largely increased.

This road will, no doubt, be of the greatest benefit to the commerce of this city, and ample accommodations ought to be extended to it by the public authorities; and the city ought to "prepare and make smooth the highways" which lead to and from its various depots at this terminus.

☞ The land sales of the Hannibal and St. Joseph Railroad Company during the past year amounted to $1,758,607 47. The company originally owned 601,329 acres of land, and have now remaining unsold only 198,000 acres showing the aggregate sales to amount to 403,327 acres. Most of this land has been sold to actual settlers since the close of the war.

☞ An engineering party is now in the field surveying the route of the Mississippi River Railroad to Troy. Sufficient stock has already been subscribed to build a road through Shelby and Tipton Counties. As soon as the engineers designate the location, the work will be immediately commenced.

Great Western Railway of Canada.

The earnings and expenses of this road for the months of October, November and December 1867 and 1868, were as follows:

October:	1867.	1868.
Gross earnings	$395,246 23	$391,396 40
Working expenses including renewals	156,454 76	164,139 85
Net earnings	$238,791 47	$227,256 55

This shows a decrease in earnings of $3,849 83; with an increase in expenses of $7,685 09—making the decrease in net earnings, $11,534 92.

November:	1867.	1868.
Gross earnings	$316,548 06	$306,067 08
Work'g expenses including renewals	142,649 13	162,449 07
Net earnings	$173,898 92	$143,618 01

This shows a decrease in earnings of $10,480 98; with an increase in expenses of $19,799 74—making the decrease in net earnings, $30,280 92.

December:	1867.	1868.
Gross earnings	$310,771 47	$337,884 84
Work'g expenses, including renewals	160,520 63	178,373 24
Net earnings	$150,250 84	$159,511 10

This shows an increase in earnings of $27,112 57; with an increase in expenses of $17,852 61—making the increase in net earnings, $9,260 26.

For the five months ending December 31, 1868, the earnings and expenses have been as follows:

	1867.	1868.
Gross earnings	$1,676,690 24	$1,721,057 19
Expenses	773,449 51	822,113 60
Net earnings	$903,240 73	$898,943 59

This shows an increase in earnings of $44,366 95; with an increase in expenses of $48,664 09—making the decrease in net earnings $4,297 14. Per centage of expenses: in 1867, 46.13; in 1868, 47.77.

From Herapath's Railway Journal.

Railway Economy.—Permanent Way.

About the same time that the fish joint came into use, the attention of engineers was directed to another question which seriously affected the cost of maintenance. It was found that the wooden sleepers which had by this time almost entirely taken the place of the stone blocks, were beginning to decay, and in many instances at a much earlier stage than was originally anticipated. This was caused in a great measure by the use of green timber, a large quantity of which was made into sleepers, the demand being so great that properly seasoned timber could not be obtained in sufficient quantity, and thus this portion of the permanent way, which was estimated to last for twelve or fifteen years, required to be renewed in perhaps one-third or one-fourth that time. This reason of the very general premature decay of the sleepers does not, at the time, appear to have been sufficiently appreciated, notwithstanding there were plenty of instances of sleepers originally made of good well-seasoned timber, having been at work for upwards of ten and twelve years without having been subjected to any preservative process, and which were still in good condition, but the conclusion seems to have been arrived at somewhat hastily that the life of wooden sleepers have been greatly over-estimated, and that a more durable material must be substituted if the cost of maintenance was to be kept down, and this resulted in a very general movement towards the use of iron in place of wood; thus a reversion to a system having the disadvantage of rigidity to an equal degree with the original stone sleepers threatened the railway interest, which was thus placed between a "Scylla and Charybdis"—rigidity accompanied with destruction to rails and rolling stock on the one hand, or constant renewal of rotten sleepers on the other.

The advocates of the iron system propounded arguments in its favor, which, to say the least, were very alluring—Why, said they, should we send to the Baltic for timber sleepers just to put in the ground and rot in a few years, while we have abundance of iron in the country which, if properly applied, will do the work as well or better, and is at the same time practically indestructible? The result was that iron permanent way became almost a passion among the young England section of the engineering profession, and many are the forms in which it was presented to the public according to the peculiar ideas of the respective inventors.

It would occupy too much space to give an account of all the schemes that were propounded. Many of them were still-born and never got beyond the sheet of paper upon which they were designed, others advanced another stage and were tried on a short length of line and soon abandoned: while others possessing greater merits came more or less into use. None, however, of these have maintained their ground in this country, although we believe in some tropical climates they have proved advantageous.

Of these latter plans we may mention Mr. W. H. Barlow's saddleback rail and inverted trough cast-iron sleepers. Mr. P. W. Barlow's cast-iron plate sleepers in two halves, Mr. Greaves' spheroidal, or as they are commonly called pot sleepers, Mr. Samuel's trough sleepers lined with wood cushions, Mr. DeBergue's plate sleepers with foot rail, and Mr. J. Macdonnell longitudinal wrought iron hollow bearer supporting a bridge rail with a thin packing of wood interposed between them, and Mr. Adam's T rail.

Of all these Mr. Barlow's saddleback rail certainly appeared the most promising, for it had one great merit which always tells with practical men, viz: extreme simplicity. Instead of the usual components, rails, chairs, sleepers, keys, and pins, this rail contained all these within itself. It was a kind of bridge rail with an extended base of about 10in. wide of a curved sloping form like a saddle (hence its name), which formed its own sleeper and rested directly on the ballast, it was thus of a tolerably strong form as a girder, and being supported its entire length was well adapted to sustain the weight it had to carry with little or no deflection, but this apparent merit proved its great defect in practice, for it formed such a rigid road that its table was rapidly worn and laminated, this was probably also in part due to the difficulty in manufacturing rails of this form as sound as ordinary rails. However, it was laid down on some hundreds of miles in this country and it was also largely adopted in France. The cast-iron sleepers of both Mr. P. W. Barlow and Mr. W. H. Barlow were adopted to a considerable extent on various lines. The first consisted of ribbed plates with carrying half-chairs or cheeks, which gripped the rail between them and were held together by screw bolts passing under the rail. The other was composed of an inverted trough with ordinary chairs cast on it, into which the rail was fastened by wooden keys. Both of these plans appeared to succeed for a time and were less rigid than the saddleback rail, but the loosening of the bolts and the breaking of the sleepers, together with other causes, ultimately led to their abandonment.

Mr. Greaves' cast-iron spheroidal sleepers have probably obtained a greater amount of permanent success than any of the plans in which cast-iron was employed, which was due to their simple and strong form as well as to a new system of packing the ballast under them. This was effected by a hole in the top, through which the ballast was rammed in and consolidated in the hollow of the sleeper. A considerable length of line has been laid in India with these sleepers, and they were adopted on many foreign lines as well as on some lines in this country.

In Mr. De Bergue's system, the sleeper consisted of a ribbed cast-iron plate, upon which a foot rail was secured by clip bolts. It formed a very simple and cheap permanent way, but it was not suited to heavy traffic; it has not, therefore, been much used in this country, but it has been extensively adopted abroad, and for light traffic we believe answers exceedingly well.

Mr. Samuel's trough sleeper was laid down on the Eastern Counties railway, where it appeared to stand well. It consisted of a trough with wing plates to rest on the ballast, strengthened by cross-ribs underneath; the rail of the double-headed form was embedded into two blocks of wood which were jammed into the trough, and thus fixed it securely, and at the same time formed a cushion to neutralize the rigidity of the iron sleeper.

The same object was sought to be effected in Mr. Macdonnell's wrought-iron longitudinal sleeper, in which a packing of wood was interposed between it and the rail; this plan was in other respects very similar to one of the modifications of Mr. Barlow's rail. It was in use on the Bristol and Exeter line, and appeared at the time to answer well.

The T shaped rail of Mr. Adams was designed, like Mr. Barlow's, to make a direct continuous bearing on the ballast, and it was anticipated that it would offer greater facilities for packing from the bearing flanges resting upon the upper surface of the ballast; but if this was an advantage in one way, it was more than counteracted in another, for the constant vibration, loosening the finer particles of the ballast, they become washed away in wet weather, or blown away in dry, until in many parts of the line the ballast immediately under the bearing surface became reduced to a mere shingle.

Such were the more prominent systems of iron permanent way which were brought forward about the years 1849 to 1854, with the exception of Mr. Greaves' spheroidal sleeper, which dated so far back as 1846, although we believe it did not come much into use until some years after, when a more general impulse was given to the application of iron, as if by common consent. The iron system was thus put fairly on its trial. It had every chance given it of success, it was tested in a great variety of forms, its advocates became for the time strong partizans, ready to excuse its failures and overrate its advantages, not from interested motives, but from a firm conviction that it was the right thing, and ought to and would ultimately succeed. These convictions we are bound now to say were fallacious, and this confidence misplaced, for experience, that sure guide and practical teacher, has condemned it at least for the heavy traffic carried in this country, for of the hundreds of miles of iron road originally laid down, we believe scarcely a single mile now exists on any of the great main lines. Perhaps the system would have had a better chance had the decay of the wooden sleepers been irremediable, but this was not the case, for although seasoned timber could not be obtained in sufficient quantity, various processes were discovered of arresting decay and rendering these green sleepers more durable. Chemical investigation having been brought to bear upon the subject, it was shown that the decay was owing to the sap, which remained in the green wood fermenting, and in the process destroying the fibres, and artificial means were proposed and tried to neutralize this action. One of the earliest was that known as Kyanizing, which consisted in impregnating the sleepers with corrosive sublimate. This effected the object, but at the same time it had such a deleterious action on the iron portions of the permanent way brought in contact with it as to necessitate its abandonment. The system of creosoting was then tried and found to possess all the preservative qualities needed without the deleterious effect of the Kyanizing process, and it consequently became very generally adopted. If then by this or any similar process the life of the sleepers could be extended to anything like the original term estimated it became a simple question of finance, whether the difference saved in the capital invested in ordinary sleeper road over

the iron road, put out at interest, would provide a sum sufficient to renew the wood sleepers as they decayed; this view of the case was propounded by one of the members of the Institution of Civil Engineers, at a warm discussion on the subject of iron permanent way which took place twelve years ago, but the advocates of the iron system were then so elated with the partial success of the iron systems, that no heed was taken of it. The first cost of a good iron way was estimated at £2,197 per mile, whereas the cost of an ordinary sleeper road of equal capabilities was but £1.645 per mile, leaving a difference in first cost of £552, and it was shown that if this sum were put out at compound interest, at the end of twelve years, by which time the wooden sleepers would have to be renewed, the additional sum of £488 would have accumulated, which with the value of the old sleepers, would be ample to replace them all, as well as the keys and trenails, without touching the £552 originally invested, and this might be carried on *ad infinitum*. Such an argument ought to have been convincing, at least with regard to economy, and as economy was the chief thing aimed at by the introduction of iron, it clearly indicated that no advantage was gained at all, for the wood road was admitted to be superior in other respects. Experience has confirmed this view of the case, and it is only to be regretted that it was not appreciated before the large outlay on iron roads was made, and the expense thereby saved.

United States Supreme Court.

The case of the Chicago, Rock Island and Pacific Railroad Company and others, appellants, *vs.* Mark Howard, and other appellees, an appeal from the United States Circuit Court for Iowa, was decided in the United States Supreme Court, on the 8th, the decree of the Circuit Court being affirmed.

The suit involves a fund amounting with accrued interest, to about $650,000, being a part of the purchase money for which the Mississippi and Missouri Railroad was sold to the Rock Island and Pacific Railroad Company, and which was agreed and was intended to be distributed among the stockholders of the Mississippi and Missouri Company. The suit was brought by holders of the bonds of the cities of Davenport, Muscatine and Iowa City, and of the Counties of Scott, Muscatine and Johnson, which bonds were guaranteed by the Mississippi and Missouri Company, who claimed, as creditors of the railroad company that the fund ought to be applied to the payment of their bonds. This claim was sustained by the judgment of the Circuit Court, from which appeal was taken on the part of stockholders in the railroad company. The bondholders will probably realize from sixty to seventy-five per cent., of the whole amount due them.

☞ The Jackson, Fort Wayne and Cincinnati, and the Fort Wayne and Saginaw Railroad Companies have been consolidated.

Louisiana and Choctaw Railroad.

This is a new enterprise, designed to form a junction with the Vicksburg, Shreveport and Texas Railroad at Trenton, Louisiana. The line runs thence through Homer, Louisiana, Magnolia and Washington Arkansas, to a point in the Choctaw Nation on Red River, above the raft. The route passes through the most fertile regions of Louisiana, Arkansas and the Nation traversing Columbia, Lafayette, Little River and Sevier Counties in Arkansas.

☞ The Lehigh Valley Railroad Company has purchased the mines of the Locust Mountain Coal and Iron Co., the Coal Ridge Co. and (in part) of the Treverton Co., with the view of securing the coal trade of the entire Shamokin coal region to the Lehigh Valley Railroad, and in order to facilitate their grand scheme of carrying the coal trade direct to New York city.

☞ The following gentlemen have been elected directors of the Pennsylvania Railroad Company for the ensuing year: J. Edgar Thomson, Josiah Bacon, Wistar Morris, George Black, of Pittsburg; Samuel T. Bodine, Jos. B. Myers, Edward C. Knight, Washington Butcher, John M. Kennedy, John Rice.

☞ The Philadelphia, Wilmington and Baltimore Railroad Company have under consideration the expediency of mounting the through cars of their road upon wooden wheels. The favorite pattern consists of an iron hub, teak, disc and steel tire. This road has had in use such wheels for a long time.

☞ Notwithstanding the depth of snow the work upon the Woodstock Railroad has been carried on with vigor by A. W. Sims, Esq., the partner who has charge of the work and who has had some 350 men employed through the winter and is determined to have the grading finished and ready for the rails next October.

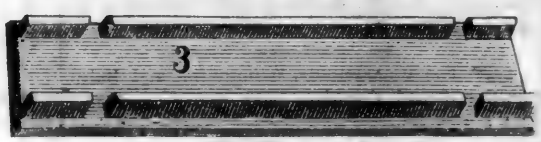
RAIL JOINTS,
MADE BY
FISHER & NORRIS,
TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.



THE PHŒNIX IRON COMPANY'S
NEW SUSPENSION RAIL JOINT.

Cross Section of Rail Joint.

Side Clamps 14 in. long, showing Rail Stop.

Bottom Ribbed Plate, 14 in. in length.

The above diagrams show the general design of this new ***Suspension Rail Joint,*** which, after long and successful trial on the Philadelphia, Wilmington and Baltimore, and other Railways, is now offered to Railway Companies The cut on the left gives a cross section of the finished joint, showing the rail (*1*) resting upon the ribs of the bottom plat (*3,*) with the flanges of the rail and the bottom plate embraced by the side clamps (*2,*) and held firmly in place by bolts (*4.* In screwing up these bolts, the bite or grip between the bevel on the side clamps corresponding with the bevel on the flanges of the rail, insures great vertical and lateral rigidity to the joint.

Several careful tests have proved that the deflection of two pieces of rail thus fastened at the joints and subjected to a transverse strain between supports five feet two inches apart, was but a trifle more than that of the same rail uncut, tested in the same way. The value of the joint in this respect was 85 per cent. of that of the solid rail, while the best fish joints, similarly tried, gave less than 50 per cent.

No holes are required to be punched through the neck of the rail, nor slots in the flanges, only a quarter circle notch of about half an inch radius is necessary to be cut out of the corner of one of the flanges of the rail to fit the "stop" shown in the upper right hand cut. This is a very important consideration, as holes punched or drilled in the neck are apt to split the rail longitudinally, and in *Steel Rails particularly,* is the principal cause of breakage.

All that portion of the joint, shown in the cut of cross section, below the bottom of the rail, bears endwise against the cross-ties, and prevents any creeping of the track. It makes a very firm joint, does not get out of order, and can be fitted to any size of rail. When ordering, send a sample piece of rail two feet long. Address,

The Sampson Scale Company.

Platform Scales were originated about 40 years ago. They were not essentially improved upon in principle till within a few years. In 1858, Mr. Elanthan Sampson, of Troy, N. Y., received a patent for his invention of an improved Scale; he since originated additional inventions improving it, patented in 1859 and 1862. They were admitted by all to be of great value, and received a Silver Medal and Diploma from the N. E. State Agricultural Society, New Haven, September 1, 1868; the same from the New Jersey State Agricultural Society at Waverly, October, 1868; and 1st premium medals and diplomas from the N. Y. State Agricultural Society's Fair every year from 1859 to 1868, inclusive. Lack of skilled management, in the company to whom Mr. Sampson assigned his patents, prevented their being properly set before the public. Meanwhile, he received patents, in 1865, for additional inventions, including those now comprised in the Automatic Grain Weigher and the Platform Scale; and other patents, in 1866, for his Hay Scale, and his Weigh Lock Scale, for weighing loaded vessels. Mr. Alfred Clarke Hitchcock, Dec. 31st, 1866, became sole proprietor of all Mr. Sampson's inventions, and patents, patterns, machinery, fixtures, tools, etc., used by the company at the works, and all other property of the company except its stock, and manufactured or partly manufactured articles.

In 1867 the Sampson Scale Company was incorporated under the laws of the State of New York, and purchased all the patents, machinery, and other property from Mr. Hitchcock; and having a large capital, took energetic measures to place before the public the great practical merits of the inventions of Mr. Sampson, as comprised in the now celebrated "Sampson Combination," for Scales and Weighing Machines. The capital of the company is $1,000,000, and its *Trustees* are Horatio Allen, of the Novelty Iron Works, New York; Cornelius H. Delamater, of the Delamater Iron Works, New York; General D. C. McCallum, late U. S. Director of Military Railroads; Chauncey Vibbard, late General Superintendent New York Central Railroad; Alfred C. Hitchcock, Clarence S. Brown, of Brown, Brothers & Co., Bankers, and Wm. P. Trowbridge, Vice President of the Novelty Iron Works, New York.

The Office has been at 240 Broadway, N. Y., ever since January, 1868. The factory is at the Novelty Iron Works, New York, where the company manufacture Weigh-Lock, Railroad Track, Hay, Coal, Cattle, Cart, Furnace charging, Hopper, and Railroad Depot Scales, ranging in capacity for weighing from hundreds of tons to a half pound. The smaller Scales include the Rolling Mill, Warehouse, (both dormant and portable,) Union, Grocers', Counter, Apothecaries, etc., in fact all kinds of scale and Weighing Machines, for every conceivable purpose. The parts which compose the "Sampson Combination" are the foundation Standards, Bed Plates, Links, Yokes, Levers, Adjustments, and Connecting Rods. A uniform and nice adjustment of these parts is made, so that they will work easily, equally, and together. By this system the leverage is adjusted, to the minutest exactness, so that it is immaterial whether the load is weighed upon one lever, or upon all at once. In the Hay Scale, for instance, a lever and its associated parts are placed under each corner of the platform. The timbers, on which the flooring of the platform is laid, rest on the bed plates of the system of levers, yokes and links which form the Combination. These timbers are suspended by means of vertical links, which in turn hang upon the yokes, which are horizontal, and pass through the open space in the centre of the lever. A link hangs on each end of this yoke, the lower side of which has a bearing, resting on a pivot at the end of the short arm of the lever. The links receive all the wear, and tear caused by the movements of the platform, and also preserve the pivot edges from wear and tear. The levers are so short and rigid that they do not bend or spring—thus they are another of the many safeguards against irregularity.

The longest levers used in the Sampson Combination, for Railway Track Scales, are but 12½ inches in length, instead of more than as many feet, as in the old style. Their greatest length in Hay, Coal, and Cattle Scales, is but 9 inches, instead of from *nine to fifteen feet* as used in others, whose unnecessary, cumbrous length of levers admits of their springing, and causes continual inaccuracy in weighing. Again, in other Scales, the weight on the platform, and its oscillations, bear directly on the sensitive pivot edges, blunting and rendering them imperfect in action; but in these Scales, the easy moving of the simple and beautiful system of yokes and links, gives free action to the platform, and prevents all irregular or undue strain or friction of the various parts. All the points and bearings are of steel, thus insuring durability, sensitiveness to the least pressure, and the consequent nice accuracy which distinguishes these Scales from all others, and the perfectly harmonious action of all the parts.

Two connecting rods extend along the sides of the platform and connect the four levers, whose action is transmitted to the weighing beam, by a third connecting rod, so that they all work together, and a load is weighed with invariable correctness, on whatever part of the platform it may be placed; while in the old style Scales, unless the load is on the centre of the platform, the working apparatus is liable to continual inaccuracy, owing to the unreliable and unscientific system upon which they are constructed. In these Scales, too, the work of adjustment is long and laborious; while, in the Sampson Scales, the ad-

justment is performed in a few moments by the simple means of a nut and screw. The machinery, being simple, is the less liable to be deranged; and the compactness is such that all the parts of a six ton Scale can be packed for shipment in a box 1 foot square by 5 feet long. All the parts are light, and easily handled; and the Railroad Track Scales have this advantage over all others—that their sections can be easily duplicated and extended to any desired length, so as to weigh, at one poise, the longest train of cars, or any portion of it; and the Scale can be so constructed that two tracks can be laid upon it, and a train weighed on either track, with perfect accuracy. No amount of weight affects the position, condition, or precision of the pivot edges, and the necessary excavation of these Compact Scales is a mere trifle compared with that for the bulky and ponderous old styles, which, compared with these, are but as an old-fashioned windmill compared with a steam engine.

The Weigh Lock Scale is one of the most useful inventions of the age, each saving thousands of dollars by not requiring a house to suspend it; the Scale being suspended from projections built in the sides of the Lock. As an instance of the precision of the Sampson Combination, we have seen a Ten-Ton Scale moved by a 1 ounce weight. Light and heavy weights are weighed with equal accuracy. All the Scales made by the company are constructed in the most durable and finished manner, and the prices compare favorably with any in the market.

We have said thus much from our personal inspection of the Sampson Scales, the different styles of which have received the highest commendation, after thorough trial, from the most eminent, practical and scientific authorities in this country. Among them are the following: Franklin A. Stratton, U. S Civil Engineer, Washington; William Sellers & Co., Philadelphia; John Kearney, Supt. Penn. Coal Co.'s Yard, New York; various State Engineers, Canal Surveyors, and Commissioners of New York; Charles C. Morton, Manager, N. Y. Gas Works; Davidson & Co., Albany; W. P. Trowbridge, Vice President, Novelty Iron Works, New York; and various influential journals in New York, Philadelphia, Chicago, etc.

Delaware Railroad.

The earnings of this road for the past year have been as follows:

From passengers	$149,386 22
" freight and express	197,314 32
" mails and miscellaneous	7,569 51
	$354,270 05

Against this sum the lessees have charged the following sums:

Operating expenses	$292,328 41	
Interest and dividends	102,567 09	
		394,895 50
Showing a loss of		$40,625 45

The Sinking Fund for the redemption of State bonds loaned the Delaware Railroad now amounts at par to $80,409; last year it was $71,400 56—increased during the year, $9,008 44.

The road has been operated with remarkable freedom from accidents, has been kept in a highly efficient condition by the lessees, and they have met promptly the payments for interest and dividends. It is believed that another year will show a better net result than the past.

Connecticut River Railroad.

The earnings of this road for the years ending November 30, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$282,769 53	$274,363 14
" freight	305,929 42	314,725 14
" mails	6,133 47	5,990 23
" express	23,060 77	17,083 40
" rents, etc.	11,271 82	7,186 58
	$629,165 01	$619,348 69
Expenses, viz:		
Repairs of road	$111,284 76	$103,254 17
" bridges	5,348 07	7,363 01
" buildings	34,919 47	23,886 36
" tools, etc	5,369 78	2,477 40
" locomotives	12,996 59	25,045 68
" cars	65,142 86	36,259 45
Running trains	91,144 39	89,474 54
Station expenses	50,258 24	48,645 19
General expenses	11,684 19	13,540 70
Stationery, etc	7,212 35	5,570 44

Removing snow	2,134 38	2,784 28
Water works	5,886 81	7,529 30
Miscellaneous	9,081 40	11,223 51
	$414,209 74	$380,342 61
Net earnings	$214,955 27	$239,006 08
Surplus per last report	181,581 53	192,055 18
Total	$396,536 80	$431,061 26
Against which are charged—		
Interest paid	$16,689 97	$15,921 55
Payment to Sinking Fund	8,000 00	8,000 00
Government taxes	45,791 65	45,047 37
Dividend January	66,000 00	68,000 00
" July	68,000 00	85,000 00
Surplus Nov. 30	192,055 18	209,092 34
Total, as above	$396,536 80	$431,061 26

Compared with the previous year the gross earnings of 1868, show a decrease of $9,816 82; with a decrease in expenses of $33,867 13—making the increase in net earnings, $24,046 81. The report says:

The aggregate receipts from passenger and freight transportation are substantially the same as for last year. Owing to the withdrawal of one of the express companies, the receipts from that source have fallen off about $6,000.

The expense account includes among its items the cost of a new locomotive for switching purposes, the construction of two new aqueducts for supplying water stations, an increase in the freight house accommodations at Willimansett and Northampton, the grading of additional station grounds at Springfield, Holyoke and Greenfield, and a thorough repair or reconstruction of the passenger houses at Chicopee, Chicopee Falls and Holyoke. The construction account has been debited with the cost of one new locomotive, the iron rails used in building two additional miles of side tracks, an iron bridge under a new track at Springfield, and several hundred feet in length of additional sheds for storing wood, the aggregate amount being $41,771 94.

The new station called Mt. Tom, established last year for the convenience of visitors to Mt. Tom and Mt. Holyoke, proves to be a great public convenience, the number of passengers forwarded and received during the year amounting to nearly seventeen thousand, and more than realizing our anticipations.

The construction of a foot walk on the side of the Connecticut River Bridge between Willimansett and Holyoke, seems to have been a judicious expenditure of money. The income from tolls pays the cost of attendance and a fair rate of interest on the amount expended.

The track was never in better condition than at present. In maintaining it and extending side tracks we have used 22,000 cross ties, 256 kegs of spikes, 760 tons of iron rails and 150 tons of steel rails, besides repairing 1,250 bars at the shops. No progress has been made during the year in the construction of the second track, but the facilities for doing business at the stations are constantly improving, and it is believed that with slight exceptions, they fully meet the public requirements.

The equipment of the road has not been neglected. Aside from current repairs, we have built and added one first class passenger car, one smoking and baggage car, two house freight cars and seven platform cars.

Under an arrangement entered into with the Vermont and Massachusetts Railroad Company, near the close of last year, we have furnished passenger cars and run most of the river line trains between South Vernon and Brattleboro'. The contract being for service only, and having no reference to the transportation department, the expenditures in this connection are merged in the regular operating expenses, and the compensation received for the service is passed to the credit of the same account.

The report of the Sinking Fund Commissioners states the value of the fund, Dec. 31, 1868, at $77,256 86. This fund has been accumulating since Sept. 1, 1861, by additions of interest and annual contributions of $8,000, and it is hoped that, before the maturity of our bonds, in 1878, it will amount to a sum sufficient to redeem the whole $250,000.

The company have 16 locomotives. Miles run with passenger trains, 155,406; with freight, etc., trains, 125,158—total, 280,564. Number of passengers carried, 691,133; do., carried one mile 8,230,250. Tons of freight carried, 227,764; do., carried one mile, 6,005,517. Earnings per mile of road, $11,685 82. Earnings per mile run, $2.41. Net earnings per mile run 85.2 cents. Percentage of expenses to earnings, 59.5 per cent.

BALANCE SHEET, Nov. 30, 1868.

Cost of road and equipment		$1,978,742 81

	$2,390,354 89	

President.—DANIEL L. HARRIS.

Directors.—Ignatius Sargent, I. M. Spelman, Edward A. Dana, Chester W. Chapin, J. H. Butler, Henry W. Clapp, Roland Mather, S. M. Waite.

Clerk and Treasurer.—SETH HUNT.

Auditor.—ELIPHALET WILLIAMS.

Superintendent.—W. B. BRINSMADE.

☞ A new railroad route is projected from Kennebunkport, through Alfred and Springvale to Milton, there to connect with the Great Falls and Conway Railroad.

Maryland Central Railroad.

A meeting of the corporators of this road was held in Baltimore on the 4th inst. Wm. B. Norris Esq., in the chair, and Wm. Stirling, Esq., Secretary. Messrs. Robert Lehr and Thomas Symington were appointed corporators, *vice* Edward Rider and Wm. B. Duvall, deceased. E. Stanley Rogers, Esq., was appointed Treasurer of the Company. A resolution was adopted directing George Crocker, civil engineer, to commence grading the road near Priestford Bridge, in Hartford county, on the line surveyed by J. M. Hood, under the general director of Mr. Thomas Symington, of Hartford county.

The road is intended to run from Baltimore through the Long Green Valley, and *via* Belair to the Susquehanna, which it will cross at the mouth of Deer Creek. It will connect with the Baltimore and Philadelphia Central Railroad, and also with the Columbia Road, thus affording direct and speedy communication with a rich and fertile region of Maryland, and also with the Pennsylvania coal mines.

Vermont and Massachusetts Railroad.

The earnings of this road for the year ending November 30, 1867 and 1868, were:

	1867.	1868.
From passengers	$151,962 72	$178,497 36
From freight	248,162 99	269,005 40
From Cheshire R. R. Co., for joint use of road from Fitchburg to Ashburnham, etc	89,000 00	43,000 00
From U. S. mails	6,000 00	6,000 00
From expresses	8,761 83	9,400 00
From rents	6,114 05	5,589 72
From tolls—Northfield Branch	889 50	932 68
From miscellaneous	532 72	672 06
	$461,423 81	$508,097 17
Expenses, viz:		
Repairs of road	$65,474 06	$69,554 74
" buildings	22,303 18	10,651 26
" locomotives	45,901 74	43,434 04
" cars	46,782 71	43,150 23
" bridges	9,085 61	5,455 63

Renewals of iron	51,444 44	35,411 06
Rent to Connecticut River R. R. Co.	1,500 00	1,500 00
Loss and damage	3,498 23	1,890 58
Taxes and insurance	5,755 55	5,563 25
Salaries	8,175 00	8,841 66
United States tax	3,762 18	4,297 97
State tax	20,837 70	15,753 19
Rent of Troy and Greenfield Railroad	.....	15,000 00
All other expenses	9,722 66	15,528 70
	$398,829 18	$409,016 90
Earnings less expenses	$62,594 68	$99,080 27
Interest account	28,480 81	29,956 24
Balance	$34,114 87	$69,124 03

The earnings of the Vermont and Massachusetts Railroad were $475,040 91; and of the Troy and Greenfield Railroad $33,056 26—total, as above, $508,097 17.

The indebtedness of the company, as will appear by reference to the annexed statement, is $553,263 50; and the assets, (exclusive of fuel, oil, old rails and stock materials on hand,) $125,651 80—showing a balance of indebtedness of $427,611 70. The report says:

On the first day of January, 1868, we took possession, under the lease from the Commonwealth, of the railroad from Greenfield to Shelburne Falls and have operated the same since. On the 17th day of August, we commenced running a passenger train over the remainder of the Troy and Greenfield Railroad, east of Hoosac Mountain, and between Shelburne Falls and the Hoosac Tunnel, but the road being unfinished we did not take complete possession until November 16th. This road is leased until the tunnel is completed, at an annual rent of $20,000 for the section between Greenfield and Shelburne Falls, and $10,000 for the remainder. The running of the road is wholly under the management of our corporation, and we have furnished all the rolling stock.

Mr. Barnes, the experienced owner of the White Mountain staging, established a line of stages over the Hoosac Mountain, between our depot at the tunnel, and the depot of the Troy and Boston Railroad in North Adams. This line commenced running August 17th, and has been continued regularly since, with fair patronage, and will be continued winter and summer.

There was some delay in completing the railroad from Shelburne Falls to the tunnel, so that we lost the benefit of most of the summer travel, but enough was accomplished to prove that this new through line, which we have struggled so long to establish, will be exceedingly attractive and convenient to the public.

The income of the new road has fallen short of the rent and expenses, as we expected, but the business has steadily increased and will doubtless soon be remunerative.

At a special meeting of the stockholders, held at Boston, September 19th, the following votes were passed:—Voted, that the Directors of the Vermont and Massachusetts Railroad Company, are hereby authorized to accept a lease, or transfer for a limited time or perpetually, from the Turner's Falls Branch Railroad Company to this Corporation of all their property, right and franchise, under Acts of the Commonwealth of Massachusetts of 1866, ch. 41, and Acts of 1868, ch. 33, on such terms and under such arrangements as they may see fit to make.

Voted, that in case such transfer is made, the directors are hereby authorized and instructed to locate and build a railroad under the same as soon as they shall be of opinion that the public interest and convenience require it.

Voted, that for the purpose of locating and constructing such railroad the directors are hereby authorized to use the income of this corporation, or to borrow money therefor, or both.

We have caused surveys to be made of different routes for the new road, and are making arrangements to take the charter of the Turner's Falls Branch, and build the road under this vote, whenever the best location shall be determined on.

We have renewed our contract with the Cheshire Railroad on satisfactory terms, to continue until terminated by notice from either party, in one year from the 1st of day August, following the giving of such notice.

Our income and also our expenses have been large the past year. All the rolling stock and furniture and fixtures, required for the whole road between Greenfield and the tunnel, are owned by this corporation, and the larger portion has been purchased during this year, and charged to current expenses.

Our business is generally satisfactory, and promises a steady increase.

We hope to give all local accommodation required, and, in addition, an interesting and convenient through line for passengers between Boston and Troy until the tunnel is completed. When that great work is accomplished, we shall have a new railroad route from Boston to the West, which will develop the various resources of the northern part of the State, give an ample return to the capital invested in the line, and be generally regarded as a great public benefit.

The accompanying tables will show the financial condition of the company, and will hardly need explanation. While we are making large expenditures in keeping up our road and rolling stock to the requirements of our business, it will be seen that we are diminishing our bonded debt (the only debt we have), by regular annual payments into the sinking fund.

The question of liability on the old scrip, alluded to in previous reports, is now before the Court in Vermont, but has not yet been decided.

Out of the net earnings we have made a dividend of $2 per share, paid our annual sinking fund instalment of $7,000, and have a small surplus which we retain for the future wants of the road.

Treasurer's Trial Balance.

Treasurer.—Franklin N. Poor.

Superintendent.—Otis T. Ruggles.

Manchester and Parkton Railroad.

The minimum amount of capital stock required by the charter of this road having been subscribed, a majortty of the commissioners and stockholders met at Berkleysville, Md., on the 6th inst., and organized by the election of the following board of directors: Jacob Shamberger, E. K. Wright, Daniel Beckley and H. A. Burgoyne, of Baltimore county, and Geoge Everhart, Henry Falkenstein and George Shower, of Carroll county. E. K. Wright was elected president, Lewis C. Myerly, secretary, and Dr. J. Shower, treasurer.

Certifying Checks.

The following is the text of the act passed by Congress in reference to Certifying checks by National banks:

Be it enacted, &c., that it shall be unlawful for any officer, clerk or agent of any National bank, to certify to any check drawn upon said bank, unless the person or company drawing the said check shall have on deposit in the said bank, at the time such check is certified, an amount of money equal to the amount specified in such check; and any check so certified by duly authorized officers, shall be a good and valid objection against such bank; and any officer, clerk or agent of any National bank violating the provisions of this act, shall subject such bank to the liability and proceedings on the part of the Comptroller, as provided for in section fifty of the National banking law, approved June 3d, 1864, passed the House of Representatives Feb. 13, 1869.

Abolition of Transit Duties in New Jersey.

The following act entitled "an Act Relative to Transit Duties," has been passed unanimously by both branches of the New Jersey Legislature, and approved by the Governor:

1. *Be it enacted by the Senate and General Assembly of the State of New Jersey*, That from and after the passage of this act all transit duties, whether on passengers or freight, shall be and they are hereby abolished.

2. *And be it further enacted*, That all companies heretofore paying duties to the State shall hereafter pay each year, in quarterly payments as heretofore, to the Treasurer of this State, a tax of one-half of one per centum upon the costs of their respective works, including all their property of every description not otherwise taxed, until the Legislature shall, by general law, impose a uniform State tax, equally applicable to all railroad and canal corporations of this State, and said companies shall then pay such uniform tax; and until such general law be passed, no company heretofore paying transit duties as aforesaid shall, in any year hereafter, pay a less sum as tax to the State than that paid by it for taxes and duties of all kinds for the year 1868, and said amounts shall be paid by them in equal quarterly payments, and no other tax or impost shall be levied or assessed upon said companies.

3. *And be it enacted*, That this act shall not apply to any corporation having a contract with this State in reference to taxation, unless, within three months from the passage hereof, this act and its provisions be accepted by the Board of Directors of such corporation in place of said contract, and a certificate of such acceptance, under the corporate seal of such corporation, be filed in the office of the Secretary of State, which cetificate, or a duly certified copy thereof, shall be plenary evidence of such acceptance, and until the filing as aforesaid of such acceptance, such corporation shall pay as now required by law.

4. *And be it enacted*, That this act shall take effect immediately.

East Tennessee and Virginia Railroad.

The earnings of this road for the years ending June 30, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$214 755 22	$218,616 06
" freight	237,755 00	264,006 42
" express	22,514 97	18,636 06
" mail	13,070 00	16,316 56
" other sources	13,602 00	20,115 94
	$501,697 19	$537,691 04

The expenses in 1867-'68, were:

Conducting transportation	$72,585 10	
Repairs of roadway	118,806 20	
Maintenance of cars	69,046 01	
Motive power	80,707 19	
Wood	32,693 85	
Salaries of officers	10,035 00	
Miscellaneous	20,108 51	
		403,981 86
Leaving a balance of		$133,709 18

Included in the above expenditures are the following items which have been charged to extraordinary expenses, viz: building and repairs to depots, $3,000; cross ties, $11,000; labor on track, $15,000; repairs of bridges and trestles, $3,000; building and repairs to passenger cars, $35,000; repairs to locomotives, $13,000—total, $80,000. Deducting this amount, will leave the ordinary operating expenses, $323,981 86, and the actual net earnings over operating expenses, $213,709 18. In 1867 the earnings were $501,697, and the total expenditure, $418,114—leaving a balance of $83,584. In that year the extraordinary expenses amounted to $134,200. Deducting this amount, will leave the ordinary expenses, $283,914, and the net earnings, $217,783.

The equipment of the road consists of 20 locomotives, 10 first class and 4 second class passenger, 5 baggage, 152 box and 56 flat cars. Miles run by locomotives with passenger trains, 141,940; with freight trains, 166,485; with other trains, 41,953—total, 350,378. Local passengers carried, 63,240; through passengers, 19,153—total, 82,393, an increase over the previous year 7,313. Through freight carried east, 18,016 tons; do., west, 25,891; way freight carried east, 9,896 tons; do., west, 15,853 tons; express freight, 1,630 tons—total, 71,288 tons, an increase over the previous year of 15,118 tons. The report says:

The condensed balance sheet and the statements of the funded and floating debts and the assets of the company furnished by the Treasurer, will enable you to understand fully the condition of the company's affairs. We would suggest that you carefully examine and compare the statements and tables accompanying this report, with the similar statements and tables in the former annual reports, and you will have a more definite knowledge of the workings and operations of the road, and a clearer idea of the company's affairs than can possibly be derived from any other source. You will learn that in addition to the ordinary and extraordinary expenses of the road, the interest on State aid, the amount paid the United States Government and the interest due on the company's debts, &c., all of which have been promptly paid, also bonds of the company and coupons of company's bonds have been paid and lifted during the year as follows:

First mortgage bonds	$7,000
Second mortgage bonds	8,500
Coupons of indorsed bonds	15,720
Coupons of first mortgage bonds	1,860
Coupons of second mortgage bonds	2,130
Coupons of income bonds	330

Within the last three years a large quantity of chairs, spikes and new iron has been used upon the road, every bridge and trestle on the line has been rebuilt or thoroughly repaired, about ten miles of the track has been properly ballasted with rock and gravel, six new depot buildings have been erected, and the other depot buildings have all been repaired, and over 183,000 good new cross ties have been put into the road. These facts, taken in connection with the large increase of new passenger, baggage and freight cars, the improved condition of the locomotives and rolling stock generally, and our increased facilities for doing business, has made our road equal in every respect to any road in the South. It is true that all this work has been accomplished by the company at a heavy expense, owing in a great measure to the high prices of labor and supplies, but we feel that for all this we have been amply compensated by the regular and safe running of trains, thus avoiding detention of passengers and freights as well as all accidents resulting in the loss of life and the destruction of property.

The importance of the road as a link in the great passenger and freight line connecting the Northern and Eastern cities with the cities and towns of the South and Southwest, is no longer a question of doubt but is now a fixed fact; and that it possesses many and great advantages over rival and opposing lines is evident by the general satisfaction given to both passengers and shippers. In the last Annual Report we stated our views with regard to our consolidated freight line—our approval of the experiment and our solicitude for a more perfect organization of the scheme. We see no reason why we should change our views with regard to this project, but on the contrary we would urge a cordial co-operation and a concert of action on the part of all the roads in interest, that we may realize and profit to the fullest extent by whatever advantages we do possess.

During the year 46,981 cross ties have been purchased, and 40,000 laid in the track. The road bed and superstructure is now in good condition. The principal expenditure for the current year will be for new iron. At the lowest estimate it will require 800 tons of new iron to make good the deterioration which has plainly shown itself during the past year.

The completion of the Selma, Rome and Dalton Railroad, now finished to Rome, will be of great advantage to this road, both in passengers and freight.

CONDENSED BALANCE SHEET, June 30th, 1868.

Cost of road		$3,133,200 87

Superintendent.—R. C. JACKSON.

Treasurer.—JAMES G. MITCHELL.

Gen'l Freight & Ticket Agent.—JAMES R. OGDEN.

☞ The first iron for the Montgomery and Selma Railroad has been received at Montgomery, coming over the Montgomery and West Point road. When the link between Montgomery and Selma is completed there will be a continuous and nearly straight railroad line from Savannah to Vicksburg, and it will soon be extended to Shreveport.

Elkton and the Kent Railroad.

A correspondent writes to the Cecil *Democrat* urging the continuation of the Kent County Railroad to Elkton, which, he says, can be done at no appreciable cost. The *Democrat* adds that "assurances have already been given by competent and responsible parties connected with the Philadelphia, Wilmington and Baltimore Railroad, that if a road should be built as far as Warwick, said parties will guarantee its construction to Elkton."

The Centreville *Observer* says that should this be done, railroad communication with Baltimore will be easy and cheap for citizens of Queen Anne's County.

Cleveland, Columbus, Cincinnati and Indianapolis Railway.

The earnings and expenses of this company for the year 1868, including the earnings and expenses of the C., C. & C. R. R. and the Bellefontaine Railway, from January 1st, to May 14th, 1868, (the date of consolidation,) have been as follows:

Earnings:

From passengers	$849,283 58
" freight	1,843,129 82
" express	115,114 86
" mails	61,918 00
" rents	48,901 57
" Berea Branch	8,886 79
" interest and dividends	11,943 69
" miscellaneous sources	15,065 33
" *division of earnings with L.M. & C. & X. R. R. to Nov. 30th	8,369 98
	$2,962,613 62

* (Settlement for December not yet made with L. M. & C. & X. R. R.)

Expenses:

Geo. H. Russell, *Treasurer.*

Cleveland, O., Feb. 17th, 1869.

☞ The charter for the Vicksburg and Memphis Railroad, most liberal in its provisions, has been enacted by the Legislature of Tennessee. The company will soon be organized, and measures adopted to induce the co-operation of land owners along the Mississippi who would make a railroad subserve the purpose of a levee.

☞ Since the opening of the stock books of the Gallatin and Murfreesboro Railroad, in Lebanon, Tenn., a great many subscriptions have been made. The friends of the road are confident that $100,000 in private subscriptions will be raised in Wilson County.

☞ The Louisville, New Albany and Chicago Railroad, 288 miles in length, costing $7,000,000, with a bonded debt of $4,000,000, is to be sold at public auction in April by order of the bondholders.

Michigan Central Railroad.

The condition of this company at the close of the first six months of its present financial year, November 30, 1868, is exhibited in the following:

Income Account.

By balance of income account, per Treasurer's report June 1, 1868		$582,243 95
Receipts of road from June 1, 1868, to December 1, 1868		2,382,395 95
Total		$2,964,639 90
To dividend paid July 1, 1868, 5 per cent. in cash		$426,435 00
U. S. Gov. tax on dividends and surplus	$26,430 08	
U. S. Gov. tax on rec'pts	25,691 44	
		52,121 52
Annual payments towards sinking funds		84,500 00
Operating account from June 1, to Dec. 1, 1868	$1,383,715 88	
Interest and exchange	308,879 18	
		1,692,595 06
Balance to new account		708,988 32
Total, as above		$2,964,639 90

The foregoing account shows the net receipts of the road for six months ending December 1st, after deducting operating, interest, and exchange accounts, but excluding the amount paid to the sinking funds, to be $637,579 37. After deducting the amount paid to sinking funds, the balance is $553,179 37. Adding the balance to credit of this account, June 1st, $582,243 95 less the July dividend, $426,435, the amount to credit of income account is $708,988 32.

The gross earnings show an increase over those of the corresponding six months of 1867, of $43,898 97, and the operating expenses, exclusive of Government tax and sinking fund payments, a decrease of $95,593 16, while the Government taxes have increased $11,389 79—giving net increased earnings for the six months of 1868 of $128,102 35.

The sum invested in the sinking funds amounts to $1,310,832 32.

The company is free from floating debt.

Illinois Central Railroad.

The statement of this Company for the month ending February 28, 1869, is as follows:

Land Department.

Acres Construction Lands Sold	8,451.59	for	$82,782 16
Acres Int. Fund Lands sold	160.00	for	2,424 40
Acres Free Lands sold	1,379.48	for	19,747 68
Total sales during month of February, 1869	9,991.07	for	$104,954 19
To which add Town Lot Sales			453 00
Total of all	9,991.07	for	$105,407 19
Cash collected in February			$217,868 43

Traffic Department.

Receipts from Freight		$283,826 00
do. Passengers		113,161 30
do. Mails		6,358 83
do. Rent of Road		4,000 00
do. Other Sources		90,000 00
Total Receipts in February, 1869		$496,845 63
Total Receipts in February, 1868		$188,088 74
Estimated earnings in the month of February, on the D. & S. C. R. R., not included above		$61,937 75
Corresponding month of 1868		$43,184 87

American Railroad Journal.

Saturday, March 13, 1869.

Stock Exchange and Money Market.

Money has been working rather favorably for the borrowing interests, since our last. The supply of capital has been comparatively liberal, while there has been a less urgent inquiry from all sources for accommodation. The city banks have been losing on their specie, deposit and legal tender averages, and have made a less satisfactory exhibit in their last weekly statement, which showed a further decrease of $2,611,738 of deposits, $1,689,685 of legal tender notes, and $1,345,969 of specie. The whole line of deposits at bank is now $25,132,643 below the corresponding week last season, the difference in specie deposits being less than a million and a half, while the loss in currency deposits is about twenty-three and a half millions, including a difference of $7,871,675 in greenbucks and greenback 3 per cent. certificates. The relative strength of the movement, however, in respect to the lawful money basis to deposits and circulation, is not important as these figures might seem to indicate—31⅝ per cent. now, to 32⅛ per cent. on the 7th March last year. The U. S. Sub-Treasury made heavy disbursements, during the week, largely in excess of its receipts, thus reducing its cash reserve on Tuesday of this week to 83¼ millions as against nearly 88 millions the preceding Tuesday. Private lenders have been making free advances to the Government houses at 6@7 per cent.; and to the Stock firms at generally the legal rate of 7 per cent. on call. There has been a better inquiry for choice to good mercantile paper at from 7@9 per cent. per annum, on a somewhat lighter offering of really marketable grades. More confidence has been noted in financial and commercial circles, since the inauguration of the new National administration, which gives promise of more harmonious and more acceptable action on the pressing issues of the times, particularly in the financial and industrial lines. Pending the permanent organization of the Cabinet of President Grant, however, conservative movements have been noted in the Fund, Stock, Gold, and Merchandise markets. Our Washington dispatches enabled us to anticipate, in our last, the showing of the monthly Treasury statement as to the cash reserves of the department, which on the 1st inst., embraced $98 741,261 of coin, and $16,853,529 of currency, or a total of $115,594,790. Included in the coin balance were $28,775,560 to the credit of private depositors. At the close of January the coin reserve was 88¾ millions, and the currency balance 17½ millions. The coin and currency balances of the United States Sub-Treasury at this port on the 1st of March, were $88,540,000.

It has been noted, as an assuring circumstance, that quarter day with the National banks can no longer be a source of grave periodical disturbance and embarrassment to the business interests of the country. Under the "Act Regulating the Reports of National Banking Associations," which was one of the last measures enacted by the Fortieth Congress, and approved by the President, the Comptroller of the currency is empowered to call for not less than five general, as also for special statements of the business of the National banking institutions, at the close of business on any *past* day which he may designate. The enforcement of this law will preclude all manipulations of the money market in the interest of the banks desirous of making a strong exhibit; will prevent all "doctoring" of statements for special purposes, and will protect the financial and commercial public from the hardships of sudden contraction, such as has been the usual preliminary to former quarter day returns to the Currency Bureau, under the old provisions of the banking act.

The specie reserve of the city banks is now $19,486,634, against $20,714,233 same time last year. The city bank deposits are now $182,604,437, against $207,737,080 week ending March 7, 1868 The legal tender reserve amounts to $49,145,869, against $57,017,044 same time last year. The circulation now stands at $34,275,885, against $24,153,957 same time last year. The loans are now $262,089,883, against $269,156,636 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $121,191,355 a day, against a daily average of $105,563,204 the preceding week, and $117,998,508 the week ending with Feb. 17, 1869. The current week's exchanges average about $110,384,000 a day. The city banks, last week, reported a further loss of $1,345,969 of

specie, $2,611,738 on deposits, and $1,689,685 of legal tender notes. They increased their loans, $717,986; and their circulation, $27,904.

The average amounts of the Gold Exchange Bank loans and discounts last week was $1,315,462, average amount of specie $524,770, average amount of deposits $1,209,436.

National Bank notes to the amount of $129,610 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $313,055,776, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $13,150,693, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,905,083. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,622,900; and for the public deposits, $33,116,350—making a total of $375,539,250. The Treasury Department last week redeemed and destroyed $369,185 of worn and mutilated fractional currency, and issued $411,462 of new. The outstanding amount of fractional currency on the 1st of March, 1869, was $36,781,548, against $35,511,127, on Feb. 1, and $34,215,716 on the 1st of January.

The U. S. Sub-Treasury receipts, week ending with March 6, were $8,221,692, including $3,257,013 from customs duties; payments, $6,604,387, including $2,483,846 of coin interest; balance at the close of the week, $86,924,288, against $88,541,593, at the close of the preceding week, showing a decrease of $1,617,305. The business of the Office during the first two business days of the current week, was as follows: On Monday, receipts, $799,494, including $318,000 from customs; payments, $946,515 including $176,000 of coin interest. On Tuesday, receipts, $726,000 including $338,000 from customs and, payments $4,217,841 including $108,643 of coin interest. The balance at the close of business on Tuesday stood at $83,286,391, against $87,930,325 a week previous; and $90,889,560, on Feb. 17, 1869. The aggregate receipts of the office in February were $31,657,457, including $12,179,726 from customs, aggregate payments, $26,789,619, including $1,923,545 of coin interest.

The outstanding amount of coin certificates on the 1st of March, 1869, was $28,775,560, against $32,659,520 on Feb. 1, and $27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $417,200, and retired $3,154,113 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during February, reached $1,634,240.

The income of the Government has been on a comparatively satisfactory scale, since our last, in both forms of customs and excises. The excises, last week, yielded about 4¼ millions; customs at the port of New York, $3,257,013, and at the outports about $1,100,000 (in coin) more, making the grand total income for the week equal to about $10,023,042 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 100 millions, according to the latest Washington advices.

The gold speculation has been active and excited again, this week. The price has been unusually variable and sensitive, the range having been from 130@132⅛, and the closing quotation on Wednesday 131¾. The general tendency of the market has been toward even lower figures, in harmony with the increasing measure of confidence in business circles, and with the improved political prospect. The delays in the formation of the Cabinet of President Grant, on a permanent working basis, have been the chief source of aid to the speculative interests. The export call for coin has been light. The customs demand has been up to a full average, even for the Spring season. The Sub Treasury received during the week $3,261,816 in gold for customs, and paid out $2,483,846 gold interest on the United States 10-40 Loan. The banks lost $1,345,969 on their gold deposits. They now hold a specie reserve of 19½ millions, as against 20¾ millions same time in 1868. The specie exports, last week, were only about half a million dollars. Thus far in the current week, the shipments have been confined to $39,000 on Tuesday.

The Gold Exchange Bank clearances on Wednesday, were $106,558,000, and the resulting balances $1,638,576 in coin, and $2,277,204 in currency.

The customs demand for Gold last week, averaged $542,835 a day; thus far, this week, it has averaged $328,000 a day, or equal to a weekly aggregate of $1,968,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $75,812, and since Jan. $2,097,452 against $542,587 same time in 1868. The receipts from California, last week, were $385,366. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $83,987,493, against $76,141,248 same time in the preceding fiscal year. At San Francisco, from Jan. 1, to Feb., 1869, $715,753, against $880,074 same time last year.

The total receipts of California gold at this port, since July 1, 1868, have been $15,767,874, against $23,096,863 same time in fiscal year 1867–'68, showing a decrease in the current fiscal year, of $7,714,355. The exports of specie, from this port, last week, were $507,843, against $1,543,290 same week last year; total, since July 1, 1868, $28,692,304, against $40,106,020 in 1867–'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,483,846; since July 1, 1868, $65,642,192, against $53,519,606 same time in 1867–'68. The specie exports from San Francisco, from Jan. 1, to Feb. 12, 1869, were $4,784,186, against $4,789,669 same time in 1868.

Foreign Exchange opened more firmly, on a moderate demand for prime bills, but closed tamely and heavily, with an increasing supply of both bankers' and merchants' drafts available. Bankers' prime sixty day bills on London closed on Wednesday at 108⅝@109, and on Paris to 5.21¼@5.17½; sight bills on London to 109@109⅜, and on Paris to 5.16⅞c.@5.15. The offering of produce bills has been again quite moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,865,839, against $2,574,845 same week last year; total, since July 1, 1868, $111,633,425, against $124,748,882 same time in preceding fiscal year of 1867–'68.

The dealings in the Public Funds have been on a less extensive scale, since our last. The offerings of bonds have been moderate. The home and export demand has been checked, temporarily it is confidently believed, by the unexpected Cabinet derangements. But there has been no pressure to sell, even on speculative account, as it has been felt throughout the week that with the formal organization of the executive branch of the National administration, and the prompt and harmonious action, which is assured, of the National Legislature, the public credit will be greatly strengthened in the home and foreign markets, and higher prices will be realized on all the funded obligations. Values have been comparatively well supported, during the week, despite the diminished activity in the market.

U. S. sixes of 1881 closed here on Wednesday at 115¾@116¼; U. S. Five-twenties of 1862, 118¼@118½; U. S. Five twenties of 1864 at 113⅞@114; U. S. Five-twenties of 1865 at 112⅜@112⅝; U. S. Five-twenties of 1865, consolidated, 116¼@116½; U. S. Five-twenties of 1867, 112⅝@112¾; U. S. Five-twenties of 1868, 112½@112⅝; U. S. Ten-forties at 105@105¼; U. S. Six per cent. currency bonds, 101⅞@102.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 24.	Mar. 3.	Mar. 10.
Consols	93	93	92⅞
U. S. 5-20's of 1862	79¼	81½	82⅛
Erie	24¼	24¾	24¼
Ill. Central	97¼	97	97

A more active speculative inquiry has been noted for railway and miscellaneous share property, chiefly toward the close, and prices have shown much more firmness and buoyancy. The National Stock Exchange, an independent business centre, has completed its organization, and formally commenced operations on Thursday, the 11th inst. This makes the third Stock Exchange now open for business in this city. The regular and the Open Boards of Brokers, however, continue (and are likely so to do,) to control the bulk of the dealings in share values.

A restricted business has been transacted in produce, since our last, though in most instances, prices have been quoted easier, especially for Flour, Wheat, Pork, Petroleum and Naval Stores. Middling upland cotton closed heavily on Wednesday at 29@29¼ cts. per lb. The stock of cotton now here is estimated at about 112,500 bales. The receipts at the port this week, have averaged about 2,500 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 1,731,000 bales, against 1,725,000 bales same time in 1867–'8; exports, same time 881,000 bales, against 1,071,000 bales same time in 1867–'8; stock on hand at latest dates, 395,000 bales, against 331,000 bales same date 1868. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 2,385 pkgs., against 2,201 pkgs., same time last year. From Boston, 2,981 pkgs., against 2,276 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been

in fair demand and firm at from 11@17½c., per lb.; week's receipts, 5,188. Milch cows at from $40@$110, each, receipts, 76. Veal calves at from 9½@13½c. per lb.; receipts, 338. Sheep and lambs at from 6@9½c., per lb.; receipts, 24,218. Swine at from 10¾@11⅜c. per lb.,; receipts, 7,-121. There has been less activity in foreign merchandise, groceries have been quoted less firm, particularly Sugars, which have receded sharply from the high figures made on the recent speculative movement. The total imports of foreign dry goods, last week, were $3,507,848, and the total amount marketed $3,587,868. The value of foreign merchandise imported last week, was $3,-507,848—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $7,255,441, against $4,753,533 same week last year; total since July 1, 1868, $170,-856,403, against $154,888,678 in 1867-'8. The freight market has shown less firmness, the supply of room having been more liberal. The engagements have consequently been on an enlarged scale. For Liverpool we quote flour at 1s. 3d.@ 1s. 4½d. by sail, and 1s. 6d. by steamer, per bbl.; grain at 2½d. by sail, and 3d.@3¼d. by steamer, per bushel; cotton at $\frac{3}{32}$@⅛d. by sail, and ⅛d. by steamer, per lb.; and heavy goods 12s. 6d.@20s. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 329.

The New York exports, exclusive of specie, for the week ending Mar. 9, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week.....	$2,574,845	$2,865,839
Prev. reported.....	29,892,329	26,035,420
Since January 1.....	$32,467.174	$28,901,259

The imports for the week ending March 6, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$2,024,344	$3,507,848
Gen. merchandise.....	2,729,189	3,747,593
Total for the week.....	$4,753,533	$7,255,441
Previously reported....	33,437,021	41,358,863
Since January 1.....	$38,190,554	$48,614,304

The balance in the Sub-Treasury on Wednesday was $86,832,283 08.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Louisiana 6s, 73; do., Levee bonds, 70⅜; Georgia 6s, 82; Alabama 8s, 96; do., 5s, 65; N. Y. State 7s, Bounty Loan reg., 109; Michigan 6s, 1878, 97; Jersey City W. L., 95; Brooklyn 6s, W. L., 95½; Great Western 1st mort., 7s, 1888, 86; St. Louis and Iron Mt. R. R., 85; Am. Dock and Imp. Co. 7s, 95; New Jersey Central new bonds, 97; Dubuque and Sioux City R. R., 108¼; do., 1st mort., 90; Long Island R. R., 45; Hannibal and St. Joseph R. R., 110; do., pref., 110; Adams' Exp. Co., 62; Am. Mer. Union Exp., 43; Wells-Fargo Exp., 30; Merchants' Union Exp., 17; Mariposa Mining Co., 15¾; do., pref., 34¼; do., Tr. 10s, ctfs., 67; do., bonds, 86; Western Union Telegraph, 87½; Boston Water Power Co., 18¾; Central Coal, 62½; Buchanan Farm oil, 0.61; Consolidated Gregory Gold, 2.70; Central Petroleum, 0.75; Corydon, 0.10; Grass Valley, 0.62; Gunnell Gold, 0.50; Montana Gold, 0.38; Pit Hole Creek petroleum, 1.30; Quartz Hill Gold, 0.78; Smith and Parmalee, 1.50; Wallkill Lead, 0.20.

Philadelphia.—St. Louis W. L., 102¾; Penna. State coupon 5s, 92½; West Jersey R. R. 6s, 89½; Phila. and Erie 7s, 80½; Morris Canal scrip, 68½; West Phila. R. R., 61½; Oil Creek and Allegheny River R. R., 38; Clinton Coal, ½; Big Mt., 5½; Fulton, 5; N. Y. and Middle Coal Fields, 4½; Niagara oil, 1; Corn Planter, ½; Feeder Dam, ⅜. The latest quotations are: City 6s, 97@98; do., free of tax, 100⅞@101; State 5s, reg., 98@100; do., coupon, 92½@93; do., 6s, W. ☞ THE FIRST MORTGAGE BONDS of the ROCKFORD, ROCK ISLAND AND ST. LOUIS RAILROAD COMPANY, pay both the Principal and Seven per Cent. Interest—1st Feb. and 1st Aug.—in GOLD COIN, Free of Government Tax.

A limited amount only of these Bonds may be had at par and accrued interest in currency, of H. H. BOODY, Treasurer, 12 Wall street, or of HENRY CLEWS & CO., Bankers, 32 Wall street.

Copper Falls Mining Co.

The operations of this company for the year 1868 show the following result: Amount of mineral produced 1,589,301 lbs., yielding at 69.258 per cent. in Ingot Copper. 1,100,718 lbs. sold at an average of 24⅛ cents—229,724 02. The total cost, other than extraordinary expenses for new machinery requisite for the future working of the mine, additions to real estate, &c., is $182,509 83. showing a profit of $47,214 19 for the year. The statement of assets and liabilities shows a surplus of available assets of $26,198 24, after charging $28,944 57 for new machinery, $9,943 06 additions to real estate, and $12,691 37 charged for depreciation machinery, &c., without including any of the cost of machinery, real estate and plant of the mine.

Franklin Mining Co.

The report of this company shows a profit for the year of about $32,000, upward of $30,000 of which has been expended upon the stamp mill. The average price of the sales of copper for the year past has been 23¾ cents per lb. The balance of assets over liabilities is $58,085 79. The Directors say: "With liabilities reduced from $107,628 40 at the commencement of last year, to $67,514 74 at its close, with copper at a price which insures a profit, and with the strict economy in every department of the business, we hope, within a reasonable time, to have again the satisfaction of finding ourselves in a position to pay regular dividends."

Movements of Produce.

Receipts of certain articles of domestic produce at the port of New York for two months from January 1st:

☞ The Island City *Times* says it is proposed to consolidate the Green Bay and Lake Pepin, the Portage and Ripon and the Doty Island and Waupaca roads making a common starting point at Doty Island.

Journal of Railroad Law.

COMMON CARRIERS—INCLOSURES—DAMAGES—NEGLIGENCE.

The facts in the late case of the Hannibal and St. Joseph R. R. Co., *vs.* Kenney (41 Mo., 271) will sufficiently appear in the following opinion by—

HOLMES, J. The plaintiff sues for damages done to the railroad and a running train in consequence of the defendant's mules getting upon the track. It is alleged that the plaintiff was the owner of the railroad, and was running a passenger express train on the road, at night, in the county of Caldwell, when a large number of mules belonging to the defendant, unlawfully and by reason of the defendant's negligence, entered and were upon the track at a point where it was not the duty of the plaintiff to erect and maintain fences, and that without any negligence on the part of the plaintiff the train came in contact with the mules, causing damage to the locomotive, train, and road, to the amount of $20,000, for which judgment is asked. The case is presented here on demurrer to the petition for the reason that it does not state facts sufficient to constitute a cause of action. It is urged in support of the demurrer, that the petition does not state any facts nor charge any acts of omission or commission on the part of the defendant, which in law amount to negligence for which the defendant is responsible in damages, and that it appears to be assumed that it was the duty of the defendant to keep his mules in his own enclosure, and that in default thereof he would be responsible for any damage which they might do by going upon the enclosed land of others.

We cannot sustain this view of the matter. The fact is stated that the defendant's mules had got upon the track unlawfully and by reason of the negligence of the defendant; it is not merely that the mules had strayed upon the track without his fault or knowledge. It is not necessarily assumed that the defendant was bound to keep the mules in his own enclosure; but it is positively averred that they were on the track by reason of his negligence. The trespass of the mules may be his own trespass as well, and he is certainly responsible for his own negligence if the negligence averred can be proved. The existence of negligence is a matter of fact, and must be proved like any other fact. The question what circumstances would amount to proof of negligence, or would show negligence, would more properly arise when the evidence should be produced. Lee *vs.* Cox, 16 Mo. 166. It is settled law in this State, that the owner of animals is by our law under no obligation to fence them in; that is, in not confining them, he is in no fault, nor is he guilty of negligence. Gorman *vs.* Pacific R. R. 26 Mo., 441. But it was said in this case that "although the owner of animals is not bound to fence them in, yet there may arise a state of circumstances showing that he was guilty of such willfulness or negligence in regard to his animals as would prevent a recovery of damages for their destruction;" and for the same reason we think he might be liable to the company for the damage done by them. The allegations show a good cause of action. By what evidence the plaintiff will undertake to sustain them we, of course, cannot say, nor is it necessary that he should set forth his evidence in the petition. It may happen that no other evidence can be produced than the mere omission to enclose his cattle, and that negligence can be proved on the part of the plaintiff; and if the negligence of both parties were only the remote, and neither the proximate cause of the damage, it might present a case of unavoidable accident, or simple misadventure, for which none can be held responsible. Kimbacker *vs.* Clev., C. & C. R. R. Co. 3 Ohio, 172. But no opinion need be given on such questions until they arise upon the trial of the cause. The subject has been considered by this court in several cases, and need be no further discussed at this time. Gorman *vs.* Pacific R. R., 26 Mo., 441, Clark's Adm'x *vs.* Han. & St. Jo. R. R. Co., 36 Mo. 202.

We are of opinion that the petition states a good cause of action, and that the demurrer should have been overruled.

Judgment reversed and the cause remanded.

From Herapath's Railway Journal.

Railway Economy.—Permanent Way.

We stated in a previous article that the term broad gauge became almost synonymous with a bridge rail and longitudinal sleeper road in contradistinction to the narrow gauge, which consisted of a double-headed rail held in chairs, supported on cross sleepers, and this holds good generally in England; but some modifications, or combinations, of the two systems, were introduced in Ireland which are deserving of notice.

On the Great Southern and Western, and Dublin and Drogheda Railways, the permanent way, introduced by Sir John Macniel, was composed of a deep bridge rail of 92 lbs. per yard, supported on cross sleepers 2 ft. 6 in. apart, to which it was secured by fang bolts. The sleepers were all rectangular in section, those at the joint being 12 in. by 6 in., and the intermediate ones 9 in. by 5 in. This road, therefore, was a combination of the two systems, the broad gauge rail strengthened sufficiently to enable it to bear the weights when supported on the narrow gauge substructure. A more simple type of permanent way can hardly be conceived; it has all the advantages of the cross sleeper system without the chairs and keys. The chief disadvantage urged against it was that the rail could not be turned when its top table had become worn out, but experience has proved that neither can the double-headed rail, so that they were both equal in this respect, and undoubtedly, getting rid of the chairs is a great advantage.

On the Midland Great Western railway another modification was introduced by Mr. Hemans. It consisted of a foot, or Vignoles rail, 76 lbs. per yard, supported on longitudinal sleepers with cross transomes underneath. Here, then, was the broad gauge substructure with a different kind of rail.

It was the examination of these two and the Great Western systems which led Mr. Dockray in 1848 to recommend to the directors of the London and North Western Railway a plan of permanent way designed by him, and partaking of the peculiarities of these three. At that time the permanent way of the southern division of the line was rapidly wearing out from the increasing traffic, greater speed of the express trains and weight of engines, and it became necessary to take some decided steps to render the permanent way capable of enduring the increased work thus brought upon it; accordingly an experimental length of line, as proposed by Mr. Dockray, was laid down. It consisted of a heavy bridge rail, 100 lbs. per yard, with a base 7½ in. wide, which rested on a longitudinal sleeper of the same width as the rail, and 5½ in. deep, this was supported by cross-sleepers placed 3 ft. apart, the rail being laid down by long fang bolts passing through both. This should have made a good permanent way, but it nevertheless was not adopted beyond the

experimental length, and that has since given place to the double-headed rail and cross sleepers; this might perhaps be owing to the difficulty of packing a road composed of the longitudinal and cross sleeper system combined, and perhaps also from its greater first cost as compared with the other, which it exceeded by about £700 per double mile. It was a remarkable instance of the application of the longitudinal system to the narrow gauge.

Another system which has been much patronized of late, more particularly for light traffic, is that composed of a foot rail resting on cross sleepers to which it is held down by dog spikes. It was partially adopted on the London, Chatham, and Dover, but has, we believe, been abandoned, but it may be found working well on many branch lines. It has the great merit of simplicity, the chief defect being the difficulty of maintaining the gauge, as the dog spikes usually employed have not sufficient hold of the sleeper to resist the side thrust against the rails, particularly on curves. This system has been introduced by Mr. Fowler on the Metropolitan Railway, and we are bound to say that it has been carried out in a very efficient manner. The rails are of Bessemer steel about 80 lbs. to the yard, are 4½ in. deep, and have a base 6 in. wide; these rest on rectangular cross sleepers placed as close together as the requisite spaces for packing will allow, and form the nearest approach possible to a close planked road; the rails are held down to the sleepers by bolts and fang nuts, the nuts being made purposely of cast in preference to wrought-iron, this is done to obviate the difficulty always experienced in screwing up or unscrewing the bolts on account of the oxidation which always takes place when the screw thread is buried in the ballast, as it is found that the rust of the cast-iron is not nearly so strong or adhesive as that of wrought, but crumbles into powder when the bolt is moved. The joints are secured by means of fishing-plates bolted together with ⅞ in. bolts. Altogether we regard this permanent way as an improvement in the right direction, and if it continues to stand the never-ceasing heavy traffic which it has to carry, as well as it appears to have done up to the present time, it will do much towards abolishing chairs which, now it is generally accepted that the double headed rail cannot be reversed with advantage, become useless appendages. On this point, however, we should remark that there is one experiment now under trial on the Great Northern Railway with a view to prevent the indenting of the under side of the rail. A new kind of chair was introduced some few years ago with a wider base than ordinary, and having a wood packing let into a recess under the rail for it to rest upon instead of resting directly on the chair. This would, of course, preserve the rail so long as the packing stood, and it appears to us that its success will hinge entirely on this point, and the difficulty of getting a sufficient bearing surface to distribute the weight sufficiently to prevent the wood being crushed.

Another system of permanent way which has been for some time under trial on the South Eastern Railway appears to possess great merit as regards both efficiency and economy, and is likely to become a formidable competitor with the chair system. This plan is, we believe, the invention of Mr. Meakin, but the practical form it has assumed on the South Eastern is due to the able engineer of the line, Mr. Ashcroft. The rail consists of a single and rather massive head attached to a light web with a small foot made of steel; this is gripped between two continuous angle plates of iron, which afford a direct support to the under sides of the table and nip the foot, thus forming a kind of continuous fish-joint, the rails breaking joint with the angle plates, and the whole being held together by screw bolts and nuts about 18 inches apart. The steel head weighs about 45 lbs. per yard, the angle plates 63 lbs., making together 108 lbs. per yard, the cost of which, including bolts, is £10 10s. per ton; the rail rests directly on a longitudinal plank 10 in. by 4 in., and this again on the usual complement of cross sleepers, the rail being held down by fang bolts. We have in this system again a combination of the longitudinal and cross sleeper systems with a rail of altogether a novel construction. The great feature is no doubt the rail itself, as if further experience corroborates the result, of its working up to the present time, which we believe has proved very satisfactory, it will show an advantage over a rail entirely of steel in admitting of a renewal of the head at half the cost of a new rail, while the first cost is not more than a steel rail of equal strength, and which when worn out would have to be thrown away entirely. This plan also saves the cost of the fishing plates for the joints, and it promises, we think, the advantage of greater security than a simple steel rail, as should from any unforeseen circumstance a fracture of the rail occur, the angle plates would hold it firmly together. We shall watch with interest the further trial of this plan. It could hardly be submitted to a more severe test than it is on the sharp curve running from the main line into the Cannon-street terminus, with the incessant heavy traffic over it, where it has now been laid down for upwards of a year.

From the Arkansas Standard.

Cairo and Fulton Railroad.

The deep interest we feel in the construction of this road, and the great benefit that would accrue to this section of the state especially, and to the country generally, from its early completion must be our apology for so pertinaciously pressing the attention of the public to the subject. The dilatoriness with which those in charge of the enterprise move in its construction, excites in our mind grave apprehensions of either incompetency of the officers, or a collusion on their part with the officers of other contemplated roads, to delay action until it forfeits its charter, and thus remove it out of the way of those roads, with whose interests it conflicts. This road was chartered over fifteen years ago, and by the terms of its charter, it is to be forfeited, unless twenty miles of the road be built within sixteen years. That time will expire on the 28th of July next, and not one foot of the road in Arkansas is completed, nor so far as we know, is there a single hand engaged on the work at this time. If the time specified in the charter for the completion of a certain portion of the road should pass without its completion, the million and a half acres of land granted to it will be forfeited with its charter, and the Cairo and Fulton Railroad, in consequence of the lengthy period of gestation will be still born, affording another evidence of the truth of the adage, "procrastination is the thief of time."

Gen. Brayman, the president, before the election last fall, issued a circular, in which he made such flattering representations of the condition and affairs of the road, that the people were inspired with the hope that its early completion was a fixed fact, and that in two years at farthest the iron horse would be careering through this section, drawing in his train thousands and millions of freight. With this hope animating them, our people voted for state aid to railroads, with a unanimity we have never seen equaled anywhere. But since that time we have seen and heard but little about the road, and the fair promises then made begin to bear the aspect of an electioneering trick, as many suspected at the time they were. Now, the people would like to know whether all those fair promises were merely "Buncomb," or whether the road will actually be built, and Gen. Brayman is in duty bound to give them this information.

The immense land grants that have been made to this road, and the state aid it will receive as soon as the required conditions are complied with, it appears to us would enable Gen. Brayman to hypothecate the bonds on liberal terms, and push the road forward to an early completion. As we stated a week or two since, the people along the line are willing and anxious to afford all the aid in their power towards its construction, and as soon as the work is commenced with a fair prospect of completion they will come forward with a liberality that will show their high appreciation of its importance to the country, and at the same time give material aid to the enterprise. With the five million dollars that we learn Gen. Brayman says he can command, the land grants, the state aid, and the assistance the people will give, we see no valid excuse for delaying for even one day, active operations on the road.

Virginia State Debt.

A statement of the Virginia State debt has just been made public, from which it appears that—

The whole debt on which the State is paying four per cent. interest from Jan. 1, 1867, to July, 1868, is	$32,808,032 94
On this two per ct. interest, unpaid, stands to the credit of the creditor.	
Interest funded and to be funded..	7,671,600 09
On which no interest is being paid.	
Guaranteed debt	1,976,260 91
On which no interest is being paid.	
Total debt	$42,455,893 94

To which is to be added the outstanding two per cent. on the interest paying debt, which is unpaid and unfunded.

From the Arkansas Gazette.

Iron Mountain and Helena Railroad.

We have received a copy of the report of J. C. McCabe, Esq., Secretary, addressed to Gov. Clayton. It contains valuable information relative to the characteristics and resources of the State, and is well worth perusing. Mr. McCabe asserts that among the several railroads projected in Arkansas, none more deservedly claims the attention of the State authorities than the Iron Mountain and Helena Railroad. Traversing the heart of eastern Arkansas from the northeastern boundary of the State in a due direction to Helena, 140 miles, passing through or near the county seats of six large counties, and immediately affecting the business of at least seven other contiguous counties, it will subserve the interest of the people of Greene, Lawrence, Randolph, Craighead, Poinsett, Jackson, Woodruff, Cross, Crittenden, St. Francis, Phillips, Monroe and Mississippi Counties. It will secure at the northern boundary of the State immediate rail communication with St. Louis, and at the southern connect it with head of low water navigation on the Mississippi River at Helena; and by the extension of the road a few miles, with the system of railroads in the State of Mississippi *now*, in daily communication with New Orleans. Being an extension of the Iron Mountain and St. Louis Railroad, it will be the middle link between the latter city and New Orleans, thus drawing to our State the great bulk of the trade carried on between the grain and meat producing States of the northwest, of which St. Louis is the centre, and the cotton, rice, and sugar producing States on the Gulf of Mexico, whose business centre is New Orleans.

With the Iron Mountain and Helena Railroad

in operation, emigration would naturally tend toward the rich and fertile Valley of White River or the splendid cotton and corn lands found in the valley of the Arkansas. With St. Louis at the north and New Orleans at the south, both centres of foreign immigration, this railroad would present a facile outlet for their superabundant population, inducing the thousands of able-bodied laborers vainly seeking for employment in these overstocked cities to come to Arkansas and find in the cultivation of its millions of untilled acres, in the working of its mines, the navigation of its rivers, the felling of its forests, in its workshops, factories and foundries, an honest livelihood and manly independence, while at the same time they increased the revenue and promoted the prosperity of the State.

In point of public benefit to the State, of National importance, and of cheapness of construction, the Iron Mountain and Helena Railroad recommends itself most strongly to the fostering and encouraging hand of the State authorities. Its main assets, consisting of lands situated along the line of the road, highly fertile and eligibly situated for residence and cultivation, need only the supervening influence of friendly legislation to give them available vitality. Any appropriation of any part of the public domain to this enterprise would be a wise expenditure of the State resources, to be returned ere long in the permanent prosperity of the people, and the consequent enlargement of the revenue of the State. The building of this road will be a desideratum to eastern Arkansas, and must most happily affect every interest—political, social, agricultural, manufacturing and mineral—of the State. The officers of the Iron Mountain and Helena Railroad are: President, D. C. Cross; Secretary, J. C. McCabe; Treasurer, J. S. Horner.

Specie Movement at New York in 1869.

Received from foreign ports:

In January	$221,278
Do. February	1,882,755
	$2,104,033

Received from California:

In January	$1,810,536
Do. February	1,359,226
	3,169,762
Total supply	$5,273,795

Exported to foreign ports:

In January	$3,214,380
Do. February	3,232,083
	6,446,463
Loss since January	$1,172,668

Cumberland Valley Railroad.

A joint meeting of the two boards of directors of the Cumberland Valley and Pennsylvania Railroad Companies will be held in Philadelphia on the 17th inst., for the purpose of finally determining the plan of action on this subject. The Hagerstown *Mail* says it is already settled that the road will be extended from Hagerstown to Williamsport, and that all that now remains to be determined is the point of termination on the Potomac, intersecting with the Chesapeake and Ohio Canal. The impression is that the original survey of the Chief Engineer, Major Watts, with some variations of the line east of the creek, will be adopted, and that the terminus will be on the west bank of the Conococheague.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of February, were:

ENTERED FOR CONSUMPTION.

☞ The Bedford (Ind.) *Independent* says that "the surveying party of the B., B. and T. H. R.R. route have reached Salt Creek and found a route quite practicable, but they propose surveying two other routes in order to find the best. So the question has been settled definitely, that we can reach Salt Creek without any difficulty."

New Bank Statement Law.

The following is a copy of the act passed at the last session of Congress, entitled "An Act Regulating the Reports of National Banking Associations:"

Be it enacted, &c., That in lieu of all reports required by section 34 of the National Currency act every association shall make to the Comptroller of the Currency *not less than five reports* during each and every year, according to the form which may be prescribed by him, verified by the oath or affirmation of the President or Cashier of such association and attested by the signatures of at least three of the directors, which report shall exhibit in detail and under appropriate heads the resources and liabilities of the association at the close of business on *any past day to be by him specified*, and shall transmit such report to the Comptroller within five days after the receipt of a request or requisition therefor from him; and the report of each association above required, in the same form in which it is made to the Comptroller, shall be published in a newspaper published in the place where such association is established, or if there be no newspaper in the place, then in the one published nearest thereto in the same county, at the expense of the association, and such proof of publication shall be furnished as may be required by the Comptroller. And the Comptroller shall have power to call for special reports from any particular association, whenever, in his judgment, the same shall be necessary, in order to a full and complete knowledge of its condition. Any association failing to make and transmit any such report, shall be subject to a penalty of $100 for each day after five days that such bank shall delay to make and transmit any report as aforesaid, and in case any association shall delay or refuse to pay the penalty herein imposed, when the same shall be assessed by the Comptroller of the Currency, the amount of such penalty may be retained by the Treasurer of the United States upon the order of the Comptroller of the Currency, out of the interest, as it may become due to the association, on the bonds deposited with him to secure circulation. And all sums of money collected for penalties under this section shall be paid into the Treasury of the United States.

SEC. 2. *And be it further enacted*, That, in addition to said reports, each National banking association shall report to the Comptroller of the Currency the amount of each dividend declared by said association, and the amount of net earnings in excess of said dividends; which report shall be made within ten days after the declaration of each dividend, and attested by the oath of the President or Cashier of said association; and a failure to comply with the provisions of this section shall subject such association to the penalties provided in the foregoing section.

☞ The Wrightsville *Star* says that the connection between the Pennsylvania and Northern Central Railroads has been made in Wrightsville, and hopes to see the cars very soon passing over the bridge. The change in the tracks is a decided improvement, and adds much to the convenience of both companies. The Northern Central will, during the coming summer, lay down new and heavier rails between Wrightsville and York, which is certainly demanded by the character of the freight that will hereafter pass over the road.

☞ The Hackensack Railroad, N. J. has been transferred to the Erie Railway Company, and will be immediately extended to Sufferns, furnishing a third track at that end of the road.

☞ The earnings of the European and North American Railway in February, 1869, were $9,701 19; in February, 1868, $8,581 23—increase, $1,119 96.

☞ The Platte Valley and Pacific Railroad Company was organized at Omaha on the 28th of January, by the election of the following board of directors: P. R. Sharpy, A. R. Gilmore, O. D. Richardson, E. Lowe, James C. Mitchell, J. B. Stutsman, and John A. Parker. President, John A. Parker; Vice-President, J. B. Stutsman; Treasurer, J. A. Jackson; Secretary, B. R. Pegram.

☞ The Hudson River Railroad Company has placed twelve of the Mansell wooden car wheels on their drawing-room car. These wheels cost treble the price of the ordinary cast iron wheels, but this is regarded as of little consequence compared with the advantages derived from their use. They ride smoothly, making conversation, reading and even writing, not only possible, but an easy task on the cars.

☞ The Rockford, Rock Island and St. Louis Railroad Company has just concluded a negotiation of two millions of dollars of their first mortgage bonds in Europe. The work on the road is progressing favorably, and the company have advanced the price of its bonds from 97½ to 100 and accrued interest.

☞ The extension of the Missouri Valley Railroad was completed on the 27th ult., to the western division of the Missouri road, forming another direct route from St. Louis to St. Joseph, thence to Omaha.

☞ The Montreal *Gazette* says it is the impression that section No. 1 of the Intercolonial Railway, awarded to Horsey & Co., will be put up again for tender.

☞ The Tallahassee, Pensacola and Georgia Railroad is advertised to be sold on the 20th of March. The sale is ordered by the trustees of the State Internal Improvement Fund.

THE WORKSHOP.

AN INDUSTRIAL MONTHLY PERIODICAL, devoted to progress in the Useful Arts, with a speciality in Ornamentation. Founded in 1863, now published in English, German, French and Italian. A most useful and practical work for Architects, Builders, Cabinet Makers, Carvers, Glass Cutters and Stainers, Decorators, Fresco Painters, Sculptors, Designers, Engravers, Lithographers, for Manufacturers of Bronzes, Silverware, Gas Fixtures, Wall Paper, Carpets and Oil Cloth, Mouldings, Frames, Terra Cotta, and for every variety of Art-Industry.

Edited by Prof. W. Baumer, I. Schnorr and others, and published by E. Steiger, No. 22 & 24 Frankfort street, New York.

This excellent Periodical has commenced its new year with the same spirit of enterprise and emulation that has already won for it such flattering success, and we can cheerfully say it should circulate wherever taste is required in Manufacture, Construction and Decoration.

Intercolonial Railway.

THE Commissioners appointed to construct the Intercolonial Railway give public notice that they are now prepared to receive TENDERS for THREE FURTHER SECTIONS of the line.

Section No. 5 will be in the Province of Quebec and will extend from forty miles east of Riviere du Loup, at the end of Contract No. 2, to the Sixty-Sixth Mile Post, near Rimouski, a distance of about twenty-six miles.

Section No. 6 will be in the Province of New Brunswick and will extend from the easterly end of Contract No. 3, opposite Dalhousie, to the west side of the Main Post road near the 48th Mile Post, easterly from Jacquet River, about twenty-one miles.

Section No. 7 will be in the Province of Nova Scotia and will extend from the southerly end of Contract No. 4, near River Phillip, to Station Fifty at Folly Lake, about twenty-four miles.

Plans and profiles with specifications and terms of contract will he exhibited at the office of the Board of Works, Toronto, and at the offices of the Commiseioners at Ottawa, Rimouski, Dalhousie, St. John, and Halifax, on and after the FIFTH day of MARCH, 1869, and SEALED TENDERS, addressed to the Commissioners of the Intercolonial Railway, and marked "Tender," will be received at their office in Ottawa up to SEVEN o'clock, P. M., on the TWENTY-NINTH day of MARCH, 1869.

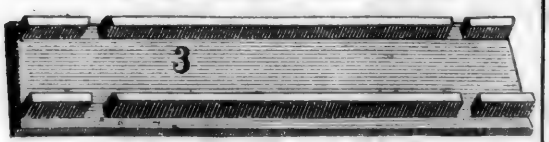
FISHER & NORRIS,
TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.



THE PHŒNIX IRON COMPANY'S
NEW SUSPENSION RAIL JOINT.

Cross Section of Rail Joint.

Side Clamps 14 in. long, showing Rail Stop.

Bottom Ribbed Plate, 14 in. in length.

The above diagrams show the general design of this new ***Suspension Rail Joint,*** which, after long and successful trial on the Philadelphia, Wilmington and Baltimore, and other Railways, is now offered to Railway Companies. The cut on the left gives a cross section of the finished joint, showing the rail (*1*) resting upon the ribs of the bottom plate (*3,*) with the flanges of the rail and the bottom plate embraced by the side clamps (*2,*) and held firmly in place by bolts (*4.*) In screwing up these bolts, the bite or grip between the bevel on the side clamps corresponding with the bevel on the flanges of the rail, insures great vertical and lateral rigidity to the joint.

Several careful tests have proved that the deflection of two pieces of rail thus fastened at their joints and subjected to a transverse strain between supports five feet two inches apart, was but a trifle more than that of the same rail uncut, tested in the same way. The value of the joint in this respect was 85 per cent. of that of the solid rail, while the best fish joints, similarly tried, gave less than 50 per cent.

No holes are required to be punched through the neck of the rail, nor slots in the flanges, only a quarter circle notch of about half an inch radius is necessary to be cut out of the corner of one of the flanges of the rail to fit the "stop" shown in the upper right hand cut. This is a very important consideration, as holes punched or drilled in the neck are apt to split the rail longitudinally, and in *Steel Rails particularly,* is the principal cause of breakage.

All that portion of the joint, shown in the cut of cross section, below the bottom of the rail, bears endwise against the cross-ties, and prevents any creeping of the track. It makes a very firm joint, does not get out of order, and can be fitted to any size of rail. When ordering, send a sample piece of rail two feet long. Address,

The East River Bridge:

CONSULTATION OF THE BOARD OF ENGINEERS—ROEBLING'S PLAN INDORSED.

The Board of Consulting Engineers, consisting of Horatio Allen, W. J. McAlpine, J. Dutton Steele, Benjamin H. Latrobe, John Serrell, J. P. Kirkwood and J. W. Adams, have finished their conference, after having sat for three days, carefully examining the details of the plans and theories of Mr. Roebling. The result is a full confirmation of them in their application to the proposed East River Bridge. The first point on which they unanimously decided was, that there was nothing impossible in the building of a suspension bridge of so great a span as 1,660 feet though hitherto it had not been accomplished or attempted. The progress of suspension-bridge erection was traced, from the 600 feet bridge span of Europe to 850 feet in the old Niagara bridge. From this the span of 1,057 feet had been attained by Mr. Roebling in the Cincinnati bridge, and now the second Niagara bridge had been built by an English engineer, Mr. McAlpine being consulting engineer, with a span of 1,264 feet. Mr. Roebling's East River bridge project contemplates a span of 1,600 feet. The Board of Engineers were agreed that not only this great span of 1,600 feet, but even double as great a span, was perfectly feasible. The limit is simply the strength of the materials in proportion to their weight. The next and most important point upon which the Board consulted, was the foundations proposed for the towers on each side, from which towers the bridge was to be suspended. In this case there was no natural chasm to be crossed, but an artificial structure of 300 feet in height would be needed on each side of the river. The towers must be at least 1,600 feet apart. The engineering and mechanical world, whatever the uninformed public might suppose—found no difficulty in the span; but the erection of the towers on the brink of a deep and rapid river was a problem requiring careful study. On the Brooklyn side there was a substratum of bowlders which the current would not act upon or wash away. Here a firm foundation would readily be obtained. But on the New York side the foundation would have to be laid upon a quicksand—substantially the same sort of quicksand as was met with in excavating the Dry Dock, where not a stone was found in the whole excavation. But, though a quicksand, the borings on the New York side showed this substratum to be a sand compacted almost to the hardness of rock. The question most closely studied by the Board of Engineers has been. Might not the rapid current of the river, contracted, deepened or diverted by future projections and encroachments on the water space, wash against the foundation and undermine it by scouring out the quicksand? The borings showed that this quicksand was not a recent deposit, but the original decomposed rock, which had lain for numberless ages just where it is now. The changes in the river bed were carefully inquired into, old charts and new soundings compared, and the conclusion arrived at by the Board of Engineers on this point is, that while the contraction of the river bed by encroachments and shore projections has undoubtedly varied the current and increased its force, the effect upon the soil has been confined to the mid-channel, which has deepened in some places as much as eight or ten feet. But there is no indication of a tendency of the water to scour out the quicksand on the New York side of the bridge. To guard, however, against any possible result of this kind, Mr. Roebling was willing, if thought necessary, to dig as low as 107 feet below low-water mark, down to the solid rock, for a foundation for the New York tower. But the Board were unanimous in deeming this wholly unnecessary. They considered there was no danger of scour below the level of the present river bed. In all the centuries of its flow the river has scoured its channel only sixty feet in mid-channel. Hence, if the foundations of the tower were dug down to seventy feet, no future scour at this depth could ever be expected. But if, contrary to anticipation, such scour should ever occur, it would be perfectly prevented and arrested by piling up a rip-rap work of huge stones from the level of the foundation twenty or thirty feet up toward low-water mark, thus diverting the action of the water from the tower's foundation, without at all interfering with the depth of the water along the shore. Thus it was decided that a firm and unchanging bed for the foundation of the towers could be had.

The experiments made on the quicksand bed by Mr. McAlpine while excavating the Dry Dock, proved its bearing power to be ten tons per square foot. Mr. Roebling's plan of the New York tower proposes to rest upon this bed a weight of only four tons per square foot. The weight of each tower is to be 75,000 tons. To distribute this vast weight so that no part of the pressure on the base shall be over four tons per foot, Mr. Roebling proposes that the area of the foundation shall be 165 feet long by 100 feet broad. This area will be composed of huge timbers resting on the sand, and bearing the masonry work of the tower upon it. The timber will be 20 feet thick, and this vast mass of 20 feet by 165 by 100 will be securely bolted into one solid frame, so that the weight of the tower above can never deflect it in the slightest degree at any point. At this point came in a question, concerning which the outside public may be apt to feel more in doubt than a body of trained and practiced engineers. What is the durability of timber, when exposed to the action of salt water and of fresh water, wholly or partially? On this point the researches and the experience of the Board of Engineers adduced many interesting facts, which we have not space to record. Suffice it to say that there are two dangers to submerged timber—rotting, and

the ravages of the *teredo navalis*. The uniform judgment of the Board is that when sound timber is imbedded free from fluctuations of temperature, and at a depth below the action of the *teredo*, it is simply indestructible and everlasting. Instances were cited of timber thus lasting five hundred, one thousand, and even three thousand years, either below salt or fresh water. The timber must be selected with care, the tree felled while yet growing, before it has attained its full maturity and begun to decay; it must be submerged below the mud, to which depth the *teredo* never penetrates, and then its permanence can be assured. Piles were inspected, standing between low water mark and the mud, that had in eight years been perforated in every direction by the *teredo*, or worm, so as to be absolutely honeycombed and destroyed, and become mere shells. Examples of this may be seen in the Lyceum at the Navy Yard. But the effects of the worm were nowhere visible below the mud. By placing the timber bed for the tower foundation at the depth proposed, it would be safe from the worm as well as from the scour of the river undermining it. The Board therefore unanimously held that 300 feet high of a masonry structure could be safely and unyieldingly erected on such a timber foundation as proposed by Mr. Roebling; and that the superstructure thereon, if properly built, would easily bear the weight of the bridge and all the weight that could be put on the bridge. The next subject considered by the Board was whether the plan of the bridge proposed would be perfectly safe from danger of oscillation, or of damage from heavy gusts of wind. The material, steel wire, is extremely flexible; the result desired in the bridge is the exactly opposite quality of perfect rigidity. The great weight of the structure would tend to its rigidity. The plan of longitudinal trusses, and the system of stays, were examined in connection with the element of weight, and the various results calculated and compared. The conclusion arrived at was, that the proposed East River Bridge would be equal in rigidity to the Brittannia or the Victoria tubular bridges, or to the Niagara Bridge, which for seventeen years has exhibited an example of complete rigidity. In regard to the other danger, which in several instances has been fatal to suspension bridges, of a great tornado striking under the bridge, lifting it and letting it down again, the Board considered that the enormous weight of the East River Bridge would be a considerable guarantee against such a contingency; and that the system of trusses which bound the whole together like a solid mass, and compelled every part of the bridge to rise the moment that any other part rose, afforded perfect security. The power of the bridge to sustain the greatest weight that could be put on it, was another point upon which the Board made minute calculations. The greatest weight would be that of a dense crowd of human beings, attracted to the bridge in times of excitement or to visit some spectacle visible from the bridge. This weight of people would far exceed that of locomotives and trains either of freight or passengers; and the strength of the bridge would be far in excess of the maximum of weight that could ever be piled upon it, in any conceivable contingency.

The Board have reported their decision to the Bridge Company, which expresses their conviction that the structure as planned by Mr. Roebling is in every way feasible and judicious. The great work may therefore be expected to commence without much delay.

Chesapeake and Ohio Railroad.

The Covington *Times* says that the work on the first section of this road is going on bravely. The cut near the depot was to have been finished by the 15th inst., and the whole section will be ready for cross-ties and rails by the 1st of April. This is about thirty days earlier than it was thought possible to complete the job. If the other contractors along the route have made such rapid progress, there is no reason why the cars should not run through to the White Sulphur by the 1st of July next.

Atchison and Nebraska Railroad.

Major Fanning, Chief Engineer of the Atchison and Nebraska Railroad, has completed his examination of the Nemehaw Valley Railroad route from White Cloud, Kansas, to Lincoln, Neb. He reports it a very easy route, being a valley for nearly ninety miles, and only for a short distance would it be necessary to have a grade fifty-three feet to the mile. The country is settling rapidly, and the people on the line of the proposed route are anxious for its speedy construction.

South Carolina Railroad.

The earnings of this road for the years ending December 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$355,599 92	$310,778 47
" freight	940,549 26	961,704 80
" mail	18,947 36	20,575 00
" other sources	909 96	1,904 12
	$1,316,006 50	$1,294,961 89
Expenses, viz:		
Salaries, etc.	$15,354 73	$15,430 33
Transportation	359,817 56	358,392 87
Machinery	174,705 99	167,672 03
Roadway	152,351 06	155,952 17
	$702,229 34	$697,447 40
Earnings less expenses	$613,777 16	$597,514 49
From which deduct—		
Interest—sterling	$114,305 64	$113,765 28
" domestic	132,840 03	119,405 79
Damages	10,621 96	4,395 44
Stock killed	2,395 55	2,412 58
	$260,163 18	$239,979 04
Net income	$353,613 98	$357,535 45

Compared with the previous year, the gross earnings of 1868 show a decrease of $21,041 61; with a decrease in operating expenses of $4,781 94—making the decrease of net earnings, $16,262 67. The net income, after payment of interest, damage, etc., shows an increase of $3,921 47.

The equipment of the road December 31, 1867 and 1868, is thus compared:

	1867.	1868.
Locomotives—effective	35	35
waiting repairs	8	8
Total	43	43
Passenger cars, first class	22	22
" 2d class	17	18
Box cars	263	284
Platform	76	70
Stock	4	6
Total	382	400
Number of miles run	609,871	756,431
Passengers carried	92,331	85,270
Tons moved	126,222	160,529

Showing an increase in mileage of 146,560, or 24 per cent.; and in tonnage moved of 34,307, or about 28 per cent.—with an increase in expenses of less than one-half of one per cent.

The results of the operations of the road for the year ending December 31, 1868, are as follows:

Gross income, as above		$1,294,961 89
Sales of old materials		7,845 43
Materials recovered from old stock and carried to supply of materials for general application		5,898 65
Decrease in supply of materials on hand		33,155 63
Total		$1,341,861 60
Current expenses, as above		$697,447 40
Sterling interest:		
Payable in London, in gold	100,647 24	
" Charleston, in currency	13,118 04	
Domestic interest	119,405 79	
Damages and stock killed	6,807 97	
Railroad iron purchased	$87,828 08	
Less old rails sold	34,911 96	
	52,916 12	
Restoring motive power	26,276 62	
Purchase of locomotive	2,500 00	
Cars built at company's shops	33,376 37	
Lands purchased	2,766 66	
Increase in commissary stores	174 85	
Adjustment of claims prior to June 19, 1865	47,868 45	
Decrease in balance of indebtedness	238,561 09	
Total		$1,341,861 60

The general expenditures for road purposes have been chiefly, if not exclusively, in the direction of new rails and cars, and have amounted to over $115,000. In neither case has it been found that we could have dispensed with a particle of what has been procured, and in the matter of rails the supply has been insufficient.

The General Superintendent, in his report, calls for 2,100 tons new rails, and recommends the construction of fifty cars at least. Whilst the Board may not be able to answer these requisitions to their full extent, they recognize as undeniably true the wants of the department in both cases, and will, to the best of their ability, satisfy them. The wear of the old rails during the past year has been much greater than they could have expected, and it is demonstrated, to their entire satisfaction, that, apart from the question of safety, paramount with them, it is a false economy to retain in the track an old rail worn beyond a certain degree. They have furnished one hundred and fifty tons, 56 lbs., new, to meet present pressing wants, and immediately after the meeting of stockholders, propose arrangements for a larger supply, which they are of opinion can be had without creating any embarrassment to our finances.

They are also quite of opinion that the stock of good box cars should not be less than three hundred, and have already authorized the construction of the number necessary to make up that total.

In pursuance of their purpose to extend accommodation to the traveling public, commensurably with their means, the Board has authorized the purchase of the latest and most improved pattern of reclining seats in use, which are intended for their night trains, and which, it is expected, will add greatly to the comfort and ease of those who patronize them. They are looked for by every steamship.

The Auditor's statements present in their usual full and perspicuous style the financial condition of the company, and it gives infinite pleasure to the Board to be able not only to say, but to know that condition to be greatly improved, and to be rapidly reaching a point of great satisfaction and comparative ease.

They had entertained confident expectations that the important negotiations entrusted in June

last to the Honorable C. M. Furman, could in this paper have been reported as successfully accomplished, and thus finally quieted your mind as to all apprehensions about your unadjusted foreign debt.

The earlier progress of the negotiation abundantly justified such expectations, but technical difficulties later in the year intervened to obstruct and retard our agents' progress, and prevent the consummation of our wishes. Later advices, however, from Mr. Furman not only reinvigorate our hopes, but from their very sanguine nature really leave little room for doubt on our part.

The character of the negotiation in charge of Mr. Furman is as follows: As the stockholders are aware from our last report, the plan of debt adjustment adopted in 1865–'66, namely, renewal of the $2,000,000 sterling debt and interest with State guarantee had been found impracticable from several causes, but chiefly because the holders of these bonds on this side declined to exchange for the new bonds offered.

We were thus quite inconveniently situated: with a bond debt past due, part exchanged, part in original shape. Both claiming to be, and undoubtedly entitled to be, regarded, as of equal obligation upon us. This condition it will be readily seen without verbose explanation completely enchained us in the payments of interest, in the view not only of the road's convenience but of simple justice to the foreign bondholders, who had exchanged and held the bonds of 1866. Hence the Board became impressed with the imperative necessity of providing without further delay some substitute, in the shape of a new plan of debt adjustment, which would be equally acceptable to holders abroad and free of objection to those at home.

After much earnest and anxious reflection they concluded to prepare and offer to all the bondholders referred to in this connection, the company's first mortgage sterling bond bearing five per cent. interest, exchangeable at the pleasure of the company, for similar bonds bearing seven per cent. currency interest; payable within twenty years; payments to commence at expiration of ten years from date, and to be continued semi-annually until the whole debt was paid. This method of arrangement had the full concurrence of your Board. It has much to recommend it to their favor and yours; it met with the prompt and cordial acceptance of the holders of the bonds on this side, (indeed it could not well have done otherwise; for whilst undoubtedly it has advantage for us, it has yet more for them,) and we dispatched our agent to London, in July last, without doubt then as now of ultimate success; yet prepared for a less ready acceptance from an older and more cautious people than we found here.

Amongst the interesting papers from the Auditors's Department, that in relation to the company's debt, is most deserving your attention. Its most noticeable feature is the heavy reduction as indicated in the year's balance of indebtedness when compared with that of last year, in figures, $238,561 09, and this, it must be remembered, is in addition to the large sum appropriated to items of general expenditure, rails and the like.

But considerable as this sum is, it inadequately expresses the real and actual reduction of the company's debt, for it must be borne in mind that the large figures which represent the Investment Fund, represent only the cost of the constituents of that fund, and as these constituents are chiefly valuable securities purchased much below par, and their face value their real value, not their price, so the difference between their cost price and face value enters fully and legitimately into the elements of debt reductions.

Bearing this in mind, the true reduction of debt this year would not fall short of $350,000.

The reductions and changes of the principal accounts, bonds payable and bills payable, and the explanation necessary to a thorough comprehension will be found amply set forth in the various papers prepared for the information of Stockholders by the Auditor. The following general view will doubtless satisfy most:

The domestic bond debt now (31st Dec., 1868,) stands at	$1,585,296 06
On the 31st Dec., 1867, it stood at	1,492,632 92
Increase in 1868	$92,663 14
This increase is the result of	
1st, issues of new bonds in part settlement of confederate claims	$42,500 00
Retiring past due bonds	24,000 00
Retiring past due coupons	2,500 00
Purchasing certain securities	45,500 00
New bonds issued	$114,500 00
Add to this balance of arrears of interest on past due bonds, charged up to 31st Dec., 1868	8,329 81
Making together	$122,829 81
2d, A reduction of the retired past due bonds above mentioned.	$24,000 00
Cash payments on account of bonds for land purchases	6,166 67
	30,166 67
Producing the result as above stated.	$92,663 14

Of the Investment Fund above referred to as eventually applicable to debt reductions, the following items are particularly so to bonds payable:

Securities at their face valuation	$211,000 00
" " market "	67,000 00
Total	$278,000 00
If the "Increase," as above stated, viz.	92,663 14
Be taken from the amount of these securities, the "Bond Debt" would show a reduction of	$185,336 86
The bills payable account, on the 31st December, 1867, stood at	$317,186 10
It now stands at	88,060 60
Showing a reduction during the past year of	$229,125 50
To this should be added the amount of an outstanding note, given in October, for the purchase of certain securities, they now forming a part of the assets of that class	27,355 83
Virtual reduction	$256,481 33
The balance of the account as above stated, viz	$88,060 60
After deducting the note just referred to, viz.	27,355 83
Leaving	$60,704 77

is composed of obligations given for the purchase of rails and other necessary supplies, and more accurately represent balance of bills payable.

The debt and property accounts of the company at the close of the last and preceding years were as follows:

	1867.	1868.
Capital stock	$5,819,275 00	$5,819,275 00
Sterling bonds	2,275,310 88	2,275,444 79

President.—Wm. J. Magrath.

Directors.—William J. Magrath, George A. Trenholm, L. D. DeSaussure, John Hanckel, Andrew Simonds, George W. Williams, Henry Gourdin, Francis J. Pelzer, C. M. Furman, B. H. Rice, H. H. DeLeon, James Rose, William A. Courtenay, James S. Gibbes, James P. Boyce.

Gen'l Superintendent.—H. T. Peake.

Auditor.—J. R. Emery.

Pennsylvania Railroad.

The stock distribution of 136,000 shares which the officers of the Pennsylvania Railroad Co. are authorized to make to shareholders, to the extent of 25 per cent. of their respective interests, as they stand registered on the books of the company on the 30th day of April next, is to be paid for in two instalments. Fifty per cent. at the time of subscribing, between the 15th of May and the 30th of June following, and fifty per cent. between the 15th of November and the 31st of December, 1869; or, if the subscribers prefer, the whole may be paid at the time of subscribing—each instalment so paid being entitled to a pro rata of the dividend that may be declared on full shares. Those holding less than four shares, and those holding more than a multiple of four shares are to be entitled to subscribe for an additional share. By this arrangement the time of paying subscriptions is extended over two dividend periods, which are expected to give back to the shareholders ten per cent., or two-fifths of the amount paid in While this will make it easy for the subscribers to pay their subscriptions, will make it still easier for the Company to pay its dividends.

Supreme Court of the United States.

Frederick Bronson, Executor of the last will and testament of Arthur Bronson, deceased, Plaintiff in Error, *vs.* Peter Rodes. In error to the Court of Appeals of the State of New York. Mr. Chief Justice Chase delivered the opinion of the Court.

This case comes before us upon a writ of error to the Supreme Court of New York.

The facts shown by the record may be briefly stated.

In December, 1851, one Christian Metz having borrowed of Frederick Bronson, executor of Arthur Bronson, fourteen hundred dollars, executed his bond for the repayment to Bronson of the principal sum borrowed on the 18th day o January, 1857, in gold and silver coin, lawful money of the United States, with interest, also in coin, until such repayment, at the yearly rate of seven per cent.

To secure these payments, according to the bond, at such place as Bronson might appoint, or

in default of such appointment, at the Merchants, Bank of New York, Metz executed a mortgage upon certain real property, which was afterwards conveyed to Rodes, who assumed to pay the mortgage debt, and did, in fact, pay the interest until and including the 1st day of January, 1864.

Subsequently, in January, 1865, there having been no demand of payment nor any appointment of a place of payment by Bronson, Rodes tendered to him United States notes to the amount of fifteen hundred and seven dollars, a sum nominally equal to the principal and interest due upon the bond and mortgage.

At that time one dollar in coin was equivalent in market value to two dollars and a quarter in United States notes.

This tender was refused, whereupon Rodes deposited the United States notes in the Merchants' Bank to the credit of Bronson, and filed his bill in equity praying that the mortgaged premises might be relieved from the lien of the mortgage, and that Bronson might be compelled to execute and deliver to him an acknowledgment of the full satisfaction and discharge of the mortgage debt.

The bill was dismissed by the Supreme Court sitting in Erie County; but, on appeal to the Supreme Court in general term, the decree of dismissal was reversed, and a decree was entered adjudging that the mortgage had been satisfied by the tender, and directing Bronson to satisfy the same of record; and this decree was affirmed by the Court of Appeals.

The question which we have to consider, therefore, is this:

Was Bronson bound by law to accept from Rodes United States notes equal in nominal amount to the sum due him as full performance and satisfaction of a contract which stipulated for the payment of that sum in gold and silver coin, lawful money of the United States?

It is not pretended that any real payment and satisfaction of an obligation to pay fifteen hundred and seven coined dollars can be made by the tender of paper money worth in the market only six hundred and seventy coined dollars. The question is, Does the law compel the acceptance of such a tender for such a debt?

It is the appropriate function of Courts of justice to enforce contracts according to the lawful intent and understanding of the parties.

We must, therefore, inquire what was the intent and understanding of Frederick Bronson and Christian Metz when they entered into the contract under consideration in December, 1851.

And this inquiry will be assisted by reference to the circumstances under which the contract was made.

Bronson was an executor, charged as a trustee with the administration of an estate. Metz was a borrower from the estate. It was the clear duty of the former to take security for the full repayment of the money loaned to the latter.

The currency of the country, at that time, consisted mainly of the circulating notes of State banks, convertible, under the laws of the States, into coin on demand. This convertibility, though far from perfect, together with the acts of Congress which required the use of coin for all receipts and disbursements of the National Government, ensured the presence of some coin in the general circulation; but the business of the people was transacted almost entirely through the medium of bank notes. The State banks had recently emerged from a condition of great depreciation and discredit, the effects of which were still widely felt, and the recurrence of a like condition was not unreasonably apprehended by many. This apprehension was, in fact, realized by the general suspension of coin payments, which took place in 1857, shortly after the bond of Metz became due.

It is not to be doubted, then, that it was to guard against the possibility of loss to the estate, through an attempt to force the acceptance of a fluctuating and perhaps irredeemable currency in payment, that the express stipulation for payment in gold and silver coin was put into the bond. There was no necessity in law for such a stipulation, for at that time no money, except of gold or silver, had been made a legal tender. The bond without any stipulation to that effect would have been legally payable only in coin. The terms of the contract must have been selected, therefore, to fix definitely the contract between the parties, and to guard against any possible claim that payment, in the ordinary currency, ought to be accepted.

The intent of the parties is, therefore, clear. Whatever might be the forms or the fluctuations of the note currency, this contract was not to be affected by them. It was to be paid, at all events, in coined lawful money.

We have just adverted to the fact that the legal obligation of payment in coin was perfect without express stipulation. It will be useful to consider somewhat further the precise import in law of the phrase "dollars payable in gold and silver coin, lawful money of the United States."

To form a correct judgment on this point, it will be necessary to look into the statutes regulating coinage. It would be instructive, doubtless, to review the history of coinage in the United States, and the succession of statutes by which the weight, purity, forms, and impressions of the gold and silver coins have been regulated; but it will be sufficient for our purpose if we examine three only, the acts of April 2, 1792, (1 U. S. St., 246,) of January 18, 1837, (5 U. S. St., 136,) and March 3, 1849, (9 U. S. St., 397.)

The act of 1792 established a mint for the purpose of a National coinage. It was the result of very careful and thorough investigations of the whole subject, in which Jefferson and Hamilton took the greatest parts; and its general principles have controlled all subsequent legislation. It provided that the gold of coinage, or standard gold, should consist of eleven parts fine and one part alloy, which alloy was to be of silver and copper in convenient proportions, not exceeding one-half silver; and that the silver of coinage should consist of fourteen hundred and eighty-five parts fine, and one hundred and seventy-nine parts of an alloy wholly of copper.

The same act established the dollar as the money unit, and required that it should contain four hundred and sixteen grains of standard silver. It provided further for the coinage of half dollars, quarter dollars, dimes and half dimes, also of standard silver, and weighing respectively a half, a quarter, a tenth, and a twentieth of the weight of the dollar. Provision was also made for a gold coinage, consisting of eagles, half eagles, and quarter eagles, containing, respectively, two hundred and ninety, one hundred and thirty-five, and sixty-seven and a half grains of standard gold, and being of the value, respectively, of ten dollars, five dollars, and two and a half dollars.

These coins were made a lawful tender in all payments according to their respective weights of silver or gold; if of full weight, at their declared values, and if of less, at proportional values. And this regulation as to tender remained in full force until 1837.

The rule prescribing the composition of alloy has never been changed; but the proportion of alloy to fine gold and silver, and the absolute weight of coins, have undergone some alteration, partly with a view to the better adjustment of the gold and silver circulations to each other, and partly for the convenience of commerce.

The only change of sufficient importance to require notice, was that made by the act of 1837. (5 U. S. St., 137.) That act directed that standard gold, and standard silver also, should thenceforth consist of nine parts pure and one part alloy; that the weight of standard gold in the eagle should be two hundred and fifty-eight grains, and in the half eagle and quarter eagle, respectively, one-half and one-quarter of that weight precisely; and that the weight of standard silver should be in the dollar four hundred twelve and a half grains, and in the half dollar, quarter dollar, dimes, and half dimes, exactly one-half, one-quarter, one-tenth, and one-twentieth of that weight.

The act of 1849 (9 U. S. St., 397,) authorized the coinage of gold double-eagles and gold dollars conformably in all respects to the established standards, and, therefore, of the weights respectively of five hundred and sixteen grains and twenty-five and eight-tenths of a grain.

The methods and machinery of coinage had been so improved before the act of 1837 was passed, that unavoidable deviations from the prescribed weight became almost inappreciable; and the most stringent regulations were enforced to secure the utmost attainable exactness, both in weight and purity of metal.

In single coins the greatest deviation tolerated in the gold coins was half a grain in the double-eagle, eagle, or half eagle, and a quarter of a grain in the quarter eagle or gold dollar; (19 U. S. St., 398,) and in the silver coins, a grain and a half in the dollar and half dollar, and a grain in the quarter dollar, and half a grain in the dime and half dime. (15 U. S. St., 137.)

In 1849 the limit of deviation in weighing large numbers of coins on delivery by the chief coiner to the Treasurer and by the Treasurer to depositors was still further narrowed.

With these and other precautions against the emission of any piece inferior in weight or purity to the prescribed standard, it was thought safe to make the gold and silver coins of the United States legal tender in all payments according to their nominal or declared values. This was done by the act of 1837. Some regulations as to the tender, for small loans, of coins of less weight and purity have been made; but no other provision than that made in 1837, making coined money a legal tender in all payments, now exists upon the statute books.

The design of all this minuteness and strictness in the regulation of coinage is easily seen. It indicates the intention of the Legislature to give a sure guaranty to the people that the coins made current in payments contain the precise weight of gold or silver of the precise degree of purity declared by the statute. It recognizes the fact, accepted by all men throughout the world, that value is inherent in the precious metals; that gold and silver are in themselves values, and being such, and being in other respects best adapted to the purpose, are the only proper measures of value; that these values are determined by weight and purity; and that form and impress are simply certificates of value, worthy of absolute reliance only because of the known integrity and good faith of the Government which gives them.

The propositions just stated are believed to be incontestable. If they are so in fact, the inquiry concerning the legal import of the phrase "dollars payable in gold and silver coin, lawful money of the United States," may be answered without much difficulty. Every such dollar is a piece of gold or silver, certified to be of a certain weight and purity, by the form and impress given to it at the mint of the United States, and therefore declared to be legal tender in payments. Any number of such dollars is the number of grains of standard gold or silver in one dollar multiplied by the given number.

Payment of money is delivery by the debtor to the creditor of the amount due. A contract to pay a certain number of dollars in gold or silver coins is, therefore, in legal import, nothing else than an agreement to deliver a certain weight of standard gold, to be ascertained by a count of coins, each of which is certified to contain a definite proportion of that weight. It is not distinguishable, as we think, in principle, from a contract to deliver an equal weight of bullion of equal fineness. It is distinguishable, in circumstance only by the fact that the sufficiency of the amount to be tendered in payment must be ascertained, in the case of bullion, by assay and the scales, while in the case of coin it may be ascertained by count.

We cannot suppose that it was intended by the provisions of the currency acts to enforce satisfaction of either contract by the tender of depreciated currency of any description equivalent only in nominal amount to the real value of the bullion

or of the coined dollars. Our conclusion, therefore, upon this part of the case is, that the bond under consideration was in legal import precisely what it was in the understanding of the parties, a valid obligation to be satisfied by a tender of actual payment according to its terms, and not by an offer of mere nominal payment. Its intent was that the debtor should deliver to the creditor a certain weight of gold and silver of a certain fineness, ascertainable by count of coins made legal tender by statute: and this intent was lawful.

Arguments and illustrations of much force and value in support of this conclusion might be drawn from the possible case of the repeal of the legal tender laws relating to coin, and the consequent reduction of coined money to the legal condition of bullion, and also from the actual condition of partial demonetization to which gold and silver money was reduced by the introduction into circulation of the United States notes and national bank currency; but we think it unnecessary to pursue this branch of the discussion further.

Nor do we think it necessary now to examine the question whether the clauses of the currency acts making the United States notes a legal tender are warranted by the Constitution.

But we will proceed to inquire whether upon the assumption that those clauses are so warranted, and upon the further assumption that engagements to pay coined dollars may be regarded as ordinary contracts to pay money rather than as contracts to deliver certain weights of standard gold, it can be maintained that a contract to pay coined money may be satisfied by a tender of United States notes.

Is this a performance of the contract within the true intent of the acts?

It must be observed that the laws for the coinage of gold and silver have never been repealed or modified. They remain on the statute book in full force. And the emission of gold and silver coins from the mint continues; the actual coinage during the last fiscal year having exceeded, according to the report of the director of the mint, nineteen millions of dollars.

Nor have those provisions of law which make these coins a legal tender in all payments been repealed or modified.

It follows that there were two descriptions of money in use at the time the tender under consideration was made, both authorized by law, and both made legal tender in payments. The statute denomination of both descriptions was dollars; but they were essentially unlike in nature. The coined dollar was, as we have said, a piece of gold or silver of a prescribed degree of purity, weighing a prescribed number of grains. The note dollar was a promise to pay a coined dollar; but it was not a promise to pay on demand nor at any fixed time, nor was it in fact, convertible into a coined dollar. It was impossible, in the nature of things, that these two dollars should be the actual equivalents of each other, nor was there anything in the currency acts purporting to make them such. How far they were, at that time, from being actual equivalents has been already stated.

If, then, no express provision to the contrary be found in the acts of Congress, it is a just if not a necessary inference, from the fact that both descriptions of money were issued by the same government, that contracts to pay in either were equally sanctioned by law. It is, indeed, difficult to see how any question can be made on this point. Doubt concerning it can only spring from that confusion of ideas which always attends the introduction of varying and uncertain measures of value into circulation as money.

The several statutes relating to money and legal tender must be construed together. Let it be supposed then that the statutes providing for the coinage of gold and silver dollars are found among the statutes of the same Congress which enacted the laws for the fabrication and issue of note dollars, and that the coinage and note acts, respectively, make coined dollars and note dollars legal tender in all payments, as they actually do. Coined dollars are now worth more than note dollars; but it is not impossible that note dollars, actually convertible into coin at the chief commercial centres; receivable everywhere, for all public dues; and made, moreover, a legal tender, everywhere, for all debts, may become, at some points, worth more than coined dollars. What reason can be assigned now for saying that a contract to pay coined dollars must be satisfied by the tender of an equal number of note dollars, which will not be equally valid then, for saying that a contract to pay note dollars must be satisfied by the tender of an equal number of coined dollars?

It is not easy to see how difficulties of this sort can be avoided, except by the admission that the tender must be according to the terms of the contract.

But we are not left to gather the intent of these currency acts from mere comparison with the coinage acts. The currency acts themselves provide for payments in coin. Duties on imports must be paid in coin, and interest on the public debt, in the absence of other express provisions, must also be paid in coin. And it hardly requires argument to prove that these positive requirements cannot be fulfilled if contracts between individuals to pay coin dollars can be satisfied by offers to pay their nominal equivaelnt in note dollars. The merchant who is to pay duties in coin must contract for the coin which he requires; the bank which receives the coin on deposit contracts to repay coin on demand; the messenger who is sent to the bank or the custom-house contracts to pay or deliver the coin according to his instructions. These are all contracts, either express or implied, to pay coin. Is it not plain that duties cannot be paid in coin if these contracts cannot be enforced?

An instructive illustration may be derived from another provision of the same acts. It is expressly provided that all dues to the government, except for duties on imports, may be paid in United States notes. If, then, the government, needing more coin than can be collected from duties, contracts with some bank or individual for the needed amount, to be paid at a certain day, can this contract for coin be performed by the tender of an equal amount in note dollars? Assuredly it may if the note dollars are a legal tender to the government for all dues except duties on imports. And yet a construction which will support such a tender will defeat a very important intent of the act.

Another illustration, not less instructive, may be found in the contracts of the government with depositors of bullion at the mint to pay them the ascertained value of their deposits in coin. These are demands against the government other than for interest on the public debt; and the letter of the acts certainly makes United States notes payable for all demands against the government except such interest. But can any such construction of the act be maintained? Can judicial sanction be given to the proposition that the government may discharge its obligation to the depositors of bullion by tendering them a number of note dollars equal to the number of gold or silver dollars which it has contracted by law to pay?

But we need not pursue the subject further. It seems to us clear beyond controversy that the act must receive the reasonable construction, not only warranted, but required by the comparison of its provisions with the provisions of other acts, and with each other; and that upon such reasonable construction it must be held to sustain the proposition that express contracts to pay coined dollars can only be satisfied by the payment of coined dollars. They are not "*debts*" which may be satisfied by the tender of United States notes

It follows that the tender under consideration was not sufficient in law, and that the decree directing satisfaction of the mortgage was erroneous.

Some difficulty has been felt in regard to the judgments proper to be entered upon contracts for the payment of coin. The difficulty arises from the supposition that damages can be assessed only in one description of money. But the act of 1792 provides "the money of account of the United shall be expressed in dollars, dimes, cents, and mills, and that all accounts in the public offices, and all proceedings in the courts of the United States, shall be kept and had in conformity to these regulations."

This regulation is part of the first coinage act, and doubtless has reference to the coins provided for by it. But it is a general regulation, and relates to all accounts and all judicial proceedings. When, therefore, two descriptions of money are sanctioned by law, both expressed in dollars and both made current in payments, it is necessary in order to avoid ambiguity and prevent a failure of justice, to regard this regulation as applicable alike to both. When, therefore, contracts made payable in coin are sued upon, judgments may be entered for coined dollars and parts of dollars; and when contracts have been made payable in dollars generally, without specifying in what description of currency payment is to be made, judgments may be entered generally, without such specification.

We have already adopted this rule as to judgments for duties by affirming a judgment of the Circuit Court for the District of California, (Cheang Kee *vs.* U. S., 3 Wall., 320.) in favor of the United States, for thirteen hundred and eighty eight dollars and ten cents, payable in gold and silver coin, and judgments for express contracts between individuals for the payment of coin may be entered in like manner.

It results that the decree of the Court of Appeals of New York must be reversed, and the cause remanded to that court for further proceedings.

Mr. Justice DAVIS concurring in the result said:

I assent to the result which a majority of the court have arrived at, that an express contract to pay coin of the United States, made before the act of February 25, 1862, commonly called the legal tender act, is not within the clause of that act which makes treasury notes a legal tender in payments of debts; but I think it proper to guard against all possibility of misapprehension by stating that if there be any reasoning in the opinion of the majority which can be applicable to any other class of contracts, it does not receive my assent.

Mr. Justice SWAYNE said:

I concur in the conclusion announced by the Chief Justice.

My opinion proceeds entirely upon the language of the contract and the construction of the statutes.

The question of the constitutional power of Congress, in my judgment, does not arise in the case.

New York and Boston Air Line Railroad.

The City of New Haven, Conn., has voted, 2,737 to 909, to loan the credit of that city for five hundred thousand dollars on mortgage bonds of the corporation, in aid of the proposed Air Line Railroad from New York to Boston. The new road will run from New Haven to Willimantic, by way of Middletown, and connecting with the Boston, Hartford and Erie Railroad, will shorten the distance between New York and Boston, as now traversed by the Springfield route, twenty-six miles, or over an hour in time. The preliminary surveys have been made by the engineer, General Edward W. Serrell, and the most of the line has been laid out.

☞ The city council of Bangor has passed a resolve to aid the Winterport Railroad, by loaning its credit to an amount not to exceed $15,000 per mile.

☞ Conway has voted to take $40,000 in stock of the Williamsburg and Shelburne Falls Railroad, and individuals will endeavor to raise it to $100,000.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

American Railroad Journal.

Saturday, March 20, 1869.

Stock Exchange and Money Market.

The Money market has been more active, since our last. The demand from speculative sources, particularly from the Stock and Gold operators, has been quite urgent, especially during the latter half of the week under review; and the call loan figures have been ranging from 7 per cent. in currency to the same price in gold, the latter an exceptional quotation. The Government houses have experienced no great difficulty in providing for their wants at the legal rate, all through the week. The leading lenders have been discriminating against Stocks, and in favor of the Public Funds, in placing balances, in a temporary form. The mercantile call for aid has been rather more active, and the rates on strictly prime to good business paper has been quoted at from 7½@10 per cent. per annum. The city banks gained nearly half a million of legal tender notes while reporting a further loss of deposits, and of specie the latter chiefly through the influx of coin, in the form of customs, into the Sub-Treasury. The U. S. Sub-Treasurer had his currency balances increased some four millions of dollars on Tuesday, by transfers from Washington, making his aggregate cash (coin and currency) balances at the close of business on that day $91,631,258 as against $83,286,391 on the preceding Tuesday, showing an increase of $8,344,867 for the were. The city bank exchanges on Wednesday week $110,557,192, and the resulting balances $2,390,595.

The specie reserve of the city banks is now $17,858,671, against $19,744,701 same time last year The city bank deposits are now $182,392,458. against $201,188,470 week ending March 14, 1868 The legal tender reserve amounts to $49,639,625, against $54,738,866 same time last year. The circulation now stands at $34,690,445, against $24,213,381 same time last year. The loans are now $261,669,695, against $266,816,084 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $104,862,927 a day, against a daily average of $121,191,355 the preceding week, and $105,563,204 the week ending with Feb. 24, 1869. The current week's exchanges average about $107,721,000 a day. The city banks, last week, reported a further loss of $2,127,963 of specie, and $211,979 of deposits, with a gain of $494,256 of legal tender notes. They increased their loans, $420,188; and their circulation, $414,560.

National Bank notes to the amount of $145,600 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $313,200,936, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $13,299,013, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,901,923. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,667,900; and for the public deposits, $32,966 350—making a total of $375,634,250. The Treasury Department last week redeemed and destroyed $759,600 of worn and mutilated fractional currency, and issued $350,700 of new. The outstanding amount of fractional currency on the 1st of March, 1869, was $36,781,548, against $35,511,127, on Feb. 1, and $34,216,716 on the 1st of January.

The U. S. Sub-Treasury receipts, week ending with March 13, were $11,113 388 including $2,569,769 from customs duties; payments, $10,250,601, including $507,185 of coin interest; balance at the close of the week, $87,787,075, against $86,924,288, at the close of the preceding week, showing an increase of $862 787. The business of the Office during the first two business days of the current week, was as follows: On Monday, receipts, $1,467,569, including $469,000 from customs; payments, $971,163 including $52,061 of coin interest. On Tuesday, receipts, $4,478,932 including $678,000 from customs and, payment $1,131,155 including $75,300 of coin interest. The balance at the close of business on Tuesday stood at $91,631,258, against $83,286,391 a week previous; and $87,930,325, on Feb. 24, 1869. The aggregate receipts of the Office in February were $31,657,457, including $12,179,726 from customs, aggregate payments, $26,789,612, including $1,923,545 of coin interest.

The outstanding amount of coin certificates on the 1st of March, 1869, was $28,775,560, agains

$32,659,520 on Feb. 1, and $27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $429,000, and retired $2,482,768 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during February, reached $1,634,240.

Government revenues have been on a moderate scale, since our last. The excises, last week, yielded about 3½ millions; customs at the port of New York, $2,569,769, and at the outports about $850,000 (in coin) more, making the grand total income for the week equal to about $8,059,500 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 103 millions, according to the latest Washington advices.

Gold has been in quite active request, chiefly on speculative account, most of the week, within a range of from 130¾@132⅜, leaving off on Wednesday to 131⅜. There have been more frequent though less violent fluctuations, in the price, influenced by the varying London quotations for U. S. 5-20s of 1862, which have been as high as 83⅞, and as low as 82¾, leaving off on Wednesday at 83⅛ on a firm market. The customs inquiry for Gold has been active. The export demand, however, has been light.

The Gold Exchange Bank clearances on Wednesday, were $63,120,000, and the resulting balances $1,723,271 in coin, and $2,428,208 in currency.

The average amounts of the Gold Exchange Bank loans and discounts last week was $1,287,534, average amount of specie $461,376, average amount of deposits $1,203,588.

The customs demand for Gold last week, averaged $428,295 a day; thus far, this week, it has averaged $574,500 a day, or equal to a weekly aggregate of $3,447,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $138,925, and since Jan. $2,236,377 against $1,106,837 same time in 1868. The receipts from California, last week, were $354,292. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $87,628,769, against $78,817,248 same time in the preceding fiscal year. At San Francisco, from Jan. 1, to Feb., 24th 1869, $939,069, against $1,110,265 same time last year.

The total receipts of California gold at this port, since July 1, 1868, have been $16,122,166, against $23,573,010 same time in fiscal year 1867–'68, showing a decrease in the current fiscal year, of $7,450,844. The exports of specie, from this port, last week, were $304,228, against $1,096,916 same week last year; total, since July 1, 1868, $28,996,583, against $41,496,246 in 1867–'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $507,185; since July 1, 1868, $66,149,377, against $53,952,600 same time in 1867–'68. The specie exports from San Francisco, from Jan. 1, to Feb. 20th, 1869, were $5,576,802, against $5,470,839 same time in 1868.

Foreign Exchange has been less active and without remarkable changes in prices, closing rather weak. Bankers' prime sixty day bills on London closed on Wednesday at 108½@108⅞, and on Paris to 5.22½@5.17½; sight bills on London to 109@109⅜, and on Paris to 5.16½c. @5.15. The offering of produce bills has been again quite moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,676,378, against $4,052,946 same week last year; total, since July 1, 1868, $114,309,803, against $128,801,828 same time in preceding fiscal year of 1867–'68.

Government securities have been more variable in price; but, on the whole, quite strong, with a very moderate offering, most of the week, of both classes of bonds. There has been less activity in the earlier loans. The later issues, especially of the Five Twenties, and the U. S currency six per cents (Pacific Railroad aid) bonds, have been in lively request. The general market closed strong on Wednesday with an upward tendency.

U. S. sixes of 1881 closed here on Wednesday at 116¼@116¾; U. S. Five-twenties of 1862, 119½@119⅝; U. S. Five twenties of 1864 at 114⅞@115; U. S. Five-twenties of 1865 at 117⅜@117⅝; U. S. Five-twenties of 1865, consolidated, 118⅜@118½; U. S. Five-twenties of 1867, 113¼@113⅜; U. S. Five-twenties of 1868, 113⅛@118⅜; U. S. Ten-forties at 105½@105⅝; U. S. Six per cent. currency bonds, 103⅜@103½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Mar. 3.	Mar. 10.	Mar. 17.
Consols	93	92⅞	93⅛
U. S. 5-20's of 1862	81½	82½	83½
Erie	24¾	24¼	24¾
Ill. Central	97	97	96¾

Railway and miscellaneous stocks have been quite active, but unusually irregular in price, closing weak and feverish.

Business in Produce has been more active, since our last, and prices of the leading articles closed in favor of sellers, particularly for Flour, Wheat, Pork, Lard, and Cotton. Middling upland cotton closed buoyantly on Wednesday at 28½ cts. per lb. The stock of cotton now here is estimated at about 120,000 bales. The receipts at the port this week, have averaged about 3,000 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 1,781,000 bales, against 1,779,000 bales same time in 1867–'8; exports, same time 907,000 bales, against 1,124,000 bales same time in 1867–'8; stock on hand at latest dates, 390,000 bales, against 331,000 bales same date 1868. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 4,158 pkgs., against 2,419 pkgs., same time last year. From Boston, 3,006 pkgs., against 2,276 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been in moderate demand at from 10@17c., per lb.; week's receipts, 5,960. Milch cows at from $40 @$125, each, receipts, 76. Veal calves at from 9½@13½c. per lb.; receipts, 56. Sheep and lambs at from 6@9½c., per lb.; receipts, 17,677. Swine at from 11@11½c. per lb.,; receipts, 12,180. Foreign merchandise has been in moderate request, and generally held with more confined. The total imports of foreign dry goods, last week, were $3,036,604, and the total amount marketed $2,728,970. The value of foreign merchandise imported last week, was $3,985,001—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $7,021,605, against $4,563,354 same week last year; total since July 1, 1868, $181,049,304, against $159,662,868 in 1867–'8. The wool trade of Thursday, March 11, was well attended, and passed off with moderate success. The freight market has shown rather more steadiness. The engagements have been on a moderate scale. For Liverpool we quote flour at 1s. 3d. by sail, and 1s. 3d.@1s. 6d. by steamer, per bbl.; grain at 2½d. by sail, and 3d.@3½d. by steamer, per bushel; cotton at $\frac{3}{32}$@⅛d. by sail, and $\frac{1}{16}$d.@$\frac{5}{16}$ by steamer, per lb.; and heavy goods 12s. 6d.@20s. by sail, and 10s.@30s. by steamer, per ton. Total number of vessels in port on Wednesday, 421.

The New York exports, exclusive of specie, for the week ending Mar. 16, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$4,052,946	$2,676,378
Prev. reported	32,467.174	28,901,259
Since January 1	$36,520,120	$31,577,637

The imports for the week ending March 13, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$2,031,293	$3,036,604
Gen. merchandise	2,532,061	3,985,001
Total for the week	$4,563,354	$7,021,605
Previously reported	38,190,554	48,614,304
Since January 1	$42,753,908	$65,635,909

The balance in the Sub-Treasury on Wednesday was $92,078,876 30.

☞ THE FIRST MORTGAGE BONDS of the ROCKFORD, ROCK ISLAND AND ST. LOUIS RAILROAD COMPANY, pay both the Principal and Seven per Cent. Interest—1st Feb. and 1st Aug.—in GOLD COIN, Free of Government Tax.

A limited amount only of these Bonds may be had at par and accrued interest in currency, of H. H. BOODY, Treasurer, 12 Wall street, or of HENRY CLEWS & CO., Bankers, 32 Wall street.

Union Pacific Railroad.

The President has sent to the House of Representatives a communication from the Government Directors of the Union Pacific Railroad in regard to the late election of Directors. They state the whole number of votes thrown to be 207,430, of which number 205,840 were given for the names annexed, and no other votes could be given that would have changed the result.

The Government Directors ask that Congress shall take some action to relieve the Directors elected from the injunction served upon them by the Fisk party, in order that the interests of the United States may be protected, and to keep the road uninterrupted.

It is signed by the Government Directors Jas. Brooks of New York; J. L. Williams, of Indiana; D. L. Harris of Massachusetts: J. D. Webster, of Illinois; H. Price of Iowa, and they report the following as the Directors elected by the vote given above: Oliver Ames, of Massachusetts; Thomas C. Durant, of New York; John J. Cisco, of New York: Sidney Dillion of New York; C. S. Bushnell, of Connecticut; Benjamin E. Bates, of Massachusetts; Cyrus H. McCormick, of New York; John Duff, of Massachusetts; Josiah Bardwell, of Massachusetts; John B. Alley, of Massachusetts; F. Gordon Dexter, of Massachusetts; Charles A. Lombard, of Massachusetts; Wm. H. Macy, of New York; G. M. Dodge, of Iowa; John F. Tracey, of Illinois.

Improvements in Making Iron.

The following letter of Mr. A. S. Hewitt to H. McAllister, Jr. Esq., Secretary of the American Iron and Steel Association, Philadelphia, published in the *Bulletin* of the Association, March 3, will be read with interest:

NEW YORK, February 26th, 1869.

H. MCALLISTER, JR., ESQ.,

DEAR SIR:—I think that the Trade will be interested in the following extract from a letter which I have just received from Mr. Wm. Barrett the able manager of the Norton Furnace, near Stockton in Yorkshire England, using the Cleveland ores. The furnace is the one described in my report on the "Iron and Steel of the Exposition of 1867" and the particulars of size, hot blast, etc., are there given in detail:

"I have made, during the year 1868, from one furnace 28,237 tons of pig iron consuming 25,737 tons of coke. The weekly yield has now greatly increased. From 12th of September to 26th of December inclusive, I made an average 530 tons weekly. Since then I have rather increased; the make of the week ending January 23d, was 564 tons and of the week ending January 30th 597 tons all gray iron; in fact, we have not made any but gray iron during all the year."

I think that the above results go far to confirm my prediction, that with high furnaces and hot blast we shall make pig iron in this country with a ton of anthracite coal to the ton of pig iron. Already at Port Henry on Lake Champlain, gray iron is being made regularly with 1 3-20 tons, in a furnace 65 feet high, working with a closed top and blast heated nominally to 1000 degrees.

The "coming" furnace will in all probability be 100 feet high with blast heated as high as the pipes will stand without injury, and with a consumption of our anthracite, the best blast furnace fuel in the world, not exceeding one ton. I take this occasion also to state that the Westman Roasting Kiln, mentioned in my report, is now working with entire success; and that Mr. Sjoberg, the Sweedish Engineer, who came out to erect it, is now prepared to build other kilns.

Faithfully yours,

ABRAM S. HEWITT.

☞ The South Side (Va.) Railroad Company has lately issued about $2,000,000 of new bonds. Of this amount $1,200,000 will be applied to the redemption of the old bonds of the company. The balance will be expended in ballasting the track and relaying it with heavy rail. The work has already been commenced, and twelve miles of new iron laid down on that part of the road next to Lynchburg.

☞ The work preparatory to bringing the tracks of the Milwaukee and St. Paul and St. Paul and Sioux City Railroads across the river at St. Paul and down the levee to the Pacific depot, is progressing rapidly.

☞ The towns of Plainfield, Groton and Montpelier have voted $143,000 to the Montpelier and Welles River Railroad, and Montpelier by private subscription will add $50,000 more. The road is regarded as secure.

From the Montreal Trade Review.

Wooden Rails.

We have received a short pamphlet, suggesting a new system of wooden rail, written by Mr. JOHN FOSTER, C. E., of this city.

The novelty of the system consists in making the track or rail, not of rails longitudinally, but of short pieces of hardwood lain with the grain upright instead of horizontal, and firmly bolted between two longitudinal pieces resting on sleepers.

Mr. Foster calculates that a track, exclusive of grading, could be constructed in this way at a total cost of $1.80 per yard, or $3,168 per mile, on which locomotives weighing 12 to 14 tons, could be used to run at a maximum of 15 miles an hour.

We give his calculations, based on being able to obtain red pine, cut and sawn into longitudinal rectangular pieces at 18 cents per cubic foot, and the hardwood into 3½ inch planks at 25 cents per cubic foot.

COST OF ONE COMPLETE LENGTH OF SEVEN YARDS OF PERMANENT WAY.

Red pine, 22 cubic feet at 18c	$3.96
Hardwood, 8 cubic feet at 25c	2.00
Wrought iron bolts, 28 lbs. at 5s	1.40
24 wooden pins at 2c	48
Labor in preparing blocks, grooving longitudinals, assembling, wedging and bolting the same together, and shaping and finishing the upper surface of the two rails under a circular plane, at 63c. per rail	1.26
Superintendence and machinery	63
One cross tie at joint	25
	$9.98
Say	10.00
25 per cent. contractors' profits and contingencies	2.50
For seven yards	$12.50

Or $1.80 per yard.

We think this estimate high for the wood and for superintendence, but as an offset, we are quite sure that one cross tie in 21 feet would be quite insufficient to bind the track and maintain the gauge of the road. One in every 7 feet would be none too many.

The rails laid in the way suggested, with the grain perpendicular to the radius of the wheels passing over them, would be capable of wearing under moderate traffic an almost unlimited time, we have no doubt. Any necessary renewals on account of the rotting of the wood could be made with great economy and very little trouble. We imagine there would be no comparison in point of durability between rails made in this way and the ordinary maple rail, as proposed to be used in the various wooden railways shortly to be constructed: and if the difference in cost of construction be not very great, we think it might be advantageous to secure the better rail, which would still be very much less costly than if of iron.

Mr. Foster considers this system of rails as peculiarly adapted to a line carried on trussels. He says: "The addition would merely be the trussel work necessary for carrying the road, as the road, that is the rail, would require no further bracing the diagonals which would be wanted to steady the line longitudinally." The following is his estimate of the road complete, including rails, mber supports, and fixing, ready for traffic on trussel system:

	Per yard.
For a line with rail raised 5 feet high	$5.36
" " " 10 "	9.00
" " " 15 "	12.28

He considers "the average height of 5 feet for the rail to be abundantly sufficient for forming an estimate for a line in this country, which is equal to embankment containing 13 cubic yards per yard run; the 10 and 15 feet heights would only be required for short lengths, and on the other hand for considerable distances the rail would be laid on the natural level of the soil or at least only raised some inches to admit of ditches and drainage, anything above 18 inches to be carried on timber, as of course the idea is only to use timber where embankments would exist."

Commerce of New York.

The foreign imports at New York for the month of February, 1868 and 1869, are officially stated as follows:

	1868.	1869.
Entered for consumpt'n.	$10,386,053	$14,205,473
Do. for warehousing	9,297,632	8,548,655
Free goods	718,777	1,190,397
Specie and bullion	415,875	1,882,755
Total entered at port	$20,818,337	$25,827,280
Withdrawn fr. wareh'use	9,049,389	9,880,388

The foreign imports at New York for the two months from January 1, were:

	1868.	1869.
Entered for consumpt'n.	$18,241,883	$24,904,228
Do. for warehousing	15,945,503	17,927,874
Free goods	1,497,073	2,484,174
Specie and bullion	552,449	2,104,033
Total entered at port	$36,236,908	$48,369,809
Withdrawn fr. wareh'se.	15,780,963	18,887,018

The foreign imports at New York for the eight months of the fiscal year have been as follows:

Six mos. ending	1868.	1869.
Jan. 1	$116,072,182	$123,552,971
January	15,418,571	22,542,529
February	20,818,337	25,827,280
Total for 8 months	$152,309,090	$171,922,780

The duties received at New York for eight months ending with February, were:

Six mos. ending	1868.	1869.
Jan. 1	$54,731,301 44	$57,845,963 97
Jan.	7,133,428 42	9,615,894 43
Feb	9,696,752 39	11,996,628 46
Total 8 months	$71,561,482 25	$79,458,486 86

The foreign imports at New York in February since 1846 compare as follows:

1846	$4,749,091	1858	$9,209,043
1847	7,409,637	1859	18,848,870
1848	9,757,900	1860	19,356,879
1849	8,564,226	1861	16,341,707
1850	8,829,821	1862	13,872,140
1851	12,054,403	1863	12,027,846
1852	9,249,577	1864	21,643,937
1853	17,481,920	1865	11,473,668
1854	11,095,580	1866	30,692,557
1855	12,081,482	1867	25,630,781
1856	16,036,283	1868	20,818,337
1857	25,524,492	1869	25,827,280

The exports from New York to foreign ports in the month of February, were:

	1868.	1869.
Domestic produce	$13,543,674	$10,507,041
Foreign free goods	86,387	4,941
Do. dutiable	431,528	312,880
Specie and bullion	4,203,825	3,232,083
Total exports	$18,225,414	$14,056,895
Do. exclusive of specie.	14,021,589	10,824,812

The exports from New York to foreign ports for two months from January 1, were:

	1868.	1869.
Domestic produce	$27,310,170	$23,179,865
Foreign free goods	49,067	12,906
Do. dutiable	1,110,679	785,058
Specie and bullion	11,553,650	6,446,463
Total exports	$40,023,566	$30,424,292
Do. exclusive of specie	28,469,916	23,977,829

The exports (exclusive of specie) from New York to foreign ports for eight months ending with February, have been:

Six months ending January 1	1868.	1869.
	$91,143,385	$80,651,068
January	14,448,327	13,153,017
February	14,021,589	10,824,812
Total produce	$119,613,301	$104,628,897
Add specie	38,759,936	28,184,462
Total exports	$158,373,237	$132,813,359

The exports from New York to foreign ports in February, since 1851, compare as follows:

	Specie.	Prod. & Mdse.
1851	$1,097,689	$2,932,283
1852	3,551,543	3,769,147
1853	1,121,020	3,559,327
1854	579,724	5,958,097
1855	2,123,708	4,565,091
1856	1,204,343	5,606,209
1857	1,831,726	5,938,786
1858	3,746,920	4,173,677
1859	2,371,427	3,735,633
1860	977,009	6,675,870
1861	1,102,926	10,804,307
1862	3,776,919	10,335,924
1863	3,965,664	18,434,484
1864	3,015 367	14,196,409
1865	1,023,201	15,750,807
1866	1,807,090	17,196 507
1867	2,124,461	15,452,500
1868	4,203,825	14,021,589
1869	3,232,083	10,824,812

From Herspath's Railway Journal.

Railway Economy.—Permanent Way.

In our previous articles we have traced the development of the permanent way from the 30 lb. fish-bellied rail, first employed on the Liverpool and Manchester Railway in 1830, down to the 80 and 90 lbs. rails of the present time, and we have given a general description of the methods now in use for securing the rails in their places, and the various kinds of substructure employed for affording the rails support. In fulfilling this task we do not pretend to have described every minute variation in use, but we have brought under notice those systems which are most general, and which from their extensive adoption appear to possess the greatest merits.

In order to examine the comparative advantages and capabilities of these different systems it will be desirable to go back to first principles. The problem then to be solved in constructing a permanent way is to provide a pair of rails for the wheels of the rolling stock to run upon, which will sustain the passing weights without any appreciable deflection, and yet without too much rigidity, they should be true, smooth, and even, and carefully adjusted to the proper gauge. Also the joints should be so strong and perfect as to be imperceptible when traveled over; and lastly, all this should be provided and maintained in perfect order at the least possible cost.

To effect this we require—first, the rail; secondly, the substructure or support interposed between it and the ballast; and thirdly, the means of firmly uniting the two.

The form of the rail must depend upon the method intended to be employed in securing it to the sleepers, and then the question naturally arises, is it best to employ a double-headed rail with chairs, or a rail that can be attached direct to the sleepers?

It might be said this question is answered by the results of experience, for the double headed rail with chairs is used to probably ten times the extent of all the other plans put together; and no doubt this is a very striking fact, but then another question may be asked, has not the double-headed rail been adopted so extensively, partly from an erroneous impression as to the advantages, which it required years of experience to rectify; and secondly, from the chair and cross-sleeper system having been the first in the field, and founded by the great originator of railways, and as such adopted by numbers of his followers who accepted it as right without troubling themselves to investigate the principles upon which it was based?

Another question which arises collaterally with and is a resultant of the employment of chairs as a fastening is, which is the best and proper method to support the rail, at intervals or continuously? for if chairs be employed we at once commit ourselves to a system of intermediate supports, and we require as a consequence a rail sufficiently strong to sustain the passing weights without deflecting beyond the practical limit. It is therefore evident that a rail so supported at intervals, say of 3 feet, will require greater strength than one supported along its entire length; greater strength means greater weight, the material being the same in both cases, and greater weight involves greater first cost not only in the rail itself but in the additional cost of the chairs to hold it.

It would therefore appear that as regards supporting the weight of the rolling load the chair system is not the best that can be employed; in fact so far as this point is concerned it seems unwise not to utilize the continuous support afforded by the ballast by some kind of longitudinal sleeper directly under the whole length of the rail instead of employing a greater length of sleeper by about one-third placed crossways, which one-third is ineffective as bearing surface.

Take for instance a line as now ordinarily laid down with sleepers say 10 in. by 5 in. and 9 feet long, placed 3 feet apart. Certainly not more than 3 feet at each end of the sleepers can be reckoned as effective bearing surface, so that if 3 feet were cut away from each sleeper partly at the ends and partly in the middle the effective bearing surface would not be lessened, and so far as supporting the weight it would be quite immaterial in what position the sleepers were placed.

If, then, instead of being placed crossways they were placed longitudinally, with the reduced length they would exactly correspond to the length of the rails, that is, each sleeper 6 feet long would occupy the two spaces between the chairs 3 feet apart, and the 3 feet saved off each sleeper would more than pay for the material and fastenings for a cross transome to maintain the gauge and cant of the rails every 9 feet or even 6 feet if required.

Supposing this arrangement carried out, and the rails still mounted on chairs, we have in effect a precisely similar road to the ordinary cross sleeper road with this simple difference—that the direction in which the sleepers are placed is changed.

Now if such a road was made, the first thing that would strike anyone having a second idea, would be the absurdity of placing a longitudinal sleeper under the rail, and then mounting it on points 3 feet apart, instead of allowing it to rest upon and receive the support of the sleeper all along, the more so as in doing this the additional expense of providing the chairs is incurred.

Taking the chairs as weighing 28lb. each, this at £5 per ton would amount to 1s. 8d. each chair; if the rails were 84lb. per yard, this at £8 per ton would be 6s. for each yard, so that the cost of the chairs is rather more than one-fifth that of the rail. If, then, we do away with the chairs, we might for the same cost have a rail one-fifth heavier or rather over 100lb. per yard, and proportionally stronger, but when the chairs were taken away and the rail came to bear on the sleepers all along, in addition to its own vertical strength, it would have the vertical strength of the sleeper added to it. Let us see, supposing this were done, what this additional strength would amount to.

A piece of good fir timber 10in. by 5, placed on supports 3 feet apart, the same as the rail, would require about 20 tons to break it flat ways; now this would be about the weight that would permanently bind a good 84 lb. iron rail the same distance between the supports, so that by adding the strength of the sleeper to that of the rail, by allowing it to rest upon it all along, instead of supporting it every 3 feet, we just double the strength of the road, and if we add to this the additional strength gained by substituting a 100lb. for the 84 lb. rail, which we may fairly estimate at 4 tons, we shall have by this arrangement for the same cost a permanent way possessing the same bearing surface on the ballast, but having theoretically a strength of 44 tons in place of 20 tons. In practice, however, the whole of this surplus could not be reckoned on. We have calculated the strength of the timber on the supposition that it is sound and of good quality, but being buried in the ballast would, after a time, deteriorate it.

Again, the form that it would be necessary to give the rail in order to provide sufficient surface to rest on the sleeper would not be quite so favorable to its vertical strength, weight for weight, as the double-headed rail, but taking both these things into account there would still be a large margin in the shape of a money value, which might go either to a reduction of the first cost or be left in the permanent way, in which case it would eventually show itself in a reduction of the cost of maintenance. If it were determined to save the first cost, a rail of about 60lb. might be used, thus saving 80lb. on the two rails per yard, or nearly 63 tons per mile, which at £8 per ton would be just £500 saving per single mile for a road with the same bearing surface on the ballast, and certainly stronger than with the 84lb. rail mounted on chairs. Of course this arrangement involves an altered section of rail, so as to admit of its being attached to the sleepers direct. It might be a bridge rail or a foot rail; we should prefer the latter, as it affords a better chance of fishing the joints. In adopting such a rail it is assumed that the double-headed rail is not capable of being reversed, but this may still be questioned by some; if so, we can only point to the actual results of practice, which fully support this assumption.

We now come to another point, viz., the amount of bearing on the sleepers. In the chair system we have one chair with a base, say 6in. by 12in. =60 sq. in. per yard run to each rail; but with the other plan, taking the foot of the rail to be 5 in. wide, we have for every yard 5 in. by 36 in.=180 sq. in. per yard run, or just three times the amount. This is a question of some importance, for with the existing heavy traffic it is found that the sleepers are very soon crushed under the base of the chairs, and become worn out and useless long before they show signs of natural decay; so that now that the sleepers are destroyed by being thus knocked to pieces, the practice of creosoting is being abandoned, for it is argued it is useless to prolong the natural life of the sleeper if it is to be thus subjected to a premature death by violence. Now as this is occasioned solely by insufficiency of the bearing the chairs take on the sleeper, it would appear a better remedy to take means to increase this to a sufficient extent than to thus mercilessly abandon the sleepers to their fate, and by so doing increase the cost of maintenance and renewals.

☞ The earnings of the Milwaukee division of the Chicago and Northwestern Railroad in February were $78,539 57, an increase over the same month last year of $2,715 43, or 3.58 per cent. From Jan., 1868 to Feb. 28th, 1869, the total earnings of the road were $840,929 67, an increase of $53,555 82, or 6.80 per cent. over the same period from 1867 to 1868.

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of February, as compared with the same period of the year 1868:

	1869.	1868.
From freight	$398,769 38	$427,311 22
" passengers	161,851 61	158,253 94
" express matter	9,468 00	7,987 50
" mail	7,825 00	7,825 00
" rent of railway	7,083 33	7,083 33
" miscellaneous	1,000 00	855 01
Total	$585,997 32	$601,316 00
Expenses	361,381 32	389,928 29
Net earnings	$224,616 00	$214,387 71

This shows a decrease in earnings of $18,318 68; with a decrease in expenses of $28,546 97—making the increase in net earnings, $10,228 29.

The earnings and expenses, from January 1 to February 28, compare as follows:

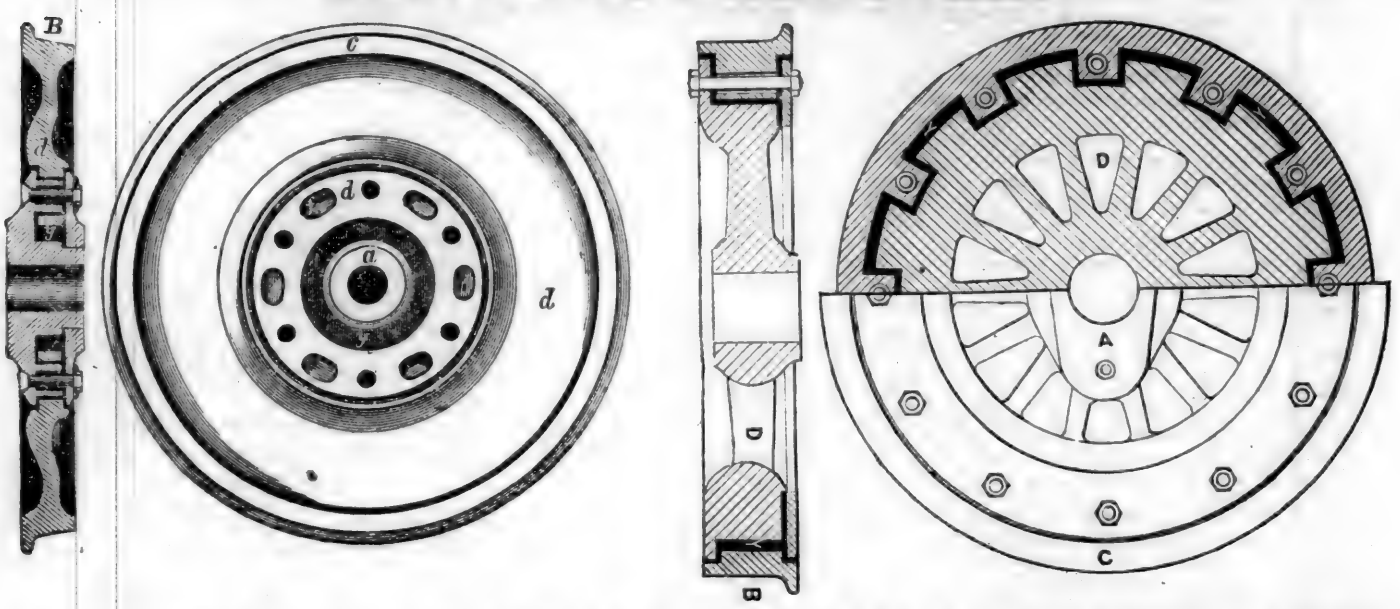
	1869.	1868.
Earnings	$1,211,718 81	$1,109,821 16
Expenses	845,197 45	788,844 56
Net earnings	$366,521 36	$320,976 60

This shows an increase in earnings of $101,897 65; with an increase in expenses of $56 352 89—making the increase in net earnings, $45,544 76.

Finances of Philadelphia.

In the following table is given the entire revenue of the city for the year 1868:

Cash balance, Jan. 1, 1868		$1,082 789 18
Receipts from departments		1,372 828 84
Temporary loans		835,000 00
Defense loans, Nos 3 & 4	$205,100 00	
School loan, No. 2	145,800 00	
City Loan, No. 34	171 500 00	
$325,000 loan	180,000 00	
Culvert loan, No. 2	18,200 00	
		720,600 00
Taxes of 1862	$357 51	
" 1863	1,022 52	
" 1864	1,557 62	
" 1865	8,798 46	
" 1866	56,940 46	
" 1867	345,969 86	
		409,646 43
" 1868		4,751,342 45
State and militia taxes		48,089 77
Total		$9,220,296 17



The following is a general summary of the total funded debt of the city on January 1, 1869:

Loans not matured		$36,503 740
Loans overdue and yet outstanding	$400,413	
Deduct this amount paid in excess of amounts reported at consolidation	166,417	
		233,996
Total funded debt		$36,737,736

☞ The Delaware, Lackawanna and Western, and Morris and Essex Railroad Companies, have completed their contracts for the grading and completion of their "cut off" track, which will bring the road through Paterson along the foot of Garret mountain. The work is to be completed by the 15th of March 1870.

☞ The contracts have been signed for the construction of the "Hackensack and New York Railroad Extension Company," a project mainly supported by property owners, who take this means of bringing their property into market. It will run from Hackensack northward to the Piermont branch of the Erie Railway.

Elastic Car and Locomotive Wheels.

The above cuts represent a side view and cross section of RADDIN'S Patent Elastic Car and Locomotive Wheels, which are attracting the attention of railroad men, and which are soon destined to supercede all other wheels in use.

Mr. John Raddin, of Lynn, Mass., the inventor, was awarded a silver medal at the Mechanic's Fair in Boston in Sept., 1865, upon the exhibition of his wheels, and the highest premium at the great Fair in New York in October, 1867.

This invention can be applied to any car or locomotive, at small expense, with so little trouble, and is so great an improvement in the strength, durability and quiet of the running gear, enhancing so much the pleasure and security of riding, as to be absolutely invaluable.

It will be readily seen that these wheels being packed with rubber prevents iron from touching iron, by giving radial movement for the expansion and contraction of the tires without the liability of their being broken by heat or cold, or becoming loose as is the case with those now in use. The rubber packing also causes a motion on curves essentially as easy as on a direct course.

The hub, (A) web and tread of the wheel (B) are separate castings, a ring of india-rubber (*y*) being interposed between.

The holes (*f*) in the web (*d*) receiving the projections on the hub and bolts, being larger than the projections, give a slight play of about an eighth of an inch, so that the rubber (*y*) being tightly compressed in the annular space can only change its figure when the load comes upon it, as before provided, by giving play to the hub and web. Thus the entire jar of the wheel is absorbed by the rubber before it reaches the hub and axle, and the relief to the wheels, from the sharp concussions and jolts upon solid unyielding obstructions, gives a saving of at least fifty per cent. in the wear of cars and rails.

A saving of $150 on each car is claimed in repairs, it not being necessary to resort to a machine shop to replace broken wheels, and no extraordinary power being called for in repairing of broken wheels, all that is required being the unbolting of the old web and tread and the replacing on the spot by new ones, which may be taken along in a freight car and adjusted at any point on the road from New York to San Francisco.

The following official reports showing the results of extended trials of Raddin's Elastic Car Wheel, are submitted to the attention of Railway Managers:

EASTERN RAILROAD COMPANY,
East Boston, Nov. 10, 1868.

JOHN RADDIN, ESQ.—Dear Sir—In answer to your inquiries as to the working of the Elastic Car Wheels, which you requested to be tested upon the Eastern Railroad, I would say that the eight wheels you sent for trial were under an iron car weighing 22 tons, about fifteen months since; were run about nine months; we then had them taken apart, and found the rubber to be in a perfect state, and although the bolts were not headed, not one of the nuts had started a particle. Since then we have placed the wheels under one of our best passenger cars, which is now running in our regular trains. We estimate the wheels have run 40,000 miles, and the wear of the tread is very slight compared with the common wheels running the same distance. The inference is, that an equal amount of saving would be had in the rails and machinery. We have examined your device for preventing any strain upon the bolts holding the flange and hub in place, and preventing any movement of the rubber packing when the brakes are applied, and think well of it.

Yours truly,
JOHN THOMPSON, M. M.

I have to say that the above statement is correct, and I see no reason why the wheels should not come into general use.

J. PRESCOTT, Sup't E. R. R.

These wheels have been in successful operation on the Eastern Railroad for *twenty* months, and have been so thoroughly successful that orders have been received from ten other railroads.

The able and efficient Superintendent of the Eastern Railroad, J. Prescott, Esq., in a recent letter, says of these wheels:

"We put a set of them under one of our passenger cars on the 15th June, 1867, which have since run over 50,000 miles, and to all appearances are in as good condition as when first put in use. About six months ago, we took two of the wheels apart, and examined the rubbers, which seemed to be as perfect as when first put in. They were then put together, and have been since, and are still running without repairs. As to liability to accident, I can say that these wheels have run through one very severe winter, and so ar through the present (letter dated January 22, 1869,) without accident, and I think them less liable to break than the ordinary wheels, from the fact of their being made in three separate pieces. I will not undertake to state any percentage of saving, but should your new pattern be as successful as the Elastic Frog we have in use, the saving must be very great, and would probably reach several hundred per cent. I think well of the Elastic Wheel, and that it is what railroads need very much."

The new pattern referred to above, is a very great improvement over the wheels that have been on trial by the Eastern Railroad, and may be seen at the Union Car Wheel Co., Jersey City, N. J. A stock company is about being organized for the manufacture and introduction of these wheels. Rights to manufacture on royalty, and orders for car wheels may be addressed to John Raddin, Western Hotel, N. Y.

Atlantic and Lake Ontario Railroad.

The recent combination of the railroad lines between the seaboard and Lake Ontario, namely, the Morris and Essex, the Delaware, Lackawanna and Western, the Syracuse and Binghamton and the Oswego and Syracuse, for the purpose of convenience, is termed the Atlantic and Lake Ontario route. The capital stock and funded and floating debt of these lines amounts to $34,304,550. Their equipment is as follows: Locomotives, 171; passenger and mail cars 124; freight cars, 1,480; coal cars, 6,772. The gauge of the Syracuse and Binghamton, and Delaware, Lackawanna and Western Railroads is six feet. That of the Oswego and Syracuse is 4 feet 8½ inches, but one year ago a third rail was laid (at a cost of $251,450) to accommodate the wide gauge cars.

☞ The Washington *Intelligencer* says that Mr. Wilson, Superintendent of Transportation on the Baltimore and Ohio Railway, has given orders for the thorough completion, by the first of July next, of the four or five miles of track of the Point of Rocks branch in the District. It is stated that the track is being graded all along the proposed line of the railway to the Point of Rocks.

☞ The lease of the Columbus and Xenia Railroad to the Little Miami Railroad Company has been ratified. It guarantees to the stockholders of the Columbus and Xenia Road dividends of 7 per cent. annually, and 8 per cent. upon the condition that the entire management and earnings in excess of 8 per cent. be surrendered to the Little Miami Road.

☞ The New Jersey Western Railroad has completed an arrangment with the Erie whereby the trains of the former can be run over the Erie tracks to Jersey City until the Western Railroad rails are laid to Hoboken, as projected. It is expected this road will be running trains from Pompton to Long Dock, *via* the Erie road, by October.

☞ The Governor of Arkansas has sent a message to the Assembly notifying that body that the Board of Commissioners had awarded State aid to the Memphis and Little Rock, and other railroads, which were left out in the omnibus bill.

☞ A bill is now before the New Jersey Legislature to authorize an increase in the capital stock of the Camden and Amboy Railroad and Delaware and Raritan Canal each $3,000,000, and the New Jersey Railroad $3 750,000.

☞ Work has been commenced on the Mansfield and Framington Railroad. It is expected that trains will be running from Mansfield to Foxborough by the 4th of July.

☞ Fifty-two miles of the Elizabethtown and Paducah Railroad are now under contract, and the work is being pushed forward in downright earnest.

FOR SALE.

1500 TONS. 70 lbs. to the yard, Welsh Rails, punched for Fish Bars. Also, 60-Seat Raised Roof Passenger and Freight Cars for delivery. Address

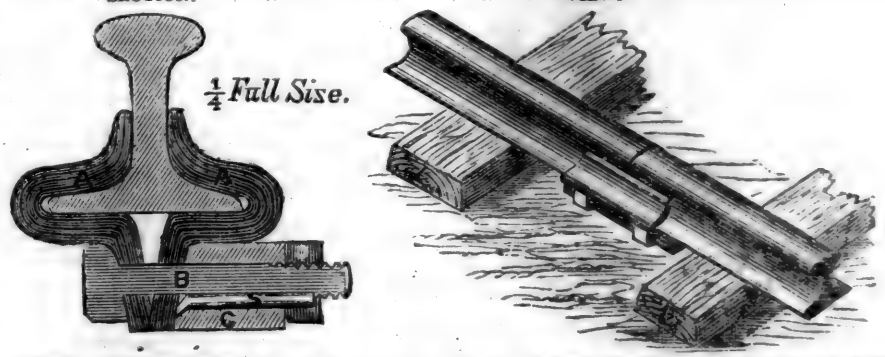
Scott's Wrought Iron Clamp Truss Joint



FOR RAILROAD RAILS.

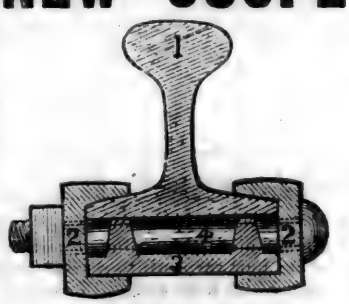
LENGTH 9 TO 12 INCHES, THICKNESS ⅝ OF AN INCH.
WEIGHT 20 TO 30 LBS. COST FROM $1.30 TO $1.50.

Has been tested to ***24,000*** lbs., between 24 inch bearings, (a 40 ton engine will not test it more than 10,000 lbs.) it is a ***TRUSS,*** supporting fully the ends of rails while suspended itself. This principle gives it a power that no chair has. Forty per cent. of rails now destroyed, will be saved by its use.

It is ***SIMPLE,*** can be put on broken or sound rails at once; will not stir from its position, and requires no renewal.

SECTION. VIEW.

VIEW AND SECTION show position in place. A.—Is CLAMP-TRUSS. B.—Are two ¾ inch Bolts. C.—An Iron Collar, (a prepared wood block can be used in its place if parties prefer it.) D.—Is the Nut. S.—The LOCK of the NUT, which prevents its jarring loose.

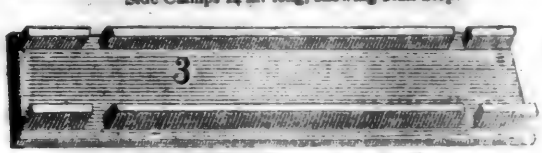


The patentee is prepared to fill orders sufficient for four miles of track per day.

Provision has been made to prevent sliding of the rails.

For particulars, address

JOHN H. OSBORNE, Morrisville, Bucks Co., Penn. And BENJ. SCOTT, New Brighton, Pa.



THE PHŒNIX IRON COMPANY'S
NEW SUSPENSION RAIL JOINT.

Cross Section of Rail Joint.

Side Clamps 14 in. long, showing Rail Stop.

Bottom Ribbed Plate, 14 in. in length.

The above diagrams show the general design of this new ***Suspension Rail Joint,*** which, after long and successful trial on the Philadelphia, Wilmington and Baltimore, and other Railways, is now offered to Railway Companies. The cut on the left gives a cross section of the finished joint, showing the rail (*1*) resting upon the ribs of the bottom plate (*3,*) with the flanges of the rail and the bottom plate embraced by the side clamps (*2,*) and held firmly in place by bolts *4.* In screwing up these bolts, the bite or grip between the bevel on the side clamps corresponding with the bevel on the flanges of the rail, insures great vertical and lateral rigidity to the joint.

Several careful tests have proved that the deflection of two pieces of rail thus fastened at the joints and subjected to a transverse strain between supports five feet two inches apart, was but a trifle more than that of the same rail uncut, tested in the same way. The value of the joint in this respect was 85 per cent. of that of the solid rail, while the best fish joints, similarly tried, gave less than 50 per cent.

No holes are required to be punched through the neck of the rail, nor slots in the flanges, only a quarter circle notch of about half an inch radius is necessary to be cut out of the corner of one of the flanges of the rail to fit the "stop" shown in the upper right hand cut. This is a very important consideration, as holes punched or drilled in the neck are apt to split the rail longitudinally, and in *Steel Rails particularly,* is the principal cause of breakage.

All that portion of the joint, shown in the cut of cross section, below the bottom of the rail, bears endwise against the cross-ties, and prevents any creeping of the track. It makes a very firm joint, does not get out of order, and can be fitted to any size of rail. When ordering, send a sample piece of rail two feet long. Address,

PHŒNIX IRON COMPANY, Philadelphia, Pa.

FIVE SECOND HAND LOCOMOTIVES

in working order—Gauge 4 ft. 8 1-2 inches.

	No.	Div.	Diam. Drivers.	Cylinder.	Fire Box.	No. Flues.	Size of Flues.	Diam. Boiler.	Weight in running order.	Connect'n.

Intercolonial Railway.

THE Commissioners appointed to construct the Intercolonial Railway give public notice that they are now prepared to receive TENDERS for THREE FURTHER SECTIONS of the line.

Section No. 5 will be in the Province of Quebec and will extend from forty miles east of Riviere du Loup, at the end of Contract No. 2, to the Sixty-Sixth Mile Post, near Rimouski, a distance of about twenty-six miles.

Section No. 6 will be in the Province of New Brunswick and will extend from the easterly end of Contract No. 3, opposite Dalhousie, to the west side of the Main Post road near the 48th Mile Post, easterly from Jacquet River, about twenty-one miles.

Section No. 7 will be in the Province of Nova Scotia and will extend from the southerly end of Contract No. 4, near River Phillip, to Station Fifty at Folly Lake, about twenty-four miles.

Plans and profiles with specifications and terms of contract will be exhibited at the office of the Board of Works, Toronto, and at the offices of the Commissioners at Ottawa, Rimouski, Dalhousie, St. John, and Halifax, on and after the FIFTH day of MARCH, 1869, and SEALED TENDERS, addressed to the Commissioners of the Intercolonial Railway, and marked "Tender," will be received at their office in Ottawa up to SEVEN o'clock, P. M., on the TWENTY-NINTH day of MARCH, 1869.

Intercolonial Railway Office,
Ottawa, 11th February, 1869.

The Monster Blast Furnace at Norton, England.

In our last impression we noticed the immense production of pig iron from this Furnace, ("28,237 tons per annum, consuming 25,737 tons of coke.") Thinking it might be interesting to our readers, we insert the following particulars respecting it, derived from Messrs. PLAYER & HENDERSON, of 30 Broadway, New York, Mr. Player of that firm having designed and constructed it while he was manager for the Norton Iron Company about three years ago. The furnace is 25 feet across the boshes, and 85 feet high, with 26,000 cubic feet contents; the blast is produced by one horizontal blowing engine of 7 feet cylinder by 7 feet stroke, working 22 revolutions per minute; the air is heated to about 1,000° Fahr. by 4 of Players Patent double-heating stoves of 80 pipes each, and passes by 4 tuyeres into the furnace at a pressure of 3 to 3½ lbs. to the square inch. A great part of the success of the furnace is to be attributed to the use of these stoves, which heat very uniformly and never require repairs. It has been observed that this furnace reduces the ores much better than smaller ones, which with Cleveland iron stone gave but 40 per cent. yield; now, by the new furnace, gives 42 per cent.—the difference formerly went into the slag or cinder. The large furnace has been found to give best foundry iron from fuel that formerly only produced white iron in the small furnace. The work of the large furnace has been so satisfactory during the two years it has been in blast, that the Norton Company have since built another, a duplicate of it, which has just gone into blast. These furnaces have exceeded the anticipations of all concerned as to product—fully 50 per cent.—as see an illustration of the furnace in *Engineering*, Aug. 10, 1866, where it is stated that it is expected to produce 400 tons per week, and it has now reached about 600 tons per week. The coming large furnace referred to in our impression of last week, built in the Middle States with ores averaging 50 to 60 per cent. with anthracite coal, will produce 700 to 800 tons per week, and with less capital than is used in some establishments here to produce 200 tons, and at 60 per cent. less cost.

Atlantic and Gt. Western Railway Lease.

We gave on the 5th ult., a copy of the lease of the Atlantic and Gt. Western Railway to the Erie Railway Company. The following is an abstract of the supplemental lease:

This agreement, made this 7th day of December, 1868, between the Atlantic and Great Western Railway Company of the first part, the Erie Railway Company of the second part, and James M'Henry of the third part, witnesseth:

That, whereas by lease this day executed between the parties of the first and second part, the party of the first part for the term of twelve years did demise unto the party of the second part the Atlantic and Great Western Railway Company, its property, &c., for the specific provisions of which said lease reference is thereunto had. And whereas 30 per cent. of the gross earnings of said road are agreed to be given as rent without any mention of particular amount, now, therefore, in consideration of the premises of said contract above mentioned, the three parties hereunto have mutually agreed as follows:

1. The Erie Railway Company agree that the annual rent shall not be less than 1,800,000 dols. per annum, to be paid quarterly.

2. If in any year the cost of operating the road shall be less than 70 per cent., such actual per centage shall be taken as the basis for the ensuing year.

3. If in any year the 30 per cent. shall not amount to 1,800,000 dols., the deficiency shall be charged to the Atlantic and Great Western Railway Company, and deducted from the excess over 1,800,000 dols., and such advance to constitute a lien upon the Atlantic and Great Western Railway, its personal property and franchises, until repaid from earnings in future years.

4. The Erie Company are to furnish the Atlantic and Great Western Company suitable offices in New York, stationery, &c., and to pay the President a salary of 5,000 dols. for attending to the business and keeping up the organization of the company.

5. The Erie Railway Company are to advance to Atlantic and Great Western Railway Company on account of the rent to fall due during the year 1869, 800,000 dols., to be used in payment of debts underlying debentures.

6. The rent in the aforementioned lease to be paid by the Erie Railway Company to the Atlantic and Great Western Railway Company shall commence from the date possession of the said demised property is fully vested in the Erie Railway Company.

7. Rates and fares to be the same for both companies, and to be divided equally per mile, and the Erie Railway Company to render monthly to Atlantic and Great Western Railway Company accurate accounts of the traffic it may carry over its line or any part thereof.

HENRY G. STEBBINS,
President, Atlantic and Great Western Railway Company.

JAY GOULD,
President, Erie Railway Company.
JAMES M'HENRY.

Potomac and Ohio Railroad.

The Legislature of West Virginia, at its last session, passed a bill incorporating the Potomac and Ohio Railroad Company, with authority to construct a railroad from any point on the Potomac river, west of Harper's Ferry, to the Ohio river at any point south of Parkersburg, by the way of the South Branch Valley. The incorporators are Elisha C. Litchfield, Wm. Bemont, Seth W. Benedict, A. N. Duffie, David R. Barnum and Rensselaer N. Havens, of New York, and Joseph Sprigg, Thomas Maslin, John W. Duffey and Joseph T. Hoke, of West Virginia. It is said to be the intention of the parties obtaining this charter to consolidate with the Alexandria, Loudoun and Hampshire Railroad in part, so as to aid and probably insure the early completion of that road to

the coal fields, with the aid of Washington, &c., and extend it from the crossing of the South Branch of the Potomac onward to the Ohio river.

Illinois Central Railroad.

The receipts from operations of this road for the year ending December 31, 1868, were as follows:

From freight		$4,172,841 59
" passengers		1,595,189 38

Balance, consisting of net cash assets in New York and Chicago, and exclusive of the working stock of supplies		2,012,927 83
		$16,572,628 43

It will be seen that the gross earnings of this road for the year 1868 amount to $7,817,629 24, the operation expenses to $4,590,681 91, State taxes to $441,597 57, and rent of leased line in Iowa to $370,365 18, leaving net $2,414,984 58, against $2,480,567 72 in 1867. The per centage of expenses to earnings, including State taxes, is 64.87, against 65.6 in 1867. These figures include earnings over leased line in Iowa, which amount to $1,019,698 72, operation expenses $515,895 60, State taxes $18,200 09, and rent $370,365 18, leaving a net profit of $127,076 79, after making liberal expenditures in improvements. The President in his report says:

It is easy to perceive that we may look for considerable increase in the profits of working this line. It is in no wise a charge upon the road in Illinois; fixing no obligation upon the company but that of paying a share of the gross income. The arrangement has been of great advantage to us in operating that part of our road in Illinois north of Mendota, enabling us to bring more of it into use than formerly in the transaction of our business. In this respect we derive already the most signal benefit from the lease in Iowa. In all its relations with the company's interests, this transaction has proved fortunate and successful.

The Southern States not taking their usual supplies of food from the North, our traffic in that direction has decreased. This loss is, I think, temporary and will be restored to us at an early day. As the South is again engaging largely in the production of cotton and sugar, we may expect to supply them with breadstuffs and provisions, when our business in that direction will be re established.

The tonnage hauled in 1868 was 1,439,675 tons, against 1,300,835 tons in 1867; the average distance each ton was hauled being 208 miles in 1868, against 131 miles in 1867.

The roadway and other property of the company have received all necessary repairs. The expenditures for the maintenance of way include the cost of 7,348 tons of new iron, which, with the cost of other materials and labor, amount to $1,260,448 04—the length of track relaid with new iron being 76 miles, and with repaired and old iron 105 miles. This amount includes also the cost of repairs of bridges, $128,271 60, which covers ordinary repairs, and a proportion of the cost of six spans (iron) of the bridge across the Illinois River at La Salle, which have been substituted for six spans of the wooden bridge, and also the cost of re-erecting two spans of the iron bridge across Rock River, at Dixon, destroyed by freshet in the Spring of last year. The motive power and rolling stock of the company have received special attention, and $1,223,812 44 were expended in their maintenance. We built about 208 miles of new fence, of excellent character, the cost of which ($106,104 55) is included in operation expenses.

The amount of permanent expenditures was $572,014 70, of which $393,187 29 was on account of construction, including for new iron bridges, $55,621 73; ballasting 28 miles of track, $19,008 67; new station building and workshops, $63,591 09; water works, $36,862 88; 6½ miles new sidings, $68,775 79; lake shore protection, filling Chicago station grounds, extending the grounds at Chicago Car Works, and for new wharves and basins, $63,960 78; and for making the tunnel and approaches to Dunleith Bridge, $77,461 92. Of these expenditures, $41,567 07 was for new sidings, station buildings, ballasting, etc., on the leased line. The equipment has been increased by the addition of three new first class locomotives, built at our shops, at a cost of $40,289 42; sleeping cars, $40 050; one hundred new stock and three new grain cars, costing $90,342 85, with other slight expenditures on shop machinery and tools.

The bridge across the Mississippi, between Dunleith and Dubuque, was completed and opened for traffic on the 1st January last. Our trains are now passing over it, and we find it a great benefit in operating the line.

During the past year the amount paid for dividends, including Government tax, was two millions four hundred and sixty-one thousand five hundred and sixty-eight dollars and forty-two cents, being at the rate of ten per cent. on the capital stock; in addition to which, stock was distributed to the stockholders in August last, at the rate of eight per cent. on the share capital, in accordance with a resolution passed at the last annual meeting of shareholders. The amount paid for interest on funded debt and sterling exchange was seven hundred and fifty-five thousand seven hundred and sixteen dollars and ninety two cents; and after paying State taxes, rent of leased line, and all other claims upon the operations of the year, we had a balance on the first day of January, of net cash assets, amounting to $2,012,927 83, out of which a cash dividend of five per cent. was paid during the present month. The stock of working supplies, inventoried at cost, amounts to $844,139 29. The funded debt was reduced $1,167,000, and amounted on the 1st of January, to $9,377,500.

In the Land Department, the collections amount to $3,200,289 21, on account of old and new sales, of which $2,070,431 31 is applicable to the cancellation of construction bonds, $558,140 61 to Free Land fund, and $407,925 56 to interest fund. The expenses for the year were $143,709 39. There were surrendered to the Trustees during the year $1,882,500 of construction bonds, at a cost of $2,070,925, against the collections on that account. The amount of bonds now in their hands in advance of deeds issued, is $4,423,819, of which $3,173,000, is in advance of collections.

The sales were 207,008.87 acres to 2,776 purchasers, for $2,228,325 90; averaging $10.76 per acre. The total number of deeds issued up to the close of the year covered 1,124,446.36 acres of the original grant. The amount owing to the company for lands is $6,128,087 59. On most of the obligations for lands one or more payments have been made. This facilitates future collections, and I expect the receipts of the department during the present, will be equal to those of the preceding year. There still remain unsold 526,690.46 acres of land, to which may be added about 96,504 acres (old sales) subject to cancellation. Of the lands sold during the past year, 115,496 acres were located on the Chicago Branch, between Champaign and Kankakee.

The net receipts from Railway and Land department during 1868, amounted to $5,451,775 75.

The annual meeting of the shareholders will be held in Chicago, on Wednesday, the 26th day of May next. The term of service of three directors will expire at that date.

GENERAL BALANCE SHEET.

Permanent expenditures		$31,900,487 31
Interest & dividend account	$12,555,937 80

The working stock of supplies consist of wood, coal, etc., on Chicago, North and Iowa Divisions, $56,828 83; engineering materials and tools, $405,091 63; materials at shops, $378,833 69; stationery, $3,385 14—total, at debit in General Balance Sheet, $844,139 29.

The lands remaining unsold are located as follows: on Main Line—between Cairo and the Ohio and Mississippi Railroad, 293,740.88 acres; between the Ohio and Mississippi Railroad and Decatur, 64,494.81; between Decatur and Dixon, 26,712.59; between Dixon and Dunleith, 22,631.45. On the Chicago Branch—between the Ohio and Mississippi Railroad and Tolono, 63,364.62; and between Tolono and Chicago, 55,746.61—total, 526,690.46 acres.

During the year 8 new first class engines were built at the company's works, making the number owned by them at the close of the year, 170; of these, 30 were employed on passenger trains, 99 on freight, and 41 on other trains. 54 engines have received general repairs, 58 thorough repairs, of which 15 have been rebuilt, and 12 have been altered to burn coal, leaving but 8 wood burners on the road.

The number of miles run by engines with passenger trains, was 1,122,791; with freight trains, 2,858,966; with construction trains, 110,292; with wood trains, 6,720; switching, 499,677—total, 4,593,446, an increase of 828,230 over the previous year. Cost of repairs, $584,345 98. Cost of repairs per mile run, 12.72 cents, against 14.45 cents in 1867. The total cost per mile, including wages, fuel, oil, waste, tallow and cleaning, has been 27.57 cents, against 29.62 cents in 1867, 32.67 cents in 1866, and 37.44 cents in 1865—the total cost being $1,266,531 98, against $1,116,102 66 in 1867, $1,177,708 23 in 1866, and $1,313,337 26 in 1865. The cost of oil, waste and tallow per mile run, has been 0.72 cents; of fuel, 6.88 cents. Av. miles run to a pint of oil, 14.89; to a cord of wood, 46.01; to a ton of coal, 37.38. Wood is rated at $7 per cord; coal at $2 12 per ton. Oil at 60 cents per gallon, and waste at 15 cents per pound.

The company have 85 passenger, 1 officers', 1 pay, 39 baggage, mail and express, 9 sleeping, 2,257 grain, 50 Blue Line, 320 stock, 335 flat, 853 coal, 2 powder, 4 derrick, 3 tool and 2 tank cars, and 4 large and 10 small snow plows. There have been added to the rolling stock 100 stock, 3 grain, and 2 sleeping cars. 7 passenger and 131 freight cars were rebuilt. 4,000 new wheels were used in repairs of cars during the year. The cost of repairing passenger cars has been 3.10 cents, and of freight cars 0.99 cents per mile run.

The total number of passengers carried was 1,312,631—an increase over the previous year of 285,081. Number carried one mile, 47,227,821—an increase of 5,135,026. Av. number of miles traveled by each passenger, 36.28. Av. fare of each passenger, $1 42.36. Revenue per mile of road, $2,167 92.

Tons of freight transported, 1,439,675—an increase of 138,839. Tons carried one mile, 225,853,410—an increase of 54,646,424. Tons carried one mile north, 122,438,852; do., south, 103,414,578. Tons of local freight carried one mile, 217,140,440; do., through do., 8,712,970. Av. distance each ton was carried 202.78 miles. Revenue per ton per mile, 2.46 cents. Av. revenue per ton, $3 86.21. Revenue per mile of road, $6,450 46.74.

The amount of expenditures in road department, has been for operation, $1,519,336 08, and permanent, $387,978 64. There were used in repairs of road, 826,171 cross ties, 563,569 lbs. spike, 23,004 chairs, 57,567 fish plates and bolts, 32,398 bars of new iron, 54,353 bars of repaired iron, and 14,398 bars of old iron. The length of track relaid was 180.67 miles. The average cost of repairing iron was 67.3 cents per bar.

President.—JOHN M. DOUGLASS.

Directors.—His Excellency, John M. Palmer, Governor of Illinois, Ex Officio. Henry Chauncey, George Bliss, John M. Douglas, until May, 1869; Thomas E. Walker, Wilson G. Hunt, Jonathan Sturges, until May, 1870; R. Daniel Wolterbeek, Cunningham Borthwick, H. H. Hunnewell, until May, 1871; Abram S. Hewitt, William Tracy, W. H. Osborn, until May, 1872.

Gen'l Superintendent—MARVIN HUGHITT.

Treasurer.—THOMAS E. WALKER.

Land Commissioner.—JOHN B. CALHOUN.

New York and Oswego Midland Railroad.

The following is a correct copy of the joint resolution of the Senate and House of Representatives of the United States of America, authorizing the Secretary of War to allow the New York and Oswego Midland Railroad Company a right of way across a portion of the public ground at Fort Ontario, Oswego, New York, for railroad purposes:

Be it resolved, etc., That the Secretary of the War be, and he is hereby authorized to allow to the New York and Oswego Midland Railroad Company a right of way through the public land at Fort Ontario, Oswego, in the State of New York, for railroad purposes, upon such terms and conditions as he may think the defences at that point may require and make proper, reserving to the United States the right to remove, at the expense of the said company, the rails, ties, and other parts of said road, whenever the Secretary of the War shall direct, without any claim or right of damages on the part of said company.

Approved, February 19, 1869.

☞ The Memphis and Charleston Railroad Company have contracted with Mr. Griffith, of Memphis, to build the bridge over the Tennessee river at Florence, Ala., and to rebuild the depot and tanks, and to put the track in order between Tuscumbia and Florence, the whole to be completed by October 1, 1869, for $100,000.

Supreme Court of the United States.

The Northern Central Railway Company, Plaintiff in error, *vs.* John G. Jackson. In error to the Circuit Court of the United States, for the District of Maryland. Mr. Justice NELSON delivered the opinion of the Court.

This is a writ of error to the Circuit Court of the United States for the District of Maryland.

The suit was brought by Jackson, a non-resident alien, against the Northern Central Railway Company, incorporated by the State of Maryland, to recover $2,650, coupons attached to bonds issued by the company. A copy of one is as follows:

"The Northern Central Railway Company will pay to the bearer, January 1, 1865, thirty dollars, being a half year's interest on bond No. 1,827, for one thousand dollars. J. S. LIEB, Treasurer."

The signature of the treasurer was admitted. The plaintiff then proved a demand of payment, at which time and place the company offered to pay the amount, deducting a tax of five per centum per annum to the United States, under an act of Congress; and a further tax of three mills per dollar of the principal of each bond claimed to be due to the State of Pennsylvania; which offer of payment was refused.

The plaintiff also gave in evidence charters incorporating the Northern Central Railway Company by the State of Maryland, and of Pennsylvania, and rested.

The defendant then gave in evidence the articles of consolidation of four railroad companies, one of which had been incorporated by the State of Maryland, and the three others by the State of Pennsylvania, embracing a line of road extending from Baltimore to Sunbury, Pennsylvania.

This consolidation was entered into by the respective companies in pursuance of acts of the legislature of the two states; and by means of which the four companies were merged in one, called the Northern Central Railway Company, and was incorporated by the same name by the legislature of each state. The stockholders of the old companies received from the new twice the number of shares held by them in the old, and upon the receipt of which the old shares were canceled. After this the company was organized and directors elected; and, on the 20th December, 1855, it executed a mortgage to a board of trustees upon the entire line of its road from Baltimore to Sunbury, including all its property and estate situate within both the states, which mortgage was given to secure the payment of $2,500,000 in bonds to be issued in amounts therein specified. The bonds were issued by the company accordingly. A portion of them is in the hands of the plaintiff, the coupons attached to which are the subject of this suit.

Upon this state of the case it is insisted, on the part of the defence, that the Northern Central Railway Company is entitled to have a deduction from the coupons of three mills per dollar of the principal of each bond as a tax imposed on the same by the State of Pennsylvania. This is denied by the plaintiff. It has been argued for the plaintiff, that the acts of the legislature of Pennsylvania, when properly interpreted, do not embrace the bonds or coupons in question; but it is not important to examine the subject; for it is not to be denied, as the courts of the state have expounded these laws, they authorize the deduction, and, if no other objection existed against the tax, the defence would fail. If this was an open question we should have concurred with the interpretation of the court below, which concurred with the views of the plaintiff's counsel. These acts, as expounded, tax "money owing by insolvent debtors, whether by promissory note, penal or single bill, bond or judgment," and impose three mills on the dollar of the principal, payable out of the interest, and it is made the duty of the president or other officer of the company who pays the coupons or interest to the holder, to retain the amount of the tax. Nor shall we inquire into the competency of the legislature of Pennsylvania to impose this tax upon general principles, as we shall place the objection upon other and distinct grounds, though we must say, that the tax upon the promissory note or bond, given by the resident debtor, and the withholding of the amount from the interest due to the non-resident holder, would seem to be a tax upon such non-resident. It is not a tax of the money loaned, because that belongs to the resident debtor, for which he is taxable; it is a tax on the security, the bond, which is in the hands of the non-resident holder.

The ground upon which we place the objection in this case, to the tax is, in brief, that the bonds, amounting to $2,500,000, of which those in question are a part, were issued by this company upon the credit of the line of road, its franchises and fixtures, extending from Baltimore to Sunbury, a given portion of which line lies within the jurisdiction of the State of Maryland. The old company, to which this line belonged by the act of consolidation, transferred it with its fixtures and all other interests connected therewith including their stock, to the new organization which have issued these bonds. The security therefore pledged and bound for the payment of them and of the interest embraces this Maryland portion of the road; and in case of a failure to pay the principal or interest, this portion with its franchises and fixtures would be liable to sale in satisfaction of the bonds and interest.

Now, it is apparent, if the State of Pennsylvania is at liberty to tax these bonds, that, to the extent of this Maryland portion of the road, she is taxing property and interests beyond her jurisdiction. This portion avails her tax-roll as effectually as if it was situate within her own limits. The Maryland portion is not liable for the payment of any specified part, or quantity of these bonds thus taxed, but it is liable, with all its interests, for the whole amount, the same as that portion of the road within the State of Pennsylvania. The bonds were an issue, in the usual way, by this N. C. Railway Co., and the security given by mortgage on the entire line of the road. No portion of the bonds belong to one part more than to another. No severance was made of the bonds, and, therefore, none can be made, in the taxation, with reference to the line within the respective jurisdictions of the states. If the tax is permitted as it respects one bond, it must be as it respects all.

Again, if Pennsylvania can tax these bonds, upon the same principle, Maryland can tax them. This is too apparent to require argument. The only difference in the two cases is, that the line of road is longer within the limits of the former than within the latter.

Her tax would be a more marked one beyond the jurisdiction of the state, as the property and interest outside of its limits would be larger.

The consequence of this tax of three mills on the dollar, if permitted, would be double taxation of the bondholder. Each state could tax the entire issue of bonds, amounting as we have seen, to $2,500,000.

The effect of this taxation upon the bondholder is readily seen. A tax of three mills per dollar of the principal, at an interest of six per centum, payable semi-annually, is ten per centum per annum of the interest. A tax, therefore, by each state, at this rate, amounts to an annual deduction from the coupons of twenty per centum; and if this consolidation of the line of road had extended into New York or Ohio or into both, the deduction would have been thirty or forty. If Pennsylvania must tax bonds of this description, she must confine it to bonds issued exclusively by her own corporations.

Our conclusion on this branch of the case is, that to permit the deduction of the tax from the coupons in question, would be giving effect to the acts of the legislature of Pennsylvania upon property and interests lying beyond her jurisdiction.

The next question is, whether or not the coupons were subject to a tax of five per centum per annum to the United States on the 1st of July, 1865, when they become due?

The first income tax was imposed by the act of Congress passed August 5, 1861.—12 U. St., p. 309.) The 49 § of that act directed to be levied and collected upon the annual income of every person residing in the United States, from whatever source derived, a tax of three per centum on the amount of the excess of such income over eight hundred dollars; and, upon the income, rents, or dividends accruing upon property, &c., owned in the United States by any citizen residing abroad, a tax of five per centum.

The next act was passed July 1, 1862, (ib., p. 473,) and § 90 directed to be levied and collected a tax of three per centum on the annual income of every person residing in the United States, over $600 and under $10,000, and exceeding $10,000, a tax of five per centum; and, upon the income of citizens residing abroad, a tax of five per centum. The next section provides that the portion of income derived, among other things, from interest on bonds, or other evidences of indebtedness of any railroad company or other corporation, which shall have been assessed and paid by said companies, shall be deducted from that prescribed in the previous section; and § 81 directs that this tax on the bonds and evidences of indebtedness shall be paid by the companies, which may deduct the same on the payment of interest to the bondholders.

The next is the act of June 30, 1864, (13 U. St., 281, § 116,) and directs the levy and collection of a tax of five per centum upon the excess of income of every person residing in the United States, or, of any citizen residing abroad, over $600 and under $5,000; seven and a half per centum over $5,000 and not exceeding $10,000, and a tax of ten per centum over $10,000. The next section provides for the same deduction from the income arising out of bonds and other evidences of indebtedness of railroad companies, as in the act of July 1, 1862, and also for the payment of the same by the companies.

This act was in force when the coupons in question fell due, and is the one by which the tax of five per centum claimed on the bonds of the plaintiff must be determined. The court below held that the act did not include a non-resident alien, and directed a verdict and judgment for the whole amount of interest. The decision was placed mainly on the ground that, looking at the several provisions bearing upon the question, and giving to them a reasonable construction, it was believed not to be the intent of Congress to impose an income tax on non-resident aliens; that they were not only not included in the description of persons upon whom the tax was imposed, but were impliedly excluded by confining it to residents of the United States and citizens residing abroad, and that the deduction from the prescribed income of the interest on these railroad bonds, when paid by the companies, was regarded as simply a mode of collecting this part of the income tax. We concur in this view. It is not important, however, to pursue the argument, as Congress has since, in express terms, by the act of March 10th and July 13th, 1866, imposed a tax on alien non-resident bondholders. The question hereafter will be, not whether the laws embrace the alien non-resident holder, but whether it is competent for Congress to impose it, upon which we express no opinion.

The judgment of the court below affirmed.

Mr. Justice CLIFFORD dissenting.

I dissent from the opinion and judgment of the court in this case, because I think the taxes in question, both state and federal, were legally assessed, and that the officers of the railway company properly deducted the same from the amount of the coupons described in the declaration.

Concurring—Mr. Justice SWAYNE.

☞ Ashland, N. H., has voted $16,000 to the stock of the New Hampshire Central Railroad Company, the New Hampshire section of the Portland and Rutland line.

☞ The citizens of Todd County, Ky., have voted, by a large majority, to subscribe $400,000 to the Owensboro and Russellville Railroad. Sacramento precinct has also subscribed $70,000.

Railroads in Kansas.

A writer in the Kansas *State Journal* gives the following summary of the railroads of Kansas completed and in course of construction. He says:

We now have over 600 miles of railway built and in operation, and expect to complete 300 more the present season. First, we have the Kansas Pacific road, running the entire length of the State from east to west, a distance of 400 miles, coursing the productive valleys of the Kansas and Smokey Hill rivers, in the central portions of the State; the Leavenworth, Lawrence and Galveston road, bisecting the Kansas Pacific road at Lawrence, completed and in operation 65 miles, from Leavenworth to Ottawa, and nearly ready for the iron 25 miles further, to Garnett, the county seat of Anderson county; the Border Tier road completed from Kansas City to Olathe, and to be finished the present season, to the southern boundary of the State; the Atchison, Topeka and Santa Fe road, under contract to Burlingame, in Osage county, the centre of an exceedingly rich and productive coal district; the Neosho Valley road, under contract and speedily to be completed and intersect with the Galveston road, in Southern Kansas; the Northern Tier road, under contract from Atchison to the northern boundary of the State; the Central Branch Pacific road, in running operation 100 miles west from Atchison.

Pork Packing in the West.

The Cincinnati *Price Current* publishes its annual statement of Pork Packing in the Western States, of which the following is a recapitulation:

	1867–'68.	1868–'69.
Ohio	562,955	544,651
Illinois	1,068,496	806,033
Indiana	321,888	326,658
Kentucky	157,880	183,426
Missouri	333,911	361,067
Wisconsin	164,958	129,094
Iowa	182,944	126,335
Grand totals	2,793,032	2,477,264
	2,477,364	
Decrease in number	315,768	

We have succeeded rather better than usual in obtaining the average weight and yield of lard, and we make the following comparison:

	Average weight per hog.		Yield of lard per hog.	
	1868.	1869.	1868.	1868.
	lbs.	lbs.	lbs.	lbs.
Ohio	204¼	214½	24⅓	24⅝
Indiana	205⅝	202⅜	21⅜	23⅜
Illinois	202⅜	205¼	22⅜	23⅝
Kentucky	206 1-6	206½	22	24⅛
Missouri	198 7-9	207½	21½	23⅝
Iowa	199¼	207⅛	21¼	26
Wisconsin	189¾	211	19	24

The general average for all the States is of hogs, 206¾ pounds, and of lard, 24¼ pounds, which compare with the three previous seasons thus:

	Hogs, lbs.	Lard, lbs.
1866	231 3-10	31 1-7
1867	232 1-7	29 3-4
1868	201	21 3-4
1869	206 3-4	24 1-4

In order to arrive at the comparative crop of pork, in pounds, by multiplying the total number of hogs packed this and last season by the general averages, the results will be as follows:

1867-8, lbs	561,399,432
1868-9, lbs	512,174,332
Net decrease, lbs	49,225,100

This is equal to 244,901 hogs of the average weight of last season, or slightly over 8¾ per cent. So then we can say that the crop is 8¾ per cent. less than that of 1867-8.

With reference to the yield of lard, the result, in the aggregate, based upon the figures already given, shows the comparative yield of leaf lard, thus:

1867-8, lbs	60,748,436
1868-9, lbs	60,073,652
Decrease	674,784

As already stated, the above is what is called leaf, that is, leaf and trimming, but in order to show the total yield of lard of all kinds, that is, of leaf and trimming, head and gut, 6 lbs per hog must be added to the yield of 1867-8, and 7 lbs to that of the present season, which would show the following aggregates, comparatively:

1867-68, lbs	77,506,638
1868-69, lbs	77,414,500
Net decrease	92,135

The total number of hogs packed in the West, as reported by us in each of the last twenty years, was as follows:

Year.	No. of Hogs.	Year.	No. of Hogs.
1849-50	1,652,220	1859-60	2,350,822
1850-51	1,332,867	1860 61	2,155,702
1851-52	1,182,846	1861-62	2,893,666
1852-53	2,201,110	1862 63	4,069,520
1853 54	2,534,770	1863 64	3,261,105
1854-55	2,124,404	1864-65	2,422,779
1855 56	2,489,502	1865-66	1,705,855
1856 57	1,818,468	1866 67	2,490,791
1857-58	2,210,778	1867-68	2,781,084
1858 59	2,465,552	1868-69	2,477,264

The Public Credit Act.

The President has approved and signed the Bill, passed by Congress, to strengthen the Public Credit. It is now a law of the land. The following is the exact text of the bill:

Be it enacted, &c., That in order to remove any doubt as to the purpose of the Government to discharge all just obligations to the public creditors, and to settle conflicting questions and interpretations of the law by virtue of which such obligations have been contracted, it is hereby provided and declared that the faith of the United States is solemnly pledged to the payment in coin or its equivalent of all the obligations of the United States not bearing interest, known as United States notes, and of all the interest-bearing obligations, except in cases where the law authorizing the issue of any such obligations has expressly provided that the same may be paid in lawful money or in other currency than gold and silver; but none of the said interest-bearing obligations not already due shall be redeemed or paid before maturity, unless at such time as United States notes shall be convertible into coin at the option of the holder, or unless at such time as bonds of the United States bearing a lower rate of interest than the bonds to be redeemed can be sold at par in coin; and the United States also solemnly pledges its faith to make provision at the earliest practical period for the redemption of the United States notes in coin.

JAMES G. BLAINE,
Speaker of the House of Representatives.
SCHUYLER COEFAX,
Vice-President of the United States and President of the Senate.

APPROVED, March 18, 1869.

U. S. GRANT.

☞ The Cambridge *Democrat* says that the Dorchester and Delaware Railroad Company have funds enough in hand to put the iron down as far as Hicksburg, or within seven miles of Cambridge. Men are at work, and it is to be hoped that on July 4th next the iron horse will make his appearance in Cambridge.

Responsibility of Express Companies.

A case of general interest has recently been decided in the Supreme Judicial Court of Massachusetts to the effect that common carriers carrying packages addressed to places beyond their routes, are only liable for losses on their own routes, and that in the absence of a contract for further liability, if they carry safely over their own route and deliver to a suitable carrier over the rest of the route, they are not liable for any loss that afterward occurs. In the case in question Peter Pendergast delivered to Adams Express, at Newbern, N. C., a package containing $200, addressed to Mrs. Mary A. Pendergast, Lowell, Mass., and took the usual receipt, which was the sole proof of contract. Adams & Co. owned the express route from Newbern to Boston, and there was another express route from Boston to Lowell. There was evidence that Adams & Co. delivered the package at Boston to the Lowell express, and the latter carried it the next day to Mrs. Pendergast, when it was opened and $100 was missing. In the Superior Court, the trial being held in Lowell, the jury was instructed that defendants were liable as common carriers through to Lowell, and that plaintiff was entitled to a verdict, and the jury found accordingly. The Supreme Judicial Court has now reversed this decision, and ruled that upon this evidence the defendants are not liable as common carriers beyond Boston, and the verdict has been set aside.

Defaced National Bank Notes.

Secretary Boutwell has decided that the United States should not assume the responsibility of acting as the redemption agent of the national banks, and no power has been conferred upon the Treasury Department to do so, nor will the department become an indirect agent in assisting to keep afloat and in circulation national bank notes in such a condition that, were they United States notes, they would be at once cancelled and destroyed; and assistant treasurers and collecting officers of the United States are therefore instructed that the same reasons which would cause assistant treasurers to withhold from circulation and send to this department for destruction notes of the United States will cause them to refuse to receive notes of the national banks which are no longer fit to be kept in circulation.

☞ The Albany *Journal* says that the iron for the Southern Central Railroad will arrive from England early in April, and the work of tracklaying will be commenced on the road soon thereafter. One hundred and fifty thousand dollars of the Auburn city bonds have been sold at par for raising funds to carry forward the building of this road.

☞ It is rumored that the Schenectady and Athens Railroad has been purchased by the Rensselaer and Saratoga Company, and is to be put in operation the coming season as a coal road, and a large coal depot to be established at Athens, and one at Coxsackie.

☞ The act to enable the Savannah and Charleston Railroad Company to complete their road has become a law without the signature of the Governor, by the expiration of the constitutional limit of thirty days, in which it should have been returned.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."
